THE GOODRIDGE BANNER

VOLUME XV, No 3. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JANUARY 7, 192[illegible] $1.50 PER YEAR.

OVERCOME CHESTNUT BLIGHT

Hybrid Trees Are Quite Resistant to Disease and Produce Nuts of Good Flavor.

Chestnut orchards which have been practically annihilated by a blight of Japanese origin may be restored through efforts of the United States Department of Agriculture. Ten years' experimentation has shown that it is possible to cross the chinquapin, a dwarf chestnut, with the Japanese chestnut, which is blight resistant, and that the hybrid trees thus produced are quite resistant to the disease and yield nuts of good flavor and quality.

Tree surgery is comparatively simple and inexpensive and most persons can, with a little preliminary practice, undertake the simpler types of tree repair work that will prove immensely profitable in saving fine trees. A few fundamental principles must be observed to secure permanently good results.

(1) Remove the dead, decayed, diseased or injured wood or bark. When on a limb this can often be done best by removing the entire limb; on a large limb or on the trunk it may be done at [illegible] digging out the decayed matter so [illegible] a cavity is formed.

(2) Sterilize all cut surfaces.

(3) Waterproof all cut surfaces.

(4) [illegible] work in the most favorable [illegible] for rapid healing; [illegible] filling or covering [illegible].

(5) [illegible] work from year to year [illegible] if any [illegible] attend to [illegible] immediately.

R[illegible] Large Limbs.

A [illegible] should be removed [illegible] cuts on the upper [illegible] usually strips the bark and [illegible] falls. A preliminary cut [illegible] made from the under side [illegible] the point for the final cut; [illegible] second cut on the upper side [illegible] more [illegible] the first one [illegible] the stub close to the trunk. [illegible] coat of good shellac should be applied over the entire area of the bark, [illegible] sapwood, and the cambium immediately.

Creosote should be applied to the rest of the exposed wood not already covered by the shellac as a protection, and the entire shellacked and creosoted surface should be finally waterproofed with thick coal tar or asphalt. Grafting wax, particularly the thick liquid alcoholic kind, is excellent for waterproofing small surfaces. Another good method of treating the scars is to char the surface with a gasoline or alcohol blast torch and then quickly cover the hot surface with heavy tar, pitch, or hot asphalt. The treated surfaces should be watched from year to year and recoated as necessary to preserve the waterproofing.

In removing small branches and twigs the cut should be made as close to the supporting branch as possible, so as to leave no projecting stub. The pruning wound must be sterilized and water-proofed. For very small wounds shellac is handy.

When a wound has been allowed to remain untreated for a year or more, decay-producing organisms are almost certain to have started an area of decay and insect activity behind the exposed surface. Such regions generally require excavation of decayed and diseased wood and sterilizing and waterproofing of the cut surfaces.

The tools ordinarily required are two outside-ground socket-handled gouges (one three-fourths of an inch and the other 1½ inches), a knife, mallet or hammer, and an oilstone. Only keen edges should be used on the bark or near the cambium.

Remove Diseased Wood.

Remove all the diseased or insect-eaten or water-soaked wood. In diseased areas of many years' standing there may be only a thin shell of healthy wood around the cavity, in which case the tree must be braced or guyed, and it is often better removed and replaced by a healthy one.

Do not leave a cavity so it will retain water. In shaping a cavity that is to be filled with cement, etc., have the sides undercut, if possible, so as to hold the filling more firmly in place. Inrolled bark at the edges of the opening should be cut away after the decayed and diseased matter has been completely excavated and the edges of the sapwood and bark adjoining the cambium shellacked. The remainder of the cavity also must be sterilized. Creosote is recommended. Over this a heavy waterproof covering should be applied.

Filling the cavity is of much less importance. Often a cavity is better left unfilled. A cavity must be watched from year to year and any tendency of the waterproofing to crack, split, or blister should immediately be counteracted by repainting.

Where sheet-metal covering is used there should be a narrow half-inch ledge of bare wood around the edge to which the margin of the metal can be tacked. The cavity must be thoroughly sterilized and waterproofed,

Looking Like a Million

By WILL T. AMES

(©, 1920, by McClure Newspaper Syndicate.)

When Beth Bedell came back to North Gilead, after two years' absence in the metropolis, the clothes she wore produced exactly opposite impressions in the minds of Hugh Silsby and Imogene Dart.

Imogene, though she had but a fleeting glimpse of Beth as the "jit" from Gilead shorted through the village, exultantly reported to Amy Austin that "Beth Bedell is home, wearing about a dollar and a quarter's worth of dress and forty cents' worth of hat!"

Hugh, however, experienced a sudden sinking sensation around the heart when he made an errand over to the Bedells' that afternoon and found Beth looking, as he told himself, "like a million dollars."

Beth's face lighted as the tall young farmer came through the gate, and if Hugh had been less stunned by the luxurious aspect of the homecomer he might have noticed that the rose of her cheeks grew deeper as she shook hands with him.

What really absorbed Hugh's mind to most melancholy effect was the conviction that it had all worked out with Beth precisely as it always did in the Gilead theater movies—Beth had become a regular fashionable city girl, quite unattainable for a plain fellow like himself. Why, her clothes alone must cost a lot more in a year than he could clear on his place even with the best of luck!

Dispirited, vaguely but keenly disappointed—for he had been thinking a deal, and with secret hopefulness, about Beth ever since he heard she was coming home—Hugh followed the well-blazed trail of ingenuous youth in such case made and provided. He sulked, and his sulks took the guise of stiff formality.

"Glad to see you home, Miss Bedell," he said solemnly.

"Miss Bedell!" laughed Beth. "Since when? Don't be silly, Hugh. It's awfully good to see you. Why don't you tell me I'm looking well?"

"You look mighty nifty, if that's what you mean," replied Hugh with elaborate ungraciousness; "but you look like somebody else—somebody that flies high. Guess you perch on a different tree from old friends nowadays, don't you? Your father in?"

For an instant Beth stared amazed. Then the rose in her cheeks died till in either a tiny red spot remained. "He's out at the barn," she said, and without further word walked straight into the house.

North Gilead was a very small place. It boasted of only one rich man, and of him it boasted not greatly. Merton Phelps at twenty-five was a shade stingier than his father had been at seventy-two, when after a lifetime of miserliness he left a trunkful of beloved mortgages and securities to his only son.

Young Phelps dressed showily, if with infinite regard for a bargain, for he was vain. He cultivated the manner of a village beau, for he had a keen eye for feminine loveliness, but no North Gilead girl could truthfully maintain that Merton had ever spent a nickel on her. Still there is a certain glamour to a hundred and fifty thousand dollars, and girls were not wanting to welcome his inexpensive and insinuating flatteries.

On the afternoon of Beth's homecoming, within an hour after Hugh's brief visit, she met Phelps in the post office. And when, spurred by the fascination of beauty exceptionally groomed and fetchingly gowned, he asked if he might "drop around and set on the porch" with her that evening, Beth granted him the privilege with a condescension quite new to his experiences.

Two evenings after that North Gilead was shaken to its foundations by the news, spread like wildfire, that Merton Phelps had actually hired Ed Godfrey's new roadster and taken Beth Bedell to ride, leaving his own second-hand flivver idle in the garage. And when, next day, it transpired that he had taken her to Lake Chemung and paid four dollars for something to eat at the Chemung pavilion, the community almost became speechless.

That was the beginning. For two weeks Merton Phelps belied his reputation and his antecedents at a ruinous rate. The dark-green roadster was at the Bedells' door daily. And when it wasn't carrying Beth off on some frightfully costly excursion or other it was chasing into Gilead after chocolates and, finally, for a box of orchids especially ordered from the Gilead florist.

Meantime Hugh Silsby had suffered agonies of remorse for his churlish behavior toward Beth—and continued to sulk the deeper. Not again did he see Beth, save at a distance, except once when she waved at him from the green car and was gone like a flash with "that d—d monkey of a Phelps" grinning at her side.

It was the morning after the orchids. Hugh was disconsolately going about his "chores" in his big barn when there came a light step on the floor and a laughing "Good morning, Hugh." It was Beth.

"Good morning. Isn't this a queer place for a city—"

"Now Hugh, you stop that," interrupted Beth. "I'm not going to let you take that tone [illegible] again. [illegible] fair to me—[illegible] I've come to tell you something. Do you want to hear it?"

It was the old Beth. He could see it now, even if there was something different about the clothes and the way her hair was done, and such small matters. But it only made Hugh's sense of loss the more acute.

"I'm mighty sorry, Beth," he said, "that I was—well downright nasty the day you came home. But I guess it isn't going to be easy to hear what you have to tell. Maybe we'd better take it for granted. I hope he'll make you happy. I honestly do."

Then Beth laughed—a very real, hearty laugh, but with a little catch at the end.

"Hugh," she said, "Mert Phelps is a horrible little cad. I wouldn't marry him if every dollar he [illegible] a million and he'd spend [illegible] I wished. Listen to me, [illegible] knew in a minute [illegible] what was the matter [illegible] thought I had grown [illegible] extravagant and so grown [illegible] from homeliness and [illegible]—like this. And all because [illegible] caught a little of the knack that so many city girls simply [illegible] acquire—of making a lot of [illegible] next to nothing. Hugh, I [illegible] very well in town. [illegible] pretty hard time. Right [illegible] the most cheaply dressed girl in North Gilead. But I didn't like it anyway. I wanted home and the old folks. And I missed you, Hugh. I've never forgotten what you said just before I went away—and I looked forward to your liking me. And then you had to go and jump at the notion that I [illegible] to be a swell—and would [illegible] about loads of money for clothes and things!"

"Beth, I—"

"Wait a minute, [illegible] Last night Merton Phelps offered to make over half his money to me absolutely, if I would marry him. It made me a little sick to make him make that offer, but I did—though he doesn't know I did. You know why I did, don't you, Hugh? So I could refuse it, of course and then come and ask you how much figure you really think money and luxuries cut with Beth Bedell—you old silly." There were tears in her laughter now.

"You chucked all that money—and came to me? Beth! Say, girl, I said you looked like a million. You're a million million yourself—of pure gold."

And the tears that trickled through the laughter were dried on blue denim while more blue denim held her tight.

When the Ship Sailed

By H. LOUIS RAYBOLD

(©, 1920, by McClure Newspaper Syndicate.)

Marian Wetherby sat crouched amid the lavish cushions on the broad lanai, her face buried in her hands, her shoulders shaking convulsively. Above and about her the soft Hawaiian night spread its beauty, but Marian had no eyes for the velvet-starred sky, no ears for the droning chant of the Pacific beating on the reef beyond the harbor. Rather, the loveliness of the surroundings accentuated her grief, her loneliness.

"The last evening we might have spent together, Jim," she murmured brokenly, "and you did not come!"

For on the morrow the girl, obeying her uncle and guardian's decree—and whoever disobeyed even a wish of Henry C. Winthrop, millionaire sugar planter and important citizen of Honolulu?—was to leave with her aunt on the Esonia for a prolonged trip in the States.

Marian, resentful, already homesick in anticipation, knew that her uncle's chief reason for banishing her was to break up the friendship between his niece and James Elliot Callendar.

The sound of heavy footsteps startled the girl. Jim? No, that was not Jim's step. She had dared give way to her tears, thinking the lateness of the hour rendered interruption unlikely. It proved to be her uncle, whom she had supposed asleep long ago.

Up the step he came, a broad, massive man with a half-smoked cigar gripped tightly between his teeth. For a moment he regarded his niece, not unkindly and yet without sympathy, as she stood up making futile dabs with her handkerchief at her wet eyes. Should he tell her or not? It would certainly be better for her to leave hating that confounded Callendar, instead of fancying she was heartbroken over him.

The sooner she got over her infatuation the sooner would she prove amenable to his plans—plans eminently well calculated to advance her interests—and his.

Resolutely he flicked the ash from his cigar and laid his hand on the girl's shoulder. "My dear," he said without preamble, "just where do you suppose your precious Jim is wasting his time?"

He paused as the girl raised startled eyes of inquiry, then continued: "I had occasion today to ride out to the Wailoa ditch. On my way I passed Callendar with one of Sam's pretty halfcaste daughters putting wreaths about his neck!" With a gentle pressure of his hand, Winthrop passed into the house.

Marian's first thought was that her uncle whom she knew to be a believer in the principle that any means justifies a good end, had cooked up the story as a final weapon against Jim. For well she knew her uncle was bent upon a match between her and the son of W. Laurens, owner of the palm pineapple plantations. Such a marriage would effectively unite the business interests of the island's two greatest corporations.

And yet Jim had not come to say good-by. His absence in itself was almost corroboration of her uncle's story. With a heavy heart, the girl entered the house.

Meanwhile Jim, all too well aware of the bewilderment his absence must be causing the girl he loved, sat flower-crowned among a group of dancing, chanting ukulele-playing Hawaiians, and with a fierce hatred he hated his stolid, phlegmatic, half Chinese, part native, part white, all heathen host, who had steadfastly refused all day to give his answer.

Yet Jim smiled and bowed and flirted with the girls, knowing in his heart that only by possessing his soul in patience could he gain his ends. And just about the time that Marian was falling into a troubled sleep wherein she dreamed of faithless men, Jim had his reward:

"Sure t'ing, Mist' Callen'—I buy—Tousan' dolla' down. Fixee up lest time by."

The following morning the Esonia's smokestacks were flinging their signals of departure into the smiling Hawaiian sky. Ropes of flowers stretched from the crowded dock to the decks where the passengers gorgeously wreathed with leis of brilliant flowers, smiled and waved farewells to those left behind.

Among them, standing silent, somber-eyed, one slender girl waited unsmiling. But her glance wandered, searching continually the people on the dock. Nor did they brighten as they fell upon the complacent figure of her uncle, whose very attitude indicated satisfaction at a deed well done.

And indeed he had cause to pat himself approvingly on the back. In two minutes more the vast Pacific would begin to stretch between his rebellious niece and the man of her choice—but not of his. Yet a great deal can happen in two minutes.

Just as the native band changed from its martial music into the plaintive Hawaiian Aloha, whose cadences never fail to awaken in the hearts of those who listen strange, melancholy regrets and yearnings; just as the last wreaths were thrown and the sleek-bodied young Kanakas made ready at the rails for their bold dives after coins thrown by the passengers above; just as the deckhands reached for the gang-plank ropes, a commotion at the rear of the crowd communicated itself to the rest.

The gangplank stayed its withdrawal while a hatless youth elbowed his way through. As he passed Henry Winthrop he pressed a note into his hand. The next instant he was aboard and the gangplank was drawn in.

Jim Callendar! Wrathfully, Winthrop wanted to leap the ever-widening distance as the boat pulled out, and haul the fellow back. But all he could do was to watch—watch helplessly as the chains of flowers parted, scattering their petals on the churned-up water as the Esonia pointed her bow to the cloud-piled horizon. Then he remembered something thrust in his hand, and straightening out the crumpled paper, he read—not with pleasure:

"My Dear Mr. Winthrop—You have always claimed that your big objection to me was my lack of money—and of business ability. As to the first—remember those acres in Manoa Valley you said were worthless? Sam Lutong has been after them for some time, but would not meet my price. At midnight last night, after twelve hours of meditation, he met it. And—money makes money. Yours truly,

"JAMES E. CALLENDAR."

In a sheltered corner of the middle deck Jim and Marian talked together while a necessarily resigned aunt settled their belongings in the stateroom below.

"Dearest," Jim was explaining, "I had hoped to get here in time for a talk with your uncle and then to persuade you to give up the trip until—well, until we could be married and take it in on our honeymoon. But we had a blowout on the Wailoa road, and, foreseeing some such contingency, I scribbled the note to leave for him with a deckhand—then I happened to see him." Jim paused with a faint smile.

"What is it?" asked Marian, her eyes no longer sad but shining with happiness.

"I didn't tell your uncle the best of it. The sale of those 'worthless lands' gave me enough to purchase a considerable interest in the Laurens pineapple plantation, where I go in as assistant superintendent on my return!"

Suddenly Marian had an idea, an idea which made her blush adorably.

"Why—why—Jim—there is no reason why we couldn't be—be—"

"Exactly," said Jim, "when we reach San Francisco!"

"Only," and Marian looked lovingly at the distant shores growing in the purple blue haze, "I'd like to come back to Hawaii—"

"For our honeymoon," finished Jim, and promised her with a kiss.

University Lyceum Course

THIRD NUMBER

Tuesday, February 1, 1921

A. W. OLMSTEAD.

Mr. Olmstead is the secretary of the lecture department of the State University and the general manager of the lecturing business in Minnesota. He knows perhaps better than any other man in the state what the people want and he tries to apapt his material and methods to fit their needs.

Mr. Olmstead believes in democracy on the platform as well as in other places. He believes the chief difficulty with lecturers is that they totally ignore the audience. They usually make a lot of noise and demonstration on the platform telling the people things they have always known in language which cannot be understood without an interpreter. Mr. Olmstead will introduce you to the Open Forum style of lecture in which the audience is given the biggest part of the program. The lecture will be short and snappy. It will open up some of the biggest issues in national and world affairs. At the close the audience will be given an opportunity in a systematic parliamentary manner to ask questions and take part in discussion. This will prove the most lively part of the program

Mr. Olmstead is a lawyer. He has been a close student of public affairs. His views are always progressive and liberal, but he knows how to allow for the other fellow's point of view. He has been for ten years a University teacher, but he boasts that no one can tell it on him. He knows how to translate a college education into the English language.

The Pekin Legation.

A glance at the names of the few countries where the United States minister is appropriately installed in his official mansion betrays a rather eccentric choice, writes Terressa Long in the World's Work. Instead of London, Paris, Rome, we find diplomatic residences in Bangkok, Pekin and Morocco. The legation at Pekin is particularly creditable, being of substantial masonry and placed in a spacious compound. That so worthy a reservation should have been acquired in the heart of Pekin might strike the traveler curiously. When did congress become so generously well-disposed toward our diplomats in China? The rather shamefaced answer is that we never bought it. In the Boxer rebellion of 1900 United States marines occupied that particular piece of territory, and in a sense, they have occupied it ever since.

Care of Antiques in Palestine.

An archeological department has been created in Palestine which will be responsible for the preservation of all antiquities. The high commissioner has appealed to all the archeological societies of Palestine to report to the administrator of this new department everything of interest in connection with Palestinian archeology. Delegates from all these learned societies will be attached to this service.

TOUCHED BY HIS GENEROSITY

Impossible for Wife to Scold Such a Charitably Inclined Hubby as She Had.

Ah, at last he came!

The waiting woman rose majestically to her feet as she heard her husband open the front door. He paused aghast as he entered the little living room and saw her flashing eyes.

"Sammy!" she cried. "This afternoon I saw you go into Goshen's pawnshop with a package. What does it mean? Answer me! The suspense is killing me."

She sank halfway to the floor and rested there.

Her husband turned away and coughed twice.

"Yes, Janet," he confessed. "But, my dear, I really couldn't see poor old Goshen go about in rags any longer, so I just bundled up my old suit, and took it over to the poor man."

"Sammy!" she cried. "How I have misjudged you, you dear, generous dear!"

And out of pure admiration for his generosity she refrained from reminding him of the $2 she had lent him the day before.—Houston Post.

Explained.

Little Mike—Fayther, phwot is an autopsy?

McLubberty (promptly)—An autopsy, is ut? Shure, thot's whin a dead man requests the doctors to cut him up, so thot he can feind out phwot is the matter wid him.

THE RESOLUTION TREE.

Behold the resolution tree,
Lugubrious to view;
It stands so straight it backward leans,
And all its leaves are new.

It does not glitter in the gloom,
No cheerful gleam invites,
There is no chance for jollity—
The lid is on its lights.

And though alluring articles
Festoon it round about,
The branches are entirely hung
With things to do without.

—McLandburgh Wilson.

SUCCESS IN MARKETING

Success in co-operative marketing depends upon obtaining a sufficient volume of business, observing co-operative principles, employing capable management, following up-to-date business methods, and having loyal members.

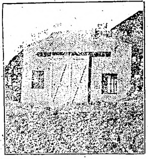
CARELESS HANDLING CAUSE OF BIG LOSS

Easy for Potatoes to Develop Serious Diseases.

Important That Utmost Care Be Given Tubers While in Storage to Prevent Rot—Good Ventilation Will Assist.

Careless handling of potatoes during and after digging, says A. G. Tolaas, chief inspector for the Minnesota state seed potato certification board, is often responsible for serious loss from rots. Every bruise or infection on a potato makes it easy for various storage rots to develop. These diseases have their origin in the soil or in unclean bins. It is important, therefore, that great care be taken while digging and also while handling the potatoes after placing them in storage.



Exterior View of Potato Storage House.

Potatoes badly bruised when dug should not be placed in storage with sound potatoes, since they are certain to rot and spread infection throughout the bins. A field that has contained blackleg, and which has not been rogued, is very likely to yield a considerable number of potatoes slightly infested, at least, with blackleg rot. If these are placed in storage with sound tubers they may be responsible for large amounts of storage rot, especially if the potatoes are damaged when being dug or after being placed in storage.

Mr. Tolaas finds that a large amount of storage rots can be prevented by placing the potatoes as soon as dug in crates, which, when filled, can be hauled to the storage cellar and carefully dumped wherever wanted. If it is necessary to drop the potatoes several feet much damage can be avoided by providing a chute for lowering them into the cellar.

Storage cellars, especially those which contained a lot of rotted potatoes the previous year, should be thoroughly disinfected with a strong solution of bluestone—one pound being dissolved in ten gallons of water; or formaldehyde, one pint in ten gallons of water, before the potatoes are put away. Good ventilation with temperature of from 35 to 40 degrees Fahrenheit will aid materially in keeping down the loss from storage rots.

COMMON SALT IS DANGEROUS

Hogs and Chickens Are Very Susceptible to Poisoning by Mineral—Instances Cited.

It should be borne in mind that hogs and chickens are very suceptible to poisoning by common salt.

A lady emptied ice containing salt from the ice cream refrigerator in the backyard. The chickens picked up salt enough to kill them.

A newly-wed made a cake of salt, presuming it to be sugar. It was thrown to the chickens and killed all of them.

Pigs were allowed to graze in a pasture with cattle where they had access to a salt lick; they licked the salt ravenously and all but three of the herd died.

Another case is reported where salt brine was mistaken for sugarwater and fed to hogs with garbage; the pigs were poisoned and died the following day.

Salt poisoned hogs show no symptoms for several hours, when they are taken with dizziness, increased thirst, frothing at the mouth, diarrhea, and vomiting. Keep salt away from hogs and chickens.—Geo. H. Glover, Colorado Agricultural College.

PROPER TIME TO CUT WHEAT

It May Be Done With Safety When Straw Has Lost Nearly All of Its Green Color.

Wheat may be cut with safety when the straw has lost nearly all its green color and the grains are not entirely hardened. If cut sooner than this, shriveled kernels will result. If left standing until fully ripe, a bleached appearance, due to the action of the elements, often results, and loss from shattering may ensue.

MAN OF BUSINESS INSTINCTS

Luckily for Bankers, All Customers Are Not as Shrewd as This Individual.

The other day a stranger entered the Indiana National bank and asked to borrow $5. He was told that the bank did not lend such small sums.

"But," he went on, "lending money is your business, isn't it?"

The banker admitted that it was.

"Well, I have good security," said the stranger, "and I want to borrow $5."

Finally the banker, half from fatigue and half from amused curiosity, agreed to make the loan. When the note was all drawn and the interest of 35 cents paid, the stranger drew from his pocket $10,000 worth of government bonds and handed them over as security. Before the banker could express his astonishment, the stranger said:

"Now this is something like it. Over at this other bank they wanted me to pay $10 just for a safety deposit box to keep these things in!"—Indianapolis Star.

New Talking Glove.

An ingenious glove by means of which the blind may converse has been invented by a physician of Ansonia, Connecticut, who is himself rapidly becoming blind and deaf. It is a thin glove, with all the letters of the alphabet upon it, distributed over digits palm and back. Dr. Terry himself has learned the precise situation of each letter, so that when a friend spells out a word by touching the several spots, he can follow by the feeling. The beauty of Dr. Terry's invention is that it enables him to receive communications from persons who are unacquainted with his system. Any deaf-blind person could have such a glove made, and, of course, it does not matter how the letters are arranged upon it, for he alone needs to know without looking where they are situated.

Foxcraft Is Unique.

Osgood P. Martin of Foxcraft, Me. has received a letter from his son. Dr. Selden O. Martin, in England, in which the doctor says that he can cable to Foxcroft for 60 cents less than to New York, because he needs to write only "Foxcroft" in the address, since it is the only place of that name in the world. It is not necessary to add either "Maine" or "U. S. A."

Canada to Replant Forests.

The Quebec government plans to plant two pine or spruce trees for every one cut down, and has at present six hydroplanes patrolling forest areas, while at the same time it is encouraging private forest protection. Three million pine and spruce trees have been planted this year and seven associations of lumbermen organized for timber development.

WHAT THE NEW YEAR MEANS

THE New Year means new opportunity to every man, woman and child. It challenges the best that is in them and promises unusual reward for effort made. In it is the hope of years to come concerning whatever is for the well-being of society.

GIVE PRODUCE BETTER CARE

More Attention Should Be Given to Quality and Methods of Packing and Shipping.

With the present condition of heavy production of almost every farm commodity and high freight rates, the bureau of markets of the United States Department of Agriculture advises that greater care than ever should be exercised as to the quality of produce shipped by rail to markets and the method of packing and loading. Where fruit or vegetables are of inferior grade or quality in any respect, the farmer will do well to market nearby, within the truck radius, or store for home consumption.

After the stock gets to a distant market the shipper is given protection by the inspection service furnished by the department at about 180 principal receiving points of the United States. This service costs $2.50 for a half carload or less and $4 for a full carload. It enables the shipper to learn the exact condition in which his produce reached the consignee by giving the exact nature of the decay or other defects, and gives him information in regard to the best method of marketing each particular lot of produce.

GOODRIDGE CO-OPERATIVE CREAMERY COMPANY

Due to the difference between butter scoring 92 and that scoring 90—a difference of 7½ cents per pound—the Board of Directors of the Goodridge creamery have decided to raise the premium on sweet cream from 2 cents per pound to 7 cents, commencing Dec. 1 next and continuing until further notice.

This applies only to monthly patrons The former premium of 2 cents pe pound will continue to be paid to cash patrons for the time being.

This ia a plan urged by the creamery Inspector and seconded by myself, as being the best way to take care of the vast difference in price between good and poor butter.

Special Election to Vote Bonds

TO DEFRAY FLOATING INDEBTEDNESS AND MEET CURRENT EXPENSES

At a special meeting of the board of education held Wednesday afternoon it was decided to call a special election for the purpose of submitting to the voters in the district the question of issuing bonds sufficiently large to take up the floating indebtedness and defray the current expenses for running the school. This step is necessary in order to keep the school open and also to save the tax payers from paying the high rates of interest unavoidable when the district is in debt. The reasons for the present indebtedness are two-fold; First, the moneys raised through taxation and the aid given by the state are always paid the year following their assessment; and secondly, the cost of operating the school has necessarily increased over pre-war prices, while state aid and local tax assessments have not increased proportionately.

There are now over $5,000 in outstanding warrants. The banks have been taking and holding them until they could be paid from time to time out of money received from taxation and from the state. Owing to the present money stringency the banks do not feel able to carry them any longer, and some provision must be made for their payment. The district has been in debt from the beginning, there always being a balance carried along from year to year. These conditions are the same throughout the Northwest. The banks will no longer carry the school warrants, and the districts are in hot water.

It will require at least $7,500 to finish the school year. The cost of running the school has increased to an amount that goes far beyond the expectations of the school board.

It is proposed to issue bonds for $10,000. It is expected that this amount, with the tax money that will be received in April, will clear up all indebtedness to that date, putting the district on a cash basis. A representative of the Northwestern Trust Co. of St. Paul met with the board Wednesday and offered to take bonds, payable in fifteen years and drawing 7 per cent interest, at par. This is the best offer the board has received. It had been the intention to call a special election for [illegible] 26, but it was found that the requirements of red tape could not be complied with quite so soon, and the election will probably be called for a week later.

As Mr. Babson Sees It

[illegible] ers of the republican party, thr[illegible] the big bankers and manufac[illegible] tu[illegible] doing everything possible to brin[illegible] as much liquidation as possible [illegible] now and April 1. The reaso[illegible] is being done is very plain. The republicans have never before come into [illegible] at the end of a democratic reg[illegible] great prosperity. They are at[illegible] to make conditions as bad as p[illegible] before they take the helm."

[illegible] is from a statement published in the Daily News of Roger Ba[illegible] famous Boston statistician, wh[illegible] in Minneapolis Tuesday. Mr. Ba[illegible] is a great personal friend of Vic[illegible]-elect Coolidge.

Primary Reform Bill

The most important elections reform bill o[illegible] session was introduced in the stat[illegible] Tuesday by Senator W. A. No[illegible] of Grand [illegible].

It provides for the retention of all the machinery of the present primary ele[illegible] system, but stipulates that fro[illegible] judges of the supreme court on do[illegible] all nominations for state office mu[illegible] on a partisan basis. He would ma[illegible] it impossible for candidates defe[illegible] the primary to enter general el[illegible] on an independent or other pa[illegible] and continue as candidates fo[illegible]. This latter provision is no do[illegible] primarily aimed at the Non-partisa[illegible].

Gr[illegible] Dairymen's Convention

[illegible] dairymen's and the Red Ri[illegible] dairymen's joint conven- tio[illegible] held at Fergus Falls, Minne[illegible] January 18, 19 and 20. Every[illegible] requested to attend and listen to [illegible] to be made by such men as:

[illegible], Crookston.

[illegible], University farm.

[illegible], sec'y Minnesota C[illegible] Operators' and Managers' as[illegible].

[illegible] French, St. Paul, former da[illegible] commissioner.

[illegible] McKerrow, Minneapolis, University [illegible].

[illegible] Glover, Ft. Atkinson, Wis., ed[illegible] Hoard's Dairyman.

[illegible] Murphy, Wheaton, Minn., preside[illegible] fair association.

[illegible] Hackney, St. Paul, Minn., pr[illegible] den dairy farms.

[illegible] Scott, St. Paul, Minn., Holste[illegible] ority.

[illegible] Grout, president state dairymen[illegible] association.

[illegible] but not the least, the Hon. Ch[illegible] state dairy and food commissioner.

[illegible] Houske, secretary Red River Val[illegible] dairymen's association.

To Help The Farmer

It would seem as if the best our law makers can do to help the farmer is to put a high protective tariff on imported grains. If an abnormal protective tariff is established in the United States now, there will come sooner or later another reaction, just as there was after the Payne-Aldrich bill was passed. It is especially interesting to study the growing provisions of the proposed emergency tariff bill. Every duty that is added for the protection of any one class of commodities immediately arouses a clamor for the similar protection of other commodities, until a schedule is arranged which obviously gives further opportunity for profiteering to various industries which do not need to be protected. This, at any rate, is the danger. The whole question of the tariff needs to be much more thoroughly discussed than it was during the campaign before the November election in order that a satisfactory solution may be reached.

What the farmer needs is a credit that will enable him to hold his products and demand a fair price for them. Manufacturers fix their own prices on their products. The farmer, in order to pay his grocery bill, is obliged to sell his product just as soon as he can possibly get it to market, and take whatever price he may be offered. A high tariff on farm products will do no good now. It will raise the prices after all the farmer had to sell has gone into the hands of the speculators, and the farmer himself has gone into bankruptcy.

CLEAN COWPEAS MOST VALUABLE

[illegible] Profit for Doing Work [illegible] the Grower Neglects to Perform.

[illegible] PRICE

[illegible] Shortage and [illegible] Producers Do Not [illegible]—Specialists Give Timely Advice.

U[illegible] growers see fit to place th[illegible] on the market in a clean [illegible] attractive condition they may expect the wide difference between the prices they receive and the wholesale price charged by the dealer to continue, say marketing specialists of the bureau of markets, United States Department of Agriculture. When the dealer is compelled to do work that the grower fails to perform, it is the dealer who enjoys the profits.

Marketing Factors.

According to estimates prepared by the bureau of markets some 100,000,000 pounds of cowpeas enter commercial channels every year. Of this quantity 25 per cent is of mixed varieties and sold at a discount of from 50 cents to $1 per 100 pounds. A large percentage of it also is made up of poorly thrashed, unclean stock containing much foreign matter and packed in second-hand bags, improperly sewed. As a result of the use of these inefficient marketing methods the average wholesale selling price for recleaned stock during the spring of 1920 was 60

Cleaning Cowpeas Pays Well.

per cent higher than the average price paid the growers for the 1919 crop of cowpeas. Similar conditions prevailed with regard to the 1917 and 1919 crops.

To secure higher prices for cowpeas, specialists of the bureau of markets who have made a careful investigation of the matter recommend the following practices:

1. Clean cowpeas thoroughly before marketing. All hulls and other foreign matter, as well as light and immature seed, if any, should be fanned out.

2. Keep the varieties pure. Only straight varieties should be planted for grain or seed production, and precautions taken to prevent mixing at harvest time.

3. Sack in new even-weight bags, well sewed. This prevents waste in handling and the package will be more attractive to the buyer.

4. Market in as large lots as possible. It costs the shipper or local dealer practically as much money to receive, weigh, record and pay for one bag of cowpeas as it does a ten-bag lot. If car lots are available the cost of handling per unit is still smaller.

All efforts made by farmers or growers to improve the quality and marketability of cowpeas add to the initial selling price.

Cause of Shortage.

Cowpeas are usually grown as a catch crop, and on most farms regarded of secondary commercial importance. Yet the farm value of cowpeas produced in the United States is something like $30,000,000 a year. Approximately 750,000,000 pounds of cowpeas are produced annually, about 45 per cent or 340,000,000 pounds of which is required for planting. Of this latter quantity 15 per cent is sold by growers direct to farmers and 30 per cent normally enters commercial channels to be distributed by various dealers. In 1919, and again in 1920, the demand for cowpeas for planting purposes exceeded the commercial new crop supply, and abnormally high prices prevailed. Despite the shortage and the high prices, practically no effort was made to increase the commercial supply.

In the opinion of the bureau of markets the commercial shortage was not due to decreased production, but to failure on the part of the growers to prepare more of their cowpeas for commercial distribution. To increase the commercial supply it is seemingly necessary for growers simply to conserve the supply produced, and to prepare and market more of it for planting purposes. Such action would directly result in a larger profit to producers of cowpeas and indirectly benefit farmer consumers who desire to grow the crop for purposes other than grain production. To feed cowpeas suitable for planting purposes to live stock is a practice that growers should readily perceive unprofitable in view of the prices that cowpeas now command.

[illegible]

[illegible] for Cattle and Hogs [illegible] Fall and Winter.

Usual Period for Pasturing Is About Three Months but This May Be Lengthened or Shortened as Deemed Advisable.

Velvet beans are an important grazing crop for cattle and hogs in the South in autumn and winter, according to specialists of the United States Department of Agriculture. They are not grazed well by horses or mules, or by any live stock until after they are well matured or frosted. As the leaves, vines and pods decay but slowly when subjected to weather conditions, velvet beans will furnish feed until early spring. It is usually better to let the crop stand until it is well matured, or until it is killed by frost, as the leaves will be off the plants at that time and the corn which has been planted at the same time may be gathered with less difficulty.

The amount of grazing which will be afforded will, of course, vary with the growth of the crop and the quantity of corn not gathered, but it is the custom with many cattlemen to allow one-third to one-half acre a month for each steer or cow. The usual period for pasturing velvet beans is about three months, but this may be shortened or lengthened as deemed advisable. When the period is longer because of large acreage in proportion to the number of cattle there is necessarily some loss of feed through decay.

Hogs should be permitted to follow the cattle, as they will consume practically all the beans which the cattle fail to get. A common practice is to [illegible] or two hogs in addition [illegible] allow one [illegible] the cattle for each acre of beans. A good stand of velvet beans should produce about 150 pounds of beef and 100 pounds of pork an acre.

QUALITY IS URGENT FACTOR

Striking Example Furnished by Kentuckian, Who Markets Eggs, Poultry and Fruit.

An example of the part that quality plays in a business of direct marketing of farm produce is furnished by the experience of a man in Kentucky who markets eggs, dressed poultry, meats and fruits to consumers in Nashville, Tenn.

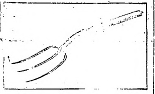
The business was established over two years ago by obtaining a friend as the first customer. From this modest beginning the producer has obtained sufficient customers to buy all of the high-grade products he can supply. Most of the shipments are made by parcel post.

This business is conducted on the basis of high [illegible] and adequate returns, says the United States Department of Agriculture. [illegible] are selected with [illegible] as most consumers show in selecting a producer from whom to buy farm produce. Customers [illegible] retained by never breaking [illegible] to supply only the best products [illegible] on his own farm. If, when [illegible] is obtained, this farmer does not have produce of the highest quality he informs the customer and states that unless otherwise instructed, the produce will be shipped at the earliest possible date.

USEFUL FOR CUTTING BANDS

Device Illustrated Is Handy for Man Pitching Bundles to Shredder or Silo Filler.

The following is a handy way for cutting bands. The man who is pitching bundles to a corn shredder or silo filler can cut the bands as he pitches them to the machine, thereby saving [illegible] bands.



Cutter [illegible]

[illegible] it handy to cut the shock [illegible] when hauling from the field, says a writer in the Farmer. To make [illegible] I attached a mower sickle section to the fork handle, as per illustration.

UNITED STATES APPLE CROP

Official Estimate Is Given at 223,000,000 Bushels, an Increase Over July Figures.

The official estimate of the apple crop of the United States is given as 223,000,000 bushels, and the commercial crop at 33,900,000 barrels, which is an increase of 3,666,000 barrels over the estimate given for July.

CLEAN EGGS BRING PREMIUM

Dirty Product, No Matter How Fresh or How Large, Always Sells at Big Discount.

Eggs that command a premium are, first of all, spotlessly clean. A dirty egg, no matter how fresh or how large it is, is always sold at a discount. One or two dirty eggs in a dozen will lower the price for the whole dozen.

PROPER TIME TO PREPARE GARDEN

A Few Well-Cared-For Hotbed Sashes Are Good Money Makers on Any Farm.

COVER CROP IMPROVES SOIL

All Rubbish, Dead Vines of Plants, Stakes and Poles Should Be Cleared Away and Ground Planted to a Green Crop.

Whether it is conducted on an extensive scale to supply the market or whether it is to produce food for the family the garden plot is likely to be the most profitable acreage on the farm. Gardening really starts in the fall. When the last vegetables have been removed and stored the prudent gardener sets about to prepare the ground for the next year's crop.

Clearing Away Refuse.

Any rubbish, dead vines or plants, and bean poles or tomato stakes should

University Lyceum Course

THIRD NUMBER

Tuesday, February 1, 1921

A. W. OLMSTEAD.

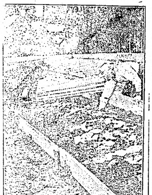
Mr. Olmstead is the secretary of the lecture department of the State University and the general manager of the lecturing business in Minnesota. He knows perhaps better than any other man in the state what the people want and he tries to adapt his material and methods to fit their needs.

Mr Olmstead believes in democracy on the platform as well as in other places. He believes the chief difficulty with lecturers is that they totally ignore the audience. They usually make a lot of noise and demonstration on the platform telling the people things they have always known in language which cannot be understood without an interpreter. Mr. Olmstead will introduce you to the Open Forum style of lecture in which the audience is given the biggest part on the program. The lecture will be short and snappy. It will open up some of the biggest issues in national and world affairs. At the close the audience will be given an opportunity in a systematic parliamentary manner to ask questions and take part in discussion. This will prove the most lively part of the program.

Mr. Olmstead is a lawyer. He has been a close student of public affairs. His views are always progressive and liberal, but he knows how to allow for the other fellow's point of view. He has been for ten years a University teacher, but he boasts that no one can tell it on him. He knows how to translate a college education into the English language.

---

be cleared away, says the United States Department of Agriculture, and the ground sown to rye or some other green crop to prevent the loose earth from washing under the winter rains. A cover crop also improves the physical condition of the soil. When a cover crop cannot be supplied the next best thing that may be done is to plow or spade the soil and allow it to lie rough throughout the winter. This practice destroys many insects that [illegible] below the surface. The winter frosts have a lightening effect upon the soil, especially on clay soils.



Hotbeds Furnish Early Vegetables at a Time When They Command Highest Market Prices.

The earliest and choicest vegetables are harvested by the man who maintains a few hotbed sashes and uses them to start his garden. He is able to handicap the frost line by several weeks, and to set strong, well-developed plants in his garden at a time when his neighbors are planting seed.

The farm income is at its lowest point in the early spring, but it can be increased considerably by the sale of young plants grown in hotbeds and ready for transplanting. Tomato, cabbage, eggplant and pepper plants are always snapped up when the first warm planting days come, and they are easily grown in the hotbed. A little more space and a little more seed than the grower needs for his own use are likely to bring good profits. Before the ground freezes in the fall is a good time to clean out the old hotbeds.

Unless the soil used in the hotbed is to be exchanged for fresh earth it should be shoveled from the bed and tossed into a pile nearby. The decayed manure from the bottom is scattered over the pile and thoroughly mixed with it to form rich soil for next year's beds. Over this goes a coat of straw or leaves held down by bits of board to keep it from blowing.

Some farmers find it convenient to [illegible] instead of [illegible] for the outer covering.

Preparation of Hotbed.

New hotbed pits should be dug so that they will face the south, and the location should be selected so that the beds will be protected from the cold north winds and late spring storms. Sometimes the earth taken from the new pit is suitable for use in the hotbed, but this is the exception rather than the rule. A few loads of leaf mold from the woods mixed with the natural soil will often form a smooth, rich stoneless mass which gives an ideal hotbed filler.

The back or north side of the frame is usually from 12 to 18 inches high, while the south end is about eight inches, so that the whole bed may have pitch enough to get the sun upon all parts. The standard hotbed sash is handled by most dealers, and measures three feet in width and six feet in length. A frame just wide enough to support the sash seems to be the most satisfactory, though wider beds are sometimes used with supporting ridges placed at six-foot intervals. A well-painted cypress sash glazed with a good double-strength glass well set in putty should give the careful gardener 12 to 15 years' service.

Heat for the hotbed is furnished by means of a bed of horse manure 8 to 16 inches thick in the bottom of the pit. Permanent hotbeds are often heated with coils of steam or hot-water pipes under the bed.

Hotbeds require constant care to prevent their becoming overheated, especially during bright weather.

VENTILATION FOR POTATOES

Tubers Tend to Sweat Upon Being Put Into Storage and Air Is Needed to Dry Moisture.

Large piles of potatoes should have ventilation channels provided, either by lattice work or by rows of crates. Potatoes tend to sweat upon being put into storage. Ventilation is necessary to dry this moisture. Only a general rule can be given, but potatoes should be kept as dry as possible, yet avoiding shriveling, and should be kept as near the freezing point as possible, yet avoiding freezing.

WILL AID WATERMELON CROP

Little Sandy Spot 10 by 40 Feet Fertilized Now Will Prove Quite Profitable.

If you have a little sandy spot on your farm measuring 10 by 40 feet, put on a little fertilizer now. Those watermelons will grow so rapidly next summer that you will be [illegible] repaid.

DEFECTIVE PAGE

THE GOODRIDGE BANNER

VOLUME XV, NO 4. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JANUARY 14, 1921 $1.50 PER YEAR

Special Election to Vote Bonds

TO DEFRAY FLOATING INDEBTEDNESS AND MEET CURRENT EXPENSES

At a special meeting of the board of education held Wednesday afternoon it was decided to call a special election for the purpose of submitting to the voters in the district the question of issuing bonds sufficiently large to take up the floating indebtedness and defray the current expenses for running the school. This step is necessary in order to keep the school open and also to save the tax payers from paying the high rates of interest unavoidable when the district is in debt. The reasons for the present indebtedness are two-fold; First, the moneys raised through taxation and the aid given by the state are always paid the year following their assessment; and secondly, the cost of operating the school has necessarily increased over pre-war prices, while state aid and local tax assessments have not increased proportionately.

There are now over $5,000 in outstanding warrants. The banks have been taking and holding them until they could be paid from time to time out of money received from taxation and from the state. Owing to the present money stringency the banks do not feel able to carry them any longer, and some provision must be made for their payment. The district has been in debt from the beginning, there alwas being a balance carried along from year to year. These conditions are the same throughout the Northwest. The banks will no longer carry the school warrants, and the districts are in hot water.

It will require at least $7,500 to finish the school year. The cost of running the school has increased to an amount that goes far beyond the expectations of the school board.

It is proposed to issue bonds for $10,000. It is expected that this amount, with the tax money that will be received in April, will clear up all indebtedness to that date, putting the district on a cash basis. A representative of the Northwestern Trust Co. of St. Paul met with the board Wednesday and offered to take bonds, payable in fifteen years and drawing 7 per cent interest, at par. This is the best offer the board has received. It had been the intention to call a special election for January 26, but it was found that the requirements of red tape could not be complied with quite so soon, and the election will probably be called for a week later.

As Mr. Babson Sees It

"Managers of the republican party, through the big bankers and manufacturers, are doing everything possible to bring about as much liquidation as possible between now and April 1. The reason this is being done is very plain. The republicans have never before come into power at the end of a democratic regime of great prosperity. They are attempting to make conditions as bad as possible before they take the helm."

The above is from a statement published in the Daily News of Roger Babson, famous Boston statistician, who was in Minneapolis Tuesday. Mr. Babson is a great personal friend of Vice President-elect Cooledge.

Primary Reform Bill

The most important elections reform bill of the session was introduced in the state senate Tuesday by Senator W. A. Nolan of Grand Meadow.

It provides for the retention of all the machinery of the present primary election system, but stipulates that from judges of the supreme court on down all nominations for state office must be on a partisan basis. He would make it impossible for candidates defeated in the primary to enter general elections on an independent or other party tickets and continue as candidates for office. This latter provision is no doubt especially aimed at the Non-partisans.

Great Dairymen's Convention

The state dairymen's and the Red River Valley dairymen's joint convention will be held at Fergus Falls, Minnesota, January 18, 19 and 20. Everybody is requested to attend and listen to speeches to be made by such men as:

C. [illegible]vig, Crookston.

C. [illegible]itch, University farm.

J. [illegible]sore son, sec'y Minnesota Creamery Operators' and Managers' association.

[illegible] French, St. Paul, former dairy commissioner.

[illegible] McKerrow, Minneapolis, University farm.

A. J. Glover, Ft. Atkinson, Wis., editor [illegible]ard's Dairyman.

C. [illegible] Murphy, Wheaton, Minn., president state fair association.

J. [illegible] Hackney, St. Paul, Minn., proprietor [illegible]den dairy farms.

[illegible] Scott, St. Paul, Minn., Holstein authority.

G. [illegible] Grout, president state dairymen's association.

And lastly, but not the least, the Hon. Ch[illegible]n, state dairy and food commissioner.

Leonard Houske, secretary Red River Valley dairymen's association.

To Help The Farmer

It would seem as if the best our law makers can do to help the farmer is to put a high protective tariff on imported grains. If an abnormal protective tariff is established in the United States now, there will come sooner or later another reaction, just as there was after the Payne-Aldrich bill was passed. It is especially interesting to study the growing provisions of the proposed emergency tariff bill. Every duty that is added for the protection of any one class of commodities immediately arouses a clamor for the similar protection of other commodities, until a schedule is arranged which obviously gives further opportunity for profiteering to various industries which do not need to be protected. This, at any rate, is the danger. The whole question of the tariff needs to be much more thoroughly discussed than it was during the campaign before the November election in order that a satisfactory solution may be reached.

What the farmer needs is a credit that will enable him to hold his products and demand a fair price for them. Manufacturers fix their own prices on their products. The farmer, in order to pay his grocery bill, is obliged to sell his product just as soon as he can possibly get it to market, and take whatever price he may be offered. A high tariff on farm products will do no good now. It will raise the prices after all the farmer had to sell has gone into the hands of the speculators, and the farmer himself has gone into bankruptcy.

CLEAN COWPEAS MOST VALUABLE

Dealer Reaps Profit for Doing Work That the Grower Neglects to Perform.

WIDE DIFFERENCE IN PRICE

Despite Commercial Shortage and High Market Prices Producers Do Not Sell More—Specialists Give Timely Advice.

Until the growers see fit to place their cowpeas on the market in a clean and attractive condition they may expect the wide difference between the price they receive and the wholesale price charged by the dealer to continue, say marketing specialists of the bureau of markets, United States Department of Agriculture. When the dealer is compelled to do work that the grower fails to perform, it is the dealer who enjoys the profits.

Marketing Factors.

According to estimates prepared by the bureau of markets some 100,000,000 pounds of cowpeas enter commercial channels every year. Of this quantity 25 per cent is of mixed varieties and sold at a discount of from 50 cents to $1 per 100 pounds. A large percentage of it also is made up of poorly thrashed, unclean stock containing much foreign matter and packed in second-hand bags, improperly sewed. As a result of the use of these inefficient marketing methods the average wholesale selling price for recleaned stock during the spring of 1920 was 60 per cent higher than the average price paid the growers for the 1919 crop of cowpeas. Similar conditions prevailed with regard to the 1917 and 1919 crops.

Cleaning Cowpeas Pays Well.

To secure higher prices for cowpeas, specialists of the bureau of markets who have made a careful investigation of the matter recommend the following practices:

1. Clean cowpeas thoroughly before marketing. All hulls and other foreign matter, as well as light and immature seed, if any, should be fanned out.

2. Keep the varieties pure. Only straight varieties should be planted for grain or seed production, and precautions taken to prevent mixing at harvest time.

3. Sack in new even-weight bags, well sewed. This prevents waste in handling and the package will be more attractive to the buyer.

4. Market in as large lots as possible. It costs the shipper or local dealer practically as much money to receive, weigh, record and pay for one bag of cowpeas as it does a ten-bag lot. If car lots are available the cost of handling per unit is still smaller.

All efforts made by farmers or growers to improve the quality and marketability of cowpeas add to the initial selling price.

Cause of Shortage.

Cowpeas are usually grown as a catch crop, and on most farms regarded of secondary commercial importance. Yet the farm value of cowpeas produced in the United States is something like $30,000,000 a year. Approximately 750,000,000 pounds of cowpeas are produced annually, about 45 per cent or 340,000,000 pounds of which is required for planting. Of this latter quantity 15 per cent is sold by growers direct to farmers and 30 per cent normally enters commercial channels to be distributed by various dealers. In 1919, and again in 1920, the demand for cowpeas for planting purposes exceeded the commercial new crop supply, and abnormally high prices prevailed. Despite this shortage and the high prices, practically no effort was made to increase the commercial supply.

In the opinion of the bureau of markets the commercial shortage was not due to decreased production, but to failure on the part of the growers to prepare more of their cowpeas for commercial distribution. To increase the commercial supply it is seemingly necessary for growers simply to conserve the supply produced, and to prepare and market more of it for planting purposes. Such action would directly result in a larger profit to producers of cowpeas and indirectly benefit farmer consumers who desire to grow the crop for purposes other than grain production. To feed cowpeas, suitable for planting purposes to live stock is a practice that growers should readily perceive unprofitable in view of the prices that cowpeas now command.

[illegible] GRAZING CROP

Excellent for Cattle and Hogs in Fall and Winter.

Usual Period for Pasturing Is About Three Months but This May Be Lengthened or Shortened as Deemed Advisable.

Velvet beans are an important grazing crop for cattle and hogs in the South in autumn and winter, according to specialists of the United States Department of Agriculture. They are not grazed well by horses or mules, or by any live stock until after they are well matured or frosted. As the leaves, vines and pods decay but slowly when subjected to weather conditions, velvet beans will furnish feed until early spring. It is usually better to let the crop stand until it is well matured, or until it is killed by frost, as the leaves will be off the plants at that time and the corn which has been planted at the same time may be gathered with less difficulty.

The amount of grazing which will be afforded will, of course, vary with the growth of the crop and the quantity of corn not gathered, but it is the custom with many cattlemen to allow one-third to one-half acre a month for each steer or cow. The usual period for pasturing velvet beans is about three months, but this may be shortened or lengthened as deemed advisable. When the period is longer because of large acreage in proportion to the number of cattle there is necessarily some loss of feed through decay.

Hogs should be permitted to follow the cattle, as they will consume practically all the beans which the cattle fail to get. A common practice is to [illegible] of two hogs to each [illegible] allow one [illegible] the cattle for each acre of beans. A good stand of velvet beans should produce about 150 pounds of beef and 100 pounds of pork an acre.

QUALITY IS URGENT FACTOR

Striking Example Furnished by Kentuckian Who Markets Eggs, Poultry and Fruit.

An example of the part that quality plays in a business of direct marketing of farm produce is furnished by the experience of a man in Kentucky who markets eggs, dressed poultry, meats and fruits to consumers in Nashville, Tenn.

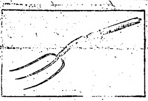
The business was established over two years ago by obtaining a friend as the first customer. From this modest beginning the producer has obtained sufficient customers to buy all of the high-grade produce he can supply. Most of the shipments are made by parcel post.

This business [illegible] on the basis of high [illegible] adequate returns, says the [illegible] States Department of Agriculture. [illegible] customers are selected with [illegible] care as most consumers show in selecting a producer from whom to buy farm produce. Customers are retained by never breaking the rule to supply only the best produce raised on his own farm. If, when an order is obtained, this farmer does not have produce of the highest quality, he informs the customer and states that unless otherwise instructed, the produce will be shipped at the earliest possible date.

USEFUL FOR CUTTING BANDS

Device Illustrated Is Handy for Man Pitching Bundles to Shredder or Silo Filler.

The following is a handy way for cutting bands. The man who is pitching bundles to a corn shredder or silo filler can cut the bands as he pitches them to the machine, thereby saving the aid of one man to cut the bands.



Cutter for Bundles.

I at [illegible] it handy to cut the shock ties [illegible] even when loading from the field, says a writer in the Farmer. To make one I attached a mower sickle section to the fork handle, as per illustration.

UNITED STATES APPLE CROP

Official Estimate Is Given at 223,000,000 Bushels, an Increase Over July Figures.

The official estimate of the apple crop in the United States is given as 223,000,000 bushels, and the commercial crop at 33,000,000 barrels, which is an increase of 3,666,000 barrels over the estimate given for July.

CLEAN EGGS BRING PREMIUM

Dirty Product, No Matter How Fresh or How Large, Always Sells at Big Discount.

Eggs that command a premium are, first of all, spotlessly clean. A dirty egg, no matter how fresh or how large it is, is always sold at a discount. One or two dirty eggs in a dozen will lower the price for the whole dozen.

PROPER TIME TO PREPARE GARDEN

A Few Well-Cared-For Hotbed Sashes Are Good Money Makers on Any Farm.

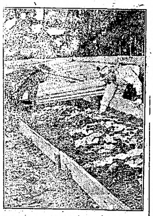
COVER CROP IMPROVES SOIL

All Rubbish, Dead Vines of Plants, Stakes and Poles Should Be Cleared Away and Ground Planted to a Green Crop.

Whether it is conducted on an extensive scale to supply the market or whether it is to produce food for the family the garden plot is likely to be the most profitable acreage on the farm. Gardening really starts in the fall. When the last vegetables have been removed and stored the prudent gardener sets about to prepare the ground for the next year's crop.

Clearing Away Refuse.

Any rubbish, dead vines or plants, and bean poles or tomato stakes should be cleared away, says the United States Department of Agriculture, and the ground sown to rye or some other green crop to prevent the loose earth from washing under the winter rains. A cover crop also improves the physical condition of the soil. When a cover crop cannot be supplied the next best thing that may be done is to plow or spade the soil and allow it to lie rough throughout the winter. This practice destroys many insects that lie just below the surface. The winter frosts have a lightening effect upon the soil, especially on clay soils.



Hotbeds Furnish Early Vegetables at a Time When They Command Highest Market Prices.

The earliest and choicest vegetables are harvested by the man who maintains a few hotbed sashes and uses them to start his garden. He is able to handicap the frost line by several weeks, and to set strong, well-developed plants in his garden at a time when his neighbors are planting seed.

The farm income is at its lowest point in the early spring, but it can be increased considerably by the sale of young plants grown in hotbeds and ready for transplanting. Tomato, cabbage, eggplant and pepper plants are always snapped up when the first warm planting days come, and they are easily grown in the hotbed. A little more space and a little more seed than the grower needs for his own use are likely to bring good profits. Before the ground freezes in the fall is a good time to clean out the old hotbeds.

Unless the soil used in the hotbed is to be exchanged for fresh earth it should be shoveled from the bed and tossed into a pile nearby. The decayed manure from the bottom is scattered over the pile and thoroughly mixed with it to form rich soil for next year's beds. Over this goes a coat of straw or leaves held down by bits of board to keep it from blowing. Some farmers find it convenient [illegible] for the outer covering.

Preparation of Hotbed.

New hotbed pits should be dug so that they will face the south, and the location should be selected so that the beds will be protected from the cold north winds and late spring storms. Sometimes the earth taken from the new pit is suitable for use in the hotbed, but this is the exception rather than the rule. A few loads of leaf mold from the woods mixed with the natural soil will often form a smooth, rich stoneless mass which gives an ideal hotbed filler.

The back or north side of the frame is usually from 12 to 18 inches high, while the south end is about eight inches, so that the whole bed may have pitch enough to get the sun upon all parts. The standard hotbed sash is handled by most dealers, and measures three feet in width and six feet in length. A frame just wide enough to support the sash seems to be the most satisfactory, though wider beds are sometimes used with supporting ridges placed at six-foot intervals. A well-painted cypress sash glazed with a good double-strength glass well set in putty should give the careful gardener 12 to 15 years' service.

Heat for the hotbed is furnished by means of a bed of horse manure 8 to 16 inches thick in the bottom of the pit. Permanent hotbeds are often heated with coils of steam or hot-water pipes under the bed.

Hotbeds require constant care to prevent their becoming overheated, especially during bright weather.

VENTILATION FOR POTATOES

Tubers Tend to Sweat Upon Being Put Into Storage and Air Is Needed to Dry Moisture.

Large piles of potatoes should have ventilation channels provided, either by lattice work or by rows of crates. Potatoes tend to sweat upon being put into storage. Ventilation is necessary to dry this moisture. Only a general rule can be given, but potatoes should be kept as dry as possible, yet avoiding shriveling, and should be kept as near the freezing point as possible, yet avoiding freezing.

An Inch of Time

By MARTHA M. WILLIAMS

© 1920, by McClure Newspaper Syndicate

"Music hath pangs to make the savage [illegible]," Marcia paraphrased, standing [illegible] the stocking she was darning. The [illegible] was a [illegible] from the French-harp [illegible], a [illegible] top floor studio, the girls singing [illegible] a key across the court, and the scratchy phonograph [illegible] below grinding out "Over There" for the third time since dinner.

"Had as well have gone to that silly concert," Marcia went on plaintively. "Still, it's something to have nobody [illegible] [illegible] love to you. Joe, poor lamb, is a dub at it, but I have to listen—it would be as cruel to hurt him as to strike a baby that smiled at you."

From which it appears Miss Marcia Lane had a conscience, an awkward possession for a born flirt. Marcia loved the game if it were even reasonably well played. Joe Gregory would, however, never learn to play it. He was so appallingly honest, so absolutely literal. Marcia loved to think of him as something betwixt a habit and a benefactor—any other way he weighed on her mind. He was as steadfast as thoughtful in rendering friendly services—Marcia writhed under some of them, but could not bring herself to hurt him by refusing them.

The evening was so sultry she had left the outer door on the chain. After a mild rap some one said through the crack of it: "May I come in for five minutes? No longer?"

"Why—I don't know," Marcia faltered, approaching the door. She saw a human segment, tall, well clothed, clean, part of a chin, a cheek, excellently modeled and three quarters of an eye, full-set underneath a dark line of eyebrows. He stood hat in hand, the hand slightly before him. She did not know him—but he was, somehow, not quite strange. "Please, may I come in?" he repeated hushedly, yet with something of strain.

She Saw a Human Segment.

When Marcia had unbolted the door he came through it and melted into the duskiest of the corners, saying still hushedly: "Keep time on me—and please remember it—well."

Marcia nodded. Suddenly she broke out, in her own guarded voice: "Which of us is maddest? You for asking to come in, I for permitting it?"

"On the face—honors are easy," he answered, his eyes fast on the watch open in his hand. "But listen—I am your neighbor—you have heard me speak—in behalf of a poor dog—"

"I remember!" Marcia broke in eagerly; "I know your name—"

"Forget it—please!" he admonished. "Forget also my asking asylum with you—unless you would like to remember that, by granting it, you perhaps have saved my life."

"Will I ever know how?" Marcia asked in almost a whisper. He glanced at her. "It depends," he answered. She stared into the court where still alleged music whined and blatted. She was glad of it now—its discords masked their low talk perfectly. Two minutes more had passed. A sense of noiseless motion made her half turn—to see her caller creeping toward her, so bent he was invisible to other view. "You are not afraid. I should not be here if you were cowardly," he said calmly crouching low at her feet. "I hope it is a long life you are saving with this inch of time you give me. However that may be, it is henceforth at your service."

He did not touch even her garment's hem, but she knew he was quivering all through. Presently he whispered: "You have a right to know my peril is—of my own making—one that manhood forbids me to protect myself from—"

"A woman scorned?" Marcia asked under breath. He nodded. "She waits to kill me inside my door—she has a key. I balked her plan to run away with me. Outside her husband"—a gulp over the words—"waits for—both of us—or either."

"Let me help you to escape," Marcia said dragging from a closet Joe's [illegible] dustcoat and deeply visored [illegible]. "Put them on—and go— [illegible] I will snap out the hall light," she said breathlessly. As he obeyed she put up her face to his in the darkness, saying clearly: "Good-by, Joe. I'll surely be ready tomorrow when you come."

She had caught a light step, the merest rustle of garments, as she passed into the hall. The lights there, [illegible] full, showed her a veiled and [illegible] figure rushing impetuously [illegible]. It pushed rudely past the stranger without a glance at him, and was quickly swallowed in lower hall-lit depths. Then came a smothered scream, drowned by the loud purring of a powerful car. Marcia rejoiced that hers were not street windows; whatever happened she could not see it. Staggering she sank upon a window seat and hid her face in her hands. Body and soul, she was shaken to the depths.

Now for a year she had built up an [illegible] about the man she had saved, Gordon Ammerly, lawyer, litterateur, society ornament, modestly rich, but ambitious as Lucifer. The type she could love—fate permitting. Now—she flung up her head, rose and shook herself free of something intangible. So he played with women's hearts and men's honor. In a shuddering revulsion she flung doors and windows wide, bathed her burning face, turned out the lights and sat pondering life and things till a low moon told her it was long past midnight.

When next Joe came—to be exact it was next afternoon—she saw him transfigured. He was clean as he was kind—there were no folded-down pages for his wife to discover. Moreover, he loved her so entirely, trusted her with such perfect trust. "I—gave away your coat and cap," she said to him, abruptly, to which he only smiled, saying: "It must have been the right thing—or you wouldn't have done it." And although he sensed dimly the change in her, the change that bespoke ordeal, he said nothing of it, but took her to dinner and afterward for a long, lazy wandering through the park. It was the first of many. Marcia found them infinitely [illegible]. She found, too, that Joe had ceased to bore her—that she missed him acutely, longed for his coming, and felt happy in his presence though neither spoke a word.

Thus, time's whirligig brought to pass the inevitable end—a quiet wedding, a brief honeymoon, then the making of a new and delightful home, big enough for two, that by and by became three. Marcia in her happiness remembered her flight of adventure only now and then, but always thankfully—it had been the turning point. She knew Ammerly was abroad—permanently, said the society gossip. He had sent as a wedding gift a small [illegible] of exquisite silver—thus she knew he too remembered thankfully. "I am trying to make my life worth your having saved it," he wrote in answer to her warm acknowledgment. Still it took her all aback, when her second baby came, to find that he watched over her though far away. "I have settled on you my old home, with enough money to live there in comfort. Please do it—cities are no places for young things which have hereditary right to grow up very fine. Knowledge that you and yours are there, safe and happy, is the only thing that can make me sure your inch of time was not spent in vain."

He died a year later. Marcia grieved for him sincerely—but her gratitude to him was not for his benefactions, but for Joe.

China's Clay Cliff Dwellings.

When we speak of houses built of clay in the United States we mean brick. But along the banks of a certain river in the Yunnan province of China the idea is carried out much more literally, according to the Kansas City Star. There a lofty vertical cliff of clay affords homes rent free for several hundred people. The cliff is a bright yellow, so fine in texture that a bit of it rubbed between the fingers gives no feeling of grit. It is easily dug out with spades, and a great many cave dwellings have been excavated in the face of the cliff, overlooking the river. Some of them are two and three stories, the clay being so tenacious that thick horizontal layers of it furnish a series of floors. Nothing at all like these homes is to be seen anywhere else in the world, it is said. Scattered over the face of the cliff among the cave houses, are quaint buddhist shrines, with images carved out of clay.—New York Sun-Herald.

Temporary Truce.

Tommy was the worst of a lot of very bad boys at the little village school. Every day he worried the life out of his unfortunate teacher.

At last, however, came a day when the teacher thought the ringleader had repented.

"Teacher," he said, "I'm going to be a good boy today."

"I am very glad to hear it," smiled teacher. "But why is that?"

"Well," said Tommy, as if ashamed of his promise. "I don't feel very well today."—London Answers.

His Father's Son

By H. LOUIS RAYBOLD

(©, 1920, by McClure Newspaper Syndicate.)

Roger Bennett had grown up in the shadow of his father's disgrace. Since his early school days he had become accustomed to sly innuendoes and looks askance, which at first he attributed to some peculiarity of his own. But little by little he gathered stray bits of information until one memorable day shortly before his graduation from high school he confronted his mother with his scraps of self-knowledge and learned from her the whole bitter tale; how his father had misappropriated trust funds, had been indicted and had committed suicide in prison while serving his sentence.

"Don't forget, my son," she had concluded at the end of the sad story, "that, now, it lies with you to make worthy the name you bear. It was your father's also, but through you it may again become honorable."

And it was with this thought always in mind that Roger left the high school, went through college and came back to make a living for himself and mother, whose scanty resources had been practically depleted by the expense of her son's education. Then, shortly after his return, his mother had died, and Roger, bitterly, but truthfully, blamed the heavy burden of sorrow she had borne for so many years for her untimely death and his consequent great loneliness.

His one comfort during the sad days was the kindness of Virginia Dacre. Back in Roger's school days had been born the one great hate and one great love of his life. The love was for this same Virginia, the hate for her cousin, Wilbur Howard, nephew of the president of the bank where Roger worked.

It had been Wilbur's slurring remarks concerning Roger's father that had made Virginia, at that time a slim, leggy little girl with snapping brown eyes and flyaway pigtails, thrust a protecting arm through Roger's and declare: "You're a hateful thing, Wilbur. If you are my cousin; and no matter what you say about Roger's father, he has the most beautiful mother in the world!" Virginia's own mother was dead.

Roger had never forgotten her partisanship. Not that the old antagonism between her and her cousin had developed. Rather the contrary. For as Virginia grew into a tall, slender girl with her pigtails loosened into waves and curls on her stately head, and Wilbur became a dapper youth with a thin mustache of which he was inordinately proud, people began to hint that the kinship between the two was not going to prove an obstacle to a closer relation, and Roger feared the downfall of the hopes he had long cherished.

And people hinted at other things, also. For instance, there were those who, when Roger was taken into the bank, shook their heads and gave utterance to vague remarks about heredity, "bred in the bone," "like father, like son." And Wilbur himself, a vice president of the bank largely through the grace of being the president's nephew, had felt it incumbent upon his position to remonstrate with his uncle.

"Uncle Will," he began with a slight embarrassed pull at his mustache, "isn't it—er—rather risky to employ young Bennett?"

William Howard laid down the report he was reading and regarded his nephew over the rims of his glasses. "How so?" he asked curtly.

"Well, his father—"

"I'm not employing his father. He's dead," said Uncle Will. "Close the door as you go out, Wilbur."

Then, late one winter evening, Roger, returning to the bank for a forgotten package, surprised a light in an inner office. Investigation discovered Wilbur, rather flustrated, who after an involved explanation of his presence, departed hastily. Roger puzzled over the matter, then dismissed it from his mind. He could not know, of course, that Wilbur was forgetting his own dismay in wondering what was the nature of his (Roger's) errand.

It chanced that on the day the bank examiners elected to visit Tylerville, Wilbur was out of town. As he got off the train on his return he stepped into such a hubbub of excitement as his native village had not known for years. Knots of people stood on the corners in gesticulative discussion. An attempt to use a telephone found all lines busy. The one evening paper flaunted the news in glaring type. "Large sums missing from local bank—books tampered with—suspicion directed toward certain well-known citizen."

With fingers that tried in vain to be steady Wilbur held the sheet and read. Only at the end, as he saw that Roger Bennett was being held for investigation, did the color return to his face. It looked bad for Roger. Poor chap—it did that! And with what little information he could give in addition to that which was evidently already known—. Well, what could they expect? And he had warned his uncle.

At that very moment, paroled at the instance of the president on his own recognizance, Roger Bennett sat in his room facing the great crisis of his life. Upon his action depended the happiness of three people. Did he assert his innocence and tell all he knew, he felt sure of ultimate acquittal—at the expense of the fiance of the girl he loved. For how came back to him many little acts on Wilbur's part—petty excuses to see his books, an erasure or substitution he could not recall making.

Suppose he kept silent? His own life would be ruined and his great hope of making his father's name honorable, defeated. Yet, now that his mother was dead, what did it matter, compared to Virginia's shattered happiness and loss of faith in men? He had seen one woman's life wrecked through the perfidy of the man she loved. Through the long, sleepless night Roger struggled—and when morning came, he had made his decision. Virginia should be happy.

With the morning came an early summons from the president of the bank to come to his office. To his surprise, Roger found him not alone. Wilbur, chewing the end of an unlighted cigar, sat on the edge of a chair, obviously less at ease than either of the two men.

"My nephew tells me," began Howard without preamble "that you came to the bank late one evening. Can you explain?"

Roger looked at Howard in surprise. Then, with a fleeting smile at Wilbur, "No," he said quietly.

It was the president's turn to be amazed. "My boy," he said. "Just why are you doing this?"

At that moment the door opened and Virginia, beautiful in soft furs, stood on the threshold. "I came as you asked me, uncle," she hesitated. "I don't know just why—"

Howard stood up. "Come with me, Wilbur," he said. "I have had my eye on you for some time—on your frequent trips out of town—on your nocturnal visits to the bank. In fact, I sent Bennett here one night for some papers when I felt sure he would stumble upon you. I let suspicion rest temporarily on an innocent man hoping to see you make a clean breast of it. If you had things might have gone easier with you. As it is—" His look was significant as he tightened his hold on the arm of his nephew, who during his words had appeared to shrink perceptibly into his clothes. The door closed upon them both.

Left alone, the man and girl were for a moment at a loss. Then it occurred to Roger that Virginia was taking very easily this startling news about her fiance. "I'm sorry about Wilbur—on your account," he began hesitantly.

"You may be for him, but not on my account!" cried Virginia with heightened color. "Every one seems to be laboring under a mistake. Last night Uncle Will called and asked me if Wilbur and I were engaged. When I denied it he said he was glad. Then he told me of the accusation against you and I—well, I wouldn't believe it and was so—indignant. I guess that Uncle Will thought—thinks—I mean—"

Roger rose suddenly. What was giving Virginia those wonderfully rosy cheeks, and why was she floundering so helplessly?

"Anyway," the girl was continuing, "uncle said that yesterday when you were questioned you were not as emphatic in your denials as he thought you ought to be and he decided you were being quixotic and shielding somebody for some reason or other."

"Virginia," cried Roger suddenly, bending down to her, "since there is no one else may I hope that some day—"

Virginia lifted love-lit eyes to his. "Sooner than that," she said, and as Roger drew her into his arms, "I guess I know why uncle wanted me to come," she whispered happily.

WAS NOT HIS TIME TO DIE

Indiana Judge, Reported Slain in Civil War, Still Alive and in Official Harness.

Judge Henry Clay Allen tells a thrilling story of the battle at Richmond, Ky. He asserts that only a miracle kept him from being found shot in the back more than once. Only a boy of eighteen, he suddenly was thrust into this battle with the rest of his regiment, untrained and undrilled. The fighting was long and hard, and two-thirds of the regiment met death. Judge Allen was shot twice, but once the bullet hit an iron spoon in his pocket, a spoon he carried for his ague medicine, and once the hard heel of his harvester shoe. When the fight was over at last he dropped exhausted where he stood, his face all powder-blackened, and slept for hours and hours. One of his comrades, seeing him lying there, reported to his brother that he had seen him dead, wounded in the face; but the judge is still living.—Indianapolis News.

Dog Hero of Sea Disaster.

Last December when the steamer Ethele ran ashore on the coast of Newfoundland with ninety-two passengers, including a new-born infant, in immediate danger of death in the heavy sea, Reuben Decker of Bonne Bay called his dog and, putting the end of a rope in his mouth, started him to swim to the wrecked ship. The dog, holding the rope fast, plunged into the heavy sea, and after struggling for more than an hour reached the steamer. With the line aboard, the passengers were sent ashore in a breeches buoy, the baby being carried in a mail bag. Now the dog has a silver collar, the gift of a number of humane societies of Philadelphia.

FARM INVENTORY IS INDEX TO PROGRESS

Practicable Way of Answering Important Questions.

Bulletin Recently Issued by Department of Agriculture Enables Farmer to Determine Exactly His Financial Status.

What is the net worth of your farm business? Is it more or less than one would imagine from a casual inspection of your farm? Do you know for sure whether you are going or coming in financial solidity?

These are important questions to the farmer, and questions that are not so easily answered as would at first appear. Farming is an intricate business, and one in which returns from investment are sometimes long delayed so that progress cannot be accurately measured by the amount of money taken in a given time. Sometimes cash income may be almost wholly attributable to reduction in other assets, so that in reality the result is like taking money from one pocket and putting it in another.

The farm inventory, or property list, offers the only practicable way of answering these questions. Once the farmer has made a complete list of all his assets and liabilities and has balanced them he knows just what his net worth is, and when he has made such a list annually he knows each year whether he has gone forward or back, and just how much has been the increase or decrease in the net worth of his business.

The United States Department of Agriculture has just issued Farmers' Bulletin 1182 entitled "Farm Inventories," in which are given detailed instructions for making an inventory of farm property and revising such a list from year to year. By using the simple system described in this bulletin any farmer can determine exactly his financial status and lay the foundation for a permanent system of accounting. Without the farm inventory as a basis no system of accounting that might be chosen would be of any great use to the farmer.

ESSENTIALS FOR BEST EGGS

Proper Proportions of Sound Grains Oyster Shell and Clean Quarters Are Necessary.

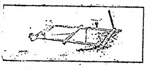
Just because an egg is freshly laid by an apparently healthy hen it cannot be assumed that it is a good egg. Hens that are forced to obtain the greater proportion of their living as scavengers and given a poor range to work on cannot produce eggs of as good quality as can a flock which regularly is fed a good ration.

Eggs lacking protein have a watery white and the shell is apt to be thin, owing to the partial absence of such lime. Such eggs, besides being of less value as food, are more than likely to bring forth puny chickens of low vitality, subject to white diarrhea and an early death. With proper quantities of wheat, bran, clover, oyster shell and sound grains in the ration fed to laying hens, eggs with firm shells, rich in protein and delicately flavored are sure to result, providing, of course, that the flock is given clean nests and runs and is kept free from mites.

DEVICE FOR HAULING FODDER

Several Shocks of Corn Can Easily Be Drawn on Inexpensive Rack to Barn or Yard.

A handy device for drawing corn fodder from the field is shown in the cut. It is a rack made of two poles which are fastened to the bolster of the front wheels. The rear end [illegible] on the ground. Two crosspieces are firmly fastened to the poles and two uprights at the rear prevent the corn from sliding off. Several shocks of corn can be loaded on this and drawn to the feeding yard or barn.



Handy Rack for Fodder.

PREVENT RATTLE OF BONNET

Strip of Lamp Wick or Rawhide Fastened Along Edge of Radiator Will Stop Noise.

The motortruck is, of course, peculiarly liable to rattles, and anything that helps reduce this will be valuable. A strip of round lamp wick or rawhide fastened along the edge of the radiator upon which the front end of the bonnet rests will prevent some of the noise. The ledge can be prepared for the wick or hide by drilling holes, through which the material is threaded, or by drilling smaller holes and securing the wick in place by pieces of fine wire.

MUCH SOIL FERTILITY LOST

Soil Washing or Erosion Can Be Prevented by Keeping Hilly Lands in Sod, Etc.

Much soil fertility is lost every winter by washing or erosion. Put a stop to it by keeping the hilly lands in sod, planting a cover crop, providing underdrainage, filling the gullies with brush, etc.

New Excuse for Bad Spelling.

If a pupil makes mistakes in spelling or arithmetic don't give him a bad mark, but send for a psychoanalyst. That is the latest innovation schoolteachers in this city are discussing.

It is the theory of the psychoanalyst that it is in the apparent breaks of speech that the man or child expresses true thoughts and desires, that when a speaker of a legislative body declared a session closed instead of open he had in the back of his head the wish that the meeting was closed. So that when the pupil asked to spell "cat" spells "fat" the psychoanalytic teacher reads in the pupil's misspelling a subconscious desire to be fat.

So a pupil who habitually misspells "cat" as "fat" may be placed on an egg and milk diet under the psychoanalyst theory.

"We never say anything but what we want to say," say the leaders of the new psychology.—Portland Oregonian.

Falcons Prey on London Birds.

Air raiders are still at work over London. Twice during the last few weeks an enormous peregrine falcon has braved the dangers of the city and feasted on the famous pigeons of St. Paul's cathedral. A pair of these rare hawks have been frequently seen near Bromley, Kent, and are thought to be the ones that have been doing the raiding. As these fierce birds usually haunt wild and desolate parts of the coasts naturalists here are at loss to explain their coming to London for food. It is estimated that a peregrine falls on its victim at a speed of 150 miles to break the back of the unsuspecting bird and at the same time rips it with the dagger-like talons on each feet.—London Answers.

A Lost Appetite.

"My most embarrassing moment occurred Saturday when I went to lunch with my girl friends. I finished before they did and I happened to look around and noticed a piece of cake on the table, and I thought the lady had left not wanting the cake, so I spoke to my friends about it. They told me to take it because if I didn't the waiter would.

I hesitated a while, then got up and took the cake and commenced to eat it, when here comes the lady back with some ice cream. She called the waiter. I went over and told her I took it and I bought her another piece, and I went out not finishing my piece.—Exchange.

Accounted For.

"I was reading an article which says that jazz is popular in China."

"Well, if you've ever heard a Chinese orchestra you'll know why."

He could not know, of course, that Wilbur was forgetting his own dismay in wondering what was the nature of his (Roger's) errand.

It chanced that on the day the bank examiners elected to visit Tylerville, Wilbur was out of town. As he got off the train on his return he stepped into such a hubbub of excitement as his native village had not known for years. Knots of people stood on the corners in gesticulative discussion. An attempt to use a telephone found all lines busy. The one evening paper flaunted the news in glaring type. "Large sums missing from local bank—books tampered with—suspicion directed toward certain well-known citizen."

With fingers that tried in vain to be steady Wilbur held the sheet and read. Only at the end, as he saw that Roger Bennett was being held for investigation, did the color return to his face. It looked bad for Roger. Poor chap—it did that! And with what little information he could give in addition to that which was evidently already known—. Well, what could they expect? And he had warned his uncle.

At that very moment, paroled at the instance of the president on his own recognizance, Roger Bennett sat in his room facing the great crisis of his life. Upon his action depended [illegible] asserted his innocence and told all he knew, he felt sure of ultimate acquittal—at the expense of the future of the girl he loved. For now came back to him many little acts on Wilbur's part—petty excuses to see his books, an erasure or substitution he could not recall making.

Suppose he kept silent? His own life would be ruined and his great hope of making his father's name honorable, defeated. Yet, now that his mother was dead, what did it matter, compared to Virginia's shattered happiness and loss of faith in men? He had seen one woman's life wrecked through the perfidy of the man she loved. Through the long, sleepless night Roger struggled—and when morning came, he had made his decision. Virginia should be happy.

With the morning came an early summons from the president of the bank to come to his office. To his surprise, Roger found him not alone. Wilbur, chewing the end of an unlighted cigar, sat on the edge of a chair, obviously less at ease than either of the two men.

"My nephew tells me," began Howard without preamble, "that you came to the bank late one evening. Can you explain?"

Roger looked at Howard in surprise. Then, with a fleeting smile at Wilbur, "No," he said quietly.

It was the president's turn to be amazed. "My boy," he said, "just why are you doing this?"

At that moment the door opened and Virginia, beautiful in soft furs, stood on the threshold. "I came as you asked me, uncle," she hesitated. "I don't know just why—"

Howard stood up. "Come with me, Wilbur," he said. "I have had my eye on you for some time—on your frequent trips out of town—on your nocturnal visits to the bank. In fact, I sent Bennett here one night for some papers when I felt sure he would stumble upon you. I let suspicion rest temporarily on an innocent man hoping to see you make a clean breast of it. If you had things might have gone easier with you. As it is—" His look was significant as he tightened his hold on the arm of his nephew, who during his words had appeared to shrink perceptibly into his clothes. The door closed upon them both.

Left alone, the man and girl were for a moment at a loss. Then it occurred to Roger that Virginia was taking very easily this startling news about her fiance. "I'm sorry about Wilbur—on your account," he began hesitantly.

"You may be for him, but not on my account!" cried Virginia with heightened color. "Every one seems to be laboring under a mistake. Last night Uncle Will called and asked me if Wilbur and I were engaged. When I denied it he said he was glad. Then he told me of the accusation against you and I—well, I wouldn't believe it and was so—indignant. I guess that Uncle Will thought—thinks—I mean—"

Roger rose suddenly. What was giving Virginia those wonderfully rosy cheeks, and why was she floundering so helplessly?

"Anyway," the girl was continuing, "uncle said that yesterday when you were questioned you were not as emphatic in your denials as he thought you ought to be and he decided you were being quixotic and shielding somebody for some reason or other."

"Virginia," cried Roger suddenly, bending down to her, "since there is no one else may I hope that some day—"

Virginia lifted love-lit eyes to his. "Sooner than that!" she said, and as Roger drew her into his arms, "I guess I know why uncle wanted me to come," she whispered happily.

WAS NOT HIS TIME TO DIE

Indiana Judge, Reported Slain in Civil War, Still Alive and in Official Harness.

Judge Henry Clay Allen tells a thrilling story of the battle at Richmond, Ky. He asserts that only a miracle kept him from being found shot in the back more than once. Only a boy of eighteen, he suddenly was thrust into this battle with the rest of his regiment, untrained and undrilled. The fighting was long and hard, and two-thirds of the regiment met death. Judge Allen was shot twice, but once the bullet hit an iron spoon in his pocket, a spoon he carried for his ague medicine, and once the hard heel of his harvester shoe. When the fight was over at last he dropped exhausted where he stood, his face all powder-blackened, and slept for hours and hours. One of his comrades, seeing him lying there, reported to his brother that he had seen him dead, wounded in the face; but the judge is still living.—Indianapolis News.

Dog Hero of Sea Disaster.

Last December when the steamer Ethele ran ashore on the coast of Newfoundland with ninety-two passengers, including a new-born infant, in immediate danger of death in the heavy sea, Reuben Decker of Bonne Bay called his dog and, putting the end of a rope in his mouth, started him to swim to the wrecked ship. The dog, holding the rope fast, plunged into the heavy sea, and after struggling for more than an hour reached the steamer. With the line aboard, the passengers were sent ashore in a breeches buoy, the baby being carried in a mail bag. Now the dog has [illegible] the gift of a number of humane societies of Philadelphia.

FARM INVENTORY IS INDEX TO PROGRESS

Practicable Way of Answering Important Questions.

Bulletin Recently Issued by Department of Agriculture Enables Farmer to Determine Exactly His Financial Status.

What is the net worth of your farm business? Is it more or less than one would imagine from a casual inspection of your farm? Do you know for sure whether you are going or coming in financial standing?

These are important questions to the farmer, and questions that are not so easily answered as would at first appear. Farming is an intricate business, and one in which returns from investment are sometimes long delayed, so that progress cannot be accurately measured by the amount of money taken in a given time. Sometimes cash income may be almost wholly attributable to reduction in other assets, so that in reality the result is like taking money from one pocket and putting it in another.

The farm inventory, or property list, offers the only practicable way of answering these questions. Once the farmer has made a complete list of all his assets and liabilities and has balanced them he knows just what his net worth is, and when he has made such a list annually he knows each year whether he has gone forward or back, and just how much has been the increase or decrease in the net worth of his business.

The United States Department of Agriculture has just issued Farmers' Bulletin 1182, entitled "Farm Inventories," in which are given detailed instructions for making an inventory of farm property and revising such a list from year to year. By using the simple system described in this bulletin any farmer can determine exactly his financial status and lay the foundation for a permanent system of accounting. Without the farm inventory as a basis no system of accounting that might be chosen would be of any great use to the farmer.

ESSENTIALS FOR BEST EGGS

Proper Proportions of Sound Grains Oyster Shell and Clean Quarters Are Necessary.

Just because an egg is freshly laid by an apparently healthy hen it cannot be assumed that it is a good egg. Hens that are forced to obtain the greater proportion of their living as scavengers and given a poor range to work on cannot produce eggs of as good quality as can a flock which regularly is fed a good ration.

Eggs lacking protein have a watery white and the shell is apt to be thin, owing to the partial absence of such lime. Such eggs, besides being of less value as food, are more than likely to bring forth puny chickens of low vitality, subject to white diarrhea and an early death. With proper quantities of wheat, bran, clover, oyster shell and sound grains in the ration fed to laying hens eggs with firm shells, rich in protein and delicately flavored are sure to result, providing, of course, that the flock is given clean nests and runs and is kept free from mites.

DEVICE FOR HAULING FODDER

Several Shocks of Corn Can Easily Be Drawn on Inexpensive Rack to Barn or Yard.

A handy device for drawing corn fodder from the field is shown in the cut. It is a rack made of two poles which are fastened to the bolster of the front wheels. The rear end drags on the ground. Two crosspieces are firmly fastened to the poles and two uprights at the rear prevent the corn from sliding off. Several shocks of corn can be loaded on this and drawn to the feeding yard or barn.

Handy Rack for Fodder.

PREVENT RATTLE OF BONNET

Strip of Lamp Wick or Rawhide Fastened Along Edge of Radiator Will Stop Noise.

The motortruck is, of course, peculiarly liable to rattles, and anything that helps reduce this will be valuable. A strip of round lamp wick or rawhide fastened along the edge of the radiator upon which the front end of the bonnet rests will prevent some of the noise. The ledge can be prepared for the wick or hide by drilling holes, through which the material is threaded, or by drilling smaller holes and securing the wick in place by pieces of fine wire.

MUCH SOIL FERTILITY LOST

Soil Washing or Erosion Can Be Prevented by Keeping Hilly Lands in Sod, Etc.

Much soil fertility is lost every winter by washing or erosion. [illegible]

New Excuse for Bad Spelling.

If a pupil makes mistakes in spelling or arithmetic don't give him a bad mark, but send for a psychoanalyst. That is the latest innovation schoolteachers in this city are discussing.

It is the theory of the psychoanalyst that it is in the apparent breaks of speech that the man or child expresses true thoughts and desires, that when a speaker of a legislative body declared a session closed instead of open he had in the back of his head the wish that the meeting was closed. So that when the pupil asked to spell "cat" spells "fat" the psychoanalytic teacher reads in the pupil's misspelling a subconscious desire to be fat.

So a pupil who habitually misspells "cat" as "fat" may be placed on an egg and milk diet under the psychoanalyst theory.

"We never say anything but what we want to say," say the leaders of the new psychology.—Portland Oregonian.

Falcons Prey on London Birds.

Air raiders are still at work over London. Twice during the last few weeks an enormous peregrine falcon has braved the dangers of the city and feasted on the famous pigeons of St. Paul's cathedral. A pair of these rare hawks have been frequently seen near Bromley, Kent, and are thought to be the ones that have been doing the raiding. As these fierce birds usually haunt wild and desolate parts of the coasts naturalists here are at loss to explain their coming to London for food. It is estimated that a peregrine falls on its victim at a speed of 150 miles to break the back of the unsuspecting bird and at the same time rips it with the dagger-like talons on each foot.—London Answers.

A Lost Appetite.

My most embarrassing moment occurred Saturday when I went to lunch with my girl friends. I finished before they did and I happened to look around and noticed a piece of cake on the table, and I thought the lady had left not wanting the cake, so I spoke to my friends about it. They told me to take it because if I didn't the waiter would.

I hesitated a while, then got up and took the cake and commenced to eat it, when here comes the lady back with some ice cream. She called the waiter. I went over and told her I took it and I bought her another piece, and I went out not finishing my piece.—Exchange.

GOODRIDGE CO-OPERATIVE
CREAMERY COMPAY

Due to the difference between butter scoring 92 and that scoring 90—a difference of 7½ cents per pound—the Board of Directors of the Goodridge creamery have decided to raise the premium on sweet cream from 2 cents per pound to 7 cents, commencing Dec. 1 next and continuing until further notice

This applies only to monthly patrons The former premium of 2 cents per pound will continue to be paid to cash patrons for the time being.

This is a plan urged by the creamery Inspector and seconded by myself, as being the best way to take care of the vast difference in price between good and poor butter.

County Nurse for Schools

Miss Marie Knutson of Grand Forks has been secured to act in the capacity of school nurse in Pennington county. Miss Knutson arrived here Wednesday and immediately entered upon her duties in the local school. Every child in school will be given a physical examination. It is Miss Knutson's intention to visit the balance of the schools in the county as soon as possible and organize nursing schools for the benefit of the parents and others with regard to the proper care to be taken and to teach all interested in hygiene.

A short course in nursing is now being given under the auspices of the local chapter of the Red Cross Miss Drexton, of the northern division of the Junior Red Cross, is in charge of the work. A class for the girls in the high school and the eighth and seventh seventh grades is given in the afternoon from 2.30 to 4 o'clock, and a class for adult ladies is given in the evening from 7:30 to 9. The attendance at the first session on Wednesday night was very good This is a two weeks' course and it is the hope of the committee in charge that all who possibly can will avail themselves of this opportunity and in that way make the venture a success.

The Youth's Companion Home Calendar for 192

The publishers of The Youth's Companion will, as always at this season, present to every subscriber whose subscription, $2.50, is paid for 1921, a calendar for the new year. The tablets are printed in red and olive green and, besides giving the days of the current month in bold legible type, give the calendar of the preceding and succeeding months in smaller type in the margin. It is a rich and practical piece of work.

School Notes

School reopened Monday with the full force on hand. Teachers and pupils alike enjoyed their vacation and are now happily at work again.

At the usual assembly hour Wednesday morning Ethel Vaughan reported to the school her achievement through the sheep club project. First, her lamb brought enviable prizes at local and and county fairs; then it was sold at sold at the annual stock show held in St. Paul, where it brought a net sum of $18.

Report cards for the month of December were given out Wednesday. Parents are urged to look them over carefully. After doing this talk with the child about the work in school, giving him such encouragement as you may deem advisable.

The following pupils in the High school room had perfect attendance during the month of December: Edith Schie, Ida Anderson, Christine Bundhund, Harry McDonald, Daniel Payne and Vivian Thoreson.

Funeral Services for Henry Svare

The remains of Henry Svare, who died for his county in October, 1918, were returned here from France, arriving here last Saturday. Funeral services were held at the Torgerson church yesterday under the auspices of Henry Svare Post, American Legion, Rev. G. A. Hanson officiating, and interment was made in the Torgerson cemetery. Mrs. Hans Svare and sons, John and Calmer, and daughter, Mrs. Henry Hanson, were present.

No Money for Red Lake Road

A dispatch from Washington states that in a wrangle over the Indian appropriation bill in the house of representatives the house strudk out of the bill appropriations of $10,000 each for the expenses of the annual Chippewa council and for the construction of roads on the Red Lake reservation.. Representatives Harold Knutson and Halvor Steenerson made vigorous objection to the elimination of these items, but the members were in an ugly mood and they were bowled over.

This probably means no work done on the road to Red Lake next summer.

Passed the House

The Tribune received a telegram Tuesday saying that Congressman Steenerson's bill to authorize the improvement of Red lake and Red Lake river for navigation, drainage and flood control passed the house unanimously

Practically every one is familiar with the bill and realizes just what it means to the people living in the Red Lake river valley. It will call for the installation of flood gates at the head of the river, controlling the outlet and eliminating the floods that have been endured by the people in that district for several years past. The installation of these flood gates, the deepening of the channel of the Red river to take care of the extra amount of water, means the reclaiming of several thousand acres of the choicest farming land and places the district on a basis where floods will be a thing of the past.

The district includes the counties of Polk, Pennington, Red Lake, Marshall, Beltrami and Clearwater.

How Would This Help

The F[illegible] State bank wrote to Hon. Halvor Steenerson in regard to the financial [illegible] exigency in this country, caused to [illegible] extent by the inability of the Federal Reserve banks, under the law, to di[illegible] farmers' paper for the country b[illegible] in replying he sent a copy of a [illegible] introduced by Hon. L T. McFadden [illegible] how this would improve the [illegible] it is hard to understand T[illegible] of the bill follows:

A bill t[illegible] section 9 of the Federal Res[illegible] Act, as amended by the Act appro[illegible] June 17, 1917.

Be it e[illegible] by the Senate and House of [illegible] sentatives of the United States of [illegible] in Congress assembled, That [illegible] 9 of the Act approved Dec. 23, 1[illegible] known as the Federal Reserve [illegible] amended by the Act approved [illegible] 17, 1917, be further amended [illegible] out the proviso in paragraph [illegible] said section and inserting in [illegible] thereof the following:

"Provid[illegible] however, That no Federal reserve b[illegible] be permitted to discount for [illegible] bank or trust company not[illegible] or bills of exchange of any o[illegible] who is liable for borrowed [illegible] such state bank or trust co[illegible] an amount greater than that [illegible] could be borrowed lawfully from [illegible] state bank or trust company [illegible] a national banking associati[illegible]

Cha[illegible] Management

Contr[illegible] Non-partisan league organiz[illegible] North Dakota passed last Satu[illegible] from A. C. Townley and his assist[illegible] an executive committee of five f[illegible]

Despite [illegible] that the state convention [illegible] league held at Brainard adopted [illegible] endorsing Townley's Kansas [illegible] declaring that it stab[illegible] Townley, William Lem[illegible] E. Wood, members of [illegible] executive committee, in [illegible] committee of five farmers [illegible] tion took control of the league [illegible] Dakota from their hands.

It is [illegible] that the change signifie[illegible] loss of prestige of the [illegible] North Dakota. The situation [illegible] will probably go farther [illegible] bitterness between town[illegible] which has been extrem[illegible] action taken by any faction [illegible] North Dakota fight since it b[illegible] blow at North Dakota's [illegible] political factions, the [illegible] gang," whose administra[illegible] gave birth to the league [illegible] Dakota and the autocrati[illegible] machine which has succeed[illegible] league management since [illegible] has been in power in the [illegible] change proves to be bons[illegible] no doubt strenghthen the [illegible] league and add to its prest[illegible]

Bemidji High School Burns

Fire totally destroyed the Bemidji high school building at 5 o'clock Monday morning, The fire started from the boiler room.

The loss was estimated at $125,000.

CONDITIONING BIRDS FOR POULTRY SHOWS

Stand Better Chances for Winning if Well Trained.

Poultry Specialists of United States Department of Agriculture Give Suggestions for Preparation of Fowls.

Although the larger poultry shows are usually held in the fall, smaller exhibitions are staged throughout the winter months. The following advice in training and conditioning birds previous to a show, given by poultry specialists of the United States Department of Agriculture, is good the whole year round. The bird that has been properly trained and prepared will stand a better chance every time of winning a prize than another bird equally good, but wild or easily frightened, or whose plumage is soiled or dirty.

After the birds are selected, remove them from the rest of the flock and place each bird in an exhibition coop for at least a part of each day. Fowls so confined will become accustomed to the coop. Handling them—that is, removing them from the coop each day—will have the effect of making them tame.. In handling the birds and removing and returning them to and from the coops, move quietly and handle the birds gently so as not to frighten them.

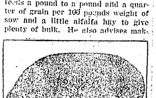
Examine the plumage so that the fowl will become accustomed to such movements when being handled by the judge. Likewise, attempt to compose the bird by smoothing and stroking the wattles gently; this seems to have a soothing effect on the fowls, and when done frequently and properly they come to look for it when one approaches the coop.

Birds to be exhibited should not be confined to the exhibition coops for too great a period, as long, continuous cooping may cause them to get out of condition and therefore unfit for show. A satisfactory plan is to confine the birds for a part of each day or every other day alternately up to a few days before sending them to the show, when they should be confined until ready to ship.

EXERCISE FOR SOWS NEEDED

Feed for Animals Should Be Scattered Around Floor to Compel Them to Hustle.

"Sows due to farrow in April or May ought to have some bulky feed. Prof. J. H. Sheperd of the North Dakota Agricultural college reports that the herdsman at the agricultural college feeds a pound to a pound and a quarter of grain per 100 pounds weight of sow and a little alfalfa hay to give plenty of bulk. He also advises making the sows take exercise, scattering their feed around on the floor so they will have two hours or more of work in picking it up. Another good thing about alfalfa hay is that it keeps them on their feet quite a little while. Pigs from sows which have had plenty of exercise and bulky feed are usually much stronger than those from fat, lazy sows.



Prize-Winning Poland China Sow

ROTTEN EGG IS UNDESIRABLE

Many Farmers Do Not Seem to Care or Bother About Clean Nests for the Layers.

No one likes a rotten egg, consequently no one is going to buy one—not even the commission dealer. Many farmers do not care whether their hens steal their nests or not and do not bother to hunt for the eggs until market day comes around. Once a week is sometimes as often as eggs are looked for. Any eggs that have come from an old nest or that in any way look suspicious should be candled at home before sending them to market.

FARM INVENTORY HELPS BUSINESS

Enables Farmer to Determine Whether He Is Going or Coming Financially.

ANSWER TO MANY QUESTIONS

Complete List of Assets and Liabilities Each Year Tells Land Owner Just How Much Increase or Decrease Has Been.

What is the net worth of your farm business? Is it more or less than one would imagine from a casual inspection of your farm? Do you know for sure whether you are going or coming in financial standing?

Question Not Easily Answered.

These are important questions to the farmer and questions that are not so easily answered as would at first appear. Farming is an intricate business and one in which returns from investment are sometimes long delayed, so that progress cannot be accurately measured by the amount of money taken in in a given time. Sometimes cash income may be almost wholly attributable to reduction in other assets, so that in reality the result is like taking money from one pocket and putting it in another.

Farm Inventory is Index to Financial Progress.

The farm inventory, or property list, offers the only practicable way of answering these questions. Once the farmer has made a complete list of all his assets and liabilities and has balanced them he knows just what his net worth is, and when he has made such a list annually he knows each year whether he has gone forward or back and just how much has been the increase or decrease in the net worth of his business.

Detailed Instructions.

The United States Department of Agriculture has just issued Farmers' Bulletin 1128, entitled "Farm Inventories," in which are given detailed instructions for making an inventory of farm property and revising such a list from year to year. By using the single system described in this bulletin any farmer can determine exactly his financial status and lay the foundation for a permanent system of accounting Without the farm inventory as a basis no system of accounting that might be chosen would be of any great use to the farmer.

FANNING MILL VERY USEFUL

Present High Price of Grain Should Bring Machine Into More Use on Stormy Days.

In many parts of the country there has been a tendency to let the fanning mill rest and rust and gather dust and to pay the mill or elevator for cleaning the grain, paying the bill by accepting a low price for the uncleaned wheat or oats or barley. Besides, the chickens lose the screenings. The present high price of grain should bring many a neglected fanning mill into profitable use. Incidentally, farmers will have profitable work for stormy days, and much cheap feed for chickens, pigs and other animals.

EASY TO WINTER FALL PIGS

Where Farmer Is Properly Equipped He Can Raise Young Animals Without Difficulty.

More fall pigs are being raised nowadays than was the case a few years ago. This is due largely to the fact that grain is relatively high-priced. When a man is properly equipped for taking care of fall pigs through the winter season he can raise them about as cheaply as he can spring pigs and he gets more out of his sow by breeding her twice a year than only once. It is not difficult to winter fall pigs if one gives the matter proper attention.

CUSTOMERS SECURED FOR POULTRY SHOWS

Persons at Summer Resorts Buy Produce in Winter.

City People Have Inspected Producer's Farm and Know Under What Conditions Foodstuffs Are Raised —One Case Cited.

Many producers living near summer resorts supply produce in the summer months to the persons at the resorts and during the other months of the year ship produce to these persons while they are in the city. This, say marketing specialists of the United States Department of Agriculture, is one of the best methods of obtaining customers for direct marketing, as the producer and consumer have some acquaintance. In most instances the customers have seen the producer's farm and know what conditions the articles are produced under.

One man who lives near a summer resort in Indiana is about twelve miles from the nearest town of any size. He does not desire to drive to this town to dispose of his farm produce and is not satisfied with the prices that the hucksters pay. Consequently he built up a business of supplying products to resorters in the summer and of shipping produce by parcel post and express to these persons at their city homes in the winter.

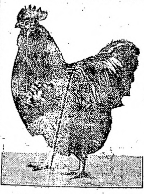
The principal products shipped are butter, eggs and dressed poultry. This producer uses good shipping containers and packs produce attractively. As he is acquainted with his customers, he renders statements of accounts only once a month. In this way the matter of making payments is simplified for the customers.

This producer has had no trouble in establishing his business nor in retaining customers. He states that his only trouble has been in getting enough high-grade produce to supply all of his customers.

OBTAIN BEST HATCHING EGGS

One Male Should Be Used With Every 15 Hens of Breeds Like Orpingtons or Rocks.

The male must be in the flock from ten to fourteen days before the eggs laid can be used for hatching purposes. After the male has been removed from the flock, hatchable eggs will be laid for about three weeks thereafter. To secure good, hatchable eggs, provide one male to every twenty leghorn or other egg breeds; use one male to every fifteen Rocks, Reds, Wyandottes or Orpingtons, and one male to each twelve Langshans, Brahmas or other meat breeds.



Single Comb Black Orpington.

BARIUM POISONOUS TO RATS

Tests Indicate That a 20 Per Cent Mixture With Food Makes Most Satisfactory Bait.

A study of barium carbonate as a rat poison, made by the United States Department of Agriculture, indicates that a 20 per cent mixture with food makes a satisfactory bait. With this percentage a rat ordinarily needs to eat only one-third or three-eighths of a meal of average size to get a fatal dose. It was found that with this dose many of the rats poisoned died within 24 hours, though an occasional rat was found which survived an even larger amount, thus indicating that 100 per cent mortality is not to be expected in any case.

A summary of results of experiments conducted by various persons with a view to determining the deadliness of barium to different animals shows the fallacy of the assumption that barium is poisonous only to rats. It is pointed out that the fatal dose of barium per pound tends to decrease relatively as the size of the animal increases, and that a bait calculated to be fatal to rats may be assumed to be more or less dangerous to small domestic animals also.

University Lyceum Course

THIRD NUMBER

Tuesday, February 1, 1921

A. W. OLMSTEAD.

Mr. Olmstead is the secretary of the lecture department of the State University and the general manager of the lecturing business in Minnesota. He knows perhaps better than any other man in the state what the people want and he tries to adapt his material and methods to fit their needs.

Mr. Olmstead believes in democracy on the platform as well as in other places. He believes the chief difficulty with lecturers is that they totally ignore the audience. They usually make a lot of noise and demonstartion on the platform telling the people things they have always known in language which cannot be understood without an interpreter. Mr. Olmstead will introduce you to the Open Forum style of lecture in which the audience is given the biggest part on the program. The lecture will be short and snappy. It will open up some of the biggest issues in national and world affairs At the close the audience will be given an opportunity in a systematic parliamentary manner to ask questions and take part in discussion. This will prove the most lively part of the program.

Mr. Olmstead is a lawyer. He has been a close student of public affairs. His views are always progressive and liberal, but he knows how to allow for the other fellow's point of view. He has been for ten years a University teacher, but he boasts that no one can tell it on him. He knows how to translate a college education into the English language.

GUINEA FOWL IN GREATER DEMAND

Of Big Value in Various Sections as Substitute for Many Game Birds.

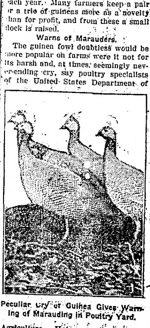
MAKES GOOD AS POLICEMAN

Hotels and Restaurants in Large Cities Eager to Secure Young Birds Which Are Tender and of Fine Flavor.

The great majority of guinea fowl are raised in small flocks of from 10 to 25 upon farms in the Middle West and in the South, but a few of the large poultry raisers, particularly those who are within easy reach of the large Eastern markets, make a practice of raising a hundred or so guineas each year. Many farmers keep a pair or a trio of guineas more as a novelty than for profit, and from these a small flock is raised.

Warns of Marauders.

The guinea fowl doubtless would be more popular on farms were it not for its harsh and, at times, seemingly never-ending cry, say poultry specialists of the United States Department of Agriculture. However, some people look on this cry as an argument in the guinea's favor, as it gives warning of marauders in the poultry yard. Similarly, their pugnacious disposition while sometimes causing disturbances among the other poultry also makes them show fight against hawks and other common enemies, so that guineas sometimes are kept as guards over the poultry yard. Often a [illegible] few guineas are raised with a flock of turkeys and allowed to roost in the same tree, where they can give warning if any theft is attempted during the night.



Peculiar Cry of Guinea Gives Warning of Marauding in Poultry Yard.

Used as Substitute.

The value of the guinea fowl as a substitute for game birds such as grouse, partridge, quail and pheasant is becoming more and more recognized by those who are fond of this class of meat and the demand for these fowls is increasing steadily. Many hotels and restaurants in the large cities are eager to secure prime young guineas, and often they are served at banquets and club dinners as a special delicacy. When well cooked, guineas are attractive in appearance, although darker than common fowls, and the flesh of young birds is tender and of especially fine flavor, resembling that of wild game. Like all other fowl, old guineas are very likely to be tough and rather dry.

RIDDING HENHOUSE OF MITES

Cleanliness and Disinfection Required to Destroy Parasites That Live on Fowls.

To rid the henhouse of the little red mite that stunts the hens so much requires cleanliness and disinfecting. The filth must be cleaned up, the house ventilated and the sunlight let in. Removable roosts and drop boards will help clean up the house. To disinfect the roosts and house everything should be painted or sprayed with a solution of two parts of oil and one part of stock dip. Applications should be made in pairs about five or six days apart in order to kill the mites that have hatched since the last spraying.

GREAT ASSISTANCE OF BIRDS

Little Feathered Songsters Do Much Toward Good Crop of Fruit by Devouring Insects.

A good crop of birds goes a long way toward a good crop of fruit. Encourage the children to feed the birds during the cold, stormy weather and in spring they will pay you a hundred-fold by clearing the orchards of insect pests.

SQUEALING PIG BEST

The pig that keeps still is the pig that sucks the most swill, runs a saying. Maybe so, but we have observed that the hungry porker who is always complaining to high heaven about his appetite usually proves a growthier, thriftier, and consequently more profitable individual than his tongue-tied brother.

THE GOODRIDGE BANNER

VOLUME XV, No 5. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JANUARY 21, 1920 $1.50 PER YEAR

No Money for Red Lake Road

A dispatch from Washington states that in a wrangle over the Indian appropriation bill in the house of representatives the house struck out of the bill appropriations of $10,000 each for the expenses of the annual Chippewa council and for the construction of roads on the Red Lake reservation. Representatives Harold Knutson and Halvor Steenerson made vigorous objection to the elimination of these items, but the members were in an ugly mood and they were bowled over.

This probably means no work done on the road to Red Lake next summer.

Passed the House

The Tribune received a telegram Tuesday saying that Congressman Steenerson's bill to authorize the improvement of Red lake and Red Lake river for navigation, drainage and flood control passed the house unanimously.

Practically every one is familiar with the bill and realizes just what it means to the people living in the Red Lake river valley. It will call for the installation of flood gates at the head of the river, controlling the outlet and eliminating the floods that have been endured by the people in that district for several years past. The installation of these flood gates, the deepening of the channel of the Red river to take care of the extra amount of water, means the reclaiming of several thousand acres of the choicest farming land and places the district on a basis where floods will be a thing of the past.

The district includes the counties of Polk, Pennington, Red Lake, Marshall, Beltrami and Clearwater.

How Would This Help

The Farmers' State bank wrote to Hon. Halvor Steenerson in regard to the financial stringency in this country, caused to a large extent by the inability of the Federal reserve banks, under the law, to discount farmers' paper for the country banks. In replying he sent a copy of a bill introduced by Hon. L. T. McFadden. Just how this would improve the situation it is hard to understand. The text of the bill follows:

A bill to amend Section 9 of the Federal Reserve Act, as amended by the Act approved June 17, 1917.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 9 of the Act approved Dec. 23, 1913, known as the Federal Reserve Act, as amended by the Act approved June 17, 1917, be further amended by striking out the proviso in paragraph 10 of said section and inserting in lieu thereof the following:

"Provided, however, That no Federal reserve bank shall be permitted to discount for any state bank or trust company notes, drafts or bills of exchange of any one borrower who is liable for borrowed money to such state bank or trust company in an amount greater than that which could be borrowed lawfully from such state bank or trust company were it a national banking association."

Change of Management

Control of the Non partisan league organization in North Dakota passed last Saturday from A. C. Townley and his assistants to an executive committee of five farmers.

Despite the fact that the state convention of the league held at Brainerd adopted resolutions endorsing Townley's Kansas City plan and declaring that it stands solidly behind Townley, William Lemke and F. B. Wood, members of the national executive committee, in [illegible] the committee of five farmers [illegible] convention took control of the league in North Dakota from their hands.

It is [illegible] that the change signifies [illegible] loss of prestige of the [illegible] in North Dakota. The situation [illegible] will probably go farther to [illegible] bitterness between town [illegible] which has been extreme [illegible] action taken by any faction [illegible] North Dakota fight since it began [illegible] blow at North Dakota's [illegible] political factions, the [illegible] gang," whose administrators gave birth to the league [illegible] Dakota and the autocratic machine which has succeeded [illegible] league management since [illegible] has been in power in the [illegible] change proves to be bona [illegible] no doubt strengthen the [illegible] league and add to its prestige.

Bemidji High School Burns

Fire totally destroyed the Bemidji high school building at 5 o'clock Monday morning. The fire started from the boiler room.

The loss was estimated at $125,000.

CONDITIONING BIRDS FOR POULTRY SHOWS

Stand Better Chances for Winning if Well Trained.

Poultry Specialists of United States Department of Agriculture Give Suggestions for Preparation of Fowls.

Although the larger poultry shows are usually held in the fall, smaller exhibitions are staged throughout the winter months. The following advice in training and conditioning birds previous to a show, given by poultry specialists of the United States Department of Agriculture, is good the whole year round. The bird that has been properly trained and prepared will stand a better chance every time of winning a prize than another bird equally good, but wild or easily frightened, or whose plumage is soiled or dirty.

After the birds are selected, remove them from the rest of the flock and place each bird in an exhibition coop for at least a part of each day. Fowls so confined will become accustomed to the coop. Handling them—that is, removing them from the coop each day—will have the effect of making them tame. In handling the birds and removing and returning them to and from the coops, move quietly and handle the birds gently so as not to frighten them.

Examine the plumage so that the fowl will become accustomed to such movements when being handled by the judge. Likewise, attempt to compose the bird by smoothing and stroking the wattles gently; this seems to have a soothing effect on the fowls, and when done frequently and properly they come to look for it when one approaches the coop.

Birds to be exhibited should not be confined to the exhibition coops for too great a period, as long, continuous cooping may cause them to get out of condition and therefore unfit for show. A satisfactory plan is to confine the birds for a part of each day or every other day alternately up to a few days before sending them to the show, when they should be confined until ready to ship.

EXERCISE FOR SOWS NEEDED

Feed for Animals Should Be Scattered Around Floor to Compel Them to Hustle.

"Sows due to farrow in April or May ought to have some bulky feed." Prof. J. H. Sheperd of the North Dakota Agricultural college reports that the herdsman at the agricultural college feeds a pound to a pound and a quarter of grain per 100 pounds weight of sow and a little alfalfa hay to give plenty of bulk. He also advises mak-

Prize-Winning Poland China Sow.

ing the sows take exercise, scattering their feed around on the floor so they will have two hours or more of work in picking it up. "Another good thing about alfalfa hay is that it keeps them on their feet quite a little while. Pigs from sows which have had plenty of exercise and bulky feed are usually much stronger than those from fat, lazy sows.

ROTTEN EGG IS UNDESIRABLE

Many Farmers Do Not Seem to Care or Bother About Clean Nests for the Layers.

No one likes a rotten egg, consequently no one is going to buy one—not even the commission dealer. Many farmers do not care whether their hens steal their nests or not and do not bother to hunt for the eggs until market day comes around. Once a week is sometimes as often as eggs are looked for. Any eggs that have come from an old nest or that in any way look suspicious should be candled at home before sending them to market.

FARM INVENTORY HELPS BUSINESS

Enables Farmer to Determine Whether He Is Going or Coming Financially.

ANSWER TO MANY QUESTIONS

Complete List of Assets and Liabilities Each Year Tells Land Owner Just How Much Increase or Decrease Has Been.

What is the net worth of your farm business? Is it more or less than one would imagine from a casual inspection of your farm? Do you know for sure whether you are going or coming in financial standing?

Question Not Easily Answered.

These are important questions to the farmer and questions that are not so easily answered as would at first appear. Farming is an intricate business and one in which returns from investment are sometimes long delayed, so that progress cannot be accurately measured by the amount of money taken in in a given time. Sometimes cash income may be almost

Farm Inventory is Index to Financial Progress.

wholly attributable to reduction in other assets, so that in reality the result is like taking money from one pocket and putting it in another.

The farm inventory, or property list, offers the only practicable way of answering these questions. Once the farmer has made a complete list of all his assets and liabilities and has balanced them he knows just what his net worth is, and when he has made such a list annually he knows each year whether he has gone forward or back and just how much has been the increase or decrease in the net worth of his business.

The Spring Girl

By KATE EDMONDS

(©, 1920, by McClure Newspaper Syndicate.)

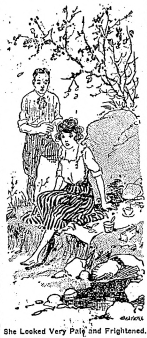
Orth came down the mountain trail with a long swinging stride, his gray eyes eager for the open glade where the spring was. Brown leaves rustled down on his bare head, and the cool kiss of the October wind touched his browned face; he walked with the air of one who has quaffed the elixir of life. Emerging from the deep woods he stopped short. On the big rock near the spring a girl's slim form was lightly poised. In the russet of her dress and the scarlet of her cap she seemed another wind-blown leaf, frost touched to gold and fire. He drank in the lithe brown beauty of the girl, the perfect autumnal setting of crimson [illegible], brown earth and wind-stripped trees.

The girl began to dance—with uplifted arms and a careless abandon, moving in rhythm with a strange wild melody that the wind tore from her lips to flutter up in airy fragments of pure delight.

Orth frowned as he strode toward the spring. The girl did not see him at first; her arms were uplifted in a wild invocation to the cloudless blue and when her glance fell upon him as he drank from his folding cup she sank in a brown heap on the rock, staring at him with mutinous eyes.

He dipped the cup again into the spring, drained it, and put it away in his kit bag. Then, for the first time, he recognized her presence. He removed his cap with a stiff inclination of his head, and did not replace it. She sat on the rock eying his movements with open curiosity.

He opened his bag and took out a tin of "condensed heat," lighted it, placed a small folding saucepan over it filled with water, took out a small tea caddy, various tins of crackers, sardines and sweet biscuit, then sat down to watch the water come to a boil. When it boiled he extinguished the flame, put some tea into the saucepan and covered it tightly.



She Looked Very Pale and Frightened.

The girl on the rock watched these preparations with hungry eyes but her mouth was set very firmly and her face grew quite pink. How delicious the lunch looked there! She saw that there was a box of her favorite crackers and a jar of pimento cheese—and the tea was really fragrant. The brute was actually going to sit down and eat in front of her—and—not—offer—her—a—bite!

She hated him for that.

At least she would compel him to notice her presence!

Deliberately she slipped toward the edge of the rock—it was three feet above the ground—uttered a strangled shriek of dismay that sounded very genuine, and fell plump on the soft turf, crashing down upon the most delectable box of biscuits.

She looked very pale and frightened, sitting there with one slender ankle twisted under her skirt.

He was up in an instant. "I am sorry—are you hurt?" he asked concernedly, but there was a hostile note in his voice.

"My ankle—just a sprain—stupid of me."

"It should be bandaged at once—ice cold water from the spring—you must allow me—." In less time than it takes to tell it he had brought the bandage from a pocket first-aid case, soaked it in cold water while the girl obediently bared her slender ankle. He looked at it, [illegible] it skillfully and then proceeded deftly to inclose it in a tight bandage.

"Are you a—doctor?" she inquired.

"A lawyer," he answered crisply; "just lost my first case, too!" bending low over the little foot.

"How provoking! Thank you so much—I am afraid I have spoiled your lunch."

"No—I will make another cup of tea and you must share it w[illegible] Orth's formal [illegible] had lost [illegible] and as [illegible] pleas[illegible] he [illegible] girl's [illegible] into [illegible]nce. [illegible]

[illegible] a big [illegible] thick [illegible]hes and [illegible] tea to [illegible]

[illegible] asked, [illegible] a cup [illegible] tea. [illegible] flushed. "[illegible]" she [illegible] stopped sh[illegible] thank [illegible] icily.

"[illegible]—" she held [illegible] steadily. A few drops of scal[illegible] tea fell on her hand and she winc[illegible]

"I am sorry," he ap[illegible]ed; "I am clumsy."

"The wind may have [illegible]own it—it is nothing," she said has[illegible]

"It is your unluck[illegible] day," he remarked.

The strange meal pr[illegible]ded to its close, the man's eyes s[illegible] the flying clouds, the flash [illegible] a scudding maple leaf, the song of [illegible] in the next field. The [illegible] saw none of these things—sh[illegible] was looking covertly at the man's [illegible] face, scanning the food spread on the grass between them.

Suddenly she spoke. "Why [illegible] you bring a lunch for me?" [illegible]

Their eyes met, there [illegible] humor in his—defiance in hers and a hint of tears.

"A lunch for you?"

She pointed to the cr[illegible] sardines and cheese, and then [illegible] the substantial sandwiches before him.

"These are all thing[illegible] love—"

"Impossible that I should presume to expect a strange young lady to lunch with me," he said sadl[illegible] "Last night you told me that henceforth we were strangers!"

"Well?" she challenged.

"This is 'henceforth' isn't it?" he asked mildly.

"I hate you, Billy Orth!" she cried, and jumping to her feet she ran swiftly toward the patch of woods where a path led to her father's camp.

He was after her, with grimly smiling lips and anxious eyes. "Peggy!" he called. "Peggy—dear—wait for me!"

She flew on unheeding, and as he gained on her it dawned upon him that she had sprained her ankle—but—had she?

"The darling imp!" he chuckled, and found that he was gaining on her and presently he caught her, and held her close to his heart.

"Well, dear," he said contentedly—"I suppose we may consider ourselves introduced all over again!"

She hid her face in his shoulder. "I am sorry—forgive me—" then womanlike she wanted to know more. "How far would you have followed me, Billy?"

"To the end of the world," he assured her, and what woman could ask more?

MALAYS THE LAZIEST PEOPLE

Natives Characterized by a Marked Antipathy to Labor and Extremely Philosophical.

Their disregard of money makes all dealings with Malays extremely difficult, and their dislike for work has completely blocked more than one project, writes Charles Mayer in Asia Magazine. To my mind, the Malays are the laziest people in the world.

When work is an exciting or amusing game, such as the hunt, they will go on for days without signs of fatigue. They seem to keep alive by some fanatic energy. But when work is just plain labor they will say, "Wait" or "I must think." Or a Malay may say candidly: "Sir, I have had plenty to eat. I am content." Many times I have had a Malay tell me, when I asked him to do some work, that he had enough rice and fish for the day and that he might die during the night. It is an unanswerable argument. Tomorrow's food can be found when tomorrow comes.

Why should a Malay gentleman, who believes in Allah and whose stomach is full, do the labor that can be done by heathen, pig-eating Chinese?

"Will you row me across the river?" I asked a Malay one day.

"Tuan, I have eaten and I have plenty," he replied. "You may take my boat and row yourself across the river. Tomorrow, if Allah grants me life and if I need the boat, I will swim over for it."

That Malay trait of living for the moment has led many a European to murder, and more than once it made me feel like running amuck. It is maddening. Getting work out of Malays is a fine art, a science to be learned only after years of patient arguing and cajoling. And yet, with all their laziness, they are lovable people. In most cases they are brave and willing to do anything for a person they like.

The Spring Girl

By KATE EDMONDS

(©, 1920, by McClure Newspaper Syndicate.)

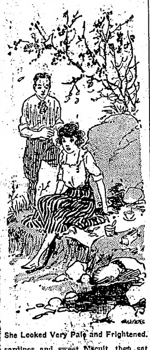
Orth came down the mountain trail with a long swinging stride, his gray eyes eager for the open glade where the spring was. Brown leaves rustled down on his bare head, and the cool kiss of the October wind touched his browned face; he walked with the air of one who has quaffed the elixir of life. Emerging from the deep woods he stopped short. On the big rock near the spring a girl's slim form was lightly poised. In the russet of her dress and the scarlet of her cap she seemed another wind-blown leaf, frost touched to gold and fire. He drank in the lithe brown beauty of the girl, the perfect autumnal setting of crimson leaf, brown earth and wind-stripped trees.

The girl began to dance—with uplifted arms and a careless abandon, moving in rhythm with a strange wild melody that the wind tore from her lips to flutter up in airy fragments of pure delight.

Orth frowned as he strode toward the spring. The girl did not see him at first; her arms were uplifted in a wild invocation to the cloudless blue and when her glance fell upon him as he drank from his folding cup she sank in a brown heap on the rock, staring at him with mutinous eyes.

He dipped the cup again into the spring, drained it, and put it away in his kit bag. Then, for the first time, he recognized her presence. He removed his cap with a stiff inclination of his head, and did not replace it. She sat on the rock eying his movements with open curiosity.

He opened his bag and took out a tin of "condensed heat," lighted it, placed a small folding saucepan over it filled with water, took out a small tea caddy, various tins of crackers, sardines and sweet biscuit, then sat down to watch the water come to a boil. When it boiled he extinguished the flame, put some tea into the saucepan and covered it tightly.



She Looked Very Pale and Frightened.

The girl on the rock watched these preparations with hungry eyes but her mouth was set very firmly and her face grew quite pink. How delicious the lunch looked there! She saw that there was a box of her favorite crackers and a jar of pimento cheese—and the tea was really fragrant. The brute was actually going to sit down and eat in front of her—and—not—offer—her—a—bite!

She hated him for that.

At least she would compel him to notice her presence!

Deliberately she slipped toward the edge of the rock—it was three feet above the ground—uttered a strangled shriek of dismay that sounded very genuine, and fell plump on the soft turf, crushing down upon the most delectable box of biscuits.

She looked very pale and frightened, sitting there with one slender ankle twisted under her skirt.

He was up in an instant. "I am sorry—are you hurt?" he asked concernedly, but there was a hostile note in his voice.

"My ankle—just a sprain—stupid of me."

"It should be bandaged at once—ice cold water from the spring—you must allow me—." In less time than it takes to tell it he had brought the bandage from a pocket first-aid case, soaked it in cold water while the girl obediently bared her slender ankle. He looked at it, tested it skillfully, and

[illegible] proceedings. "I thank you so much. I am afraid I have spoiled your lunch."

"No—I will make another cup of tea and you must share it with me." Orth's formal tone had lost its [illegible], and [illegible] pleasantly while he [illegible] into [illegible] a big pa[illegible] think [illegible] hes and [illegible] them to [illegible]

[illegible] he asked, [illegible] a cup [illegible] tea.

[illegible] blushed. [illegible] she [illegible] stopped [illegible] thank [illegible] ed jelly.

[illegible] the tea [illegible] unfriendly [illegible] she ate [illegible] the meat sandwiches. She nibbled [illegible] of the crackers and sardines and thought with regret of the delicate biscuits she had crushed.

"You are not eating anything," he noticed at last.

"I am not hungry, thank you."

"You will have another cup of tea?" stretching forth a strong brown hand for her aluminum cup.

"Please—" she held the cup steadily. A few drops of scalding tea fell on her hand and she winced.

"I am sorry," he apologized; "I am clumsy."

"The wind may have blown it—it is nothing," she said hastily.

"It is your unlucky day," he remarked.

The strange meal proceeded to its close, the man's eyes studying the flying clouds, the flash of a scudding maple leaf, the song of a belated thrushbird in the next field. The girl saw none of these things—she was looking covertly at the man's fine, stern face, scanning the food spread on the grass between them.

Suddenly she spoke. "Why did you bring a lunch for me?" she asked.

Their eyes met, there was humor in his—defiance in hers and a hint of tears.

"A lunch for you?"

She pointed to the crackers, sardines and cheese, and then to the substantial sandwiches before him.

"These are all things I love—"

"Impossible that I should presume to expect a strange young lady to lunch with me," he said sadly. "Last night you told me that henceforth we were strangers!"

"Well?" she challenged.

"This is 'henceforth' isn't it?" he asked mildly.

"I hate you, Billy Orth!" she cried, and jumping to her feet she ran swiftly toward the patch of woods where a path led to her father's camp.

He was after her, with grimly smiling lips and anxious eyes. "Peggy!" he called. "Peggy—dear—wait for me!"

She flew on unheeding, and as he gained on her it dawned upon him that she had sprained her ankle—but—had she?

"The darling imp!" he chuckled, and found that he was gaining on her and presently he caught her, and held her close to his heart.

"Well, dear," he said contentedly—"I suppose we may consider ourselves introduced all over again!"

She hid her face in his shoulder. "I am sorry—forgive me—" then womanlike she wanted to know more. "How far would you have followed me, Billy?"

"To the end of the world," he assured her, and what woman could ask more?

Call for New Branding Designs.

There are between 40,000 and 45,000 cattle-branding marks registered in the state of Colorado, and it is said that the limit of possible combinations has about been reached. New branding designs are wanted.

Of East Indian Origin.

The Hindustani word "paejama" means literally "leg clothing," and it applies to the thin loose trousers tied around the waist, which are worn by Mohammedan men and women. The English adaptation, spelled "pyjamas" abroad, but "pajamas" in the United States, is applied not only to the trousers, but to a suit made up of trousers and blouse, worn in the dressing room or as a sleeping garment.

One for Mother.

Bobbie's mother had not been well for some time and had, naturally, been a little more strict with the children than was usual. During this time Bobbie started kindergarten.

One day his grandmother asked him how he liked school and his teacher.

Bobbie replied: "O, fine, grandma; and I sure do like teachers. They aren't cross like mothers."

VIGILANCE NECESSARY TO KEEP CHICKEN HOUSE FREE OF MITES

For Small Coops a Hand Atomizer Will Suffice for Applying Insecticides.

Poultry raisers are all too familiar with the common red or gray mite which infests poultry houses. In general those who are making a specialty of poultry raising have comparatively little trouble with mites, or at least they keep them reduced to a point where they are of little importance. On the other hand, farmers and others who raise poultry as an incident to other operations frequently find their chicken houses overrun by mites.

Detecting Presence of Mites.

The attack of this blood-sucking mite is of an insidious nature which does not readily draw attention to its presence, and often the poultryman is not aware of an infestation until he is attracted to it by the irritation produced by mites on his own body through coming in contact with the infested coops. The presence of the pest may readily be determined, however, by the detection of small areas on the boards specked with black and white as though dusted with salt and pepper. This is the excrement of the mites, which are hidden in adjacent cracks or rough places. More careful examination will reveal masses of mites in hiding, together with their eggs and the silvery skins cast by the young.

In moderately infested poultry houses the injury to the fowls is not easily apparent, but the constant blood loss and irritation are shown by decreased egg production and the poor condition of the fowls' flesh. In heavily infested coops it is not unusual for the chickens to become droopy and weak, with pale comb and wattles. Sitting hens desert their nests and thus ruin the eggs or, as is often the case, they are found dead on the nest, being killed outright by the attack of thousands of mites. In extreme cases a considerable number of fowls succumb, even though not sitting, and all are so weakened as to be very susceptible to various diseases.

Owing to the fact that mites feed during the night and secrete themselves in cracks and crevices during the day, their presence very often is overlooked until a very heavy infestation has developed. In such cases they should be attacked energetically. Although not hard to kill, the greatest obstacle is the difficulty of reaching them in their hiding places. Dust baths will not control them as, at most, only the few which remain on the chickens during the daytime will be destroyed.

The first step necessary to destroy the mites is to get rid of the hiding places so far as possible. The roosts should be taken down and all unnecessary boards and boxes removed. In heavily infested houses the mites are to be found in all parts of the building, including the roof. Where they are less numerous the infestations usually are confined to the roosts and nests and the walls immediately adjacent. For small coops a hand atomizer will suffice for applying insecticides as sprays, but for larger houses a bucket pump, knapsack sprayer, or barrel pump is desirable. A rather coarse spray should be applied from all angles and thoroughly driven into the cracks. The floor also should be treated, as many mites fall to the floor when the roosts are being removed.

In tests conducted by the United States Department of Agriculture during the last two years a considerable number of materials used as sprays have proved effective. One of the so-called wood preservers was found immediately effective, and its killing or repelling power lasts for months. As this material is rather expensive (about $1 per gallon) and is too heavy to spray well it is advisable to reduce it with equal parts of kerosene.

Crude petroleum is almost as effective, retains its killing power for several weeks, and in most localities it is very cheap. It will spray better, if thinned with one part of kerosene to four parts of crude oil.

It has been found that one thorough application of either of these materials will completely eradicate the mites from an infested chicken house, but ordinarily it is advisable to make a second application a month after the first, and in some cases a third treatment is required. These subsequent applications may be made with a brush, using the materials undiluted and covering only the roosts, their supports, the walls adjoining, and the nests if they are infested. This method of application is effective for the first treatment also if the houses are not heavily infested. Poultry should be kept out of the treated buildings until the material is well dried into the wood.

Using Pure Kerosene.

Pure kerosene and kerosene emulsion in double the strength ordinarily applied to plants will destroy all mites hit, but these substances have not body enough to destroy those mites which are in more protected situations, and several applications at ten-day intervals are needed to destroy all the mites.

Arsenical dip, such as is used to destroy cattle ticks, has been found fairly satisfactory for use against chicken mites. Several applications are required to eradicate the mites from poultry houses.

SHOCKED CORN GOOD SILAGE

Refilling Silo With Surplus, Even in Middle of Winter Is Most Economical Practice.

"Corn cut at the proper time and put into the shock can be made into good silage, even in the middle of the winter," says Alvin Kezer of the agronomy department of the Colorado Agricultural college. "Of course, such silage will not be as palatable as when siloed early and there will be more mechanical waste of leaves and other parts of the corn plant because the shocked corn had been stored for part of the winter, either in the shock or in stacks. But if this dry fodder is run through a silage cutter and the proper amount of water run in with it, it will make good silage and a much more palatable feed than the dry fodder, which will be eaten by the stock with less waste.

"Sometimes, shocking the surplus corn after the silos are filled and refilling from the shocked corn is a very economical practice, a practice worth remembering, especially when the capacity of the silos is not great enough to take care of the entire crop. It is a good way of improving a valuable feed."

VERMIN CARRY HOG DISEASES

Lousy Animal Will Consume More Feed Than Clean One, According to Many Experiments.

A hog affected with lice can't make as profitable use of his feed as one that is free from this pest. No successful hog man will dispute this statement; yet, judging from the condition of some farmers' hogs, it is doubtful whether all realize that it really costs money to feed lice. However, feeding experiments have been conducted from time to time which show plainly that a lousy hog consumes more feed per pound of gain than a clean hog. This loss of feed, however, is not the only reason for keeping hogs free from lice. Lice are also disease carriers. They will carry infection from one hog to another and that, perhaps, is as strong a reason for holding lice in check as any other.

Solitude.

Give me the flowing river that runs between the pine-clad shores! Give me the babbling brook with its rippling music! And you may have the crowded streams of commerce that rush and toss between the huge piles of granite.

Give me the twinkling stars—the glow of the silvery moon. And a million electric torches that illuminate the great cities are yours.

Give me the music of the wind-swept trees! And keep your sympathies. Give me the bellowing herd, the crowing cock, the chirp of the new hatched brood! And your Carusos and McCormacks will not be missed.

Give me the joyous vision of the budding rose that fills the untilled fields, the bluebells by the brook, the cowslip in the marshy bed! And you may have all the forced blooms, the result of man's effort to improve on the works of God.—L. J. Muler in the Utah Chronicle.

Outside the Door

By DOROTHY DOUGLAS

(©, 1920, by McClure Newspaper Syndicate.)

Up and down the piano like a water sprite pursued by a tornado dashed the fingers of Marcel Caronni. In his eyes was the wild conquest of music and in his soul all the color and grandeur of a great artist.

Daily Marcel sat at the piano and practiced those wonderful dances that were one day to set the world afire with their flame.

And each day outside his door crouched a more or less ragged little figure whose haunted eyes were lighted with the glow of appreciation and whose hungry little body was not less starved for food than was her soul for music.

The corner of the dark hall on the top floor of the rooming house permitted her to crouch with her touseled head as near as possible and drink in the wild music undisturbed.

She was a drab little bundle. Her clothes, her life and all there was to her seemed drab—all but her eyes, and in them was an intensity of inspiration and slow-burning fire.

Tossed about relentlessly by the winds of fate and being of not sufficient strength of her own to buffet successfully, Doris Varisi lingered on the mediocre doorstep of life a being, only half conscious of her own powers and striving with a pitiful maintenance to keep body and soul together by dancing in fifth-rate restaurants.

And Marcel Caronni made music in his top-floor, scantily furnished room that flung the soul of Doris into a wild passion of expression.

She seemed suddenly born of the wind and clouds; her feet light as a fawn, her movements gentle as the moths that hung in the fragrance of a moonlit garden.

Marcel played on, quite unconscious that any human being was within miles of him. He was in a world of his own making and breathing, deeply the intoxicating air of creative moments. His world was spinning, tossing, tumbling and clinging again to heights unknown to any save the great artists of life. Had Marcel known that a bit of human driftwood had been lodged against his door he undoubtedly would have failed to complete his great masterpiece, for Marcel was above all a compassionate human being. His emotions would have been torn to shreds and left jagged and worn at sight of Doris in her present drab state. However, he was unconscious of her very existence and carried his masterpiece to a glorious and triumphant finale.

Seemed But a Bit of Rose Petal.

The strains buried themselves in the brain of Doris, and while her body lay inert her soul was swishing about in a glory of sound and her senses were registering every movement so that at a later day her body would again produce them in a dance of utmost perfection of expression.

So intense was her strain that from sheer fatigue of the brain she must have dropped into an exhausted sleep.

Marcel, dashing out toward dusk for a bite of food wherewith to keep his soul and body together, stumbled over the drab heap of humanity at his door. So startled was Marcel that for a moment he failed to realize that the thing which his feet had all but kicked was a bit of the feminine world. With arms gentle as those of a woman Marcel lifted the slight bundle and carried it within his scantily furnished room. Once there he deposited the girl in the one chair in his possession.

She opened wide her eyes. They rested with wonderful light in their depths full on Marcel. He sighed with relief, for he had not known what to expect from that inert heap.

"I must have fallen asleep at your door," Doris said slowly; "the music was so heavenly—so beyond anything I have ever heard—that I—well, I think my senses were quite drugged by its beauty."

It was Marcel's turn to open wide his eyes. This was no mere flattery. It was a soul's appreciation expressing itself more through glowing, brilliant eyes and vibrant little body, than by mere spoken praise.

"I could bring the world to my feet if I could but dance to your music," Doris continued rapturously. There was no touch of personal conceit attached to her words. There was just a tremendous desire to express the greatest and best in the art of dancing. "If you would only play again some time so that I may dance the story I conceived today—I would be so happy."

Marcel smiled eagerly. "Now—if you like," he said, his eyes reflecting the enthusiasm in her own. It all seemed very natural that genius should meet genius in this unconventional but positive manner, and a moment later Marcel was seated again at his piano. The drab little figure leaped forward almost as soon as the first notes filtered away from Marcel's inspired fingers.

Doris then seemed but a bit of rose petal flung ruthlessly about by an all-powerful wind. Light as elderdown she was hurled relentlessly across the rude floor but with a grace and beauty that quite took the breath from Marcel's excited breast. Never had he imagined his music could be interpreted with so perfect a following of his own conceived idea.

He played his newly composed "Weeping Willow" with its wonderful use of the minor strain and Doris seemed but a bit of drooping willow branch. Her head, her shoulders and her whole body responded to the theme until Marcel could have wept with the sadness of it.

"Girl!" he cried suddenly, for he did not know her name, "we two must work together. With your exquisite interpretation of my music we will wend our way into the art world." He gazed wistfully at Doris as if a slight fear possessed him that she might not feel as he did. But her eyes were blazing with inspiration and enthusiasm which promised well for their future.

"We could begin in the cabaret—where I dance," she suggested quickly. "It will be just a stepping stone, and we must live—while we progress." Doris smiled softly. "I am very happy—to have fallen asleep at your door."

"And I," said Marcel, with his winning grace, "am happy to have found you there."

They began, as Doris suggested, in the cabaret where Doris danced, but soon wended their way nearer the heart of real art, and before many moons had waned found they were to fill an engagement on the metropolitan stage.

"Marcel," said Doris as she drew near to him before going down for the great engagement, "we have almost reached the top—are you not very happy?"

"Doris," Marcel returned, and in his eyes was a terrible sadness, "I will never reach the top—through music—and I am afraid—"

"[illegible] through music—then what?" asked Doris, but in her heart she knew.

"Only through love," Marcel told her.

"And have you tried to reach the top—through love?" queried Doris.

"I am afraid. The public loves you so. You are too wonderful."

"The public is nothing—I am not wonderful at all—if you are not going to reach—if your next composition is not to be of love, and if we are not to make it our greatest expression of art."

Marcel flung his eager arms about her. "We have already reached the very top—dear."

Call for New Branding Designs.

There are between 40,000 and 45,000 cattle-branding marks registered in the state of Colorado, and it is said that the limit of possible combinations has about been reached. New branding designs are wanted.

Of East Indian Origin.

The Hindustani word "paejama" means literally "leg clothing," and it applies to the thin loose trousers tied around the waist, which are worn by Mohammedan men and women. The English adaptation, spelled "pyjamas" abroad, but "pajamas" in the United States, is applied not only to the trousers, but to a suit made up of trousers and blouse, worn in the dressing room or as a sleeping garment.

One for Mother.

Bobbie's mother had not been well for some time and had, naturally, been a little more strict with the children than was usual. During this time Bobbie started kindergarten.

One day his grandmother asked him how he liked school and his teacher.

Bobbie replied: "O, fine, grandma; and I sure do like teachers. They aren't cross, like mothers."

VIGILANCE NECESSARY TO KEEP CHICKEN HOUSE FREE OF MITES

For Small Coops a Hand Atomizer Will Suffice for Applying Insecticides.

Poultry raisers are all too familiar with the common red or gray mite which infests poultry houses. In general those who are making a specialty of poultry raising have comparatively little trouble with mites, or at least they keep them reduced to a point where they are of little importance. On the other hand, farmers and others who raise poultry as an incident to other operations frequently find their chicken houses overrun by mites.

Detecting Presence of Mites.

The attack of this blood-sucking mite is of an insidious nature which does not readily draw attention to its presence, and often the poultryman is not aware of an infestation until he is attracted to it by the irritation produced by mites on his own body through coming in contact with the infested coops. The presence of the pest may readily be determined, however, by the detection of small areas on the boards specked with black and white as though dusted with salt and pepper. This is the excrement of the mites, which are hidden in adjacent cracks or rough places. More careful examination will reveal masses of mites in hiding, together with their eggs and the silvery skins cast by the young.

In moderately infested poultry houses the injury to the fowls is not easily apparent, but the constant blood loss and irritation are shown by decreased egg production and the poor condition of the fowls' flesh. In heavily infested coops it is not unusual for the chickens to become droopy and weak, with pale comb and wattles. Sitting hens desert their nests and thus ruin the eggs or, as is often the case, they are found dead on the nest, being killed outright by the attack of thousands of mites. In extreme cases a considerable number of fowls succumb, even though not sitting, and all are so weakened as to be very susceptible to various diseases.

Owing to the fact that mites feed during the night and secrete themselves in cracks and crevices during the day, their presence very often is overlooked until a very heavy infestation has developed. In such cases they should be attacked energetically. Although not hard to kill, the greatest obstacle is the difficulty of reaching them in their hiding places. Dust baths will not control them, as, at most, only the few which remain on the chickens during the daytime will be destroyed.

The first step necessary to destroy the mites is to get rid of the hiding places so far as possible. The roosts should be taken down and all unnecessary boards and boxes removed. In heavily infested houses the mites are to be found in all parts of the building, including the roof. Where they are less numerous the infestations usually are confined to the roosts and nests and the walls immediately adjacent. For small coops a hand atomizer will suffice for applying insecticides as sprays, but, for larger houses a bucket pump, knapsack sprayer, or barrel pump is desirable. A rather coarse spray should be applied from all angles and thoroughly driven into the cracks. The floor also should be treated, as many mites fall to the floor when the roosts are being removed.

In tests conducted by the United States Department of Agriculture during the last two years a considerable number of materials used as sprays have proved effective. One of the so-called wood preservers was found immediately effective, and its killing or repelling power lasts for months. As this material is rather expensive (about $1 per gallon) and is too heavy to spray well, it is advisable to reduce it with equal parts of kerosene.

Crude petroleum is almost as effective, retains its killing power for several weeks, and in most localities it is very cheap. It will spray better if thinned with one part of kerosene to four parts of crude oil.

It has been found that one thorough application of either of these materials will completely eradicate the mites from an infested chicken house, but ordinarily it is advisable to make a second application a month after the first, and in some cases a third treatment is required. These subsequent applications may be made with a brush, using the materials undiluted and covering only the roosts, their supports, the walls adjoining, and the nests if they are infested. This method of application is effective for the first treatment also if the houses are not heavily infested. Poultry should be kept out of the treated buildings until the material is well dried into the wood.

Using Pure Kerosene.

Pure kerosene and kerosene emulsion in double the strength ordinarily applied to plants will destroy all mites hit, but these substances have not body enough to destroy those mites which are in more protected situations, and several applications at ten-day intervals are needed to destroy all the mites.

Arsenical dip, such as is used to destroy cattle ticks, has been found fairly satisfactory for use against chicken mites. Several applications are required to eradicate the mites from poultry houses.

SHOCKED CORN GOOD SILAGE

Refilling Silo With Surplus, Even in Middle of Winter Is Most Economical Practice.

"Corn cut at the proper time and put into the shock can be made into good silage, even in the middle of the winter," says Alvin Kezer of the agronomy department of the Colorado Agricultural college. "Of course, such silage will not be as palatable as when siloed early and there will be more mechanical waste of leaves and other parts of the corn plant because the shocked corn had been stored for part of the winter, either in the shock or in stacks. But if this dry fodder is run through a silage cutter and the proper amount of water run in with it, it will make good silage and a much more palatable feed than the dry fodder, which will be eaten by the stock with less waste.

"Sometimes, shocking the surplus corn after the silos are filled and refilling from the shocked corn is a very economical practice, a practice worth remembering, especially when the capacity of the silos is not great enough to take care of the entire crop. It is a good way of improving a valuable feed."

VERMIN CARRY HOG DISEASES

Lousy Animal Will Consume More Feed Than Clean One, According to Many Experiments.

A hog affected with lice can't make as profitable use of his feed as one that is free from this pest. No successful hog man will dispute this statement; yet, judging from the condition of some farmers' hogs, it is doubtful whether all realize that it really costs money to feed lice. However, feeding experiments have been conducted from time to time which show plainly that a lousy hog consumes more feed per pound of gain than a clean hog. This loss of feed, however, is not the only reason for keeping hogs free from lice. Lice are also disease carriers. They will carry infection from one hog to another and that, perhaps, is as strong a reason for holding lice in check as any other.

Solitude.

Give me the flowing river that runs between the pine-clad shores! Give me the babbling brook with its rippling music! And you may have the crowded streams of commerce that rush and toss between the huge piles of granite.

Give me the twinkling stars—the glow of the silvery moon! And a million electric torches that illuminate the great cities are yours.

Give me the music of the wind-swept trees! And keep your sympathies. Give me the bellowing herd, the crowing cock, the chirp of the new hatched brood! And your Carusos and McCormacks will not be missed.

Give me the joyous vision of the budding rose that fills the nuttiest fields, the bluebells by the brook, the cowslip in the marshy bed! And you may have all the forced blooms, the result of man's effort to improve on the works of God.—L. J. Muler in the [illegible]

Outside the Door

By DOROTHY DOUGLAS

(© 1920, by McClure Newspaper Syndicate.)

Up and down the piano like a water sprite pursued by a tornado dashed the fingers of Marcel Caronni. In his eyes was the wild conquest of music and in his soul all the color and grandeur of a great artist.

Daily Marcel sat at the piano and practiced those wonderful dances that were one day to set the world afire with their flame.

And each day outside his door crouched a more or less ragged little figure whose haunted eyes were lighted with the glow of appreciation and whose hungry little body was not less starved for food than was her soul for music.

The corner of the dark hall on the top floor of the rooming house permitted her to crouch with her touseled head as near as possible and drink in the wild music undisturbed.

She was a drab little bundle. Her clothes, her life and all there was to her seemed drab—all but her eyes, and in them was an intensity of inspiration and slow-burning fire.

Tossed about relentlessly by the winds of fate and being of not sufficient strength of her own to buffet successfully, Doris Varisi lingered on the mediocre doorstep of life a being, only half conscious of her own powers and striving with a pitiful maintenance to keep body and soul together by dancing in fifth-rate restaurants.

And Marcel Caronni made music in his top-floor, scantily furnished room, that flung the soul of Doris into a wild passion of expression.

She seemed suddenly born of the wind and clouds; her feet light as a fawn, her movements gentle as the moths that hung in the fragrance of a moonlit garden.

Marcel played on, quite unconscious that any human being was within miles of him. He was in a world of his own making and breathing deeply the intoxicating air of creative moments. His world was spinning, tossing, tumbling and clinging again to heights unknown to any save the great artists of life. Had Marcel known that a bit of human driftwood had been lodged against his door he undoubtedly would have failed to complete his great masterpiece, for Marcel was above all a compassionate human being. His emotions would have been torn to shreds and left jagged and worn at sight of Doris in her present drab state. However, he was unconscious of her very existence and carried his masterpiece to a glorious and triumphant finale.

Seemed But a Bit of Rose Petal.

The strains buried themselves in the brain of Doris, and while her body lay inert her soul was swishing about in a glory of sound and her senses were registering every movement so that at a later day her body would again produce them in a dance of utmost perfection of expression.

So intense was her strain that from sheer fatigue of the brain she must have dropped into an exhausted sleep.

Marcel, dashing out toward dusk for a bite of food wherewith to keep his soul and body together, stumbled over the drab heap of humanity at his door. So startled was Marcel that for a moment he failed to realize that the thing which his feet had all but kicked was a bit of the feminine world. With arms gentle as those of a woman Marcel lifted the slight bundle and carried it within his scantily furnished room. Once there he deposited the girl in the one chair in his possession.

She opened wide her eyes. They rested with wonderful light in their depths full on Marcel. He sighed with relief, for he had not known what to expect from that inert heap.

"I must have fallen asleep at your door," Doris said slowly; "the music was so heavenly—so beyond anything I have ever heard—that I—well, I think my senses were quite drugged by its beauty."

It was Marcel's turn to open wide his eyes. This was no mere flattery. It was a soul's appreciation expressing itself more through glowing brilliant [illegible]

"I could bring the world to my feet if I could but dance to your music," Doris continued rapturously. There was no touch of personal conceit attached to her words. There was just a tremendous desire to express the greatest and best in the art of dancing. "If you would only play again some time so that I may dance the story I conceived today—I would be so happy."

Marcel smiled eagerly. "Now—if you like," he said, his eyes reflecting the enthusiasm in her own. It all seemed very natural that genius should meet genius in this unconventional but positive manner, and a moment later Marcel was seated again at his piano. The drab little figure leaped forward almost as soon as the first notes filtered away from Marcel's inspired fingers.

Doris then seemed but a bit of rose petal flung ruthlessly about by an all-powerful wind. Light as elderdown she was hurled relentlessly across the rude floor but with a grace and beauty that quite took the breath from Marcel's excited breast. Never had he imagined his music could be interpreted with so perfect a following of his own conceived idea.

He played his newly composed "Weeping Willow" with its wonderful use of the minor strain, and Doris seemed but a bit of drooping willow branch. Her head, her shoulders and her whole body responded to the theme until Marcel could have wept with the sadness of it.

"Girl!" he cried suddenly, for he did not know her name, "we two must work together. With your exquisite interpretation of my music we will wend our way into the art world." He gazed wistfully at Doris as if a slight fear possessed him that she might not feel as he did. But her eyes were blazing with inspiration and enthusiasm which promised well for their future.

"We could begin in the cabaret—where I dance," she suggested quickly. "It will be just a stepping stone, and we must live—while we progress." Doris smiled softly. "I am very happy—to have fallen asleep at your door."

"And I," said Marcel, with his winning grace, "am happy to have found you there."

They began, as Doris suggested, in the cabaret where Doris danced, but soon wended their way nearer the heart of real art, and before many moons had waned found they were to fill an engagement on the metropolitan stage.

"Marcel," said Doris as she drew near to him before going down for the great engagement, "we have almost finished the top—are you not very happy?"

"Doris," Marcel returned, and in his eyes was a terrible sadness, "I will never reach the top—through music—[illegible] through music—then what?" asked Doris, but in her heart she knew.

"Only through love," Marcel told her.

"And have you tried to reach the top—through love?" queried Doris.

"I am afraid. The public loves you so. You are too wonderful."

"The public is nothing—I am not wonderful at all—if you are not going to reach it your next composition is not made of love, and if we are not to make it our greatest expression of art."

Marcel flung his eager arms about her. "We have already reached the top, dear."

NICK BUNDHUND, Cash. H. B. ROCKNE, A. Cash.

GOODRIDGE CO-OPERATIVE
CREAMERY COMPANY

Due to the difference between butter scoring 92 and that scoring 90—a difference of 7½ cents per pound—the Board of Directors of the Goodridge creamery have decided to raise the premium on sweet cream from 2 cents per pound to 7 cents, commencing Dec. 1 next and continuing until further notice.

This applies only to monthly patrons The former premium of 2 cents pe pound will continue to be paid to cash patrons for the time being.

This is a plan urged by the creamery Inspector and seconded by myself, as being the best way to take care of the vast difference in price between good and poor butter.

School Notes

Miss Knutson, the county nurse, completed her work of making a physical examination of the pupils in school Tuesday. Miss Knutson made a careful and thorough examination of each pupil, and some startling results were revealed. A tabulated account will be given next week.

A Farmers' institute of three to five days' duration will be given here some time in February under the auspices of the Farm bureau.

The classes in home nursing conducted by Miss Drexton are well attended.

Remember the date of the next Lyceum number, Tuesday, February 1.

This week closes the work of the first semester. Final examinations are given in the half year High school subjects.

Obituary

Private Henry Svare, member of the 341st Infantry, United States army, died at an American base hospital in France, October 9, 1918, of influenza, a short time before he had expected to be on his way home His body was one of 40 which were returned last week to relatives in Minnesota for re-interment

He was 27 years of age at the time of death. He had seen active service, having taken part in several hard fought battles. Henry was a hard worker He was always ready to give help to any one, but he always helped his parents first. When he was in France he wrote his parents, sisters and brothers not to forget the two songs, "Hvo Ved hvor Naer Mig er Min End" and "Jeg Gaar i Fare Hvor Jeg Gaar." Before he went to the war he was always singing these songs.

He leaves to mourn his death his parents, two sisters and four brothers—Mr. and Mrs. Hans Svare, Miranda, Helen, Melvin, Glenn, Johnie and Calmar.

Mrs. Hope Dead

The remains of Mrs. Henry Hope of Grygla were brought here Wednesday on their way to her former home at Crystal Lake, Ill., for burial. Mrs. Hope died Tuesday at her home at Grygla of internal hemorrhage, after an illness of but a few days. Her illness was not considered serious until the last day. Mrs. Hope was an old resident of the north country, having with her husband held and proved up a claim about ten miles north of Gryga. For the past six years they have resided in Grygla, Mrs. Hope is survived by her husband only, there being no children. Mr. Hope, his mother and Johnie Peterson accompanied the remains to Crystal Lake.

Farmers' Meetings

County Agent J. J. McCann was in Goodridge yesterday. A meeting wil be held here February 4 of those interestested in peat soils and the value of phosphates. It has been decided to give a farmers' short course March 7 to 11.

Big Reduction

I will make a reduction of 20 per cent on all Horse Blankets, and Harnesses will be sold at reduced prices.

School Notes

Miss Knutson, the county nurse, completed her work of making a physical examination of the pupils in school on Tuesday. Miss Knutson made a careful and thorough examination of each pupil, and some startling results were revealed. A tabulated account will be given next week.

A Farmers' institute of three to five days' duration will be given here sometime in February under the auspices of the Farm bureau.

The classes in home nursing conducted by Miss Drexton are well attended.

Remember the date of the next Lyceum number, Tuesday, February 1.

This week closes the work of the first semester. Final examinations are given in the half year High school subjects.

Obituary

Private Henry Svare, member of the 41st Infantry, United States army, died at an American base hospital in France, October 9, 1918, of influenza, a short time before he had expected to be on his way home. His body was one of 40 which were returned last week to relatives in Minnesota for re-interment.

He was 27 years of age at the time of death. He had seen active service, having taken part in several hard fought battles. Henry was a hard worker. He was always ready to give help to any one, but he always helped his parents first. When he was in France he wrote his parents, sisters and brothers not to forget the two songs, "Hvo Ved hvor Naer Mig er Min End" and "Jeg Gaar i Fare Hvor Jeg Gaar." Before he went to the war he was always singing these songs.

He leaves to mourn his death his parents, two sisters and four brothers—Mr. and Mrs. Hans Svare, Miranda, Helen, Melvin, Glenn, Johnie and Calmar.

Mrs. Hope Dead

The remains of Mrs. Henry Hope of Grygla were brought here Wednesday on their way to her former home at Crystal Lake, Ill., for burial. Mrs. Hope died Tuesday at her home at Grygla of internal hemorrhage, after an illness of but a few days. Her illness was not considered serious until the last day. Mrs. Hope was an old resident of the north country, having with her husband held and proved up a claim about ten miles north of Gryga. For the past six years they have resided in Grygla. Mrs. Hope is survived by her husband only, there being no children. Mr. Hope, his mother and Johnie Peterson accompanied the remains to Crystal Lake.

Farmers' Meetings

County Agent J. J. McCann was in Goodridge yesterday. A meeting will be held here February 4 of those interested in peat soils and the value of phosphates. It has been decided to give a farmers' short course March 7 to 11.

Big Reduction

I will make a reduction of 20 per cent on all Horse Blankets, and Harnesses will be sold at reduced prices.

MINNESOTA HISTORICAL SOCIETY

THE GOODRIDGE BANNER

VOLUME XV, No 6. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JANUARY 28, 1921. $1.50 PER YEAR.

Startling Facts

A number of startling facts were brought out in regard to the health of our school children in the examination recently conducted at the Goodridge school by Miss Knutson the county nurse.

Out of the 137 pupils examined only twelve were found to be physically perfect. The examination was conducted with special reference to dental and optical defects as well as throat and ear troubles. A total of 61 were found to be in need of immediate dental [illegible]. Fifty seven were suffering from adenoids, edlarged tonsils and throat troubles of various kinds; 21 proved to have defective eyesight. A number of pupils were found to have ear defects.

Wite figures based on the table of normal heights and weights sixty three per cent of all the children examined were found to be underweight, while ten were found to be overweight.

Realizing that good health is conducive to effective school work, the parents should try to carry out the suggestions given by the examiner. Defective eyesight as well as decayed teeth and throat diseases should be attended to immediately. Consult any physician of your choice regarding the health of your children.

The fact that 87 of the total 137 were underweight presents the problem of food nutrition for growing children. Underweight is often due to irregular habits of eating and sleeping and lack of regular exercise. If the child is well he should eat more fat forming foods, such as bread, butter, cereals, sugars and fats. Those who are overweight are advieed to secure as much regular exercise as possible and cut down the fat forming foods and substitute more green vegetables and fruits.

The Shame of It

The other day, for the first time in history, the representatives of forty nations assembled at Gensva to discuss the disarmament of the world—and the United States, to our humiliation and shame, was not there! To an invitation to send unofficial rehresentatives the president replied that "as the government of the United States is not a member of the league, I do not feel justified in appointing a commission to take even a de facto participation in the deliberations of the council or of the commission acting on behalf of the council in the execution of the provisions of the League of Nations."

The United States has been the one great peace nation of the world, yet England announces she is pursuing the study of the use of poisoned gases in war because the United States is doing the same thing. And Japan declares she can not reduce armaments because we are increasing ours.

The representatives of the nations who had met to discuss disarmament did nothing because the United States was not there! They will not, they dare not, disarm unless we do—and we dare not disarm unless they do!

Our program today is for the largest standing army we have ever had, and the largest navy in the world. Unless the nations disarm, we must tax ourselves while getting ready for the next war.—Youth's Companion.

DIED

At her home near Erie, Gertie, wife of John T. Coan, died Friday, Jan. 21, of hemorrhage of the liver, after an illness of but a few hours, although she had been a sufferer from liver trouble for years.

The deceased was 46 years of age. She came here with her husband and family in 190[illegible], and they have since resided in this vicinity. Her husband, two daughters Esther and Alice, and three sons John, Harry and Bert, survive her; besides one sister, Mrs. Barney Ba[illegible], who resides here, and two sisters and a brother in Michigan.

Funeral services were held Wednesday at the house at 11 o'clock and at the Erie church at 1:30, Rev Henry Lutz officiating. Interment was made in the Erie cemetery.

Card of Thanks

The undersigned desire to return thanks to those friends who so kindly assisted them in their hour of bereavement, and to the donors of the beautiful flowers.

JOHN T. COAN AND FAMILY.

C. G. Mugg, the Grand Forks Eye man, will be at Goodridge February 8,

SEED SELECTION IMPORTANT

Plant Is Hardy and Not Injured by Ordinary Cold and Sowing May Be Done When Other Farm Work Is Comparatively Slack.

(Prepared by the United States Department of Agriculture.)

Red clover [illegible] styled the cornerstone of [illegible] in the North Central and [illegible] states.

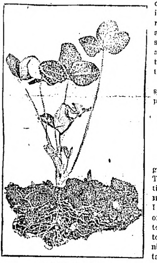
Many farmers will begin laying in their stocks as early as February, as it is customary in many sections to sow red clover on the surface of [illegible] so that it will sink into the [illegible] with the first thaw in the spring. The seed is hardy and is not injured by ordinary cold, and the fact that it can be sown at a time when other work is comparatively light adds to the economy of its cultivation.

The first important point to be considered is the selection of seed, say specialists of the United States Department of Agriculture. Consideration should be used in this matter well in advance of the time of sowing. This is particularly true [illegible], when a large proportion of the red clover seed used in the United States comes from abroad. If poor seed is used the expected crop may be a partial or total failure.

Good Seed Is Plump.

Good red clover seed is plump or well filled, bright with a slight luster. The color of individual seeds ranges from violet to light yellow. The individual seeds should be at least medium sized and fairly uniform, free from adulterants of any kind and free from seeds of noxious weeds.

Home-grown seed is desirable, especially in the North, because it is almost certain to be adapted to local conditions. If it is not available samples should be obtained from reliable dealers. These should be examined for adulterants, weed seeds and shriveled seeds. They should also be tested for germination before purchasing in quantity.



Red Clover Plant.

In the absence of more accurate methods an estimate should be made of the proportion of true red clover seed and of weed seeds and other impurities. From the red clover seed separated from all impurities, a counted number, as 100, should be taken just as they come. These seeds should be placed between layers of moistened cloth or paper or merely covered in a bed of sand or light soil. A dinner plate, covered with another, is a suitable germinating receptacle. It can be kept in the living room, at a temperature between 65 and 85 degrees. Between the third and sixth days the sprouting ability of the seeds should be shown.

It should be borne in mind that the sowing value of the seed is represented by the amount of true clover which will germinate with reasonable promptness. Thus, if four-fifths of a sample is pure clover, and only three-fourths will sprout, then only three-fifths, or 60 per cent, of the original seed as offered will grow. Thus, the germinating test has an important bearing on the worth of seed offered to the farmer.

Protects American Farmers.

A seed-testing service is maintained by the United States Department of Agriculture, where 29,638 samples of various seeds were examined and tested in the last fiscal year—16,442 in Washington and 13,196 in the five branch seed-testing stations. Similar service is offered by the various state experiment stations. The department also exercises a strict inspection service over field seeds brought from foreign countries, and last year 5,000,000 pounds of various seeds were rejected or held for cleaning before being allowed to be offered to American farmers.

It is important that the testing of seed be done early enough that a sufficient supply of pure seed can be purchased in time for use; and if seed is to be sent to one of the government or state testing laboratories, at least two weeks should be allowed.

School Bond Election

In this issue appears the notice of of election to vote bonds for the school district. The election is called for Saturday, February 5. The issue of these bonds in the sum of $10,000 will place the finances of the district on a cash basis. It is an absolute necessity—make no mistake on this point—if the school is to continue to be operated with anything like its present degree of efficiency or even if it will be operated at all. We are not alone in this regard. Districts all over the state are issuing bonds to raise funds to keep their school work moving. Thief River Falls voted Tuesday evening by an overwhelming majority to issue school bonds in the sum of $5[illegible].

We do not look for any serious opposition to our little issue. Weighted in the balance against the destruction of our splendid school system it is a small thing. Besides, a considerable portion of the funds realized from the sale of these bonds is to be used to refund floating indebtedness that will have to be paid directly by taxation.

Community Club Meeting

Soil Expert to Discuss Peat and Phosphates

A splendid program has been arranged for the regular meeting of the Community club to be held Thursday evening, February 3. A soil expert from the University of Minnesota will be here to give a discussion on peat soils and the benefit of the application of phosphates to such soils. All soils in this section are deficient in phosphorus. In view of this fact the farmers are now applying phosphates to the soil. Hence this is a very timely topic and a discussion of this subject ought to be to the interest of every one in this community.

Aside from this lecture, several musical numbers will be rendered. The program will begin at 8 o'clock.

University Professor to Lecture

The third Lyceum number will be given Tuesday evening, February 1. This will be an interesting talk on a timely topic by A. William Olmstead. Mr Olmstead is the secretary of the Lyceum department of the University of Minnesota. The committee is anxious to have a large turn out at this meeting to show Mr. Olmstead that the community is interested in this type of entertainment, and in this way it may help us to secure the very best type in the Lyceum circuit.

McLee Named as Director

Stuart McLeod has been named to succeed A. J. Anderson as director for Pennington county in the Minnesota Red River Valley Development association. Mr. McLeod is well and favorably known all throughout this section, and the delection of him for the office will be heartily commended. Mr. Anderson, through the circumstance of having taken up his residence at Frygla, necessarily had to tender his resignation as direcor for Pennington county.

Farmers' Referendum

The first statewide farmers' referendum taken in Minnesota during a legislative session to inform senators and representatives as to desires of farmers was begun Monday by the Minnesota Farm Bureau federation. Three hundred presidents, directors and county agents in county farm bureau organizations are presenting federation members copies of the concurrent resolution calling for changes in grain grading and the bill providing for a 10 per ecnt tax on deals in grain futures. The results will be forwarded to the state federation headquarters, old capitol building, St. Paul.

The plan is a good one, but it seems as if a fairer showing of the wishes of the farmers would have been obtained had the inquiry been made more general and not confined to farm bureau members.

Machines and Implements of All Kinds Should Be Overhauled and Needed Repairs Made.

Better bring in all the machinery not in use and start to get ready for spring. Take off the plows, put them where they will be handy to get to the blacksmith's and see that the cultivator shovels are cared for. Don't wait until the blacksmith is rushed to have the disks sharpened. He will do a better job if allowed to take his [illegible]

University Lyceum Course

THIRD NUMBER

Tuesday, February 1, 1921

Mr. Olmstead is the secretary of the lecture department of the State University and the general manager of the lecturing business in Minnesota. He knows perhaps better than any other man in the state what the people want and he tries to apapt his material and methods to fit their needs.

Mr Olmstead believes in democracy on the platform as well as in other places. He believes the chief dificulty with lecturers is that they totally ignore the audience. They usually make a lot of noise and demonstartion on the platform telling the people things they have always known in language which cannot be understood without an interpreter. Mr. Olmstead will introduce you to the Open Forum style of lecture in which the audience is given the biggest part on the program. The lecture will be short and snappy. It will open up some of the biggest issues in national and world affairs. At the close the audience will be given an opportunity in a systematic parliamentary manner to ask questions and take part in discussion. This will prove the most lively part of the program.

Mr. Olmstead is a lawyer. He has been a close student of public affairs. His views are always progressive and liberal, but he knows how to allow for the other fellow's point of view. He has been for ten years a University teacher, but he boasts that no one can tell it on him. He knows how to translate a college education into the English language.

Mr. Friday

By KATE EDMONDS

(© 1921, by McClure Newspaper Syndicate.)

"A squall!" cried Dorothy as the little launch headed for home.

Nan glanced over her shoulder at the yellow-brown clouds rapidly obscuring the sun. "We cannot reach the Point," she declared. "We must make for the nearest island."

"Is there any danger?" asked timid Dorothy, who had been insistent about remaining outside the breakwater.

"I think not," panted Nan, for her heart was throbbing fast. She was a little fearful of making the nearest island before the storm burst and Little Petrel island was a dangerous place to land. Many a small boat had gone down off the cruel rocks. When they were within a boat's length of the beach the wind broke loose with a scream of fury. A long wave rushed the boat upon the beach and left it there in the soft sand. The salt spray stung their lips and eyes.

Somehow they stumbled out of the boat and were thankful to feel solid ground under foot. Nancy tied the boat to a tree, for the tide was rushing in and they might lose it any moment.

"It is so exposed here on the windward side, let us walk around to the east beach; it will be warmer and drier [illegible]."

The wind snatched the words from her lips and tossed them away. The two girls screamed at each other and then laughed because not a word could be heard. At last they [illegible] to signs, and having found [illegible] [illegible] they started [illegible] [illegible] beach, just above the high water line [illegible] were long stretches [illegible] tangled with tiny shells, and Nan scooped up several armfuls and bade Dorothy do the same.

Both Girls Turned Pale.

"If we have to stay here all night it will make a good bed," she informed her companion.

It was then that Dorothy found the footprint in the sand and pointed it out to Nan. Both girls turned pale, for the footprint was freshly made—a generous shoe had made it—there was the print of a heel and a rubber sole.

It was pointed in the direction they were going.

"Shall we keep on?" pantomimed Dorothy.

Nan shook her head and motioned back. They retreated and went back to the boat, and finding the tide was still rising they entered the grove of trees. "It is quiet here," shrieked Dorothy, sinking down on the dry sand.

Nan followed suit and then, impatient of inaction, she jumped up again and explored the grove. In five minutes she was standing on the east beach and the footprint in the sand was explained.

Nan glared resentfully at the young man in white duck who was broiling bacon over a small fire in a scooped out sand hole. He looked at her in mild surprise.

"We have with us today," he began, but Nan only smiled scornfully and turned away. "Ninny," she said impolitely, and one must admit that this was not quite the proper way for two strangers to open conversation.

"I was going to ask you why you intruded," he observed. "This is the island of Robinson Crusoe—and the island was nonsuffragist, you will remember!" [illegible]

he hated the word. Ah, she knew this young man well. She had been engaged to marry him up to 2 o'clock this very afternoon. It was now 6 and the bacon smelt divinely. Dorothy had detected the odor of bacon and now came running into the scene.

For once she was stricken dumb before the vision of the island inhabitant. She looked from one to the other and her lips curved into a little smile. She was hungry! If Nan wanted to quarrel with the nicest man at Coral Point, very well! Dorothy Wellwood must eat, and to eat one [illegible] [illegible] wretch had [illegible] feed [illegible] coffee—it was too much.

"Good [illegible], Mr. Crusoe—" she began.

"Nan's Friday," protested the gentleman impaling strips of bacon on a neatly trimmed twig. "Starved?"

Dorothy nodded. "Please, [illegible]." Then, when he had made her a bacon sandwich, she took a [illegible] and went over to the enemy, [illegible] down in the sand and conversing with him in the most friendly way imaginable.

"Shipwrecked?" he asked.

Dorothy told their story, calling upon Nan to verify the facts, but Nan sat at a distance her face turned coldly away, her heart sore and resentful. She was watching the waves as they pounded on the rocks below. She wondered if he would care if she was lying dead there among the seaweed.

She was feeling very sad—tomorrow they were leaving Coral Point and she might never see him again. He had a teasing way with him that irked her—now, only a few hours after the quarrel, she was missing him. What had they quarreled about? Such a trifle—she was shocked that she had almost forgotten the cause. He was coming now, with Dorothy, she could hear their voices in friendly argument.

"If I loved anyone—well enough to become engaged—well enough to [illegible] to spend the rest of my life with him—or her," declared wise young Dorothy, "and remember it would have to be a great and glorious love (or I wouldn't love at all), then, it would have to be some huge difference that would separate us! If he wanted to wear red neckties, even—and I loathe them—I would say I love the man and I can learn to endure red neckties—because I loved him so much and he would feel the same way about trifles—and—I must see about the boat!" and Dorothy fled around the beach, leaving Nan and the Man Friday alone together.

She got up and stood uncertainly, tears were brimming her eyes, and she could hear his beloved footsteps coming nearer. She must be first to make amends. She was in the wrong.

"Mr. Friday," she called in a quavering voice. "I am sorry!"

What Mr. Friday said was intended for Nan's ear alone, but I am sure it had nothing to do with red neckties. Young Dorothy coming suddenly upon them, dashed back out of sight and when she had subdued her giggles, announced her coming by a brisk "Ship ahoy—hotel launch in the offing!" and scampered away.

Jim Treadwell smiled tenderly down at Nan. "The blessed angel," he muttered, unaware that the angel in question was eating up the bacon and cornbread.

Transportation of Products in Motortrucks Becoming More Popular in Middle West.

Great progress will be made in the transportation of farm products by trucks in the Middle West in the next few years. This is one of the big economic changes which is coming in agriculture.

TRACTORS ARE TIME SAVERS

To Get Full Benefit of Machine Farmer Should Get All Information About Mechanism.

Farm tractors are time savers for the average farmer. After a farmer gets a tractor his first impulse should be to get all the information possible about it and then so manage it as to get the full benefit from that information.

BIG FARM ECONOMIC CHANGE

SUCCULENT FEED FOR FOWLS

Now That Good Qualities of Forages Are Well Known Hens Should Be Given Ample Supply.

Everyone knows that a hen lays best when she gets the succulent grasses that first shoot out of the earth in spring. Most successful feeders use in their mashes a base of some heavy, nonfattening, yet nutritious food. For a long time the best feeders of the country used wheat bran for this base, but now that the good qualities of forages are well known the bill of fare should be changed to suit.

TAKE FISH WHILE STUPEFIED

Natives of the Fiji Islands Have Most Peculiar Method of Snaring the Finny Tribe.

An extraordinary means of catching fish is practiced by natives of the Fiji islands. The bait is "toova," a native vine or creeper. Having pounded lengths of vine into pulp, the fishermen paddle out over coral reefs. In about 12 to 15 feet of water they dive and fasten bundles of "toova" around rocks and crevices where fish are known to be.

In a few minutes all fish within a radius of six to eight feet turn over on their backs and float up to the surface. They are scooped up into the boats, and soon their tails begin to wiggle. If thrown back into the water the fish return to normal condition.

The poisoning of water in this country is not uncommon. The weed buckeye, when trampled and bruised, will contaminate a whole pond and stupefy the fish. Cattle are sometimes mortally poisoned by drinking nearby water into which they have trampled the roots of water hemlock.

Alive Though Dead.

A returned soldier living in England, who recently applied for his pension was informed that he had been posted as dead. When he persisted in his claim the war office retorted by giving the number of his grave and its location. The serious part of the situation is that being dead from the military point of view he is not entitled to his pension.

Child Entitled to Opinions.

In training the child, his opinions should be respected and parents should take time and have patience to show him wherein he is right or wrong. He certainly cannot always have his own way, now nor in the future; therefore he must learn to obey before he is fit to command, and careful, constant training is needed to produce this result. Children should be chums with their parents, and should also have the companionship of other children and learn to "get along" without difficulties or quarrels; adaptability is essential to happiness.—Exchange.

THE GOODRIDGE BANNER

VOLUME XV, No 6. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JANUARY 28, 1921. $1.50 PER YEAR

Startling Facts

A number of startling facts were brought out in regard to the health of our school children in the examination recently conducted at the Goodridge school by Miss Knutson the county nurse.

Out of the 137 pupils examined only twelve were found to be physically perfect. The examination was conducted with special reference to dentol and optical defects as well as throat and ear troubles. A total of 61 were found to be in need of immediate dental work. Fifty seven were suffering from adenoids, edlarged tonsils and throat troubles of various kinds; 21 proved to have defective eyesight. A number of pupils were found to have ear defects.

Wite figures based on the table of normal heights and weights sixty three per cent of all the children examined were found to be underweight, while ten were found to be overweight.

Realizing that good health is conducive to effective school work, the parents should try to carry out the suggestions given by the examiner. Defective eyesight as well as decayed teeth and throat diseases should be attenbed to immedistely. Consult any physiciau of your choice regarding the health of your children.

The fact that 87 of the total 137 were underweight presents the problem of food nutrition for growing children. Undeŗweight is often due to irregular habits of eating and sleeping and lack of regular exercise. If the child is well he should eat more fat forming foods, such as bread, butter, cereals, sugars and fats. Those who are overweight are advieed to secure as much regular exereise as possible and cut down the fat forming foods and substitute more green vegetables and fruits.

The Shame of It

The other day, for the first time in history, the representatives of forty nations assembled at Gensva to discuss the disarmament of the world—and the United States, to our humiliating shame, was not there! To an invitation to send unofficial rehresentatives the president replied that "as the government of the United States is not a member of the league, I do not feel justified in appointing a commission to take even a de facto participation in the deliberations of the council or of the commission acting on behalf of the council in the execution of the provisions of the League of Nations."

The United States has been the one great peace nation of the world, yet England announces she is pursuing the study of the use of poisoned gases in war because the United States is doing the same thing. And Japan declares she can not reduce armaments because we are increasing ours.

The representatives of the nations who had met to discuss disarmament did nothing because the United States was not there! They will not, they dare not, disarm unless we do—and we dare not disarm unless they do!

Our program today is for the largest standing army we have ever had, and the largest navy in the world. Unless the nations disarm, we must tax ourselves while getting ready for the next war.—Youth's Companion.

DIED

At her home near Erie, Gertie, wife of John T. Coan, died Friday, Jan. 21, of hemorrhage of the liver, after an illness of but a few hours, although she had been a sufferer from liver trouble for years.

The deceased was 46 years of age. She came here with her husbund and family in 1904, and they have since resided in this vicinity. Her husband, two daughters Esther and Alice, and three sons John, Harry and Bert, survive her; besides one sister, Mrs. Barney Baker, who resides here, and two sisters and a brother in Michigan.

Funeral services were held Wednesday at the house at 11 o'clock and at the Erie church at 1:30, Rev. Henry Lutz officiating. Interment was made in the Erie cemetery.

Card of Thanks

The undersigned desire to return thanks to those friends who so kindly assisted them in their hour of bereavement, and to the donors of the beautiful flowers.

JOHN T. COAN AND FAMILY.

C. G. Mugg, the Grand Forks Eye man, will be at Goodridge February 8.

SEED SELECTION IMPORTANT

Plant Is Hardy and Not Injured by Ordinary Cold and Sowing May Be Done When Other Farm Work Is Comparatively Slack.

([illegible] by the United States Department of Agriculture.)

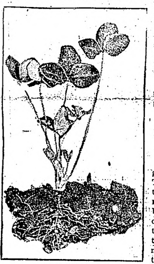
Red clove[illegible] been styled the cor[illegible] stone of agriculture in the North Central and [illegible] states. Many farmers will begin laying [illegible] stone as early as February [illegible] it is cu[illegible] in many sections [illegible] red [illegible] the surface of [illegible] so that [illegible] sink into the [illegible] the first [illegible] in the spring. [illegible] is hardy and is not injured [illegible] ordinary cold, and the fact that it [illegible] sown at a [illegible] when work on the farm is comparatively light adds [illegible] economy of its cultivation.

The first important point to be [illegible] is the selection of good s[illegible] specialists of the United States Department of Agriculture. Considerable care should be used in this [illegible] well in advance of the time [illegible]. This is particularly true [illegible], when a large proportion [illegible] red clover seed used in the United States comes from abroad. If [illegible] is used the expected crop may be partial or total failure.

Good Seed Is Plump.

Good red clover seed is plump or well filled, bright with a slight luster. [illegible] color of individual seeds ranges from violet to light yellow. The individual seeds should be at least [illegible] sized and fairly uniform, free of adulterants of any kind and from seeds of noxious weeds.

Home-grown seed is desirable, especially in the North, because it is almost certain to be adapted to local conditions. If it is not available [illegible]ples should be obtained from reliable dealers. These should be examined for adulterants, weed seeds and shriveled seeds. They should also be tested for germination before purchasing in quantity.



Red Clover Plant.

In the absence of more accurate methods an estimate should be made of the proportion of true red clover seed and of weed seeds and other impurities. From the red clover seed separated from all impurities, a counted number, as 100, should be taken just as they come. These seeds should be placed between layers of moistened cloth or paper or merely covered in a bed of sand or light soil. A dinner plate, covered with another, is a suitable germinating receptacle. It can be kept in the living room, at a temperature between 65 and 85 degrees. Between the third and sixth days the sprouting ability of the seeds should be shown.

It should be borne in mind that the sowing value of the seed is represented by the amount of true clover which will germinate with reasonable promptness. Thus, if four-fifths of a sample is pure clover, and only three-fourths will sprout, then only three-fifths, or 60 per cent, of the original seed as offered will grow. Thus, the germinating test has an important bearing on the worth of seed offered to the farmer.

Protects American Farmers.

A seed-testing service is maintained by the United States Department of Agriculture, where 29,638 samples of various seeds were examined and tested in the last fiscal year—16,442 in Washington and 13,196 in the five branch seed-testing stations. Similar service is offered by the various state experiment stations. The department also exercises a strict inspection service over field seeds brought from foreign countries, and last year 5,000,000 pounds of various seeds were rejected or held for cleaning before being allowed to be offered to American farmers.

It is important that the testing of seed be done early enough that a sufficient supply of pure seed can be purchased in time for use, and if seed is to be sent to one of the government or state testing laboratories, at least two weeks should be allowed.

School Bond Election

In this issue appears the notice of of election to vote bonds [illegible] the school district. The election is called for Saturday, February 5. The issue of these bonds in the sum of $10,000 will place the finances of the district on a cash basis. It is an absolute necessity to make no mistake on this point—if the school is to continue to be operated with anything like its present degree of efficiency or even if it shall be operated at all. We are not alone in this plight. Districts all over the state are issuing bonds to raise funds to keep their school work moving. Thief River Falls voted Tuesday evening by an overwhelming majority to issue school bonds in the sum of $63,000.

We do not look for any serious opposition to our little issue. Weighed in the balance against the destruction of our splendid school system it is a nothing. Besides, a considerable portion of the funds realized from the sale of these bonds is to be used to refund floating indebtedness that will have to be paid directly by taxation.

Community Club Meeting

Soil Expert to Discuss Peat and Phosphates

A splendid program has been arrynged for the regular meeting of the Community club to be held Thursday evening, February 3. A soil expert ffom the University of Minnesota will be here to give a discussion on peat soils and the benefit of the application of phosphates to such soils. All soils in this section are deficient in phosphorus. In view of this fact the farmers are now applying phosphates to the soil. Hence this is a very timely topic and a discussion of this subject ought to be to the interest of every one in this community.

Aside from this lecture, seaeral musical numbers will be rendered. The program will begin at 8 o'clock.

University Professor to Lecture

The third Lyceum number will be given Tuesday evening, February 1. This will be an interesting talk on a timely topic by A. William Olmstead. Mr Olmstead is the secretary of the Lycenm department of the University of Minnesota. The committee is anxious to have a large turn out at this meeting to show Mr. Olmstead that the community is interested in this type of entertainment, and in this way it may help us to secure the very dest type in the Lyceum circuit.

McLee Namsd as Director

Stuart McLeod has been named to succeed A. J. Anderson as director for Pennington county in the Minnesota Red River Valley Development association. Mr. McLeod is well and favorably known all throughout this section, and the delection of him for the office will be heartily commended. Mr. Anderson, through the circumstance of having taken up his residence at Frygla, necessarily had to tender his resignation as direcor for Pennington county.

Farmers' Referendum

The first statewide farmers' referendum taken in Minnesota during a legislative session to inform senators and representatives as to desires of farmers was begun Monday by the Minnesota Farm Bureau federation. Three hundred presidents, directors and county agents in county farm bureau organizations are presenting federation members copies of the concurrent resolution calling for changes in grain grading and the bill providing for a 10 per ecnt tax on deals in grain futures. The results will be forwarded to the state federation headquarters, old capitol building, St. Paul.

The plan is a good one, but it seems as if a fairer showing of the wishes of the farmers would have been obtained had the inquiry been made more general andnot confined to farm bureau members.

Machines and Implements of All Kinds Should Be Overhauled and Needed Repairs Made.

Better, bring in all the machinery not in use and start to get ready for spring. Take off the plows, put them where they will be handy to get to the blacksmith's and see that the cultivator shovels are cared for. Don't wait until the blacksmith is rushed to have the disks sharpened. He will do a better job if allowed to take [illegible]

Mr. Friday

By KATE EDMONDS

(©, 1921, by McClure Newspaper Syndicate.)

"A squall!" cried Dorothy as the little launch headed for home.

Nan glanced over her shoulder at the yellow-brown clouds rapidly obscuring the sun. "We cannot reach the Point," she declared. "We must make for the nearest island."

"Is there any danger?" asked timid Dorothy, who had been insistent about remaining outside the breakwater.

"I think not," panted Nan, for her heart was throbbing fast. She was a little fearful of making the nearest island before the storm burst and Little Petrel island was a dangerous place to land. Many a small boat had gone down off the cruel rocks. When they were within a boat's length of the beach the wind broke loose with a scream of fury. A long wave rushed the boat upon the beach and left it there in the soft sand. The salt spray stung their lips and eyes.

Somehow they stumbled out of the boat and were thankful to feel solid ground under foot. Nancy tied the boat to a tree, for the tide was rushing in and they might lose it any moment.

"It is so exposed here on the windward side, let us walk around to the east beach; it will be warmer and drier [illegible]"

The wind snatched the words from her lips and tossed them away. The two girls screamed at each other and then laughed because not a word could be heard. At last they ceased to [illegible] and having found [illegible] they started [illegible] just above the high water [illegible] were long stretches [illegible] tangled with tiny [illegible] shells, and Nan scooped up several armfuls and bade Dorothy do the same.

Both Girls Turned Pale.

"If we have to stay here all night it will make a good bed," she informed her companion.

It was then that Dorothy found the footprint in the sand and pointed it out to Nan. Both girls turned pale, for the footprint was freshly made—a generous shoe had made it—there was the print of a heel and a rubber sole.

It was pointed in the direction they were going.

"Shall we keep on?" pantomimed Dorothy.

Nan shook her head and motioned back. They retreated and went back to the boat, and finding the tide was still rising they entered the grove of trees. "It is quiet here," shrieked Dorothy, sinking down on the dry sand.

Nan followed suit and then, impatient of inaction, she jumped up again and explored the grove. In five minutes she was standing on the east beach, and the footprint in the sand was explained.

Nan glared resentfully at the young man in white duck who was broiling bacon over a small fire in a scooped out sand hole. He looked at her in mild surprise.

"We have with us today," he began, but Nan only smiled scornfully and turned away. "Ninny," she said impolitely, and one must admit that this was not quite the proper way for two strangers to open conversation.

"I was going to ask you why you intruded," he observed. "This is the island of Robinson Crusoe, and the island [illegible] you will re[illegible] he hated the word. Ah, she knew this young man well. She had been engaged to marry him up to 2 o'clock this very afternoon. It was now 6 and the bacon smelt divinely. Dorothy had detected the odor of bacon and now came running into the scene.

For once she was stricken dumb before the vision of the island inhabitant. She looked from one to the other and her lips curved into a little smile. She was hungry! If Nan wanted to quarrel with the nicest man at Coral Point, very well! Dorothy Wellwood must eat, and to eat one [illegible] advances even to a [illegible] wretch had cornbread [illegible] and coffee—it was too much.

"Good afternoon, Mr. Crusoe—" she began.

"Nan's Friday," protested the gentleman impaling strips of bacon on a neatly trimmed twig. "Starved?"

Dorothy nodded. "Please, sir, [illegible]" Then, when he had made [illegible] a bacon sandwich, she took a [illegible] and went over to the enemy, [illegible] down in the sand and conversing with him in the most friendly way imaginable.

"Shipwrecked?" he asked.

Dorothy told their story, calling upon Nan to verify the facts, but Nan sat at a distance her face turned stonily away, her heart sore and resentful. She was watching the waves as they pounded on the rocks below. She wondered if he would care if she was lying dead there among the seaweed.

She was feeling very sad—tomorrow they were leaving Coral Point and she might never see him again. He had a teasing way with him that irked her—now, only a few hours after the quarrel, she was missing him. What had they quarreled about? Such a trifle—she was shocked that she had almost forgotten the cause. He was coming now, with Dorothy, she could hear their voices in friendly argument.

"If I loved anyone—well enough to become engaged—well enough to plan to spend the rest of my life with him—or her," declared wise young Dorothy, "and remember it would have to be a great and glorious love (or I wouldn't love at all), then, it would have to be some huge difference that would separate us! If he wanted to wear red neckties, even—and I loathe them—I would say I love the man and I can learn to endure red neckties—because I loved him so much and he would feel the same way about trifles—and—I must see about the boat!" and Dorothy fled around the beach, leaving Nan and the Man Friday alone together.

She got up and stood uncertainly, tears were brimming her eyes, and she could hear his beloved footsteps coming nearer. She must be first to make amends. She was in the wrong.

"Mr. Friday," she called in a quavering voice. "I am sorry!"

What Mr. Friday said was intended for Nan's ear alone, but I am sure it had nothing to do with red neckties. Young Dorothy coming suddenly upon them, dashed back out of sight and when she had subdued her giggles, announced her coming by a brisk "Ship ahoy—hotel launch in the offing!" and scampered away.

Jim Treadwell smiled tenderly down at Nan. "The blessed angel," he muttered, unaware that the angel in question was eating up the bacon and cornbread.

University Lyceum Course

THIRD NUMBER

Tuesday, February 1, 1921

Mr. Olmstead is the secretary of the lecture department of the State University and the general manager of the lecturing business in Minnesota. He knows perhaps better than any other man in the state what the people want and he tries to adapt his material and methods to fit their needs.

Mr. Olmstead believes in democracy on the platform as well as in other places. He believes the chief difficulty with lecturers is that they totally ignore the audience. They usually make a lot of noise and demonstartion on the platform telling the people things they have always known in language which cannot be understood without an interpreter. Mr. Olmstead will introduce you to the Open Forum style of lecture in which the audience is given the biggest part on the program. The lecture will be short and snappy. It will open up some of the biggest issues in national and world affairs. At the close the audience will be given an opportunity in a systematic parliamentary manner to ask questions and take part in discussion. This will prove the most lively part of the program.

Mr. Olmstead is a lawyer. He has been a close student of public affairs. His views are always progressive and liberal, but he knows how to allow for the other fellow's point of view. He has beeu for ten years a University teacher, but he boasts that no one can tell it on him. He knows how to translate a college education into the English language.

Transportation of Products in Motortrucks Becoming More Popular in Middle West.

Great progress will be made in the transportation of farm products by trucks in the Middle West in the next few years. This is one of the big economic changes which is coming in agriculture.

TRACTORS ARE TIME SAVERS

To Get Full Benefit of Machine Farmer Should Get All Information About Mechanism.

Farm tractors are time savers for the average farmer. After a farmer gets a tractor his first impulse should be to get all the information possible about it and then so manage it as to get the full benefit from that information.

BIG FARM ECONOMIC CHANGE

SUCCULENT FEED FOR FOWLS

Now That Good Qualities of Forages Are Well Known Hens Should Be Given Ample Supply.

Everyone knows that a hen lays best when she gets the succulent grasses that first shoot out of the earth in spring. Most successful feeders use in their mashes a base of some heavy, nonfattening, yet nutritious food. For a long time the best feeders of the country used wheat bran for this base, but now that the good qualities of forages are well known the bill of fare should be changed to suit.

TAKE FISH WHILE STUPEFIED

Natives of the Fiji Islands Have Most Peculiar Method of Snaring the Finny Tribe.

An extraordinary means of catching fish is practiced by natives of the Fiji islands. The bait is "toova," a native vine or creeper. Having pounded lengths of vine into pulp, the fishermen paddle out over coral reefs. In about 12 to 15 feet of water they dive and fasten bundles of "toova" around rocks and crevices where fish are known to be.

In a few minutes all fish within a radius of six to eight feet turn over on their backs and float up to the surface. They are scooped up into the boats, and soon their tails begin to wiggle. If thrown back into the water the fish return to normal condition.

The poisoning of water in this country is not uncommon. The weed buckeye, when trampled and bruised, will contaminate a whole pond and stupefy the fish. Cattle are sometimes mortally poisoned by drinking nearby water into which they have trampled the roots of water hemlock.

Alive Though Dead.

A returned soldier living in England, who recently applied for his pension was informed that he had been posted as dead. When he persisted in his claim the war office retorted by giving the number of his grave and its location. The serious part of the situation is that being dead from the military point of view he is not entitled to his pension.

Child Entitled to Opinions.

In training the child, his opinions should be respected and parents should take time and have patience to show him wherein he is right or wrong. He certainly cannot always have his own way, now nor in the future; therefore he must learn to obey before he is fit to command, and careful, constant training is needed to produce this result. Children should be chums with their parents, and should also have the companionship of other children and learn to "get along" without difficulties or quarrels; adaptability is essential to happiness.—Exchange.

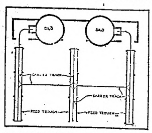
SILAGE CARRIERS TO FACILITATE FEEDING

Equipment Need Not Be Elaborate or Expensive.

Convenient Arrangement for Carrying Feed to Bunks Is Shown in Illustration—One Silo Is Emptied at a Time.

For steer feeding, silage is cheap and efficient. Whether it is fed to breeding cattle, fattening steers, stockers or baby beeves, there is no other feed in the corn belt that can entirely replace it at the same low cost.

An equipment for feeding silage conveniently is shown in the illustration. It is not elaborate or expensive, but is made strong and serviceable. There are three long, flat-bottomed feed-bunks, each 4 feet wide and 36 feet long. They are made of 2-inch lumber and are supported by 3-inch wrought-iron pipe set in concrete.



The Silage Is Carried to the Feed Troughs in a Very Short Time.

The carrier-tracks are supported from above by steel posts and plank girders. They connect the silage chutes and the feed bins. All the carrier-tracks are connected, so that one silo can be emptied at a time. The feed-bunks are used for both silage and grain feeding.

Feeders generally plan to have the feed-bunks low, as high troughs have caused sagging backs in steers.—W. E. Frudden, in Popular Science Monthly.

IMPROVEMENT OF PET STOCK

Officials of Bureau of Animal Industry Puzzled as to Where to Draw Dividing Line

Applications to recognize the improved breeding of such stock as Belgian hares, wild ducks raised in captivity, game birds, and dogs is making it difficult for officials of the bureau of animal industry, United States Department of Agriculture, to determine just where the dividing line between farm live stock and other animals, including pet stock, should be drawn in developing the "Better Sires—Better Stock" campaign. The classes in which particular efforts toward improvement by the use of purebred sires are being directed include cattle, horses, asses, swine, sheep, goats, and poultry.

A supplementary list of pet stock and miscellaneous animals is being kept, and thus far 176 such animals, all bred to purebred sires, have been listed. The predominance of interest, of course, is in the improvement of general farm live stock, of which nearly 400,000 head are now listed with the department.

SOY BEAN GROWING POPULAR

Rapidly Becoming Crop of Special Importance Because of Big Possibilities of Seed.

The soy bean has become a crop of special importance throughout the country, which is indicated by the large acreage devoted to it in 1920 and the increased interest in the possibilities of the seed for food and for oil. The introduction of new varieties by the United States Department of Agriculture has been largely responsible for extending the growing area of the crop not only in the North and West but in the extreme South.

During the past year the Mandarin, Easy Cook, Aksarben and Hoosier were placed in trade in the northern states. In the South, the Otootan, Laredo and Biloxi are being widely grown.

VALUE OF SILAGE

One ton of silage equals one ton of sugar beets.

Three tons of silage equal one ton of clover hay.

Three and one-half tons of silage equal one ton of lucerne hay.

Two and one-fourth tons of silage equal one ton of marsh hay.

One-half ton of silage equals one ton of pumpkins.

FIREWOOD MAKES GOOD CASH CROP

Farmer Can Make His Farm Pay Substantial Profits by Producing Fuel.

USEFULNESS OF MACHINERY

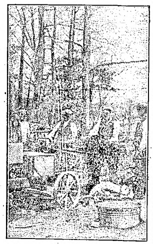
Modern Apparatus Not Only Cuts Wood and Standing Trees, but Is Used for Various Other Purposes About the Farm.

(Prepared by the United States Department of Agriculture.)

The farmer's problems appear, all of a sudden, to have become the leading national problem. Congress is talking of little else than legislation aimed to help the agricultural interests. The bankers are busy explaining why they can't lend the farmer the cash he needs. The plight of the farmer is the chief topic of discussion in railroad circles and among business men at all the big markets. Farmers themselves are organizing everywhere to force the prices of their products up to a point where selling will not mean a loss to them.

Meanwhile what the individual farmer needs is not talk, but cash. Certain things he must buy right along for himself and his family. He can't wait for the national debate to run down.

In this situation farmers who are hard pressed for cash may be overlooking the fact that all around them "money is growing on the trees," and the crop is just waiting to be picked. This is almost literally true. In other words the farmer can harvest another crop—his timber. All over the country thousands of farmers are turning to this immediate source of cash. In money value, firewood ranks as America's sixth crop. Government statistics show rank of crops in this order: Wheat, corn, cotton, hay, oats, firewood.



Modern Machinery Reduces Hand Labor in Filling the Woodshed.

Money in Producing Fuel.

With one of the practical, l[illegible]-priced power log saws now on the market, the farmer can make his farm pay substantial profits by producing fuel—a commodity that has held up well in price and for which there is an almost unlimited demand. Then, too, there is always a steady market for ties, fence posts and timbers that can easily and quickly be cut with these lightweight, portable machines. In this way the farmer, with little work or expenses, can realize good profits and still hang on to his grain and live stock if he wants to, until prices get better.

On nearly every farm in most sections of the country there is timber in more than sufficient quantities for home use. There are live trees that need to be taken out to give room for younger ones to grow, or to clear the land for cultivation; there are dead trees that are allowed to decay; and on thousands of farms, the banks of rivers and creeks are lined with great logs and other drift wood.

For many years the farmer has been interested in, and has readily accepted, machinery that would save him time, labor and money. Now he is seizing upon a machine that actually makes money for him—as well as saving him time and labor. Those who have used the 1921 improved model log saws say these machines come near to being perfect sawing outfits. They do the work of ten to fifteen able-bodied men—cut down trees and saw up logs and branches of any size—at an average cost of about 1½ cents a cord. Cutting 35 cords of wood is an easy day's work, and it is possible to cut as much as 50 cords in that time.

Machine Cuts Standing Trees.

One of the most popular log saws makes over 300 strokes a minute, and its engine pulls over four horsepower. This particular machine cuts down standing trees, too. By attaching this clever device, trees can be cut down with the level of the ground, so there will be no stump, or higher up, as desired. By attaching a circular saw the outfit is quickly turned into a buzz saw, which rapidly zips up limbs and branches, those parts of the tree which usually go to waste, yet which produce fully one-third of the wood.

MARKETING APPLES

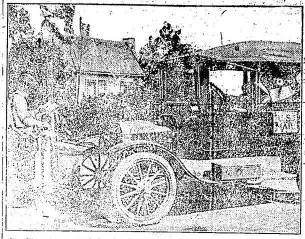
Information secured from apple-market investigations by the United States Department of Agriculture indicate that relatively low prices in large crop years in the beginning of the season make for quick movement and rapid consumption, with the natural result of better season averages; that marketing of inferior grades along with good fruit in large crop years is not profitable; that the effective operation of grade and package laws may be counted upon to aid in stabilizing apple markets.

MPORTANCE OF APPEARANCE

otatoes Suitable for Baking Wrapped in Paper and Graded Bring Bigger Profit.

The package in which a product is old has much to do with its sale. A ew York farmer found it profitable o grade and wrap in paper potatoes uitable for baking purposes. He got better price for them and also some dvertisement which sold other prod e.

PARCEL POST DELIVERS EGGS TO DOOR OF CITY CONSUMERS



One Big Advantage of the Parcel Post Is That One Package or Many May Be Sent.

If the rural delivery is at your door, the city market is there for your small produce, say specialists of the United States Department of Agriculture. At present many producers are neglecting entirely this marketing medium or are not utilizing it to the extent they might. Wider use of the parcel post for marketing eggs is particularly advisable for the small producer who can easily and advantageously build up a direct trade with the city. When more produce is marketed directly from the farm to the city there will be less complaint on the part of the producer that the prices he must sell for are too low, and less on the part of the consumer that the prices he pays are too high.

Sell Only First-Class Eggs.

It is preferable to produce infertile eggs for market, as fertile eggs deteriorate rapidly in warm weather and are the cause of much loss. The eggs should be gathered at least once a day and stored in a well-ventilated place, where they can be kept as cool as possible. As washing removes the mucilaginous coating of eggs and opens the pores of the shell, it should not be practiced in the care of eggs intended for high-class trade. Soiled eggs should be used at home or disposed of otherwise than to a parcel-post customer.

If there is any doubt concerning the freshness or quality of the eggs, they should be candled, so that all eggs showing any defect may be held at home, say poultry specialists of the United States Department of Agriculture. For parcel-post shipment it is essential that uniform containers and a uniform pack should be used, as otherwise the packages will not wear well, nor will they look attractive and appeal to the fancy trade. Furthermore, the containers should be stout and durable, so as to make it worth while to return them as "empties" for subsequent use.

According to post office regulations, eggs will be accepted for local delivery when they are so packed in a basket or other container as to prevent damage to other mail matter. Eggs to be sent beyond the local office are accepted for mailing, regardless of distance, when each egg is wrapped separately and surrounded with excelsior, cotton or other suitable material and packed in a strong container made of double-faced, corrugated pasteboard, metal, wood or other suitable material and wrapped so that nothing can escape from the package. All such parcels must be labeled "Eggs." Eggs in parcels weighing more than 20 pounds are accepted for mailing to offices in the first and second zones when packed in crates, boxes, buckets or other containers having tight bottoms to prevent the escape of anything from the package and so constructed as properly to protect the contents. Such packages must be marked "Eggs—This Side Up" and must be transported outside of mail sacks or boxes.

It is advisable that square block tissue paper, which comes in packages of 500 sheets each, soft wrapping paper, or newspaper should be used around each egg, as otherwise there is a danger of breakage in handling. Average hens' eggs will weigh about two ounces apiece, or between two and three pounds a dozen, when properly packed for mailing in a carton. Most parcels containing a dozen eggs will exceed two pounds, but will not reach three; therefore the postage on them will be 7 cents within the first and second zones, or 150-mile limit. A parcel containing two dozen eggs will add, perhaps, 2 cents to the postage, though sometimes only 1 cent, depending on the character of the container and wrapper.

Ship Large-Size Packages.

The larger the parcel, within the size and weight limits, the cheaper is the postage, as the first pound of every package costs 5 cents within the first and second zones, while each additional pound, up to 50, costs but 1 cent.

WEEDS ARE INJURIOUS

Weeds are injurious to man in the following ways: 1. They crowd out the growing crop. 2. They consume the moisture necessary for a crop. 3. They consume the mineral or other food elements essential to a crop. 4. They pull down a crop. 5. They are injurious because they harbor insects. 6. They are injurious because they harbor parasitic fungi. 7. They prevent the proper cultivation of the soil. 8. They may cause conditions which breed diseases. 9. They may poison the soil. 10. They stop drains. 11. They poison animals and man.—Prof. L. H. Pammel, Iowa State College.

URGE TESTING OF SEED CORN

Even When Carefully Selected and Stored It Should Be Tested Before Planting.

Even where seed corn has been carefully gathered and stored it should be thoroughly tested in the spring before planting. The best way to do this is to make a seed corn testing box and test 100 ears separately.

Each kernel that is tested must be perfect, and not injured at the tip when it is removed from the ear. Hand-shelling will give much fewer injured tips than machine shelling, and should be used with all seed corn. If three or more kernels out of ten from any one ear fail to grow it will be wise to test every ear in the entire supply of seed. If the 100 tested ears show no poor ones, further testing of the supply is unnecessary.

PROPER CLUTCH LUBRICATION

Truck Operator Will Do Well to Use Oil Recommended by Manufacturer of Vehicle

One rule the truck operator will be well advised to cling to as regards the lubrication of the disk clutch, and that is always to use the brand of oil recommended by the maker of the vehicle. The truck clutch shoulders a heavy burden at best and absolutely correct lubrication is essential to efficient operation of continued service.

COMPOST HEAP MADE FROM GARDEN WASTE

Organic Rubbish of All Kinds Especially Suitable.

Start by Laying Down Bed of Stable Manure and Alternating With Refuse Matter—Especially Valuable for Hotbeds.

Garden waste, decayed vegetables, dead vines, weeds, and the organic rubbish that collects about the place during a busy summer may be cleaned up and put to work again through the agency of a compost heap, say specialists of the United States Department of Agriculture. Start the heap by laying down a bed of stable manure which has not been burned or heated. The size of the plot will vary with the amount of refuse to be used; for ordinary uses, if the bed is made eight feet long by six feet wide and two feet deep it will serve the purpose. Over the manure spread a two-foot layer of refuse and cover with another layer of manure. This last layer need be only a foot in thickness.

If it is desired to add to the heap from time to time the top layer may be opened and the new material emptied into the hole thus made. This is convenient for the suburban home where there is no animal to consume the kitchen waste. In the spring the heap is well mixed with a fork and the compost is ready to be spread on the garden plot. The heating manure will effectively destroy any weed seed present and will also break down the structure of most of the materials that have been thrown upon the pile. The process may be continued indefinitely by simply adding enough manure to insure heating. Compost is especially valuable for use in hotbeds and cold frames.

GIVE BIRDS CONSIDERATION

Little Songsters Are Friends of Farmer and Should Be Looked After in Winter.

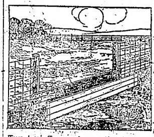
Birds as friends of agriculture are entitled to consideration from the farmers. When the snows come the birds find it difficult to make a living. Crumbs and suet placed outdoors may save bird lives.

HOG-PROOF GATE IS HANDY ARRANGEMENT

Cattle and Horses Permitted to Pass at Will.

Two Low Fences, About 18 Inches High, Serve to Keep Swine in Their Own Pasture—Other Animals Can Step Over.

A farmer uses this arrangement to keep the hogs in one lot, while allowing his cattle and horses to pass unrestrained into another pasture. The gate was removed from the hinges and the space from post to post was boarded up solidly to a height of 18 inches from the ground. About 18 inches from each gatepost, inside the lot where the hogs were confined, a short post was driven. Long boards nailed from one to the other of these posts made another panel of board fence, 18 inches high and parallel with the boarded-up gate, with an 18-inch space between the two low walls. When a hog comes to this detached panel, it will go to the end and pass round into the narrow passage between the two board walls, continuing on through and out at the other end till it tires of the performance. One that is short enough to turn in the 18-inch passage is too small to jump or climb over the boards before it, and one that cannot turn is unable to face the wall and make the attempt to climb.



Two Low Fences Across the Gateway Will Stop the Hogs, but Allow Horses and Cattle to Pass.

All other stock, except small calves or colts, will step over the low walls. No wide cracks, offering footholds, should be left between the boards.—H. F. Grinstead, Columbia, Mo., in Popular Mechanics Magazine.

FARM SELECTION PERPLEXING

Study of Several Intricate Points Called For—Knowledge of Basic Principles Needed.

(Prepared by the United States Department of Agriculture.)

In choosing a farm one has the options of buying with the intention of operating the place as his entire business, buying a small farm and renting enough additional land to meet his needs, or renting a farm either on the share or cash basis. One's choice in the matter is usually determined by the funds available.

If one has only a small amount of capital and wishes to undertake farming as a business from which to derive his entire income, he should, in nearly all cases, begin as a renter. However, if he wishes to buy a farm on which to live, deriving a part of his income from other sources, then, possibly, purchasing is desirable, even if capital is limited.

Whatever course is followed, it is highly desirable that one thoroughly understand the basic principles governing the farm business before deciding some of the finer points. A disregard of these basic principles is responsible for a large proportion of farm failures.

A man may unconsciously work all his life against some economic barrier when success would have been comparatively easy if he had selected a farm where the economic principle would aid him instead of working against him.

AGRICULTURE A NATIONAL PROBLEM

A sober national thought with regard to the importance, the absolute necessity, of a sustained agriculture in this country is imperative. There is, perhaps, no single solution for the situation which the farmers are now facing, but there are many steps which can be and should be taken to place our agriculture on a more satisfactory basis and to stabilize the business of farming, not in the interest of the farmers alone but in the interest of the nation as a whole. The matter is of such tremendous importance to our entire population that it should be recognized everywhere as a national problem and dealt with as such.—Annual Report of the Secretary of Agriculture.

DRY PLACE FOR SEED BEANS

Molds Will Quickly Attack Crop if Moisture Gets to Them, Killing Germinating Qualities.

Beans for seed should be kept in a dry place or molds will readily attack them. Beans will heat if the least bit of moisture gets to them and destroys their germinating qualities. Shoveling them over will help keep them dry.

Why Pay Rent

Notice of Special School Meeting and Election

NOTICE IS HEREBY GIVEN, That, pursuant to a resolution of the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, a special meeting and election in and for said district will be held at School House in the village of Goodridge, Pennington county, Minnesota, on the 5th day of February, 1921, at one o'clock p. m., to vote upon the following proposition:

Shall the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, issue its Refunding Bonds in the amount of $10,000 00, bearing date the First day of February, 1921, maturing as to principal on the first day of February, 1936, and bearing interest at the rate of seven per cent per annum, payable semiannually, for the purpose of refunding the outstanding floating indebtedness of said District?

The polls will remain open until Four o'clock p. m.

Dated this 24th day of January, 1921
NICK BUNDHUND, Clerk.

Those Unnecessary Warnings.

Excellent young women have chopped ice and frozen sherbet behind closed doors because they do not want to be told again to be sure not to get the ice all over the back piazza. Certain warnings go with certain projects as inevitably as rubbers with the rain. The practical mother has so often found the warnings necessary, that the mere sight of the act produces the formula by rote.

Model sons and daughters should accept these hints with gratitude, thus avoiding all friction, however minor. But rather than be advised to do that which they were planning to do already, the most loyal of daughters will resort to clandestine measures and go stealthily with the ice pick as with a poniard beneath a cloak.

This annoys an affectionate and capable mother very much. And she has a right to be annoyed, has she not? After all, it is her ice pick.—Frances Lester Warner in the Atlantic Monthly.

His One Chance.

"I believe," said the impatient man as he put aside the telephone, "that I'll go fishing."

"Didn't know you cared for fishing."

"I don't ordinarily. But it's the only chance I have of finding myself at the end of a line that isn't busy."—Boys' Life.

MARKETING APPLES

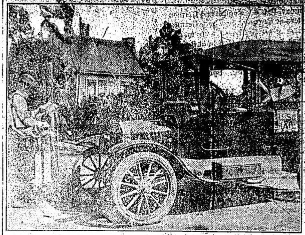
Information secured from apple-market investigations by the United States Department of Agriculture indicate that relatively low prices in large crop years in the beginning of the season make for quick movement and rapid consumption, with the natural result of better season averages; that marketing of inferior grades along with good fruit in large crop years is not profitable; that the effective operation of grade and package laws may be counted upon to aid in stabilizing apple markets.

MPORTANCE OF APPEARANCE

otatoes Suitable for Baking Wrapped in Paper and Graded Bring Bigger Profit.

The package in which a product is old has much to do with its sale. A ew York farmer found it profitable o grade and wrap in paper potatoes uitable for baking purposes. He got better price for them and also some dvertisement which [illegible] other [illegible]

PARCEL POST DELIVERS [illegible] TO DOOR OF CITY CONSUMERS



One Big Advantage of the Parcel Post Is That One Package or Many May Be Sent.

If the rural delivery is at your door, the city market is there for your small produce, say specialists of the United States Department of Agriculture. At present many producers are neglecting entirely this marketing medium or are not utilizing it to the extent they might. Wider use of the parcel post for marketing eggs is particularly advisable for the small producer who can easily and advantageously build up a direct trade with the city. When more produce is marketed directly from the farm to the city there will be less complaint on the part of the producer that the prices he must sell for are too low, and less on the part of the consumer that the prices he pays are too high.

Sell Only First-Class Eggs.

It is preferable to produce infertile eggs for market, as fertile eggs deteriorate rapidly in warm weather and are the cause of much loss. The eggs should be gathered at least once a day and stored in a well-ventilated place, where they can be kept as cool as possible. As washing removes the mucilaginous coating of eggs and opens the pores of the shell, it should not be practiced in the case of eggs intended for high-class trade. Soiled eggs should be used at home or disposed of otherwise than to a parcel-post customer.

If there is any doubt concerning the freshness or quality of the eggs, they should be candled, so that all eggs showing any defect may be held at home, say poultry specialists of the United States Department of Agriculture. For parcel-post shipment it is essential that uniform containers and a uniform pack should be used, as otherwise the packages will not wear well, nor will they look attractive and appeal to the fancy trade. Furthermore, the containers should be stout and durable, so as to make it worth while to return them as "empties" for subsequent use.

According to post office regulations, eggs will be accepted for local delivery when they are so packed in a basket or other container as to prevent damage to other mail matter. Eggs to be sent beyond the local office are accepted for mailing, regardless of distance, when each egg is wrapped separately, and surrounded with excelsior, cotton or other suitable material and packed in a strong container made of double-faced, corrugated pasteboard, metal, wood or other suitable material and wrapped so that nothing can escape from the package All such parcels must be labeled "Eggs." Eggs in parcels weighing more than 20 pounds are accepted for mailing to offices in the first and second zones when packed in crates boxes, buckets or other containers having tight bottoms to prevent the escape of anything from the package and so constructed as properly to protect the contents. Such packages must be marked "Eggs—This Side Up" and must be transported outside of mail sacks or boxes.

It is advisable that square block tissue paper, which comes in packages of 500 sheets each, soft wrapping paper or newspaper should be used around each egg, as otherwise there is a danger of breakage in handling. Average hens' eggs will weigh about two ounces apiece, or between two and three pounds a dozen, when properly packed for mailing in a carton. Most parcels containing a dozen eggs will exceed two pounds, but will not reach three; therefore the postage on them will be 7 cents within the first and second zones, or 150-mile limit. A parcel containing two dozen eggs will add, perhaps, 2 cents to the postage, though sometimes only 1 cent, depending on the character of the container and wrapper.

Ship Large-Size Packages.

The larger the parcel, within the size and weight limits, the cheaper is the postage, as the first pound of every package costs 5 cents within the first and second zones, while each additional pound, up to 50, costs but 1 cent.

WEEDS ARE INJURIOUS

Weeds are injurious to man in the following ways: 1. They crowd out the growing crop. 2. They consume the moisture necessary for a crop. 3. They consume the mineral or other food elements essential to a crop. 4. They pull down a crop. 5. They are injurious because they harbor insects. 6. They are injurious because they harbor parasitic fungi. 7. They prevent the proper cultivation of the soil. 8. They may cause conditions which breed diseases. 9. They may poison the soil. 10. They stop drains. 11. They poison animals and man.—Prof. L. H. Pammel, Iowa State College.

URGE TESTING OF SEED CORN

Even When Carefully Selected and Stored It Should Be Tested Before Planting.

Even where seed corn has been carefully gathered and stored it should be thoroughly tested in the spring before planting. The best way to do this is to make a seed corn testing box and test 100 ears separately.

Each kernel that is tested must be perfect, and not injured at the tip when it is removed from the ear. Hand-shelling will give much fewer injured tips than machine shelling, and should be used with all seed corn. If three or more kernels out of ten from any one ear fail to grow it will be wise to test every ear in the entire supply of seed. If the 100 tested ears show no poor ones, further testing of the supply is unnecessary.

PROPER CLUTCH LUBRICATION

Truck Operator Will Do Well to Use Oil Recommended by Manufacturer of Vehicle

One rule the truck operator will be well advised to cling to as regards the lubrication of the disk clutch, and that is always to use the brand of oil recommended by the maker of the vehicle. The truck clutch shoulders a heavy burden at best and absolutely correct lubrication is essential to efficient operation of continued service.

COMPOST HEAP MADE FROM GARDEN WASTE

Organic Rubbish of All Kinds Especially Suitable.

Start by Laying Down Bed of Stable Manure and Alternating With Refuse Matter—Especially Valuable for Hotbeds.

Garden waste, decayed vegetables, dead vines, weeds, and the organic rubbish that collects about the place during a busy summer may be cleaned up and put to work again through the agency of a compost heap, say specialists of the United States Department of Agriculture. Start the heap by laying down a bed of stable manure which has not been burned or heated. The size of the plot will vary with the amount of refuse to be used; for ordinary uses, if the bed is made eight feet long by six feet wide and two feet deep it will serve the purpose. Over the manure spread a two-foot layer of refuse and cover with another layer of manure. This last layer need be only a foot in thickness.

If it is desired to add to the heap from time to time the top layer may be opened and the new material emptied into the hole thus made. This is convenient for the suburban home where there is no animal to consume the kitchen waste. In the spring the heap is well mixed with a fork and the compost is ready to be spread on the garden plot. The heating manure will effectively destroy any weed seed present and will also break down the structure of most of the materials that have been thrown upon the pile. The process may be continued indefinitely by simply adding enough manure to insure heating. Compost is especially valuable for use in hotbeds and cold frames.

GIVE BIRDS CONSIDERATION

Little Songsters Are Friends of Farmer and Should Be Looked After in Winter.

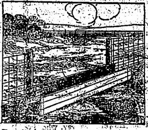
Birds as friends of agriculture are entitled to consideration from the farmers. When the snows come the birds find it difficult to make a living. [illegible] crumbs and suet placed outdoors may save bird lives.

[illegible] HANDY ARRANGEMENT

Cattle and Horses Permitted to Pass at Will.

Two Low Fences, About 18 Inches High, Serve to Keep Swine in Their Own Pasture—Other Animals Can Step Over.

A farmer uses this arrangement to keep the hogs in one lot, while allowing his cattle and horses to pass unrestrained into another pasture. The gate was removed from the hinges, and the space from post to post was boarded up solidly to a height of 18 inches from the ground. About 18 inches from each gatepost, inside the lot where the hogs were confined, a short post was driven. Long boards nailed from one to the other of these posts made another panel of board fence, 18 inches high and parallel with the boarded-up gate, with an 18-inch space between the two low walls. When a hog comes to this detached panel, it will go to the end and pass round into the narrow passage between the two board walls, continuing on through and out at the other end till it tires of the performance. One that is short enough to turn in the 18-inch passage is too small to jump or climb over the boards before it, and one that cannot turn is unable to face the wall and make the attempt to climb.



Two Low Fences Across the Gateway Will Stop the Hogs, but Allow Horses and Cattle to Pass.

All other stock, except small calves or colts, will step over the low walls. No wide cracks, offering footholds, should be left between the boards.—H. F. Grinstead, Columbia, Mo., in Popular Mechanics Magazine.

FARM SELECTION PERPLEXING

Study of Several Intricate Points Called For—Knowledge of Basic Principles Needed.

(Prepared by the United States Department of Agriculture.)

In choosing a farm one has the options of buying with the intention of operating the place as his entire business, buying a small farm and renting enough additional land to meet his needs, or renting a farm either on the share or cash basis. One's choice in the matter is usually determined by the funds available.

If one has only a small amount of capital and wishes to undertake farming as a business from which to derive his entire income, he should, in nearly all cases, begin as a renter. However, if he wishes to buy a farm on which to live, deriving a part of his income from other sources, then, possibly, purchasing is desirable, even if capital is limited.

Whatever course is followed, it is highly desirable that one thoroughly understand the basic principles governing the farm business before deciding some of the finer points. A disregard of these basic principles is responsible for a large proportion of farm failures.

A man may unconsciously work all his life against some economic barrier when success would have been comparatively easy if he had selected a farm where the economic principle would aid him, instead of working against him.

AGRICULTURE A NATIONAL PROBLEM

A sober national thought with regard to the importance, the absolute necessity, of a sustained agriculture in this country is imperative. There is, perhaps, no single solution for the situation which the farmers are now facing, but there are many steps which can be and should be taken to place our agriculture on a more satisfactory basis and to stabilize the business of farming, not in the interest of the farmers alone but in the interest of the nation as a whole. The matter is of such tremendous importance to our entire population that it should be recognized everywhere as a national problem and dealt with as such.—Annual Report of the Secretary of Agriculture.

Goodridge, Minn.
LIST WITH US FOR QUICK SATES

Elmer Olson went Plummer last evdning.

Carl Chriseianson was in Thief River Falls Wednesday.

M. G. Thoreson made a business visit to Thief River Falls Wednesday.

Miss Laura Wold of Westby, Mont., visited her sister, Mrs. John Sund, on Tuesday.

William Jones was in Thief River Falls Monday, to visit his half brother, Albert Johnson, who is in the hospital.

J. Hope and daughter Mollie left yesterday for Minneapolis. called by the illness of Mrs. Hope, who expects to undergo an operation.

Henry Hope returned vesterday from Crystal Lake, Ill, where Mrs. Hope wds buried. He was accompanied by an aunt, Mrs. A. T. White of Winnebago City, Minn., who will act as his housekeeper.

Martin Anderson and Walter Soren- attended the funeral of Mrs. Coan Wednesday.

Ernest Kath, formerly of this plaee, is attending the annual short course for creamery operators which opened at the University farm, St. Paul, Jan. 3.

Yeomen Eutertainment

The Yeomen blow out last evening was a very successful affair, there being at least 150 people in attendance. W. E. Hatley of St. Paul, stete manager of the Brotherhood, spoke on the necessity and advantages of insurance in general and of Yeomanry in partiular, giving a very interesting and pleasing talk. H. M. Evenstad, district manager, then followed, along similar lines. The program was rounded out with music by the band and supper was served at Stephenson's cafe.

Corporation Farming A Possibility

FORMER UNIVERSITY PROFESSOR BELIEVES DAY NEAR WHEN SMALL WILL CEASE TO EXIST

In a lecture entitled "Democracy, Historical and Hysterical," given Tuesday evening as the third number of our Lyceum course, A. William Olmstead of the Extension division of the University of Minnesota declared that on the basis of modern economic development it is not unreasonable to suppose the day not far distant when the present independent small farmer will be replaced by the corporation farmer operating large tracts of land and paying dividends to the stockholders. According to the speaker corporation owned farms are already in existence.

Mr. Olmstead's lecture dealt largely with the changes that have taken place in the economic, social and political world during the last century. Of the numerous plans offered for the solution of our modern economic and industrial problems, the speaker expressed his faith in cooperation as the most rational remedy.

The speaker advocated the "open forum" type of lecture, in which the audience is given an opportunity to ask questions and discuss the subject under consideration. Inter-collegiate debate was characterized as a "great bluff," leading to no practical results.

Mr. Olmstead's lecture brought out a number of interesting questions and was well received by the somewhat meagre audience in attendance.

Another Farmers' Referendum

Another call for a state-wide referendum on farm legislation pending in the state legislature has been sent out by the Minnesota Farm Bureau Federation. County farm bureaus were urged to [illegible] in the sentiment of the farmers by means of conferences and neighborhood meetings.

The farmers were called upon to vote informally on two bills, one to make illegal all contracts for future delivery of wheat, grain and other farm produce when actual delivery of the sold commodity is not intended in good faith, and imposing a fine of $500 to $1,000 for violation. The other proposed act, based on the Nebraska law declaring boards of trade to be public markets and opening them to co-operative selling organizations on full equality. Defense of these measures by the state federation or opposition to them will be governed by the result of the referendum.

Red River Valley Winter Shows

The seventh annual Red River Valley winter shows will open at Crookston next week under the joint auspices of the Northwest School of Agriculture, the Minnesota Red River Valley Development association and the Red River Valley Live Stock association.

This year's gathering is expected to surpass all its forerunners. The grain and potato exhibits will be the largest in number in the history of the shows and the live stock, as indicated by the number entered, 250 cattle, 300 swine and sheep, will tax the accommodations even with the new big addition built in 1920. That sales will be successful is assured, with outstanding animals offered and great interest by many in securing foundation stock.

The outstanding feature of the meetings programs will unboubtedly be the farm marketing question. So great has been the interest in this subject that the major portion of the time for two full days, Thursday and Friday, will be given over to the subject.

Hunters Must Report

Sportsmen who last year took out small game licenses are reminded of the fact that the time limit for their making report on these licenses is nearly up. According to the rule laid down by the state game laws, any person who took out a small game license last fall must report how many of each kind of birds were taken. The fact that a person did not shoot anything does not mean that no report has to be made. A report must be made on every license issued in this state last year for the hunting of small game. According to law the reports must be in not later than 30 days after the season closes. This time will soon be up, as the season for small game closed the last day of December, 1920. The penalty for failing to make this report is the forfeiture of the license for one year. The names of the persons who do not report are furnished the state game and fish commission by the county auditors.—Moorhead News.

Spoke on Phosphates

E. P. Taylor of the Aconda Mining company spoke to a fair sized audience last evening at the school auditorium. His subject was the use of phosphate on the soil. He set forth the many advantages and reasons why phosphate should be used and the results that have been attained in the proper use of phosphates. His talk should have been heard by every farmer in this section.

County Agents McCann of Pennington and Fetridge of eastern Marshal were present. Several musical numbers were rendered.

Weight for Age

By ALFRED STODDART

(Copyright.)

"I think I know now," said Hugh Westerly, "how a woman feels when she goes to a smart affair in her last season's gown. It will make me feel old to see all these young fellows riding in the races tomorrow."

"You foolish old Hugh," smiled Edith Penton. "As if you could ever grow old."

Tea had been served in the hall of Penton Lodge, a great oak-beamed apartment, and most of the house-party had gone to dress for dinner. Only Hugh was left to finish his tea and his chat with Edith Penton, the daughter of the house.

The Meadowthorpe Hunt races on the morrow were the occasion of the gathering, and Hugh had only just arrived.

Hugh Westerly, who had until the last few months, spent most of his life in England, was forty-four years of age, and the worst of it was that he was beginning to be aware of that fact.

In his heart, however, Hugh knew well enough that it was not the difference between English and American manners which caused this sudden, rather unpleasant consciousness of his age. The real reason was Edith Penton herself, the daughter of his father's old friend Roger Penton—Edith with her splendid youthfulness and ripening womanhood of twenty-four.

"I suppose," continued Hugh, "that your brother Dick will ride his own horse Harvester in the Challenge Cup?"

"No. Poor Dick is out West on important business, and cannot get back. He wired me to find another rider for Harvester, but I'm afraid I can't get one.

"All the good men have mounts in the race. I should like to have had Stanley Borden, but he has promised to ride Mr. Bradbury's Druid.

Hugh knew Stanley Borden very well indeed.

No wonder poor Hugh felt a sudden pang that was very much like jealousy as he pictured Stanley's slight form, as much at ease in a difficult figure of a cotillion as it was when leading the field on a good horse in the finish of a stiff three miles "across country."

When it was announced the next morning at the breakfast table that Hugh Westerly's offer to ride Harvester in the Challenge Cup had been accepted, an audible titter ran round the room.

Most of the younger people present did not know that Hugh had ridden many races in England.

Bertie [illegible] murmured something about "weight for age," which poor Hugh could not but overhear, and Stanley Borden, who was staying in the house, smiled a rather scornful smile which affected Hugh's nerves considerably.

When at last, however, the saddling bugle for the Challenge Cup had sounded and Hugh, having weighed in, was ready to mount, he felt not a little nervous in spite of himself, and he wondered whether, after all, Edith herself was not laughing at him a little bit.

Once more, however, the "feel" of the good horse between his knees gave him confidence.

Hugh was glad to accept a hint from old Watson, Penton's head groom.

"It's a proud 'oss, sir," said Watson, "and you can't keep 'im back very long. If 'e once gets discouraged, it will be all hoff for today, sir."

There were six entries for the Challenge Cup, and all of them started.

The starter, with a sweeping glance which comprehends every one of the "field," drops his flag with a sudden downward sweep, and the horses skim over the turf like a flight of swallows flying close together.

Hugh Westerly on Harvester got away about fourth, a position which suited him well.

The Meadowthorpe course is a natural one, and the first mile of the race was over a literally "fair hunting country."

Hugh had ridden for about half that distance when Harvester made up his mind to try conclusions with his rider, and threw up his head in a very determined manner, with the evident intention of bolting the course.

Much to his regret, Hugh was compelled to give his mount a rather vigorous [illegible] spurs. [illegible] the [illegible] administered [illegible] Harvester [illegible] the [illegible] had [illegible] found [illegible] their [illegible] reached [illegible] by a [illegible] post [illegible] was [illegible] showed [illegible] however [illegible] and [illegible] altogether at the [illegible] clear for Druid, [illegible] both jumps very cleverly; [illegible] Harvester, rushing at them with [illegible] that was almost fatal, just [illegible] over without a fall. The jumps now were comparative[illegible]

[illegible] in earnest. [illegible] Druid and Harvester [illegible] together.

No doubt Stanley Borden was surprised to find himself contending with Hugh.

Glancing ahead, Hugh saw that they were gaining rapidly on Druid.

Slowly the brown drew away from the chestnut, until, as they approached the brook, he was leading by a couple of lengths. Druid went at the water full speed and cleared it splendidly, but for a moment Hugh feared that his mount was going to refuse.

Just one little hint with his spurred heel did Hugh give to the chestnut, and he flew into the air, landing well in his stride on the other side of the brook.

The jumping was over, and the run home, three-quarters of a mile in length, now lay before them.

In one respect, however, Borden had the advantage. He could punish with whip and spur and thus force his mount to use all the speed he possessed. Hugh could only coax the chestnut by appealing to his courage and by an occasional hint from his spur.

But as inch by inch he began to draw up to Druid, and when at last the chestnut's nose was on a line with the brown horse's girth, he felt his confidence return to him with a rush, and he was his own man again. After that Hugh had only a rather dim idea of what was taking place.

But it was not until he had turned and was riding back to the judges' stand that he was assured, by the cheering of the spectators, of his victory.

It was Harvester's race.

Surely his self-raised bogy of middle age had been exorcised now for all time; and he hurried his toilet with the eagerness of a boy in his anxiety to see Edith Penton.

He found her in the shadow of the Penton drag, talking to Stanley Borden, who was still dressed in his racing clothes. Borden held out his hand in warm and sincere congratulation.

"You rode a wonderful race," he said.

Edith, too, extended her hand to Hugh.

"I cannot tell you how grateful I am," she cried. "It was splendid. Just to show you how much I appreciate your winning for me, I am going to tell you a secret, hours before any one else hears it—our secret, Stanley's and mine."

Poor old Hugh.

Things began to blur before his eyes as they did in the finish of the steeplechase.

He heard Edith murmur something about the engagement being announced that evening, and somehow he managed to say what was expected of him; then he made his exit as best he [illegible]

Hugh did not stay for the festivities at Penton Lodge that night, but pleaded an urgent telephone message which compelled him to hurry back to town.

As he stood before his mirror late that evening examining ruefully the increasing grayness about his temples he reflected bitterly that the race is not always to the swift nor the victory to the strong.

To which wise reflection he added a stern resolution to ride no more steeplechases.

"The Wicked Flee"

By ROBERT J. PEARSALL

(Copyright.)

I was standing on Kearney street in San Francisco when I saw a two-[illegible] wagon [illegible] with the letters "Q.M.D., U.S.M.C." on its side. The letters seemed to me to have some [illegible].

So I hailed the driver, who was dressed in a khaki uniform, and asked what they stood for.

"Quartermaster's Department, United States Marine Corps," he said.

"Oh," I said, "is that it? I thought they might mean 'Quick, McDonald, Helpless Sailors Made Comfortable.'"

He laughed a bit. "Your name McDonald?"

"Yes."

"Well, they might mean that, too. Got a job?"

"No."

"Want one?"

"Yes."

"Jump in and come with me."

He took me to the recruiting office at the foot of Market street, and the wind-up of it was that before the day was over I was enlisted in the Marine Corps as a private at thirty per, and on my way to the barracks at Mare island.

Which is all merely by way of explaining how I came to be doing a mid-watch in an orderly box in front of the commandant's house—on that auspicious night four months later.

Shortly after midnight the telephone rang.

"Commandant's orderly," I answered.

"This is wireless. Message from Western Union."

I grabbed a pencil and memorandum pad and prepared to copy it. "Let 'er go," I said.

This was the astounding message that I received:

Commanding Officer, Marine Barracks,
Mare Island, via Commandant, Navy Yard:

Place Private Fred E. McDonald under immediate arrest. Further instructions by mail.

(Signed), Bliss.
Commandant Marine Corps.

Fred E. McDonald! That was myself!

Rather than stay and face the uncertain charge, with its still more uncertain attendants of trial and punishment, I would run away.

What with the sentries and civilian watchmen and guards it wasn't going to be any easy time getting off the island, and that I knew.

Then I started down Davis street toward the water-front.

I knew where there was a shore-boat lying alongside the sea-wall at the end of the street. I would steal that, or borrow it, rather, and get away.

It was a mighty dark night; I had that in my favor. I got half-way down the street without being discovered.

Then, just as I was passing the Engineer building, some one turned into the street about fifty feet ahead. I stopped and slunk against the side of the building; but he had heard me.

"Halt!" he cried. "Who's there?" It was a sentry.

Just above me was a barred window. I took hold of the ledge and pulled myself up noiselessly.

There I clung, monkey-like.

The sentry challenged three times. Then he proceeded to investigate.

Several times he passed me so close that I could have kicked his hat off. But at last he gave it up and went his way, and I went mine, gratefully.

I made it to the sea-wall without further mishap.

And then the door of a near-by building opened and a night watchman came out.

"Oh-h, ye divil, Oi have ye, have Oi!" he cried, and made a dive for me.

"You have not!" I said.

I sprang out of the boat and dodged him as he came. I sprinted up the water-front at a ten-second gait, with him lumbering behind.

"Stop or Oi'll shoot, Oi'll shoot," he yelled.

I didn't think he would, and so I kept on running.

But, all of a sudden, from in front of me came the sharp:

"Halt! Halt! Halt!" of a sentry.

I knew that meant business.

There was only one thing to do. It was a long swim across the channel, and the undertow was treacherous, but I turned and dove headlong from the sea-wall.

Bang!

Say, did you ever make a running dive, expecting to hit water, and instead land square on a solid oak platform. No? Well, that's what I had done.

A float, for the use of shore-boats, had been anchored there. I learned more astronomy in that instant than I ever had at school.

The sentry and the watchman pulled me off the float. I was pretty well dazed; but got myself together in a moment.

"Sure, an' ye are a lucky beggar," said the watchman. "What are ye goin' to do with him, sintry?"

"Turn him over to the sergeant of the guard, I suppose," said the sentry. "What were you trying to do, anyway?"

"I'm restricted," I said. "I was trying to make a liberty. I haven't been off the island since pay-day."

"Well I don't know as I blame you much," said the sentry, who was a re-enlisted [illegible] and had probably broken restrictions many times himself.

So they turned me loose and I started up Front street, pretty badly discouraged. I had just missed my best chance for gaining freedom.

And I knew that I must run the gantlet of several more sentries before I reached the launch-landing, the next point from which it might be possible to get a boat.

The rattle of a sword sounded ahead of me. It was the officer of the day making his rounds. So he was to be added to my other troubles.

I would impersonate a member of the guard.

I had done watch over that post and thought I remembered all the orders. I would make a bluff at it anyway.

I walked boldly out in the street and toward the approaching footsteps. When about thirty paces distant, I stopped. "Halt! Who's there?" I challenged.

"Officer of the day."

"Advance, officer of the day, with the countersign."

He advanced.

"Halt!, Countersign!" I challenged again, when he had arrived within ten paces.

"Custer," he said.

Finally he turned away, and I saluted and started on, taking off my imitation belt as soon as I got out of sight.

I walked boldly enough now. I was halted by several sentries, but gave them the countersign and was allowed to pass.

However, while I was nearing the launch-landing, a big white light coming up the stream suddenly gave me an inspiration.

It was the Sehome, from San Francisco, and from the curve she was making she evidently intended running alongside the sea-wall in order to land a consignment of stores on the island.

The corporal of the guard, who had come down from the guard-house, stood near, lantern in hand, checking off the freight as it arrived.

I watched my opportunity. At a moment of some little confusion I slipped from my hiding place to a point near the cases of goods, and then started boldly up the gangway, hoping to be mistaken in the darkness for one of the workmen.

But my little plan didn't work. Something, or some one attracted the attention of the corporal of the guard to me. He let a whoop out of him like a Comanche.

"Halt! Hey, there, you! Stop!"

I was already half-way up the gangway. I didn't stop. How could I? I just couldn't afford to be caught now.

A general court martial was the least I could expect!

I leaped up the gangway into the after compartment of the ship, and up another gangway to the upper deck. The corporal of the guard was right at my heels.

I rushed to the port-rail, leaped over it, and landed again on the sea-wall, with a crash that well-nigh broke my legs.

I scurried off in the darkness.

As I passed in rear of the guard-house I saw lights flash in the relief rooms, and heard the excited hum of voices as the guard grabbed their rifles and belts. In thirty seconds I would have half a hundred men hunting me like a rabbit.

A light loomed up ahead of me. It was the light of my orderly box.

I rushed up to it, jerked open the door and sprang inside. Just then the telephone rang. I took up the receiver.

"Hallo, orderly. This is wireless. Where've you been? Been trying to get you for fifteen minutes. All right. Take this message." It was as follows:

Commanding Officer, Marine Barracks,
Mare Island, via Commandant, Navy Yard:

Error in preceding message. The Private Fred E. McDonald, in question, now at Brooklyn Navy Yard. Disregard letter.

(Signed), Bliss,
Commandant Marine Corps.

I had just started to copy this message in the smooth log when the sergeant of the guard stuck his head in at the door.

"Say, orderly," he said, "haven't heard any one pass here, have you? On the run? No! Funny. He must have come this way. Where could he have gone?"

About half an hour afterward my relief came and my mid-watch was over.

But I had some trouble next morning in explaining how I'd got so badly battered up over night.

Bi-Monthly Pay Asked.

State employees, now paid once a month, would receive their pay twice each month, under a bill sponsored by Senator Mike Boylan of Virginia. Elective officers and heads of departments are excepted.

Two and a Bridge

Concluded from Second Page

Valley didn't seem such a bad place after all.

For the rest of the week he was very busy putting the final details into shape, and he left for New York on Saturday with the contract in his pocket, after a very pleasant evening spent in calling, unofficially, on J. Harbison, highway commissioner. His chief congratulated him.

"I suppose you're glad to be back from that hole in the ground," he said.

"Well—to tell you the truth, chief, I was hoping you'd let me go up there again. I'd like to see the work started, at least—and I know the ground, and—and—" he finished lamely.

The chief looked at him for a moment through half-shut eyes, then laughed. "All right, Bob," he chuckled. "You're the doctor. If you want to go back there and die of the heat, go ahead. No one else wants the job."

So it was that for the next three months Mr. Robert Owen, representative of the Perfection Bridge and Construction company, found himself situated at Spring Valley, Spring county, Pennsylvania, spending as much of his time as possible in the company of Miss Joan Harbison, highway commissioner. And as the weeks slipped by and the construction got well under way, Mr. Owen found it more and more necessary to go to number 18 Cherry street for conferences.

That some of these conferences were not entirely official in character might have been shown by the fact that passersby heard, sometimes, the music of a guitar, very well played, coming from the veranda in the evenings; Mr. Owen had played on his college mandolin club, it appeared. But as the work progressed with great rapidity, there could be no possible ground for carping on the part of village critics.

One evening in early September Miss Joan Harbison and Mr. Robert Owen went out to Bell River bridge in Miss Harbison's little runabout to take a look at their completed work. Tomorrow the bridge would be opened with appropriate ceremonies; the town council and the mayor would make speeches, and there would be a band, and generally a good time would be had by all.

But in the twilight the bridge was peaceful and quiet as it gracefully spanned the stream; the two on the bank looked at it fondly and proudly. Miss Harbison with a sense of proprietorship, for the bridge would be a monument to her work as highway commissioner; Owen with an air of regarding a good piece of work. They were silent for a few moments; then Owen, stepping from the machine, invited his companion to sit beside him on a girder.

"Well, it's finished," he said after a pause.

"Yes." Miss Harbison sighed.

"What's the matter? Are you sorry it's over?"

"No—that is, yes. I mean I'm not sorry, and still—well, I am."

Thus the official, efficient highway commissioner. The highly impersonal and very businesslike Robert Owen could find nothing to say but "Are you?" which did not seem to have any direct bearing on the subject. More silence.

"I'm going away tomorrow," offered Robert after a time.

"Are you? I'm sorry!"

The words slipped out before Miss Harbison realized their import and a deep blush overspread her face. But Robert Owen, regardless of the scandalized faces of a couple of country people who happened to drive by just at that time, impetuously caught the efficient Miss Harbison in his arms and—said—a great many things with which we have no concern whatever. But they must have been satisfactory, for Miss Harbison seemed to agree with every one of them.

The country people drove on. The twilight deepened. The Bell River bridge stood contemplative [illegible] the water beneath it flowed on [illegible] has been [illegible] the world over. But neither of the two on the [illegible] the Sixth of September, on the country people or the bridge. The bridge was finished; they had just begun to live.

Corporation Farming A Possibility

FORMER UNIVERSITY PROFESSOR BELIEVES DAY NEAR WHEN SMALL WILL CEASE TO EXIST

In a lecture entitled "Democracy, Historical and Hysterical," given Tuesday evening as the third number of our Lyceum course, A. William Olmstead of the Extension division of the University of Minnesota declared that on the basis of modern economic development it is not unreasonable to suppose the day not far distant when the present independent small farmer will be replaced by the corporation farmer operating large tracts of land and paying dividends to the stockholders. According to the speaker corporation owned farms are already in existence.

Mr. Olmstead's lecture dealt largely with the changes that have taken place in the economic, social and political world during the last century Of the numerous plans offered for the solution of our modern economic and industrial problems, the speaker expressed his faith in cooperation as the most rational remedy.

The speaker advocated the "open forum" type of lecture, in which the audience is given an opportunity to ask questions and discuss the subject under consideration. Inter-collegiate debate was characterized as a "great bluff," leading to no practical results.

Mr. Olmstead's lecture brought out a number of interesting questions and was well received by the somewhat meagre audience in attendance.

Another Farmers' Referendum

Another call for a state-wide referendum on farm legislation pending in the state legislature has been sent out by the Minnesota Farm Bureau Federation. County farm bureaus were urged to ascertain the sentiment of the farmers by means of conferences and neighborhood meetings.

The farmers were called upon to vote informally on two bills, one to make illegal contracts for future delivery of wheat, grain and other farm produce when actual delivery of the sold commodity is not intended in good faith, and imposing a fine of $500 to $1,000 for violation. The other proposed act is based on the Nebraska law declaring boards of trade to be public markets and opening them to co-operative selling organizations on full equality. Defense of these measures by the state Federation or opposition to them will be governed by the result of the referendum.

Red River Valley Winter Shows

The seventh annual Red River Valley winter shows will open at Crookston next week under the joint auspices of the Northwest School of Agriculture, the Minnesota Red River Valley Development association and the Red River Valley Live Stock association.

This year's gathering is expected to surpass all its forerunners. The grain and potato exhibits will be the largest in number in the history of the shows and the live stock, as indicated by the number entered, 250 cattle, 300 swine and sheep, will tax the accommodations even with the new big addition built in 1920 That sales will be successful is assured, with outstanding animals offered and great interest by many in securing foundation stock.

An outstanding feature of the meetings' programs will unboubtedly be the farm marketing question. So great has become the interest in this subject that the major portion of the time for two full days, Thursday and Friday, will be given over to the subject.

Hunters Must Report

Sportsmen who last year took out small game licenses are reminded of the fact that the time limit for their making a report on these licenses is nearly up. According to the rule laid down by the state game laws, any person who took out a small game license last fall must report how many of each kind of birds were taken. The fact that a person did not shoot anything does not mean that no report has to be made. A report must be made on every license issued in this state last year for the hunting of small game. According to law the reports must be in not later than 30 days after the season closes. This time will soon be up, as the season for small game closed the last day of December, 1920. The penalty for failing to make this report is the forfeiture of the license for one year. The names of the persons who do not report are furnished the state game and fish commission by the county auditors.—Moorhead News.

Spoke on Phosphates

E. P. Taylor of the Aconda Mining company spoke to a fair sized audience last evening at the school auditorium His subject was the use of phosphate on the soil. He set forth the many advantages and reasons why phosphate should be used and the results that have been attained in the proper use of phosphates. His talk should have been heard by every farmer in this section County Agents McCann of Pennington and Fetridge of eastern Marshal were present, Several musical numbers were rendered.

Weight for Age

By ALFRED STODDART

(Copyright.)

"I think I know now," said Hugh Westerly, "how a woman feels when she goes to a smart affair in her last season's gown. It will make me feel old to see all these young fellows riding in the races tomorrow."

"You foolish old Hugh," smiled Edith Penton. "As if you could ever grow old."

Tea had been served in the hall of Penton Lodge, a great oak-beamed apartment, and most of the house-party had gone to dress for dinner. Only Hugh was left to finish his tea and his chat with Edith Penton, the daughter of the house.

The Meadowthorpe Hunt races on the morrow were the occasion of the gathering, and Hugh had only just arrived.

Hugh Westerly, who had until the last few months, spent most of his life in England, was forty-four years of age, and the worst of it was that he was beginning to be aware of that fact.

In his heart, however, Hugh knew well enough that it was not the difference between English and American manners which caused this sudden, rather unpleasant consciousness of his age. The real reason was Edith Penton herself, the daughter of his father's old friend Roger Penton—Edith with her splendid youthfulness and ripening womanhood of twenty-four.

"I suppose," continued Hugh, "that your brother Dick will ride his own horse Harvester in the Challenge Cup?"

"No. Poor Dick is out West on important business, and cannot get back. He wired me to find another rider for Harvester, but I'm afraid I can't get one.

"All the good men have mounts in the race. I should like to have had Stanley Borden, but he has promised to ride Mr. Bradbury's Druid.

Hugh knew Stanley Borden very well indeed.

No wonder poor Hugh felt a sudden pang that was very much like jealousy as he pictured Stanley's slight form, as much at ease in a difficult figure of a cotillion as it was when leading the field on a good horse in the finish of a stiff three miles "across country."

When it was announced the next morning at the breakfast table that Hugh Westerly's offer to ride Harvester in the Challenge Cup had been accepted, an audible titter ran round the room.

Most of the younger people present did not know that Hugh had ridden many races in England.

Bertie Norris murmured something about "weight for age," which poor Hugh could not but overhear, and Stanley Borden, who was staying in the house, smiled a rather scornful smile which affected Hugh's nerves considerably.

When at last, however, the saddling bugle for the Challenge Cup had sounded and Hugh, having weighed in, was ready to mount, he felt not a little nervous in spite of himself, and he wondered whether, after all, Edith herself was not laughing at him a little bit.

Once more, however, the "feel" of the good horse between his knees gave him confidence.

Hugh was glad to accept a hint from old Watson, Penton's head groom.

"'E's a proud 'oss, sir," said Watson, "and you can't keep 'im back very long. If 'e once gets discouraged, it will be hall hoff for today, sir."

There were six entries for the Challenge Cup, and all of them started.

The starter, with a sweeping glance which comprehends every one of the "field," drops his flag with a sudden downward sweep, and the horses skim over the turf like a flight of swallows flying close together.

Hugh Westerly on Harvester got away about fourth, a position which suited him well.

The Meadowthorpe course is a natural one, and the first mile of the race was over a literally "fair hunting country."

Hugh had ridden for about half that distance when Harvester made up his mind to try conclusions with his rider, and threw up his head in a very determined manner, with the ultimate intention of bolting the course.

Much to his regret Hugh was compelled to give his mount a rather vigorous treatment with the spurs. Grasping the [illegible] head, he administered [illegible] slash with his [illegible] Harvester [illegible] the [illegible] had [illegible] found [illegible]

[illegible] their [illegible] reached [illegible] by a [illegible] two post [illegible]

[illegible] jumps splendidly [illegible] was followed [illegible] however, [illegible] and [illegible] refused altogether at the [illegible]

[illegible] left the way clear for Druid, [illegible] took both jumps very cleverly; [illegible] Harvester, rushing at them with [illegible] that was almost fatal, just [illegible] to get over without a fall.

The jumps now were comparative [illegible]

[illegible] was [illegible] in earnest.

Bricktop [illegible] the lead, began to [illegible] while Druid and Harvester fought it out together.

No doubt Stanley Borden was surprised to find himself contending with Hugh.

Glancing ahead, Hugh saw that they were gaining rapidly on Bricktop.

Slowly the brown drew away from the chestnut, until, as they approached the brook, he was leading by a coupé of lengths. Druid went at the water full speed and cleared it splendidly, but for a moment Hugh feared that his mount was going to refuse.

Just one little hint with his spurred heel did Hugh give to the chestnut, and he flew into the air, landing well in his stride on the other side of the brook.

The jumping was over, and the run home, three-quarters of a mile in length, now lay before them.

In one respect, however, Borden had the advantage. He could punish with whip and spur and thus force his mount to use all the speed he possessed. Hugh could only coax the chestnut by appealing to his courage and by an occasional hint from his spur.

But as inch by inch he began to draw up to Druid, and when at last the chestnut's nose was on a line with the brown horse's girth, he felt his confidence return to him with a rush, and he was his own man again. After that Hugh had only a rather dim idea of what was taking place.

But it was not until he had turned and was riding back to the judges' stand that he was assured, by the cheering of the spectators, of his victory.

It was Harvester's race.

Surely his self-raised bogy of middle age had been exorcised now for all time; and he hurried his toilet with the eagerness of a boy in his anxiety to see Edith Penton.

He found her in the shadow of the Penton drag, talking to Stanley Borden, who was still dressed in his racing clothes. Borden held out his hand in warm and sincere congratulation.

"You rode a wonderful race," he said.

Edith, too, extended her hand to Hugh.

"I cannot tell you how grateful I am," she cried. "It was splendid. Just to show you how much I appreciate your winning for me, I am going to tell you a secret, hours before any one else hears it—our secret, Stanley's and mine."

Poor old Hugh.

Things began to blur before him again as they did in the finish of the steeplechase.

He heard Edith murmur something about the engagement being announced that evening, and somehow he [illegible] to say what was expected of him. [illegible]

Hugh did not stay for the festivities at Penton Lodge that night, but pleaded an urgent telephone message which compelled him to hurry back to town.

As he stood before his mirror late that evening examining ruefully the increasing grayness about his temples he reflected bitterly that the race is not always to the swift nor the victory to the strong.

To which wise reflection he added a stern resolution to ride no more steeplechases.

"The Wicked Flee"

By ROBERT J. PEARSALL

(Copyright.)

I was standing on Kearney street in San Francisco when I saw a two-[illegible] wagon pass with the letters "Q.M.D. U.S.M.C." on its side. The letters seemed to me to have some personal [illegible]

So I hailed the driver, who was dressed in a blue uniform, and asked him what they meant.

"Quartermaster's Department, United States Marine Corps," he said.

"Oh," I said, "is that it? I thought they might mean 'Quick, McDonald, Useless Suckers Made Comfortable.'"

He laughed a bit. "Your name McDonald?"

"Yes."

"Well, they might mean that, too. Got a job?"

"No."

"Want one?"

"Yes."

"Jump in and come with me."

He took me to the recruiting office, at the foot of Market street, and the wind-up of it was that before the day was over I was enlisted in the Marine Corps as a private at thirty per, and on my way to the barracks at Mare island.

Which is all merely by way of explaining how I came to be doing a mid-watch in an orderly box in front of the commandant's house on that auspicious night four months later.

Shortly after midnight the telephone rang.

"Commandant's orderly," I answered.

"This is wireless. Message from Western Union."

I grabbed a pencil and memorandum pad and prepared to copy it. "Let 'er go," I said.

This was the astounding message that I received:

Commanding Officer, Marine Barracks,
Mare Island, via Commandant, Navy Yard:
Place Private Fred E. McDonald under immediate arrest. Further instructions by mail.
(Signed), Bliss.
Commandant Marine Corps.

Fred E. McDonald! That was myself!

Rather than stay and face the uncertain charge, with its still more uncertain attendants of trial and punishment, I would run away.

What with the sentries and civilian watchmen and guards it wasn't going to be any easy time getting off the island, and that I knew.

Then I started down Davis street toward the water-front.

I knew where there was a shore-boat lying alongside the sea-wall at the end of the street. I would steal that, or borrow it, rather, and get away.

It was a mighty dark night; I had that in my favor. I got half-way down the street without being discovered.

Then, just as I was passing the Engineer building, some one turned into the street about fifty feet ahead. I stopped and slunk against the side of the building; but he had heard me.

"Halt!" he cried. "Who's there?" It was a sentry.

Just above me was a barred window. I took hold of the ledge and pulled myself up noiselessly.

There I clung, monkey-like.

The sentry challenged three times. Then he proceeded to investigate.

Several times he passed me so close that I could have kicked his hat off. But at last he gave it up and went his way, and I went mine, gratefully.

I made it to the sea-wall without further mishap.

And then the door of a near-by building opened and a night watchman came out.

"Oh-h, ye divil, Oi have ye, have Oi?" he cried, and made a dive for me.

"You have not!" I said.

I sprang out of the boat and dodged him as he came. I sprinted up the water-front at a ten-second gait, with him lumbering behind.

"Stop or Oi'll shoot, Oi'll shoot," he yelled.

I didn't think he would, and so I kept on running.

But, all of a sudden, from in front of me came the sharp:

"Halt! Halt! Halt!" of a sentry. I knew that meant business.

There was only one thing to do. It was a long swim across the channel, and the undertow was treacherous, but I turned and dove headlong from the sea-wall.

Bang!

Say, did you ever make a running dive, expecting to hit water, and instead land square on a solid oak platform? No? Well, that's what I had done.

A float, for the use of shore-boats, had been anchored there. I learned more astronomy in that instant than I ever had at school.

The sentry and the watchman pulled me off the float. I was pretty well dazed; but got myself together in a moment.

"Sure, an' ye are a lucky beggar," said the watchman. "What are ye goin' to do with him, sintry?"

"Turn him over to the sergeant of the guard, I suppose," said the sentry. "What were you trying to do, anyway?"

"I'm restricted," I said. "I was trying to make a liberty. I haven't been off the island since pay-day."

"Well I don't know as I blame you much," said the sentry, who was a re-enlisted [illegible] and had probably broken restrictions many times himself.

So they turned me loose and I started up Front street, pretty badly discouraged. I had just missed my best chance for gaining freedom.

And I knew that I must run the gantlet of several more sentries before I reached the launch-landing, the next point from which it might be possible to get a boat.

The rattle of a sword sounded ahead of me. It was the officer of the day making his rounds. So he was to be added to my other troubles.

I would impersonate a member of the guard.

I had done watch on that post and thought I remembered all the orders. I would make a bluff at it anyway.

I walked boldly out in the street and toward the approaching footsteps. When about thirty paces distant, I stopped. "Halt! Who's there?" I challenged.

"Officer of the day."

"Advance, officer of the day, with the countersign."

He advanced.

"Halt! Countersign!" I challenged again, when he had arrived within ten paces.

"Custer," he said.

Finally he turned away, and I saluted and started on, taking off my imitation belt as soon as I got out of sight.

I walked boldly enough now. I was halted by several sentries, but gave them the countersign and was allowed to pass.

However, while I was nearing the launch-landing, a big white light coming up the stream suddenly gave me an inspiration.

It was the Sehome, from San Francisco, and from the curve she was making she evidently intended running alongside the sea-wall in order to land a consignment of stores on the island.

The corporal of the guard, who had come down from the guard-house, stood near, lantern in hand, checking off the freight as it arrived.

I watched my opportunity. At a moment of some little confusion I slipped from my hiding place to a point near the cases of goods, and then started boldly up the gangway, hoping to be mistaken in the darkness for one of the workmen.

But my little plan didn't work. Something, or some one attracted the attention of the corporal of the guard to me. He let a whoop out of him like a Comanche.

"Halt! Hey, there, you! Stop!"

I was already half-way up the gangway. I didn't stop. How could I? I just couldn't afford to be caught now.

A general court martial was the least I could expect!

I leaped up the gangway into the after compartment of the ship, and up another gangway to the upper deck. The corporal of the guard was right at my heels.

I rushed to the port-rail, leaped over it, and landed again on the sea-wall, with a crash that well-nigh broke my legs.

I scurried off in the darkness.

As I passed in rear of the guard-house I saw lights flash in the relief rooms, and heard the excited hum of voices as the guard grabbed their rifles and belts. In thirty seconds I would have half a hundred men hunting me like a rabbit.

A light loomed up ahead of me. It was the light of my orderly box.

I rushed up to it, jerked open the door and sprang inside. Just then the telephone rang. I took up the receiver.

"Hallo, orderly. This is wireless. Where've you been? Been trying to get you for fifteen minutes. All right. Take this message." It was as follows:

Commanding Officer, Marine Barracks,
Mare Island, via Commandant, Navy Yard:
Error in preceding message. The Private Fred E. McDonald, in question, now in Brooklyn Navy Yard. Disregard letter.
(Signed), Bliss.
Commandant Marine Corps.

I had just started to copy this message in the smooth log when the sergeant of the guard stuck his head in at the door.

"Say, orderly," he said, "haven't heard any one pass here, have you? On the run? No! Funny. He must have come this way. Where could he have gone?"

About half an hour afterward my relief came and my mid-watch was over.

But I had some trouble next morning in explaining how I'd got so badly battered up over night.

Bi-Monthly Pay Asked.

State employees, now paid once a month, would receive their pay twice each month, under a bill sponsored by Senator Mike Boylan of Virginia. Elective officers and heads of departments are excepted.

Two and a Bridge

Concluded from Second Page

Valley didn't seem such a bad place after all.

For the rest of the week he was very busy putting the final details into shape, and he left for New York on Saturday with the contract in his pocket, after a very pleasant evening spent in calling, unofficially, on J. Harbison, highway commissioner. His chief congratulated him.

"I suppose you're glad to be back from that hole in the ground," he said.

"Well—to tell you the truth, chief, I was hoping you'd let me go up there again. I'd like to see the work started, at least—and I know the ground, and—and—" he finished lamely.

The chief looked at him for a moment through half-shut eyes, then laughed. "All right, Bob," he chuckled, "You're the doctor. If you want to go back there and die of the heat, go ahead. No one else wants the job."

So it was that for the next three months Mr. Robert Owen, representative of the Perfection Bridge and Construction company, found himself situated at Spring Valley, Spring county, Pennsylvania, spending as much of his time as possible in the company of Miss Joan Harbison, highway commissioner. And as the weeks slipped by and the construction got well under way, Mr. Owen found it more and more necessary to go to number 18 Cherry street for conferences.

That some of these conferences were not entirely official in character might have been shown by the fact that passersby heard, sometimes, the music of a guitar, very well played, coming from the veranda in the evenings; Mr. Owen had played on his college mandolin club, it appeared. But as the work progressed with great rapidity, there could be no possible ground for carping on the part of village critics.

One evening in early September Miss Joan Harbison and Mr. Robert Owen went out to Bell River bridge in Miss Harbison's little runabout to take a look at their completed work. Tomorrow the bridge would be opened with appropriate ceremonies; the town council and the mayor would make speeches, and there would be a band, and generally a good time would be had by all.

But in the twilight the bridge was peaceful and quiet as it gracefully spanned the stream; the two on the bank looked at it fondly and proudly, Miss Harbison with a sense of proprietorship, for the bridge would be a monument to her work as highway commissioner; Owen with an air of regarding a good piece of work. They were silent for a few moments; then Owen, stepping from the machine, invited his companion to sit beside him on a grider.

"Well, it's finished," he said after a pause.

"Yes." Miss Harbison sighed.

"What's the matter? Are you sorry it's over?"

"No—that is, yes. I mean I'm not sorry, and still—well, I am."

Thus the official, efficient highway commissioner. The highly impersonal and very businesslike Robert Owen could find nothing to say but "Are you?" which did not seem to have any direct bearing on the subject. More silence.

"I'm going away tomorrow," offered Robert after a time.

"Are you? I'm sorry!"

The words slipped out before Miss Harbison realized their import and a deep blush overspread her face But Robert Owen, regardless of the scandalized faces of a couple of country people who happened to drive by that way at that time, impetuously caught the efficient Miss Harbison in his arms and said—a great many things with which we have no concern whatever. But they must have been satisfactory, for Miss Harbison seemed to agree with every one of them.

The country people drove on. The twilight deepened. The Bell River bridge stood contemplative, while the water beneath it flowed on, as water has been in the habit of doing the world over. But neither of the two on the girder minded the water, or the country people, or the bridge. The bridge was finished; they had just begun to live.

MER[illegible] TA[illegible]

Hou[illegible] Will A[illegible] Su[illegible] co[illegible] raft C[illegible]mise [illegible] Bill—A[illegible] of [illegible]cilliat[illegible]

St[illegible]tions [illegible] t the hou[illegible] tax [illegible]ill ap point[illegible]ttee of [illegible] members to draft [illegible]mise tonn[illegible] tax bill for su[illegible] the ho[illegible]

A motion [illegible] this effect was presented to the committee at the session early this week, but was withdrawn temporarily so mining men could appear and conclude hearings on the tonnage tax which is in progress.

Representatives C. M. Bendixen and A. C. Welch have had conferences regarding a compromise on their bills and both said that an agreement had practically been reached.

"Friends of the tonnage tax want me to strike out a provision in my bill making the proposed tax of 8 per cent of net profits in leau of all other state taxes," said Mr. Bendixen. "I inserted this because the tax commission and Governor Preus both felt that a tonnage tax bill would be unconstitutional without this provision. However, I am for a tonnage tax and whatever the tax committee and judiciary committee may agree upon will be satisfactory."

The committee probably will frame its bill and have it ready for introduction within 10 days.

The Mesaba Iron range is like a great layer cake, said W. G. Swart, vicepresident and general manager of the Mesaba Iron company, to the house tax committee.

"A layer cake with 8 per cent raisins has plenty of good eating after the raisins are gone," said Mr. Swart, the raisins in his illustration being the highgrade ore mines and the rest of the cake the lowgrade mines.

Mr. Swart's company, he said, had developed copper mines in Utah that had been considered of no account but through large volume of operations had been made to produce 25 per cent of the copper in the country.

This company had spent $780,000 experimenting with low grade iron ore in Minnesota and are constructing a $3,000,000 mill on Lake Superior. This mill, he said, was only a small unit and the company considered the expenditure of $50,000,000 more for the main plant, but he told the committee they were seriously considering construction of this main plant in Wisconsin or Michigan because Minnesota has no settled taxation policy.

Mr. Swart said the United States geological survey showed 125,000,000,000 tons of iron ore already exposed on the Mesaba range and if the range dips to the south the amount available would be beyond human comprehension.

"To exhaust the 8 per cent of high grade ore would take from 20 to 30 years, but the low grade ore, at the present rate of shipping, will last more than 1,000 years," he said. "The state of Minnesota can put off indefinitely development of low grade ore by a shifting policy of taxation. It is mighty easy to discourage capital."

Representatives C. M. Bendixen and C. [illegible] Murphy closely questioned Mr. Swart, Mr. Bendixen being in favor of a tonnage tax [illegible] Mr. Murphy [illegible]

NO SHARE IN BONUS

Conscientious Objectors Claim To Bonus Defeated In House By Record Breaking Vote After Heated Debate.

St. Paul—"Conscientious objectors" who were forced to serve in the army will not share in the benefits of the Minnesota soldiers' bonus law.

The house once more made this plain when it buried by a vote of 96 to 28 the bill by Otto D. Nellermoe, Minneapolis socialist, removing the limitations placed by the 1919 law on sharing in the bonus. The vote followed the most peppery debate of the session.

Amendments to the bonus act making it more liberal in its provisions are being prepared by a subcommittee of the committee on soldier's bonus, the house was informed by Chairman J. B. Hompe and Sherman W. Child of the committee. Mr. Child said that the amendments probably will make all men who enlisted eligible to the bonus, taking care of socalled "alien objectors" who showed their willingness to serve by enlisting. The conscientious objector, however, will not be recognized by the committee. [illegible] pointed out in the debate that men who served time in Leavenworth prison for military offenses would get the bonus if the Nellermoe bill passed.

Gladiatorial combats between man and beast would be an offense against the law under a bill backed by the Minnesota Humane society, which is to be introduced this week in the legislature. The bill is prompted by the wild west show at the State Fair last fall, which aroused considerable adverse comment because of the rough handling of steers by the cowboys.

Prairie chicken hunters may have their inning this fall. The senate in committee of the whole recommended a bill opening the season for 1921. Fishing season would open May 15 instead of May 1, under another bill given favorable consideration. The object being to protect fish in spawning season.

Town road overseers, except in Hennepin, Ramsey and St. Louis counties, will receive $4 a day instead of $[illegible] under a bill passed by the house, 104 to 0.

Even though the house defeated a bill changing the weight of corn on the ear from 70 pounds to 80 pounds in October and November and 75 pounds in December and January, the senate unanimously passed the measure, after an amendment providing that buyers "may" take these weights. This means the bill will come up again in the house, and with the compulsory provision striken out, probably it will pass.

NEW AUTO LICENSE FEES

On the basis of 300,000 cars to be licensed in the state under the Good Roads Amendment No. 1 plan, the new tentative proposal will yield $5,732,277, it is estimated, or an average slightly more than $18 a car. The schedule is based wholly on valuation, starting with minimums of $10 on passenger cars and $15 on trucks and adding 1,5 per cent of the value of passenger and 2 per cent of that of commercial cars.

The new proposal is applied to common makes of cars as follows:

Make—	Pass.	Com.
Ford	$10	$15
Dodge	24	21
Buick	45	24
Studebaker	40	26
Franklin	57	36
Cadillac	84	52
Packard	130	73

LEGISLATIVE SIDE LIGHTS

Change of the open season for fishing from May 1 to May 15 is provided in S. F. 117, by Senator G. A. Turnham of Long Lake, and was unanimously recommended for passage by the Senate.

Election judges and clerks in cities operating under home rule charters, will receive 65 cents an hour, instead of the present rate of 50 cents, under provisions of S. F. 75, unanimously passed by the senate.

House file 260, backed by the committee on agriculture and horticulture, provided that county boards "shall" appropriate $1,000 for the farm bureau, if an organization of 200 members was formed and $1,000 raised locally, was recommended for passage Wednesday.

Wearing an American Legion or other war veterans organization button, when not entitled to or using the name of the veterans' associations for gain, is made a misdemeanor, punishable by a 60 day sentence or $50 fine, or both, under H. F. 360, fathered by Representative A. E. Nollet and J. R. [illegible]

[illegible]ther Minnesota counties, which [illegible] approximately $19,000,000 on highways since Feb. 1, 1919, will be reimbursed [illegible] is a question for members of the house highway com[illegible] are divided, some of them hold[illegible] that the state trunk highway funds should not be disturbed too fast.

[illegible] in the bonus law are being [illegible] by a subcommittee of the house bonus committee of which Sherman W. Child is chairman. It may be recommended that the law be made more lenient toward illiterate aliens who may have been wrongly classed as conscientious objectors, and civilian employees probably are to be given recognition. Time for filing applications will be determined. Because there are about 125 officers and 2,000 Minnesota men still in the service, it is likely an officers' certificate as well as an honorable discharge may be accepted as proof of claims.

MERGE ORE TAX BILLS

House [illegible] Will Ask [illegible] Sub committee [illegible] Draft Compromise [illegible] Tax Bill—Author of [illegible] Conciliate

St. [illegible] indications are that the house [illegible] tax [illegible] will appoint [illegible] committee of [illegible] members to draft a compromise tonnage tax bill for submission to the house.

A motion to this effect was presented to the committee at the session early this week, but was withdrawn temporarily so mining men could appear and conclude hearings on the tonnage tax which is in progress.

Representatives C. M. Bendixen and A. C. Welch have had conferences regarding a compromise on their bills and both said that an agreement had practically been reached.

"Friends of the tonnage tax want me to strike out a provision in my bill making the proposed tax of 8 per cent of net profits in leau of all other state taxes," said Mr. Bendixen. "I inserted this because the tax commission and Governor Preus both felt that a tonnage tax bill would be unconstitutional without this provision. However, I am for a tonnage tax and whatever the tax committee and judiciary committee may agree upon will be satisfactory."

The committee probably will frame its bill and have it ready for introduction within 10 days.

"The Mesaba iron range is like a great layer cake, said W. G. Swart, vicepresident and general manager of the Mesaba Iron company, to the house tax committee.

"A layer cake with 8 per cent raisins has plenty of good eating after the raisins are gone," said Mr. Swart, the raisins in his illustration being the highgrade ore mines and the rest of the cake the lowgrade mines.

Mr. Swart's company, he said, had developed copper mines in Utah that had been considered of no account but through large volume of operations had been made to produce 25 per cent of the copper in the country.

This company had spent $780,000 experimenting with low grade iron ore in Minnesota and are constructing a $3,000,000 mill on Lake Superior. This mill, he said, was only a small unit and the company considered the expenditure of $50,000,000 more for the main plant, but he told the committee they were seriously considering construction of this main plant in Wisconsin or Michigan because Minnesota has no settled taxation policy.

Mr. Swart said the United States geological survey showed 125,000,000,000 tons of iron ore already exposed on the Mesaba range and if the range dips to the south the amount available would be beyond human comprehension.

"To exhaust the 8 per cent of high grade ore would take from 20 to 30 years, but the low grade ore, at the present rate of shipping, will last more than 1,000 years," he said. "The state of Minnesota can put off indefinitely development of low grade ore by a shifting policy of taxation. It is mighty easy to discourage capital."

Representatives C. M. Bendixen and C. P. Murphy closely questioned Mr. Swart. Mr. Bendixen being in favor of a tonnage tax and Mr. Murphy against it.

Grain Traders on Carpet.

[illegible] aimed at the Minneapolis [illegible] of Commerce and the Duluth [illegible] of Trade will be in the limelight [illegible] Minnesota legislature [illegible]

[illegible] House marketing and the Senate [illegible] agricultural committees will hold [illegible] meeting to consider the bill to make the grain exchanges open [illegible] [illegible] them to [illegible] co-operative [illegible] of all kinds. Amendments to the bonus act making it more liberal in its provisions are being prepared by a subcommittee of the committee on soldier's bonus, the house was informed by Chairman J. B. Hompe and Sherman W. Child of the committee. Mr. Child said that the amendments probably will make all men who enlisted eligible to the bonus, taking care of socalled "alien objectors" who showed their willingness to serve by enlisting. The conscientious objector, however, will not be recognized by the committee. He pointed out in the debate that men who served time in Leavenworth prison for military offenses would get the bonus if the Nellermoe bill passed.

Gladiatorial combats between man and beast would be an offense against the law under a bill backed by the Minnesota Humane society, which is to be introduced this week in the legislature. The bill is prompted by the wild west show at the State Fair last fall, which aroused considerable adverse comment because of the rough handling of steers by the cowboys.

Prairie chicken hunters may have their inning this fall. The senate in committee of the whole recommended a bill opening the season for 1921. Fishing season would open May 15 instead of May 1, under another bill given favorable consideration. The object being to protect fish in spawning season.

Town road overseers, except in Hennepin, Ramsey and St. Louis counties, will receive $4 a day instead of $3, under a bill passed by the house, 104 to 0.

Even though the house defeated a bill changing the weight of corn on the ear from 70 pounds to 80 pounds in October and November and 75 pounds in December and January, the senate unanimously passed the measure, after an amendment providing that buyers "may" take these weights. This means the bill will come up again in the house, and with the compulsory provision striken out, probably it will pass.

NEW AUTO LICENSE FEES

On the basis of 300,000 cars to be licensed in the state under the Good Roads Amendment No. 1 plan, the new tentative proposal will yield $5,732,277, it is estimated, or an average slightly more than $18 a car. The schedule is based wholly on valuation, starting with minimums of $10 on passenger cars and $15 on trucks and adding 1.5 per cent of the value of passenger and 2 per cent of that of commercial cars.

The new proposal is applied to common makes of cars as follows:

Make—	Pass.	Com.
Ford	$10	$15
Dodge	24	21
Buick	45	24
Studebaker	40	26
Franklin	57	36
Cadillac	84	52
Packard	130	73

LEGISLATIVE SIDE LIGHTS

Change of the open season for fishing from May 1 to May 15 is provided in S. F. 117, by Senator G. A. Turnham of Long Lake, and was unanimously recommended for passage by the Senate.

Election judges and clerks in cities, operating under home rule charters, will receive 65 cents an hour, instead of the present rate of 50 cents, under provisions of S. F. 75, unanimously passed by the senate.

House file 260, backed by the committee on agriculture and horticulture, provided that county boards "shall" appropriate $1,000 for the farm bureau, if an organization of 200 members was formed and $1,000 raised locally, was recommended for passage Wednesday.

Wearing an American Legion or other war veterans organization button, when not entitled to or using the name of the veterans' associations for gain, is made a misdemeanor, punishable by a 60 day sentence or $50 fine, or both, under H. F. 360, fathered by Representative A. E. Nollet and J. R. Sweitzer.

Whether Minnesota counties, which expended approximately $19,000,000 on highways since Feb. 1, 1919, will be reimbursed promptly is a question for members of the house highway committee are divided, some of them holding that the state trunk highway funds should not be disturbed too fast.

Changes in the bonus law are being drafted by a subcommittee of the house bonus committee of which Sherman W. Child is chairman. It may be recommended that the law be made more lenient toward illiterate aliens who may have been wrongly classed as conscientious objectors, and civilian employees probably are to be given recognition. Time for filing applications will be determined. Because there are about 125 officers and 2,000 Minnesota men still in the service, it is likely an officers' certificate as well as an honorable discharge may be accepted as proof of claims.

Two and a Bridge

By ANDERSON MILLER

(© 1921, by McClure Newspaper Syndicate.)

The primal command to Adam to earn his bread by the sweat of his brow was certainly being applied literally in his own case, thought Robert Owen gloomily, as he regarded the moist lump that represented what had been, a few hours ago, a fresh and spotless handkerchief. The train was moving leisurely through a district in western Pennsylvania where there was not a tree, as far as he could see through the grimy windows, that was more than ten feet high.

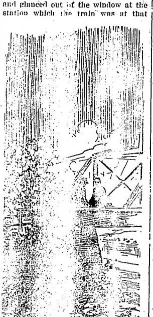
The sun beat down on the country, and from the gray-green earth reflected heat waves leaped back, quivering and distorting the view. Owen, though clad as lightly as possible, was literally sweltering.

He thought regretfully of the cool quiet of the club lounge which he had left twenty hours before; the shaded veranda, the icy shower baths, the invigorating chill of the swimming pool.

And he had let the chief talk him into making this trip on the off chance of getting the contract for putting up a bridge over some forsaken river or other in the wilds of the state, off the main line!

He groaned as he thought that he would probably be marooned up there for the better part of a week, interviewing county commissioners and highway experts in little boxlike offices that smell of dust and were abominably hot.

He mopped his brow again, more from force of habit than with any expectation of mitigating his discomfort, and glanced out of the window at the station which the train was at that moment languidly leaving. "Phillipsville," said the gilt letters. Only two more stops to Spring Valley—that, at least, was a comfort.



"I'm Going Away Tomorrow."

He would see the head of the state highway department that afternoon and try to be comfortable during the night, at least. He wondered what Spring Valley was like. For the twentieth time that day he drew the letter from the highway department from his pocket and read it, from the courteous opening to the "Yours truly, J. Harbison, Com'r."

It was a nice letter and "J. Harbison" had a nice signature—that at least was something. Harbison wasn't a smoky old [illegible]—he was sure of that. * * * "Spring Valley!" roared the conductor, and Owen leaped to his feet and hurried from the train, clutching his rolls of blueprints and his suitcase.

Spring Valley was not prepossessing to the eye. At the station were three dilapidated looking vehicles drawn by somnolent horses and manned by dusty Jehus who babbled unceasingly the merits of the hotels they represented.

Owen took the least objectionable of these and was transported in due time to the Mansion House. His first opinion of the Mansion House was that it wasn't. The usual languid bellboy; the usual crawling elevator; the usual [illegible] with the usual golden oak furniture and the usual prospect of the usual travesty of a meal at 6 o'clock. He inquired the way to the state highway commissioner's offices and departed.

His inquiry for Mr. Harbison was greeted with a grin by the boy who took his card and presently he was shown into a room that belied his preconceived ideas. It was spotlessly clean and had the air of having but recently been gone over—an air conspicuously lacking in most of the offices Owen had visited in his time. A girl was seated at a desk, writing busily. She glanced up as he entered.

"Mr. Owen?"

"Yes—to see Mr. Harbison about that bridge." Harbison had taste in secretaries, he thought. But her next words took him off his feet.

"I am Miss Harbison," the young lady replied calmly. "Won't you sit down?"

"The—the highway commissioner?" Owen could only stare.

"Of course!" With a little laugh. "I was elected last fall. You want to see me about the Bell river bridge. What is it exactly you want?"

Owen recovered from his astonishment and told her. But there were many details to go into, and it was half-past five before he knew it.

"Look here," said Miss Harbison, directly. "We have a lot to talk about. Suppose you come up to the house after dinner and we'll get on with the work. I live at 18 Cherry street—it's easy to find. About eight—good afternoon!"

Owen repaired to 18 Cherry street at the time suggested. It was a cool-looking house with a cool-looking veranda and a lot of cool-looking chairs; and Miss Harbison was there to meet him in a cool-looking frock; and he met her mother, who was a nice old lady, evidently very proud of her daughter; and for many hours the two of them set up and discussed estimates and time clauses and bonuses and penalties and such things; and at 12 o'clock Owen went back to the hotel tired but at peace with the world. He was sure that he would be able to put the contract through in fine style; and he had lost his fear of the conferences in the hot, smoky offices. Spr—

TESTS OF 29,638 SEED SAMPLES

HARD RED WINTER WHEAT
1
2

With This Equipment Grain Dealers Can Make All Tests Necessary to Determine Proper Grade of Grain.

During the year ending June 30, 1920, the United States Department of Agriculture tested 29,638 samples of seeds for farmers preliminary to planting. Of these, 16,442 were tested in Washington and 13,196 at the five branches. Under the seed importation act 69,000,000 pounds of seed were permitted entry during the fiscal year, which was more than the total for the previous [illegible] years. Nearly 5,000,000 pounds were held at port, more than half of which was reclaimed and the balance ordered destroyed or exported. Red [illegible] and alfalfa, crimson clover, rape seed, and alseke were among the [illegible] imported.

Plan of a Simple Backyard Poultry House.

(Prepared by the United States Department of Agriculture.)

Piano and packing boxes can be successfully converted into adequate backyard poultry houses, but many owners of small flocks prefer a building erected especially for the purpose, because it usually presents a better appearance in the back yard. For such, poultry specialists of the United States Department of Agriculture suggest plans for a poultry house of the shed or slope-roof type that will make a small flock comfortable and be neat in appearance.

This building is 8 by 8 feet square, and is 6 feet high in front and [illegible] high in the rear. The house may be made higher with little extra cost and would be more convenient to work in. The ventilator in the rear is not needed in the northern part of the country. The roof is covered with roofing paper. The same material may be used on the sides or if desired the sides may be covered with wooden strips three inches wide. Such a house is large enough for a flock of 20 hens.

Dry Floor a Necessity.

If the soil is well drained and remains dry no floor need be used in the house. Often a slight dampness can be corrected by filling up the floor several inches above the outside ground with sand, gravel, or dry dirt. Three or four inches of the surface of the floor should be removed and replaced with fresh earth once or twice a year. The run should be spaded up at least once a year. If the ground is so wet or damp that this condition cannot be corrected by filling, it is best to provide a board floor, as this will help to keep the house dry, will allow easier cleaning and will promote the general health and welfare of the hens. A house with a board floor should be set on posts or blocks, so that it is 5 to 12 inches above the ground. When this space is left the floor will not rot so quickly and rats will not be so likely to take refuge under the house.

The dropping boards and roosts should be placed against the back wall. Here they are out of the way and also are least likely to be reached by drafts. The dropping boards should be about 20 to 30 inches from the floor, depending on the height of the building. This gives space enough under them so that the hens have room to exercise and is not too high for the heavier hens to fly up to. The roosts should be 3 or 4 inches above the dropping boards. If more than a single roost is used, they should be on the same level; otherwise all the hens will try to crowd upon the highest roost. A piece of 2 by 4 or 2 by 4, laid on edge and with the upper corners rounded off, makes a good roost. A pole, or even a piece of board 2 or 3 inches wide, may be used. If the roost is of light material and fairly long it should be supported in the middle, as well as at the ends, to prevent it from sagging badly. An allowance of 7 to 10 inches of roost space per fowl, according to the size of the birds, should be made. If more than one roost is used, they should be placed about 15 inches apart.

Provide Simple Nests.

Nests must be provided and may be very simple. Any box about 1 foot square and 5 or 6 inches deep is suitable. An ordinary orange box with the partition in the middle serves very well, each box forming two nests. The top is removed, the box laid on its side, and a strip 3 to 4 inches wide nailed across the lower front. Nests can be fastened against the walls of the house or set on the floor. It is preferable to fasten them against the walls, as they take too much floor space if set on the floor. One nest should be provided for each four or five hens.

Paper Money That Is Lost.

From figures available it is estimated that bills of larger denominations are not frequently lost. Probably not more than three-tenths of 1 per cent of them fail to return. Taking it altogether, it is estimated that aside from the shinplasters that were lost, there has been about $8,000,000 worth of paper money that went out of the treasury and never came back. These were United States notes and gold and silver certificates.

TO AID CO-OPERATION

Farmers' Bulletin No. 1144, on Co-Operative Marketing, has just been issued by the United States Department of Agriculture, Washington, D. C. Every person interested in developing the co-operative movement among farmers should have a copy, which can be obtained free on application.

Why Pay Rent

Notice of Special School Meeting and Election

NOTICE IS HEREBY GIVEN, That, pursuant to a resolution of the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, a special meeting and election in and for said district will be held at the School House in the village of Goodridge, Pennington county, Minnesota, on the 5th day of February, 1921, at [illegible] o'clock p. m., to vote upon the following proposition:

Shall the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, issue its Refunding Bonds in the amount of $10,000 00, bearing date the First day of February, 1921, maturing as to principal on the first day of February, 1936, and bearing interest at the rate of seven per cent per annum, payable semiannually, for the purpose of refunding the outstanding floating indebtedness of said District?

The polls will remain open until Four o'clock p. m.

Dated this 24th day of January, 1921
NICK BUNDHUND. Clerk.

SECRET THAT NATURE KEEPS

Scientists Have Never Been Able to Discover Where the Seals Spend the Winter.

No one knows where the seals go in the winter. In Alaska they begin to appear on the islands of St. Paul and St. George about the end of April or the first of May, and toward the latter part of August or in the first weeks of September they disappear as strangely and mysteriously as they came. This is one of Nature's secrets which she has kept most successfully hid from scientists as well as the prying eyes of the merely curious and inquisitive.

Even in the days, years ago, when the seals numbered 5,000,000 or more, apparently some signal unknown to man would be given and the next day the fog-wreathed rocks would be bare, the seals having deserted the islands. With their slipping off into Bering sea, all trace of them was lost until their return the following spring. Then some morning they would suddenly reappear, disporting themselves in the water or on the shore.

Coroner's and Juror's Pay Raised.

Coroners and justice court jurors are raised to $2 a day for services in H. F. 327. Heretofore they have $1 per day and it has been difficult to secure men to serve without compelling them to appear.

An ordinary orange box with the partition in the middle serves very well, each box forming two nests. The top is removed, the box laid on its side, and a strip 3 or 4 inches wide nailed across the lower front. Nests can be fastened against the walls of the house or set on the floor. It is preferable to fasten them against the walls, as they take too much floor space if set on the floor. One nest should be provided for each four or five hens.

Paper Money That Is Lost.

From figures available it is estimated that bills of larger denominations are not frequently lost. Probably not more than three-tenths of 1 per cent of them fail to return. Taking it altogether, it is estimated that aside from the shinplasters that were lost, there has been about $8,000,000 worth of paper money that went out of the treasury and never came back. These were United States notes and gold and silver certificates.

TO AID CO-OPERATION

Farmers' Bulletin No. 1144, on Co-Operative Marketing, has just been issued by the United States Department of Agriculture, Washington, D. C. Every person interested in developing the [illegible] co-operative movement among farmers should have a copy, which can be obtained free on application.

Notice of Special School Meeting and Election

NOTICE IS HEREBY GIVEN, That, pursuant to a resolution of the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, a special meeting and election [illegible] for said district will be held at School House in the village of Goodridge, Pennington county, Minnesota, on the 5th day of February, 1921, at [illegible] o'clock p. m., to vote upon the following proposition:

Shall the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, issue its Refunding Bonds in the amount of $10,000.00, bearing date the First day of February, 1921, maturing as to principal on the first day of February, 1936, and bearing interest at the rate of seven per cent per annum, payable semiannually, for the purpose of refunding the outstanding floating indebtedness of said District?

The polls will remain open until Four o'clock p. m.

Dated this 24th day of January, 1921
NICK BUNDHUND, Clerk.

SECRET THAT NATURE KEEPS

Scientists Have Never Been Able to Discover Where the Seals Spend the Winter.

No one knows where the seals go in the winter. In Alaska they begin to appear on the islands of St. Paul and St. George about the end of April or the first of May, and toward the latter part of August or in the first weeks of September they disappear as strangely and mysteriously as they came. This is one of Nature's secrets which she has kept most successfully hid from scientists as well as the prying eyes of the merely curious and inquisitive.

Even in the days, years ago, when the seals numbered 5,000,000 or more, apparently some signal unknown to man would be given and the next day the fog-wreathed rocks would be bare, the seals having deserted the islands. With their slipping off into Bering sea, all trace of them was lost until their return the following spring. Then some morning they would suddenly reappear, disporting themselves in the water or on the shore.

Coroner's and Juror's Pay Raised.

Coroners and justice court jurors are raised to $2 a day for services in H. F. 327. Heretofore they have $1 per day and it has been difficult to secure men to serve without compelling them to appear.

j20 4t p SEVER ANDERSON,

Be Sure to Vote

Tomorrow from 1 o'clock to 4 the people of this consolidated school district will vote on the question of issuing $10,000 in bonds to refund the floating indebtedness of the district. This action is absolutely necessary if the schools are to be kept up Every reasonable man knows this is true. This matter has been discussed in these columns before.

The outlook is that there will be practically no opposition to the bond issue. But even so, it takes votes to carry the measure and votes we must have. Every vote counts one.

GO TO THE POLLS AND VOTE.

George Wold was in Thief River Falls Wednesday.

Harry Halvorson was in from his farm yesterday.

J. P. Jensen was in Thief River Falls Wednesday night.

Henry and Anton Lien went to Thief River Falls Wednesday.

Albert Halvorson was a business visitor at the county seat Tuesday.

Mrs. Ben Habedank has been visiting visiting her mother, Mrs. Tellefson.

Dr. Adkins was in town yesterday and drove out to Grygla on ptofessional business.

Louis Grimley came from Thief River Falls to attend tue Firemen's dance Friday evening.

Prof Norby will assist in his spare time in the enrollment of members in the Farm bureau.

Miss Lida Clemenson of Kratka was the guest of Mrs. Albert Halvorson from Friday until Sunday.

Ben Habedank was in Thief River Falls last Friday and Saturday getting medical treatment for a swelling on his face

M. J. Lysbakken went to the county seat Wednesday and has not returned. Mr. Gaylord thinks he must be getting married.

Miss Stella Stenqick, who has been attending school at Thief River Falls, came up Monday and went out to her home south of town.

Miss Teresa Giefer was in Grand Forks Monday and Tuesday. Her sister, Miss Christine Giefer, substituted for her in the school room.

Mrs. Elmer Olson came over from Plummer Friday and visited friends here. On her return the same day Mr. Olson accompanied her to Thief River Falls.

Among the big crowd who attended the ditch hearing at Thief River Falls on Wednesday we might mention L. I. Poppenhagen, Sam Gangenes, Ed Kivli, P. Sund.

The Ditch Hearing

There was a big attendance at the hearing on Ditch 18 at Thief River Falls Wednesday, and the matter was threshed over in all its details, many of the farmers joining in the discussion and arguing for and against the ditch and the laterals. Judge Grindeland adjourned the hearing to next Saturday at Warren, when he is expected to make his order.

Murder at Carp

George and Robert Miller of Carp are now held in the jail at Baudette for the killing of H. H. Fenton, a resident of that vicinity, who was shot down by George Miller last Monday afternoon. George shot Fenton because he was ordered to do so by an older brother Robert. The shooting was a mistake, in that Fenton was not the man they thought they were killing. Miller died instantly.

It is thought here that the Millers were formerly residents of Goodridge.

Phosphate Needed to Reclaim Peat Soils

A NEW ERA IN PEAT FARMING

The local interest attached to the lecture on "Phosphates and Peat Soils" given by E. P. Taylor at the Community club meeting Thursday evening prompts us to give a more detailed account than that which was published in last week's issue.

Mr. Taylor is a well known soil expert and is at the present time connected with one of the largest mining industries in the United States. According to the speaker, the use of phosphate on peat soils is beyond the experimental stage. On peat soils such as those found in our section of the state phosphorus is the one plant food that must be supplied before such soils can be utilized to their full advantage. The other elements necessary to plant life are present in abundance. Phosphate in some form alone must be supplied.

Phosphate plots were conducted in Pennington county last year, and in every case the application of this element brought results in the way of increased yield per acre. More extensive experiments have also been conducted at the Golden Valley experiment station under the direction of the soil experts of the University of Minnesota. All results point to the fact that phosphate treated soils yield more acre for acre than where no phosphate has been applied or where other forms of fertilizer have been used.

Acid phosphate is made by combining ordinary rock phosphate and sulphuric acid. This constitutes the 16 per cent acid phosphate which up to this time has been used as a commercial fertilizer to supply the phosphorus in a form directly available to plants. A more highly concentrated form of phosphate has recently been produced which brings the available phosphoric acid up to about three times the strength of ordinary acid phosphate, viz., 45.5 per cent available phosphoric acid—P_2S_5. This has been given the name treble superphosphate and is, because of its concentrated form, much more convenient to handle and easy to apply.

Mr. Taylor stated that treble superphosphate can be obtained at approximately [illegible] cents per pound, including freight charges. The amount of phosphate to be used will vary, depending depending on the locality in which it is used. An application of 100 pounds per acre will, on an average, provide the necessary amount of phosphorus for three years. If used every year, one third this amount will suffice.

Indications point to a new era in peat farming with the introduction of phosphate fertilizers. If future experience corroborates the experiments already conducted, the large tracts of waste lands may prove as profitable for grain raising as they have hitherto been unproductive.

Marshall County Farm Bureau Meetings

[illegible] board of directors of the Marshall county Farm Bureau has arranged a series of meetings at various points in the county for the purpose of organizing Community branches of the County Bureau. A director to represent each community on the board of the county [illegible] and other officers will be elected.

[illegible] Ristad, a good Pennington county [illegible], will speak. Your community [illegible] be present to talk over with [illegible] your problems and the line of work you wish to carry on. Everybody whether a Farm bureau member or not, is invited, and it is hoped that the meetings will be well attended. Go to the one most convenient.

[illegible] M. W. A. hall, Feb. 14, 1:30 p. m. [illegible] school, town of Eckvol, Feb. [illegible] Ed Sheldrew's home, town of [illegible], Feb. 15, 1:30 p. m. Ga[illegible] hall, Feb. 15, 8 p. m. Farm Bureau Fights To Open Grain Pits

Immediate action by the Federal government to compel grain exchanges to admit farmers' co-operative associations to full membership is the demand of the committee of seventeen, served on the Federal Trade commission and the attorney general and announced by the Minnesota Farm Bureau federation.

The committee of seventeen appointed by the American Farm Bureau federation and representing the largest farmers' grain selling organizations in the United States, is working out a nation-wide plan for direct grain marketing by the farmers. Its demand for legal action by the federal government to force boards of trade to open their doors to farmers' co-operatives is being used by the Minnesota federation in its fight for the public markets bill now pending in the legislature. This bill would force the Minneapolis chamber of commerce, the Duluth board of trade and the St. Paul livestock exchange to grant equal membership to farmers' co-operative selling agencies.

A resolution passed by the committee of seventeen contains the first indication of what its ultimate decision may be. It also specifically refused to recognize grain exchanges as the best means of selling grain.

"While not anticipating in any way the findings of the committee and not recognizing the grain exchanges as the best possible method of marketing grain," the committee members said, "we unanimously adopted the resolution. The principal grain exchanges of the United States bar co-operative companies that distribute their profits in proportion to the volume of business handled, from participating in the buying and selling of farm products. This prevents the producers from collectively selling their own products on the markets of the country, thereby creating a monopoly in the hands of the traders, a situation which is not just and which is not in harmony with the spirit of American institutions.

"We call udon the federal trade commission, the attorney general or other public authority to take such steps as may be necessary to open the markets to the membership of co-operative companies unless the grain exchanges shall voluntarily do the same at once."

"The committee of seventeen," W. G. Eckhardt, its treasurer, said, "has gone on record publicly as condemning short selling. The marketing plan that is complete will need to be able to market the grain crop in spite of the boards of trade and short selling. When the farmers' organizations have control of a large enough percentage of the crop, then no one will dare to short sell, unless he has first contracted for the grain from the marketing organizations controlled by the farmers."

The committee of seventeen will take its next big step toward completing the Farm Bureau federation's nationwide marketing plan when it meets in Kansas City on Feb. 14.

A Talk on Iceland

Rev. H. G. B. Thorgrimson of Grand Forks delivered an interesting lecture on Iceland to a capacity audience at the Lutheran church Sunday evening. Rev. Thorgrimson was born and raised in Iceland and thus possesses first hand knowledge of this wonderland of the north.

"Iceland," said Mr. Thorgrimson, "is a misnomer. There is but little ice, and the climate is so mild and the vegetation so beautiful all the year ronnd that this island should really have been named Parkland." He then went on to give a picture of the country with its commercial and industrial possibilities. Up to the present time, the speaker declared, the natural resources of the country have not been developed to any great extent, but the future holds great possibilities for the people of Iceland because of the rich fisheries and the large tracts of grazing grounds.

The Icelandic language, said the speaker, is among the most beautiful and expressive in the world, and ranks with Latin and Greek among the classical languages of the world. One third of all the words in the English language are said to be derived from the Icelandic. The sagas of Iceland are very famous and have found their way into every modern language. "A man," concluded the speaker, "becomes a better citizen of the country in which he lives if he cherishes the memory of the country from which his ancestors came and treasures his mother tongue

Tonsorial Parlor Moved

The barber shop moved this morning into new quarters in Bernt Tanem's confectionery.

Grygla Couple Married

A wedding of interest is that of Ole Peterson and Alice F. Hawkins, both of Grygla. The ceremony was performed Tuesday evening, February 8, at the Lutheran parsonage, Grygla, Rev. S. Anderson officiating. Miss Ruth Hawkins, sister of the bride, acted as maid of honor and the groom was attended by his brother, J. T. Peterson.

The event came as a surprise to the numerous friends of the young couple and was not generally known till some time after the ceremony had taken place. They left Wednesday morning for Minneapolis after receiving a hearty "send off" by their friends. Mr. Peterson has been employed at the Fladeland garage for the past two years and Miss Hawkins has been assistant cashier in tee Citizens State bank.

Time Granted In Ditch Hearing

At the ditch hearing held in Warren Saturday in connection with ditch No. 18, the coart allowed the attorneys of both sides an additional thirty days in which to file all objections as to the establishment of the ditch. From all indications the ditch will be established, but it is expected there will be considerable scrapping before the matter is permanently disposed of.—Tribune.

For Sale—Sweet Clover Seed, at 12 cents per pound. Also 300 bushels of Oats, cheap.—Sidney Hemmestvedt, Kratka, Minn. f11 4t p

The Greater Love

By BEN R. THORNBURY

(Copyright.)

The gaunt frame building that had served as division headquarters at Centerpoint for the past quarter of a century, trembled and creaked in the grasp of the blizzard. Everybody down in the yard, who could leave his work, had been driven to the shelter of roundhouse and train-shed by the fury of its blinding gusts.

"It never snows, but there's a blizzard out here," grumbled the night dispatcher, bending over the train-sheet at the long instrument table in the center of the room, "and that applies to something more than the weather chart, too. Just let us get a heavy run of stock, and the Old Man's sure to find some reason for running that varnished wagon of his out on the line to play shuttle-cock with the schedule. It's a bad night to keep things moving."

He was addressing no one in particular, but the superintendent wheeled around from his desk in the corner and faced him.

"Speaking of the Old Man," he said, "did you notice that drunken bum that just went out?"

"No," he snapped, "I've been too busy keeping half a dozen hog-trains from running over the Old Man's special to notice anything. What's he got to do with the Old Man?"

"Nothing, now, but there was a time about ten years ago, when the Old Man was a strong factor in his life." The superintendent hitched his chair over to the table and cocked up his heels.

"It isn't a long story," began the superintendent as he lighted a cigar and carefully studied the burning end. "That drunken bum is Sam Selkirk, at one time the smoothest operator on the M. I. and N.

"Well, Sam blowed into the general offices one day—they were located at Kensington then—and hit the Old Man for a job.

"Beyond the fact that he could pound-brass, the Old Man never asked any questions. I was a clerk in the office at the time, and I remember the expression on the Old Man's face when Sam sat down to that key. He did love a competent man, no matter what branch of the service he happened to be in.

"You can bet there wasn't any bulled messages in that office after that, and things went on as smooth as the road-bed for about six months, until one day Joe Kelsoe came in on No. 2 and announced that he needed a dispatcher, and needed him bad.

"You never knew Joe, did you? He went down East when the road was gobbled up, but he was train-master here in Centerpoint at that time.

"The Old Man knew, by the way Joe cut his eyes around at Selkirk when he made the announcement, that he might as well look out for a new operator, for what Joe went after he usually got, and so the next day Sam was ordered to report here, for a [illegible] trick work. That was the beginning of Sam's troubles.

"Of course there was a girl in the case," continued his chief, "and the girl in Sam's case was Jim O'Keefe's daughter. Jim was road-master; the Old Man having brought him and the chief dispatcher down with him from the Soo.

"The chief was a good man, all right, or the Old Man wouldn't have kept him, and we all thought he was straight as a die, but a [illegible] straight [illegible] have crooked roots, you know, and [illegible] showed [illegible] make- [illegible] some of the [illegible] with Fanny O'Keefe. [illegible] never told Sam [illegible] the chief had been thick [illegible]. From that moment the chief began throwing it into Sam and never let up until he finally got his [illegible].

"Things went on that way until [illegible] Fanny concluded to tie up. About that time the Transcontinental bought up the line and there was a general shake-up all around. Sam was [illegible] for cause. Of [illegible] it was plain to everybody that the cause was under the new superintendent.

"He came down in a day or two to [illegible] time, and I never saw such a [illegible] fellow.

"That was the last I saw of him until he drifted in here tonight on this blizzard, and I never learned the whole story until the chief was raised from superintendent to general manager of Western lines and I came up here to take his place."

"Our general manager?" exploded the night dispatcher.

"Our general manager," pursued the superintendent. "It seems that whatever the charge was, he queered Sam with the girl as well as the company, and in six months married her himself; and I guess it was that, more than the loss of his job, that put Sam all to the bad, and he must have gone to the bottom, for I didn't know him tonight until he told me who he was.

"He wanted me to place him, but I couldn't do anything for him. I told him then that the Old Man was coming through tonight and that if he would wait, I would see if something couldn't be done in the matter. He turned on his heel and went out. I never saw murder in a man's eye, but—"

"DS, DS, DS—BR."

The night dispatcher opened the key to answer the call, and the superintendent went quickly back to his desk in the corner. He was about to ask how the special was coming on, when he heard a sharp exclamation behind him and turned to see the night dispatcher standing rigid in front of his key; his face was as white as chalk.

"Great Scott, man! I've put second 97 head-on into that special!"

"What do you mean?" gasped the superintendent, springing to his side. "Speak, man! For heaven's sake say something!"

The night dispatcher had fallen limp in his chair, and the haggard face he raised to his chief was like death. He pointed silently to the open order-book.

"I got that train of empties over to the junction for them and then gave them that meeting-point with second 97. They left there ten minutes ago and Bradford just said 97 had run his signal board and had gone over the hill. His light was out."

He was speaking calmly now, but his slow, deliberate sentence came with a metallic ring.

"That means," he continued, "that in about twenty minutes from now, that train load of hogs will be going down Deanley hill at a forty-mile clip, and about five minutes later she will land on that special, and—"

"And no night man at Deanley!" The superintendent groaned.

"What's that!" he leaned toward the sounder, which was clicking rapidly.

"What is it? asked the superintendent.

"Wait!" The word cracked like a pistol-shot, then he began translating slowly:

"Don't worry up there DS, I'm not the operator here, but I got that report BR just sent and have put a glim on the bulls-eye; it'll stop the one that gets here first and—"

The circuit went wide open and did not close again, leaving the two staring at each other in helpless amazement.

"Sounds like a message from heaven," said the night dispatcher in a whisper.

Extra east pulled up at Deanley tank and the fireman crawled over the ice-covered tender to let down the spout. A brakeman jumped down from the caboose steps, pulled his cap over his ears and started toward the engine.

"Tell Dave to get a move on there, we don't want to lay out that special," called the conductor from the cupola.

"Here. This ain't no Pullman Limited. Clear out o' here!" he called roughly, and giving the foot a jerk, the form of a man struck the frozen ground and lay in a heap.

The man rose to his feet and steadied himself with an effort, then staggered across the snow-covered platform to the door of the station. It swung open against his weight and he fell prone across the floor of the little waiting-room.

For half an hour he lay thus, when an instrument began pounding [illegible]. He was listening intently. "At last!" he sobbed. "At last! Hang him! Hang him! And he'll die like the dog that he is! If she was only there too —she—she! Oh, my Fanny!"

Like a madman he flung himself against the frail door and burst into the office.

Insensible to the pain, he grasped a blazing coal and held it to the wick. He replaced the globe with shaking hands and darted outside to the platform, where he hooked the lantern to the signal-board. Stumbling, he groped his way back to the office and sank into the chair at the instrument-table.

Outside, above the howl of the increasing storm, a locomotive uttered a single shriek, which was echoed by another far up the track, and a moment later the two panting engines came to a shuddering stop with their frosty noses almost touching. A glimmer of ruby light fell softly upon them from the swinging lantern.

Inside, they found the corpse of a man, his stark fingers clutching the key of a telegraph instrument.

A Woman's Privilege

By LILY WANDEL

(© 1921, by McClure Newspaper Syndicate.)

"What you need is a permanent wave," exclaimed Melba, viewing her friend's long but somewhat stringy looking hair.

Ilsa put down her hairbrush and turned a thoroughly frightened face to the light. "Never! Don't even suggest such a thing to me. Didn't I go with Mrs. King when she got hers, and didn't I see with my own eyes what the poor thing endured for five horrible hours? No, not I.' And began to brush energetically.

"But think of the bliss afterward!" tempted Melba.

"But, Melba—why go through such torture? Mrs. King said she really thought the top of her head was coming off, as though they had built a fire on her scalp! Not for me. I'm not that ridiculous and vain!"

Melba raised her eyebrows disapprovingly. "I suppose you are getting dressed to get out with Larry tonight as usual."

"Yes, why do you ask?" dabbing her face with cold cream and then carefully massaging it in.

"Oh, nothing," answered Melba lightly, getting up from her chair and walking aimlessly about the room. She stopped before a picture of Ilsa taken some ten years ago. "You were going with Larry Philmore when this was taken, weren't you?"

"Oh, I suppose so," snapped Ilsa, visibly annoyed.

"It's a wonder you two wouldn't get married. My goodness, Ilsa, you are thirty or more!"

Ilsa began to rub off the cold cream vigorously so that her face was a bright red.

Melba sauntered back and dropped in her chair next to the dressing table. "Ilsa, are you letting that Larry Philmore string you along? Don't be foolish, child, get him to propose; don't waste your best years on a man who may drop you!"

"But Think of the Bliss Afterwards!"

"Melba! How can you!" Tears shot into Ilsa's eyes and she fumbled helplessly for a handkerchief.

"Oh, I know it; no one needs to tell me," came the muffled reply.

With a quick rush of understanding Melba flung her arm around Ilsa's shoulder and pressed her cheek against the other's. "My dear, my dear," she whispered softly, and then straightened up, full of purpose and action. "Make him propose! Make yourself so charming, so pretty that he will be afraid of losing you!"

"Why, Melba, you talk as though I go around like a frump! Don't I spend really more than I can afford on clothes and cosmetics?" She made an including gesture toward the bulging wardrobe and the double line of bottles and jars on her dressing table. "My complexion is good, you'll admit, and I have kept that tendency to a double chin away, haven't I?"

"Yes," admitted Melba slowly, "that's true, and you do dress very smartly; your hats are peaches, but—"

"But what?" demanded Ilsa, eyeing her suspiciously.

"Your hair—"

"I knew it! Your old permanent wave again! No, and a hundred times no! I won't be tortured for Larry Philmore or the king of England!"

"My goodness! Don't fly in such a temper right away. Your hats would look better, believe me. Last time I saw you out with Larry it was pouring rain, and your hair—"

"Oh, bother! If you knew how sick I am of all this," she swept her hand over the top of the dressing table, "this continual battle to keep pretty and young! I'm sick of it, Melba, just tired," a passion crept in her voice, "ready to quit! Throw it all to the wind—Larry and all!"

"Ilsa, [illegible]! Are you silly? Now don't do anything rash. You and Larry are so suited to each other—"

"[illegible] too! I don't care a rap [illegible] dress or anything! I'm [illegible] tired of all this fussing! [illegible] letter last week from Aunt Abigail in Seven Points, she's terribly busy with jelly-making and she hinted wanting help. And, Melba, I'm going; yes, I am, too. Going out there and live in a gingham housedress and make jelly and feed the chickens. And see those bottles and jars? Not a one goes along, not one. Not even a curling iron, nor a hair net. Not a georgette dress with all the million snaps and beads! I don't care if I look forty either, or fifty! And if Larry wants a younger girl why—" but her voice shook a little, "let him go to it!"

Melba rose in great consternation. "For goodness sakes, be sensible. You won't do anything of the kind." And as Ilsa obstinately shook her head, "you'll regret it. I know you will. Why not try the permanent wave, you can't tell—"

Ilsa gave her friend a little energetic shake. "Don't you dare say parmanent wave to me again!"

"There's no harm in making one's self as pretty as one can. Don't very sedate people help nature along with—for an instance—false teeth?"

But Ilsa was dragging out a suitcase. "I'm going tonight."

Two weeks of jelly-making and pickling had passed at Aunt Abigail's prim garden ablaze with bright flowers. When the day's preserving was over, Ilsa, still in her housedress, would take a pad and pencil and go out under the trees and scribble a letter to Melba.

"It's beautiful here," she wrote, "only I'm so tired from standing in the hot kitchen all day long. Somehow or other I keep glancing at the kitchen door every now and then as if I were expecting somebody. Now, if this were a story, some bright morning, when I stood over the stove with a face as red as a turkey, the door would open and in would step Larry! He would be quite overcome with joy and delight of seeing me in a stained housedress and my powderless nose would bring tears of happiness to his eyes! He would clasp me in his arms, jelly spoon and all and propose on the very spot! And then he would spring the astounding fact that he owned the next farm, a peach! Bought it five years ago and was afraid I wouldn't like to be a farmer's wife or something like that. Unfortunately this is not a story. No one comes to the kitchen door but an occasional tramp! Aunt Abigail makes very pointed remarks about old maids, and today she told me my hair looked a sight, no wonder I didn't get a husband! Nevertheless, she likes me and wants me to make my home with her and I really think I will."

In the morning came Melba's usual chatty letter. "And by the way, I saw your Larry last night in the [illegible] [illegible]ng chap and the lady who was with him was really quite stunning, and she had such pretty hair, curling out from under her hat."

"Aunt Abigail!" Ilsa came in the kitchen with pale cheeks. "I just had a letter—it's very urgent—I've got to catch the noon train—I may come back again, I'm not quite sure."

Two days later Ilsa with trembling fingers lifted the telephone receiver to her ear and gave the operator Larry's number. In reply to her invitation he promised to be there in an hour.

Ilsa met him in the hall.

Larry Philmore came in his usual brisk, matter-of-fact way, but he stopped and stared at Ilsa, then he drew her slowly toward him and kissed her very tenderly. "I really did not know how much I missed you until now," he said softly. [illegible] him gently to the library davenport.

"Ilsa," he confessed after a while, "I took Molly Davis out a few times when you were away. I thought she was so smart looking—I admired the way her hair looked, but dear, now that I see you I know what a fool I was! Why, your hair—Ilsa, queer I never noticed before, it waves so beautifully and shines—it's exquisite! Ilsa, I can't miss you again—couldn't we surprise our friends, dear? There's the Little Church Around the Corner."

And when he released her from his ardent embrace, "Dear, what makes you so attractive today, your pretty hair? Are you doing it a new way, what makes it ripple so?"

"I think," said Ilsa softly, "it was the country air."

GOVERNOR MAY REMOVE

Under New Highway Bill Introduced Governor is Empowered to Remove Highway Commissioner.

St. Paul—The state [illegible]ssioner of highways will be ap[illegible] for a six year term, but will [illegible]able at the pleasure" of the [illegible] under the highway administra[illegible] introduced by the house committee on public highways.

This provision puts the department absolutely under the governor's control, but has been agreed to by Charles M. Babcock, the present and prospective commissioner. The governor does not have to assign any cause for removing the commissioner, and may do it without any notice at all. The bill, however, prohibits a removal for political reasons.

"The office of the commissioner of highways is hereby created," the bill reads. "The term of such office shall be six years, and the governor of the state shall appoint a suitable person thereto. The commissioner of highways may be removed from office by the governor and at his pleasure other than political.

"Until the appointment and qualification of the first commissioner of highways under this act, the commissioner of highways previous to the passage of this act shall act as commissioner of highways hereunder."

Whether the two deputy commissioners shall be appointed directly by the governor or by the commissioner is yet to be settled. The bill as it reads gives the appointment to the commissioner. His salary is made $6,000 and he may pay up to that amount for the deputies, who are to be expert highway engineers.

A resolution ordering an investigation of the coal situation in the Northwest and a bill providing for the appointment of a state weed inspector were the highlights of legislation on Monday night's session of the Minnesota Senate.

Oil Inspection Revise.

The oil inspection laws are revised in Senate File 371 introduced by Senator P. A. Gandrud. The measure extends the number of products subject to inspection, and requires high test gasoline to be a superior product. Instead of inspection fees being fixed by law, the measure authorizes the inspector to fix the rates at not to exceed 5 cents a barrel of 50 gallons.

The death penalty for first degree murder must be carried out by the penintiary warden or a deputy within 90 days after sentence is passed, and the mode of inflicting the penalty must be the electric chair, under a bill introduced by Senator J. H. Hall. The bill provides that newspapers shall print no stories about the executions, except statements issued by the warden.

PASS CO-OPERATIVE MEASURE

Organization of a national co-operative selling agency to handle perishble farm produce may proceed under the co-operative bill, which became a law with the signature of Governor Preus.

The bill, the first of the present Legislature's co-operative marketing program to be enacted, was passed by both Houses of the Legislature, the Senate acting last week. Copies of the law were sent to local organizations of the farm bureau.

The new law amends the provisions of the co-operative laws passed at the previous legislative session; extending the scope so that local co-operative associations may federate in state or intrastate bodies to sell their products co-operatively.

The Farm Bureau Federation proposes to take advantage of the law at once by organizing a national selling agency to handle perishable farm produce. The agency will be modeled somewhat along the lines made famous by the California Fruit Growers' association.

LEGISLATORS SEEK RAISE

By a unanimous vote the house committee on general legislation recommended for passage the Nimocks' bill, raising the salaries of house and senate members from $1,000 to $1,500 a checked roll call to prove that he had eighty-six members to vote in favor of the bill.

The bill, which was referred to the committee on general legislation, also increases the salary from $2,000 to $3,000 for the senatorial term, which is four years, while that of the representatives, for whom the bill would provide a salary of $1,500, is two years.

TO REFUND COUNTIES

Belief Prevails that Sums Spent on Highways by Counties Since 1919 Will be Refunded.

St. Paul—A prediction that all counties which have spent mone[illegible] in the Babcock trun[illegible] since 1919, will re[illegible] the state wit[illegible] years, was made by Senator L. H. Nord. He is chairman of a subcommittee which is working on the question of refunds, and which has sent a questionnaire to every county auditor in the state, seeking exact information as to the refund claims of each county.

"I am getting many inquiries," Senator Nord said, "asking whether I think there is 'any show' for this county or that to get back the money it spent in 1919 and 1920 on the Babcock roads.

"Not only is there a 'show,' but I can say that there is no serious difference of opinion in the legilature on the main question. It is the sense of the members that the counties will get refunds. The general opinion is that there should be no refunds in the next two years, while construction work on the system is being started. But after two years, I think, refund payments will start and inside of 10 years the counties will get back not only the principal expended, but the interest."

There is some difference of opinion on this. Some members are favoring repayment only of the principal, letting the counties defray interest charges on the money they have spent on roads.

Foreign Language Fought.

Minnesota schools are prohibited from requiring a foreign language on the curriculum in a bill introduced by Senator Arch Coleman of Minnesota. Another bill sponsored by Senator Sam Rask, makes it a gross misdemeanor to hire as a teacher any one convicted of violating the federal espionage act. Both these bills are backed by the American Legion.

Senator James Dwyer introduced a constitutional amendment exempting co-operative associations or persons farming and gardening, from taxation and marketing establishments.

The commissioner of highways shall assemble all Minnesota county commissioners each year in St Paul to discuss highway propositions under Senate File 368, thrown into the hopper by Senators J. G. Callahan and G. A. Turnham.

Discrimination Bill Attacked.

Objections to Senator Magnus Johnson's unfair discrimination bill, voiced by members of the Northwestern Lumbermen's association at a meeting of the senate committee on commerce and corporation resulted in postponement of further consideration of the bill, pending an effort on the part of the author, together with supporters and opponents of the measure, to agree upon certain suggested changes.

J. B. Free of Melrose told the committee that "if co-operative lumber concerns do not get legislative assistance they will be stamped out in two years."

Chairman George Wicker of the house committee on taxes appointed the other four members of the subcommittee which will consult the attorney general as to the validity of the tonnage tax bills. The members are J. O. Haugland, C. M. Bendixen, A. C. Welch and C. H. Warner.

Gladiatorial combats between man and beast would be an offense against the law under a bill backed by the Minnesota Humane society, which is to be introduced this week in the legislature. The bill is prompted by the wild west show at the State Fair last fall, which aroused considerable adverse comment because of the rough handling of steers by the cowboys.

LEGISLATIVE SIDE LIGHTS

A bill to abolish the soldiers' bonus board and transfer its authority to the state auditor was introduced in the senate by Senator Sam A. Rask.

Evidence at hearings conducted by the railroad and warehouse commission may be taken by one commissioner, or, if it does not involve a raise in rates, by an employee, under H. F. 275, passed by a unanimous vote of the house.

Dealers in coal protested to the house committee on commerce, manufacturing and retail trade, against House File 99 introduced by Representative Guy Dilley of St. Paul, requiring dealers to remove slate and foreign substances from coal.

A bill for complete recodification of state road laws, changed only where necessary to carry out the so-called Babcock plan, was presented by a subcommittee and unanimously adopted by the public highways committee of the House of Representatives.

Five hundred farmers attending the meeings of stockholders in the Farmers' Terminal Packing plant, Newport, marched into the state capitol and presented to Speaker W. I. Nolan of the House of Representatives resolutions to be read before the chamber favoring the farm legislation program.

Senate bills already pased, increasing the license fee for a nonresident fisherman from $1 to $2, making the resident license for big game $2 instead of $1 and advancing the time for opening fishing season from May 1 to May 15, were favorably reported by the house fish and game committee.

Railroad attorneys, arguing before the house committee on railroads against the full crew bill, told members it was no time to pass the bill even though it were a meritorious measure. One railroad attorney said, "a vote for this bill is a vote against reduction of railroad rates."

Applying the Lesson.

My niece, Dorothy, was begging for a piece of candy just before supper. Her mother gave her a piece and told her she was not to have any more until after supper. Dorothy looked up at her mother and said: "Now, mother, you know we learned in Sunday school that God loves a cheerful giver. So you better give me another piece."—Chicago Herald and Examiner.

Bill Signed By Governor.

The soldier bonus bill, passed by the state legislature became a law Friday when Governor J. A. O. Preus attached his signature to the act. The bill provides for the immediate disposal of the remaining $4,538,000 bond issue, which means that the soldiers who have not yet received their bonus will be paid as the money is received from the sale of the bonds. The action of the legislature also makes it possible for the state bonus board to act upon the bids of the Minneapolis banks.

Coroner's and Juror's Pay Raised.

Coroners and justice court jurors are raised to $2 a day for services in H. F. 327. Heretofore they have $1 per day and it has been difficult to secure men to serve without compelling them to appear.

Virginia's Idle Hour

By H. LOUIS RAYBOLD

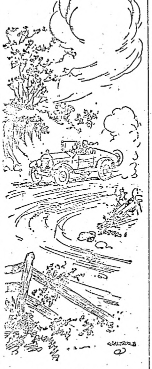
(©, 1920, by McClure Newspaper Syndicate.)

"I'm sorry for you, Peg," said Marion for at least the tenth time, "but you know how mother is. She simply takes a dislike to a person and there's no arguing her out of it. It's a pity she feels that way about Stuart. He seems to me the very man for you."

The two girls were having a farewell talk as Marion packed her going-away suitcase, for in just a few hours that young lady was scheduled to be married amid a profusion of flowers, bridesmaids and flower girls, beneath a huge wedding bell at that very moment being suspended in the living room below.

"It's so unreasonable," protested the younger girl "Just because his politics differ from those of the family isn't an excuse for spoiling my life!"

"It looks," said her sister, "as if you would have to do what I have wanted to do right along—elope. Really, very much simpler than all this fuss. However, cheer up, child. You never know what may turn up!" And she gave a wise little nod of her head which Peggy remembered afterward.



Speeding Cityward.

At the same time that the above conversation was taking place, the best man and maid of honor of the forthcoming nuptials were speeding cityward for a few last errands.

"This is going to be one busy hour, believe me," laughed Virginia, her slim gloved hands taut on the wheel, her eyes fixed on the dusty ribbon of road ahead. "There's the change in the order to the caterers, the buttonhole bouquets for the ushers, the confetti—and, oh, various things!"

"I suppose I can nevertheless manage time for a forty-'leventh proposal," flashed her companion. "Some time, I'm hoping, you'll say 'yes' absent-mindedly, and then your sense of honor will keep you to your word!"

It seemed to Jack Andrews that all his life he had been pursuing the elusive Virginia and never quite catching up with her. It was always just like today—something perpetually occupied her time to the exclusion of him. If it wasn't a question of teas and receptions and dinner dances, then it was war work or settlement work or community canning. Oh, for one single, idle hour!

At that point in his cogitations Jack noticed that the water in the radiator was boiling furiously and that the engine seemed unusually hot.

"Slow down," he advised. "I'll see what's the matter."

Matter enough it proved to be. The fan belt had broken, and combined search of the tool box and recess beneath the seat disclosed no duplicate.

In other words, two of the principals of the elaborate wedding planned to take place so shortly were stranded apparently miles from nowhere in sight of nothing on a little-used road, which Virginia had taken because it afforded a short cut from the Kendalls' country home to the main pike.

"It seems to me," mused Jack, who had a memory for places, "that there is a railroad station somewhere about."

Sure enough, a walk to the summit of the next hill revealed a line of track and a small station just below.

"We will have to take the next train to the city and telephone out for them to meet us and tow back the runabout," decided the girl.

A few minutes' trudging brought them to the station where they found the station master locking the door. "Next train? Wal, the local goes through in an hour or so. You kin flag it," and he turned away.

[illegible] station while the two young people sat them down prepared to cool their heels indefinitely. At first there was little conversation. Jack was content to enjoy the nearness of Virginia while Virginia herself was worrying considerably as to whether they would be on hand for the ceremony.

"Somehow I feel as if all the preparations for this affair were being wasted on Marion," she broke the silence suddenly. "She is only going through it to please her mother. Her preferences are for a wedding with the least possible fuss and feathers."

"It's lucky you and I think alike on such matters," said Jack calmly, regardless of the fact that he didn't in the least know how she thought at all.

Virginia gave him the benefit of a direct gaze from her lustrous eyes. "What do you mean?" she asked, then realized that she had given him the opportunity he wished.

"Two people who are going to marry each other ought to have the same ideas about such things, oh, Virginia, I have asked you so many times to marry me. You always put me off. This time, please don't evade me. Will you marry me?"

At that instant a distant rumble caught Virginia's attention, and Jack was forced to repeat [illegible]: "Dear, will you marry [illegible]

"Yes," murmured Vi[illegible]sent-minded way as the train swept round the curve. In answer to the hoisted signal, it slowed down and stopped.

Aboard the train Virginia and Jack who wanted nothing so much as a chance to take up the conversation where it had been interrupted, found the surprise of their life. As they walked through the coaches in search of a seat, they saw, unmistakably, Marion Kendall and the man she was going to marry!

And at that, Marion was the most unruffled of them all. "Are you eloping, too?" she asked.

"Eloping!" cried Virginia. "Certainly not. But—are you?"

Marion nodded.

"But your mother and all the guests and the minister!" gasped Virginia.

"Oh, that's all right," said Marion airily. "I fixed that up a long while ago with Stuart Cushing, the man Peg wants to marry, you know. Mother would do anything rather than let the whole affair fall through, so I told Stuart to have his license ready; and when mother found my note to suggest that he and Peggy take our places."

Virginia and Jack left the eloping couple and found seats in a forward car.

"It's really impossible to be angry with Marion," said Virginia, "but I do think she might have taken her maid of honor into her confidence!"

"Forget about them!" commanded Jack masterfully. "And remember that just as the train pulled in you told me you would marry me? You must keep to your bargain!"

"Did I really say 'yes?'" asked Virginia so innocently that Jack was almost misled. Then he caught the expression of her eyes.

"My darling little girl," he said tenderly. "I always knew that if I could have you an hour to myself I could persuade you to accept me, even absent-mindedly!"

"Perhaps it wasn't as absent-minded as you think!" murmured Virginia whereat Jack, delighted, surreptitiously kissed her.

CAMERA OF IMMENSE SIZE

Chicagoan Has One Three Times Bigger Than Any Other Known to Be in Existence.

A camera that is thought to be three times as large as any other in the world is that owned by a scientist in Chicago. With it several noted pictures have been taken, including bird's-eye views of factories and towns. It is also used for enlarging purposes.

The body of this giant camera is 9 feet 4 inches wide, 6 feet high, and 20 feet long when fully extended, and in its construction over thirty gallons of glue were used. The lens is 12 inches in diameter and cost $1,500. All moving parts, including the curtain slide, run on roller bearings. The focusing is accomplished by two panels of glass, which can be moved to all parts of the field. The plateholder weighs nearly 500 pounds when loaded and is put into the camera by means of a derrick. Great care is used in loading, as a broken plate would result in a loss of $150. The plates are made of plate glass 8 feet long by 4 feet 8 inches wide, and weigh over 200 pounds.

In order to dust the plates a man enters the camera through the opening in the front. A piece of ruby glass is then placed over the lens and the slide in the plateholder is withdrawn. After the plate has been dusted the slide is replaced and the man steps out.

In making enlargements the focusing is done from the inside and the operator remains in the camera during the exposure. In this process the entire apparatus is supported by springs, which absorb any possible vibration.

Ordeal by Solitude.

Shallow people are incapable of solitude. To the empty head solitude is a desert, terribly infested with the hyenas of loneliness and boredom. To the thoughtful, solitude is a spiritual necessity as imperious as the physical necessity of food. "The greatest events are not our noisiest but our stillest hours . . . . Open still remaineth a free life for great souls . . . . Empty are still many sites for lone ones and twain ones, around which floateth the odor of tranquil seas."—Boston Globe.

SEE ADVANTAGES IN CO-OPERATION

Most Effective Organizations Found Where Farmers Were Drawn Together.

MANY OBSTACLES OVERCOME

That Principles Are Fundamentally Sound and Practical Is Proven by 14,000 or More Successful Societies Now Working.

The success or failure of a farm depends almost entirely upon the results obtained in marketing the products grown. Experience has proved that the farmer who undertakes to market his products through speculators, or who attempts to ship and market them in some very distant market is laboring under a great disadvantage.

Marketing is a specialized function and is [illegible] serious problem confron[illegible] today, and the rank an[illegible] farmers are not equipped to [illegible]rm this service for themselves in a satisfactory manner. Many difficulties encountered in marketing farm crops have been overcome through the organization and operation of farmers' co-operative marketing associations. Co-operative marketing has passed the experimental stage, and the 14,000 or more examples of successful organizations in operation in this country offer positive proof that the principles of co-operative marketing are fundamentally sound and practical.

Work of Organization.

The most successful co-operative organizations confine their efforts to the shipping and marketing of certain specialized products, such as citrus fruits, apples, peaches, potatoes, melons, poultry and eggs, dairy products, live stock, tobacco and grains. The substantial growth of co-operative marketing activities in this country is perhaps best illustrated by the fact that the aggregate volume of business done in a single year through co-operative associations and exchanges runs up into the hundreds of millions of dollars.

The handling of farm crops by groups of farmers through central associations and exchanges offers many advantages, such as the improvement and standardization of grading and packing; the obtaining and use of reliable crop and market information; the intelligent development of permanent markets; the effecting of savings through the collective sale of farm products and purchase of farm supplies; the proper financing of all activities, including the building of warehouses, the preparation of crops for market, and their movement to the markets; and the employment of trained and efficient business and sales management.

A Co-operative Curb Market in Full Operation.

An organization founded on dire need with a well-defined purpose has the best chances of success. Farmers who are satisfied with the results obtained without an organization do not feel a need for an association. Necessity for an organization may arise from the lack of marketing facilities, or from dissatisfaction with existing agencies. When a co-operative marketing association is under consideration it is advisable to have a preliminary survey made by competent local people or by experienced co-operative organization specialists from the United States Department of Agriculture, whose advice and services are available upon request. In making such a survey care should be taken to ascertain the need for an organization, the attitude of the farmers toward such an undertaking, and the approximate development of business available.

OVERCOME CHESTNUT BLIGHT

Hybrid Trees Are Quite Resistant to Disease and Produce Nuts of Good Flavor.

Chestnut orchards which have been practically annihilated by a blight of Japanese origin may be restored through efforts of the United States Department of Agriculture. Ten years' experimentation has shown that it is possible to cross the chinquapin, a dwarf chestnut, with the Japanese chestnut, which is blight resistant, and that the hybrid trees thus produced are quite resistant to the disease and yield nuts of good flavor and quality.

Winning Honors in Stock Judging Contest.

small part of the far-reaching contest which, beginning in the local boys' and girls' clubs in many hundreds of communities, progressed to the contests for county supremacy, and then to the state championships, many of which were finally settled at the various state fairs. These state champion teams were the ones sent to compete for national honors at the dairy show.

In the contest last year only six individuals were entered, from as many states, while this year 15 states were represented with teams of three each. These 45 contestants were the guests of the National Dairy association for five days, and were taken by the association on a tour of the packing and machinery plants, and on automobile tours of the city. On the day following the contest they participated in a banquet, where the awards were presented by representatives of the various donors.

VERMIN CARRY HOG DISEASES

Lousy Animal Will Consume More Feed Than Clean One, According to Many Experiments.

A hog affected with lice can't make as profitable use of his feed as one that is free from this pest. No successful hog man will dispute this statement; yet, judging from the condition of some farmers' hogs, it is doubtful whether all realize that it really costs money to feed lice. However, feeding experiments have been conducted from time to time which show plainly that a lousy hog consumes more feed per pound of gain than a clean hog. This loss of feed, however, is not the only reason for keeping hogs free from lice. Lice are also disease carriers. They will carry infection from one hog to another and that, perhaps, is as strong a reason for holding lice in check as any other.

Don't Just Wish for a Home

DREADING the responsibility of home building, yet anxious for a real home! Is that your predicament? It is with many persons. But still they pay pay out rent—month after month—and at the end of the year have nothing to show for their money.

Fancied building troubles need not delay you longer. Our system of consultations and series of floor plans and helps for home builders eliminates them. They are absolutely FREE. In addition we will be delighted to give you detailed estimates so that you may know exactly what a home will cost before a single nail is driv[illegible] Write or phone

Daniel Vaughan was in Thief River Falls Saturday.

Miss Kathleen Lang spent Sunday in Theif River Falls.

Mrs. C. E. Ronken went to Thief River Falls yesterday.

Miss Lottie Simonson went to Thief River Falls Wednesday.

Elef Aakre made a business visit to the county seat Saturday.

Peter Wold returned Friday from a visit to Thief Riqer Falls.

Anton Lien made a business trip to Thief River Falls Monday.

Mrs. B. Habedank came up from Thief River Falls last night.

Adolph Johnson of Crookston is visiting his brother, George Johnson.

Wm. O. Gaylord was in Thief River Falls last Friday and Saturday.

Mrs. George Johnson left Saturday for a visit with friends at Holt.

Miss Ruby Jensen spent the week end with friends in Thief River Falls.

Carl Christianson was a business visitor at the county seat on Tuesday.

Carl Edseth went to the county seat Monday to attend court as a juryman.

Miss Eleanor Bauer spent the week end with friends at Thief River Falls.

Mrs. N. Bundhund accompanied her daughter Martha to Thief River Falls Saturday.

Emery Kately was looking after business matters at the county seat on Thursday.

Karl Korstad, the Highlanding merchant, went to Thief River Falls on Wednesday.

Miss Ruby Jensen has taken the position of bookkeeper at the Goodridge State bank.

Palmer Tvedt attended a meeting of the Elks's lodge at Thief River Falls last Friday.

Victor McLeod received word Wednesday from Antwerp, N. Y., that his baby girl is seriously ill.

Miss Gladys Wilson returned from a visit home and began her duties at the Farmers bank Monday.

Miss Agnes Vaughan entertained the High school class at her home south town last Friday evening.

N. H. Dahl went Wednesday night to the Cities to attend the auto show and look after business matters.

D. A. Danielson, manager of the creamery, was attending to business matters at Thief River Falls Saturday.

The stockholders of the telephone company will hold their annual meeting in the Goodridge hall next Monday, February 14.

Misses Mabel Txeten, Gretla Gulrud and Hilda Christianson were entertained at a supper party at the N. Urdahl home Thursday evening.

Stuart McLeod arrived home Saturday to take a short lay off and attend the Crookston stock show, where he is exhibiting his blooded sire, "King."

Supt. Gunderson and Miss Knutson the county nurse, were in town Friday. They were visiting schools near Kratka and Highlanding and examining pupils.

Miss Sena Christianson went to Minneapolis Tuesday to receive medical treatment. She was accompanied as far as Thief River Falls by Miss Hilda.

Mrs. Anderson and daughter Hazel, who have been visiting with friends in this vicinity for the past two weeks, returned Monday to their home at Duluth.

Martha Bundhund returned from Thief River Falls Tuesday, where she had been in the hospital since Saturday, when she had adenoids and her tonsils removed.

Word was received yesterday by the friends of Albert Johnson, who is ill in the hospital at Thief River Falls following an operation for appendicitis, that his condition is serious.

Miss Dorothy Blakkestad went to Thief River this morning to have an arm treated. She accidentally got a prick from a pen point and serious blood poisoning is threatened.

We have omitted to mention the Strathcona Star, a new venture by Otto H. Pauson, formerly of Oklee. The Star is a well edited and nicely printed paper and will be a credit to its town.

K. O. Sundal of Thief River Falls was in town Tuesday night and looked over the storage batteries at the electric light plant. He found nothing wrong with them except that they need brushing up and more acid put into some of them.

G. A. Aubol, deputy collector, who was to have been in Thief River Falls on February 28 for the purpose of holding income tax meetings, has sent word that he will be unable to be there during February, but will hold meetings on March 1, 2, 3, 4 and 5.

Big Gain in Creamery Business

The stockholders of the creamery association held their annual meeting last Friday afternoon.

The reports of the secretary and treasurer showed an increase in butter manufactured the past year over the previous year of over 16,000 pounds, an increase in amount of business of about $6,000. This, notwithstanding the fact that the creamery was in operation but ten months this year.

The following officers were elected: President, T. J. Helle; vice president, Morgan Vaughan; secretary, Stuart McLeod; treasurer, N. Bundhund.

D. A. Danielson was re-engaged as buttermaker, at a salary of $150 per month.

It was voted to adopt the system of settling for cream twice in each month and to cut out the daily cash payments.

Leonard Houske, the state creamery inspector, was in attendance.

School Notes

Appropriate Lincoln day exercises will be given by the pupils on Friday morning.

Monday will be Valentine day in school and the little folks who have been busy making valentines look forward to the time of distribution with much interest.

The pupils receiving an average of 90 per cent or more for each month will be placed on the Honor roll. For this month we have the following: Kathleen ng 96, Hazel Hakes 94, Grace Day 4, Christina Bundhund 92, Roy Olson 2, Daniel Stein 92, Edith Scheie 90, aynrrd Halvorson 90.

In order to reduce the danger in play the very popular game of sheeny has been modified into hockey.

A skantig pond is under construction on the school grounds and the youngsters ure very much enthused and have already made plans as to how much time they shall devote for skating.

Miss Knutson, the county nurse, visited school on Wednesday on special business.

A Change Next Year

At the last meeting of the board of education it was announced that Prof. Norby would decline a re-election as principal of our schools, he having other plans. In the discussion that ensued it seemed to be the general opinion that the position should be tendered to Mr John Nystul, the present assistant principal.

Mr. Norby came to this school when it had been made almost nothing by incompetent management. He has placed it on its feet, so to speak, and made it a school for any community to be proud of. But of course if he has better prospects we can not hold him.

Mr. Nystul is a bright young man, a graduate of Concordia college, and apparently fully competent to take Mr. Norby's place. In the short time he has been with us he has won the confidence and esteem of both parents and pupils. It is to be hoped that if Mr. Norby insists on leaving us at the end of the year, Mr. Nystul takes the position.

DIED

Mrs. Gunhild Sand died Saturday, February 5, of rheumatism of the heart.

Gunhild Olsdatter was born at Vabraaten, Valdres, Norway, in 1843, and hence was 78 years of age at time of death. She was married in Norway to Ole Anderson Sandirken, or Sand as he is called here, and with her husband came to America in 1982. They resided at Mishicot, Wis., then removed to Canby, Minn. After a residence there of 8 years, they removed to a homestead near Goodridge in 1912 and have made their home here. The deceased has been a sufferer from rheumatism for several years end much of the time has been confined to her bed. She is survived by her husband and three sons, Oscar, Andrew and Henry.

Services were held at the house at 1:30 and at the Lutheran church at 2 o'clock in the afternoon of Tuesday by Rev. G. A. Hanson, and the remains were taken to Canby for interment, accompanied by Andrew and Henry Sand. The cemetery is located on the old home farm, and there Mrs. Sand had always desired to be laid to rest.

Guernseys Take Many Prizes

Stuart McLeod returned Wednesday from Crookston. He exhibited several of his blooded Guernsey cattle at the stock show held there last week and won a number of prizes, as did also F. B. Conklin, Mrs. H. C. Woolson and Albert Johnson. Following are the prizes won by Mr. McLeod:

Bull, senior yearling, "King," 1st prize.

Heifers, junior calf, 3rd prize and 4th prize.

Produce of cow, 3rd prize.

Best bull, any age, 1st prize.

Best female, any age, 1st prize and 2nd prize.

Best young herd.

Besides these was the county herd, shown by F. B. Conklin, Stuart McLeod and Mrs. H. C. Conklin, winning 1st prize.

There were between five and six thousand people in attendance at the shows and cattle on exhibition and for sale from all parts of the country.

Farm Bureau Drive

The Pennington county farm bureau resumed activities this week in the membership drive which was started before the holidays and then discontinued for the time being.

A. R. Carlson of Warren, R. J. McKercher of St. Hilaire and Stuart McLeod of this place will carry on the drive. It will be continued until every farmer in the county has been solicited and given an opportunity to become a member. There are at present 523 members, counting the new members that were added this winter.

The organization of townships will also be taken up by the solicitors and this end of the work will be pushed with considerable activity in an attempt to make Pennington county one of the best organized in the country. At the present time there are only four townships out of the twenty-one solicited these four to be organized at a late date.

Breeding Pen for Farm Flock

All conditions indicate that poultry keeping will continue to be a profitable industry in 1921. The rare combination of high priced eggs and low priced feed has served to focus general attention on the business of producing eggs and poultry products for the market.

One's chances of success with poultry are greatly increased by a careful selection of a breeding pen for the farm flock. Several points should be considered, namely: The number of birds required; mature, healthy, high producing, standard qualities for breed and variety; time of mating; proper feeding for fertility, and comfortable housing and yardage.

The size of the pen will depend on the number of eggs desired during the hatching season. Four or five hatching eggs a day per bird and a limit of 7 to 10 days for strong "hatchability" will indicate the number required.

The breeders should have been high producers during their pullet year, late molters, of good body capacity and with large combs and wattles.

If possible, all breeders should be of standard shape, size, weight and color for the breed and variety. "Like begets like." As increased production is transmitted through the sire in a preponderating degree, a male should always be from a high producing strain or family and not too closely related to any of the hens. The earlier the mating the better.

A satisfactory ration is a scratch feed of equal parts of corn, wheat and oats in deep litter morning and night, feeding about a quart a day to a pen of 10 to 15 birds. Egg mash composed of equal parts of cornmeal, bran, shorts and finely ground oats should be supplied in a hopper. Buttermilk or skim milk should supply the protein rather than beef scraps at this time. Water, grit, oyster shells, charcoal and grain feed must be supplied.

The lack of comfortable housing and yardage is the common reason given for having no breeding pen. A part of the poultry house may be partitioned off with wire or lumber and used for this purpose. A yard can be cheaply made for a moderate sized flock. If the breeding flock is large, it may share the free range with the laying flock, confining each on alternate days.

Let Them Kick

Minnesota residents who journeyed to California to spend the winter are reported to be kicking themselves for spending their railroad fare, etc., to ge[illegible] while we here in [illegible] been enjoying a real mild winter [illegible] kind that one enjoys being out [illegible] every day.

Free Seeds?

The Department of Agriculture has asked for an appropriation of $239,000 for the distribution of free seeds to the friends of the members of the house and senate. The appropriations committee failed to make any provision for the purchase of the seeds, but the house not only provided for the allowance asked, but increased it 50 per cent, making an appropriation of $360,000. It is to be hoped that the senate will see fit to cut out the appropriation, thus saving the taxpayers a few paltry dollars. The free seed proposition has been one of the biggest fakes that was ever pulled across the eyes of the public in years gone by. Very few of the seeds which have been sent out in the past were ever planted and those that were probably never grew, as they were not suited for the climate to which they were sent.—Red Lake Falls Gazette.

MYSTERIOUS BODY OF WATER

A[illegible] of Queer Beliefs Cluster Around What Is Known as Wonder Lake, in Alaska.

[illegible] was Wonder lake," says [illegible] writing of "A Hike [illegible] in [illegible]." "It is not [illegible] fabulous [illegible] of water. [illegible] larger [illegible] any other Alaska [illegible] some three miles long [illegible]. It lies [illegible] its surface about three [illegible] hundred feet above the level [illegible] evidently [illegible] glacial action some where back in the dim ages they [illegible]. You [illegible] even now, the evidences of the glacial moraines [illegible] plow, these glaciers.

"Now, here are the things they tell of that lake. One, that it has fish so large that a specimen that a man hooked pulled him out of the boat into the lake. If that isn't a good fish story, then you try to go me one better. Other stories that I think are well authenticated are these: That in winter, [illegible] the ice [illegible] heard a rumbling, [illegible]. So much so that, [illegible] to travel it, [illegible]

[illegible] Wage.

[illegible]

We should ask questions of our books and of ourselves; what is its purpose; by what means it proceeds to effect that purpose; whether we fully understand the one, and go along with the other? Do the arguments satisfy us; do the descriptions convey lively and distinct images to us; do we understand all the allusions to persons or things? In short, does our mind act over again from the writer's guidance what his acted before; do we reason as he reasoned, conceive as he conceived; think and feel as he thought and felt; or, if not, can we discern where and how far we do not, and can we tell why we do not?—Dr. Thomas Arnold.

GIVE GAS ENGINE ATTENTION

Vibration Tends to Loosen Bolts, Nuts and Various Connections Which Need Tightening.

All screws and nuts on gas engines should be kept tight. The engine should be gone over every day or so when it is used, and all connections tightened and all oil and dirt wiped off. Such practice will go far toward preventing operating troubles, since all gas engines vibrate to some extent and this vibration tends to loosen bolts, nuts and other parts.

WM. S. BATTIS

Mr. Battis has been one of the most popular artists on the American platform for twenty years. He has given practically his whole professional career to the interpretation of the characters of Charles Dickens' novels. The entertainment is educational, full of humor, and holds attention every second through its great dramatic appeal.

Mr. Battis is not an impersonator of the ordinary type. He makes his characters live. They step right out of the books and talk to you.

Essay Contest

A number of the schools of the county have taken part in the essay contest sponsored by the Goodridge State bank and are very much interested in the decision of the judges, which is to be made public on Washington's birthday, February 22.

The essays are based on G. Sheridan Knowles' painting, "The Peace Conference," a reproduction of which forms the 1921 calendar of the Goodridge State bank. A copy of this picture was placed in every school in the county and an opportunity was given all the grade pupils to take part in an essay contest. Three prizes of $15, $10 and $5 in gold will be awarded to the writers of the three best papers.

ANT LION TRAPS HIS PREY

Remarkable Ingenuity Displayed by Small Creature in Securing Food Especially Favored.

One of the most crafty of insects is the ant lion larva. This tiny creature dotes on ants of all sizes and species, and as it is not swift of movement it must trap its victims. It does this by making a cone-shaped pit in the sand. These pits are about an inch deep and two inches across. When it is complete the ant lion buries itself in the very center, with only its head and strong-curved mandibles in sight. It then patiently awaits the [illegible] ants. Ants are Paul Prys, and have a tremendous curiosity. The little depression attracts their attention, [illegible] they come to its edge and peer into it.

The larva at once starts into a fury [illegible]. It begins a digging operation and at the same time hurls grains [illegible] in all directions. The sand [illegible] to roll down the [illegible] and carries with it other [illegible] until a miniature [illegible]. The curious ant is caught [illegible] and goes tumbling down [illegible] where the hard, sharp [illegible] the lion seize it, and the [illegible] is shaken back and forth [illegible], whereupon the lion [illegible] empty husk of body outside the [illegible] once the meal is over.

"Skin Plasters."

The term "skin-plaster" as applied to Civil-war currency is originally said to have been applied to the depreciated Continental currency. During the war people resorted to postage stamps and private notes; the latter, representing 10, 25 and 50 cents, were of little value beyond the particular locality where they were issued, except as "plasters for broken shins," hence their name "skin-plasters."

Earrings Ancient Ornaments.

The custom of wearing earrings comes down to us from the most ancient times, and no custom is more prevalent or more universal. The earliest mention of earrings is found in the book of Genesis. Many people have been struck by the mention in the authorized version of the Bible of the fact that only one earring was brought as a present for Rebekah, when Abraham's servant was seeking a wife for Isaac. This is a mistake, for the word means a "nose-ring," and has been rendered correctly in the revised version. It is, however, in Genesis 31:4, that the first mention is made of earrings: "And they gave unto Jacob all the strange gods which were in their hands, and the rings which were in their ears."

[illegible]

Cluster[illegible] Pre[illegible]

Round [illegible], Calif., is a region [illegible] forest [illegible] what is [illegible] Monterey pine. J. [illegible] in St. Nicholas, tells of a curious phenomenon observed while walking under the trees:

"Gazing up amid the branches, I noticed what looked like a number of large clusters of dull brown, dead leaves, which apparently had lodged by chance here and there among the twigs. As the clouds parted and the warm sunlight struck the tree I was gazing at two or three leaves detached themselves from a cluster and turned into large red butterflies. Faster and faster the cluster dissolved, until in ten seconds there were, perhaps, 200 or 300 butterflies flitting about. By that time another cluster, bursting like some lovely kind of bomb, and tree after tree adding to its quota, dissolving into a red cloud of butterflies, so that in a minute or two I was standing bewildered in a veritable 'snowstorm' of the charming creatures. How many there may have been in view at one time I am afraid to guess—certainly 10,000, possibly several times as many; so many, anyway, that a distinct murmur of sound came from the softly flickering wings. Gradually [illegible] them dispersed through the neighboring forest; but all day the grove was like a fairy convocation, with hundreds of thousands going to and fro or loitering about the flowering shrubs and herbage, while the sunlit sides of the pine trunks and branches often were so reddened with basking butterflies that at a little distance the trees looked as if they had been painted."

LITTLE TIME NEEDED TO KEEP LABOR DATA

Records Often Are Means of Saving Working Costs.

Farmer Enabled to Determine Number of Days of Man and Horse Power Necessary to Produce an Acre of Any Crop.

A record kept of farm labor does not require much time, yet it is often the means of saving labor costs. The labor records show just how much labor and team work is required on each crop and the time in the season when it is used. They should show what proportion of the labor is devoted to work that produces an income and the amount that is consumed on odd jobs of unproductive tasks. This will enable the farmer to determine the number of days of man and horse labor necessary to produce an acre of any crop, or the care of any class of animals for a year, says the United States Department of Agriculture. Thus he may be able to rearrange his system of management so that he can get along with less labor and at the same time maintain production.

A year's labor records show also just how much man power and horse power is necessary to run the entire farm at different seasons, and point out accurately just when the rush seasons occur. With such records before him, the farmer knows approximately what his labor requirements will be in advance of the rush season. He is able to increase or decrease the different farm enterprises and fit them together until he has outlined a complete year's work with an even load of labor for the entire season.

Moon and Mountain

By RUBY DOUGLAS

(© 1921, by McClure Newspaper Syndicate.)

Helen Morrison had come to the Berkshires as traveling companion to an elderly and very wealthy invalid who took the trip each autumn as regularly as she tore off the September sheet from the calendar.

Inasmuch as Helen was eighteen and her employer was eighty, the young girl found herself, at most times, desperately lonely. The chauffeur who drove the big limousine in which they traveled day after day along some of the most wonderfully lovely roads Helen had ever dreamed of, was as nearly a machine as the motor he was running.

He spoke of nothing but speeds and spark plugs, batteries and bearings. Helen was sure it was a carbureter that kept his body and soul joined together during this earthly span. And [illegible] could even a desperately lonely [illegible] with a man so mechanically inclined?

"Oh," she wrote home, "to be in this gloriously romantic country, in these moonlit mountain paths without so much as a human being to talk with! One of my companions is eighty and dozing continually. The other is a machine guiding according to a speedometer. I'm afraid if I had an even ordinarily attractive male person anywhere near me I should forget that I had such a thing as a brake!"

The party stopped for the night in a mountain town that lay in a beautiful valley with hills climbing up on every side and a river flowing between the two states. Helen's employer retired after she had partaken

George Stopped the Car.

of the simple country supper the hotel offered. Helen, lonely, homesick, wandered to the veranda just in time to see the chauffeur starting out for the garage to put up the car for the night.

"Hawkins," she called, almost without thinking what she was about to do, "where are you going?"

"To put up the car, Miss Morrison. Do you want something?"

"N—no. That is, I think, I'll go with you, just by way of diversion. Madam is asleep and will not need me." Helen stepped inside the big car and the astonished chauffeur closed the door and took his seat.

"I'll walk home alone, Hawkins," she said when the man opened the door for her again after they had reached the inside of the big garage, where there seemed to be many touring cars put up for the night.

"You know the way, Miss?" Hawkins asked.

Helen was sure that she did, and with a short good night she found her way out to the street.

As she was leaving the garage a car bearing an Iowa license was about to enter. Helen stopped short and looked the driver squarely in the eyes.

"George!" she cried. "George Taylor!"

The young fellow stopped his car and jumped out to grasp Helen's two hands.

"Helen, however in this world did you happen to be here—in Brattleboro, Vt.?"

"I have a job—I'm traveling companion to rich Mrs. Easely—don't you remember her?"

"I can't remember anything—anyone—but you, Helen, at this moment," the young man announced very firmly. "Won't you come out for a drive and tell me all about it?"

"But—but you were putting up your car, weren't you?" asked Helen. "I was, yes. But my family has gone to roost and I didn't want to drive alone. Will you come?"

Helen demurred for a moment, and then, after returning to the garage to leave a message with Hawkins, who did not seem to listen to her, since he was absorbed in the explanation of the [illegible] of a carbon remover, she decided [illegible].

George Taylor had made this trip [illegible] more than once with his people, and was surprisingly familiar with the beautiful mountain roads about Brattleboro. He and Helen explained to each other in the course of an hour just how they happened to find themselves so far apart during the summer. There had been another girl at college, and there had been another man at home, and they had missed each other more than either of them had realized till Helen's eyes caught sight of the familiar home-town automobile license.

"We are going on to Williamstown, and then round about and back by the Mohawk Trail, George," Helen was saying when George stopped the car beside an exquisitely moonlit view of mountain and river.

He turned squarely toward her, now that he was relieved of the responsibility of guiding the car. "You were saying——"

"Oh, George, weren't you listening?" Helen asked, a little confused by his direct gaze and constantly increasing nearness.

"I cannot hear for the beating of my own heart, dear. And what is more, I don't intend to listen to anything but one sentence—do you love me?"

Helen did not answer. He put his arm about her shoulders and lifted her face so that the moon shone full into her eyes. "Tell me, Helen. I cannot wait any longer. I must know. I have been seeing your face in all the mountains, in all the pools, in all the skies, day and night."

"I—I don't like to tell you—way up here so—so far from home, George. It is so strange."

"Love is strange, dear. Do you love me?"

Helen nodded. "Yes—I'm afraid I do. I suspect that was why I was so desperately lonely in all this wonderfully romantic country—because I was longing for you to—to love me."

After a while the car with the Iowa license found its way back to the garage guided by hands that trembled with emotion. And in more than one [illegible] own, during the remainder of the trip through the mountains, the two [illegible] managed to find themselves [illegible] the same hotels. Neither [illegible] little companion lonely; [illegible] care if the chauffeur [illegible] of cord tires and cylinder oils, [illegible] had promised to marry George Taylor at the end of the journey.

CHEERFULNESS AT THE TABLE

Last Place in the World Where There Should Be Bickerings or Long Faces.

A cheerful company at table raises your spirits, animates you and puts you into a more favorable physical condition. Also, I agree with the theory that pleasant subjects only should be discussed at meal. If father sits down to dinner with a hard-luck story of bills that are heavy and a purse that is light, of business acquaintances that fail to keep their appointments, of the lowering financial sky, and he doesn't "know what we're coming to, really" that dinner is pretty well spoiled for mother, at least, and what she does take fails to nourish her.

I have wondered if the gayety of their company did not help the people of the Middle ages to survive the horrible messes they used to eat. At the castle everybody sat down to table at once. At the head sat my lord and my lady, their family and noble guests, eating off gold and silver plates. Further down were folk who happened to stop in for the night, perhaps a wandering monk or two, pilgrims, young men in search of adventure, and lower down the servants and retainers. They took their own good time at table with stories, songs and gay laughter, interspersed by tinkling music from the harpist, who warmed himself meanwhile at the huge fireplace. And they enjoyed such dishes as pork and hens ground to powder, boiled with eggs and bread crumbs, ginger, sugar, salt and saffron!—Marion Holmes in Chicago Daily News.

Delaware's Nicknames.

During the American Revolution, the commander of a brigade in Delaware was a veteran cock-fighter, who always bet on "the blue hen's chickens." Thence the name came to be applied to the members of his brigade, and finally to the state itself. Delaware has also been nicknamed "the Diamond state," as being small and precious.

THE GOO[illegible]

Guernseys Take Many Prizes

Stuart McLeod returned Wednesday from Crookston. He exhibited several of his blooded Guernsey cattle at the stock show held there last week and won a number of prizes, as did also F. B. Conklin, Mrs. H. C. Woolson and Albert Johnson. Following are the prizes won by Mr. McLeod:

Bull, senior yearling, "King," 1st prize.

Heifers, junior calf, 3rd prize and 4th prize.

Produce of cow, 3rd prize.

Best bull, any age, 1st prize.

Best female, any age, 1st prize and 2nd prize.

Best young herd.

Besides these was the county herd, shown by F. B. Conklin, Stuart McLeod and Mrs. H. C. Conklin, winning 1st prize.

There were between five and six thousand people in attendance at the shows and cattle on exhibition and for sale from all parts of the country.

Farm Bureau Drive

The Pennington county farm bureau resumed activities this week in the membership drive which was started before the holidays and then discontinued for the time being.

A. R. Carlson of Warren, R. J. McKercher of St. Hilaire and Stuart McLeod of this place will carry on the drive. It will be continued until every farmer in the county has been solicited and given an opportunity to become a member. There are at present 52[illegible] members, counting the new members that were added this winter.

The organization of townships will also be taken up by the solicitors and this end of the work will be pushed with considerable activity in an attempt to make Pennington county one of the best organized in the country. At the present time there are only four townships out of the twenty-one solicited, these four to be organized at a late date.

Breeding Pen for Farm Flock

All conditions indicate that poultry keeping will continue to be a profitable industry in 1921. The rare combination of high priced eggs and low priced feed has served to focus general attention on the business of producing eggs and poultry products for the market.

One's chances of success with poultry are greatly increased by a careful selection of a breeding pen for the farm flock. Several points should be considered, namely: The number of birds required; mature, healthy, high producing standard qualities for breed and variety; time of mating; proper feeding for fertility, and comfortable housing and yardage.

The size of the pen will depend on the number of eggs desired during the hatching season. Four or five hatching eggs a day per bird and a limit of 7 to 10 days for strong "hatchability" will indicate the number required.

The breeders should have been high producers during their pullet year, late molters, of good body capacity and with large combs and wattles.

If possible, all breeders should be of standard shape, size, weight and color for the breed and variety. "Like begets like." As increased production is transmitted through the sire in a preponderating degree, a male should always be from a high producing strain or family and not too closely related to any of the hens. The earlier the mating the better.

A satisfactory ration is a scratch feed of equal parts of corn, wheat and oats in deep litter morning and night, feeding about a quart a day to a pen of 10 to 15 birds. Egg mash composed of equal parts of cornmeal, bran, shorts and finely ground oats should be supplied in a hopper. Buttermilk or skim milk should supply the protein rather than beef scraps at this time. Water, grit, oyster shells, charcoal and grain feed must be supplied.

The lack of comfortable housing and yardage is the common reason given for having no breeding pen. A part of the poultry house may be partitioned off with wire or lumber and used for this purpose. A yard can be cheaply made for a moderate sized flock. If the breeding flock is large, it may share the free range with the laying flock, confining each on alternate days.

Let Them Kick

Minnesota residents who journeyed to California to spend the winter are reported to be kicking themselves for spending their railroad fare, etc., to get [illegible] the [illegible] purposes, while we here in Minnesota have been enjoying a real mild winter, the kind that one enjoys being out-of-doors every day.

Free Seeds?

The Department of Agriculture has asked for an appropriation of $239,000 for the distribution of free seeds to the friends of the members of the house and senate. The appropriations committee failed to make any provision for the purchase of the seeds, but the house not only provided for the allowance asked, but increased it 50 per cent, making an appropriation of $360,000. It is to be hoped that the senate will see fit to cut out the appropriation, thus saving the taxpayers a few paltry dollars. The free seed proposition has been one of the biggest fakes that was ever pulled across the eyes of the public in years gone by. Very few of the seeds which have been sent out in the past were ever planted and those that were probably never grew, as they were not suited for the climate to which they were sent.—Red Lake Falls Gazette.

MYSTERIOUS BODY OF WATER

All Sorts of Queer Beliefs Cluster Around What Is Known as Wonder Lake, in Alaska.

[illegible] the [illegible] called "Wonder lake," says [illegible], author of "A Hike [illegible]" in [illegible]. "It is not [illegible] sheet of water. No [illegible] as large as any other Alaskan [illegible] being some three miles long by [illegible] mile wide. It lies in a sort of depression, its surface about three or [illegible] hundred feet above the level of [illegible] creek. [illegible] evidently scooped out by glacial action some where back in those dim ages they tell us about. You can see, even now, the evidences of the glacial moraines. Somehow, these glaciers [illegible]

"Now, here are the things they tell of that lake. One, that it has fish so large that a specimen that a man hooked pulled him out of the boat into the lake. If that isn't a good fish story, then you try to go me one better. Other stories that I think are well authenticated are these: That in winter, under the ice is heard a rumbling, crashing sound. So much so that, although [illegible] trail lies [illegible] across [illegible] refuse to travel it. [illegible]

[illegible] Wage.

The use of [illegible] making has [illegible] into being [illegible] for Chaucer mentions it [illegible] turned on the first. [illegible] began to appear in England, and apprentices were taught the art of making felts and decorations. Nine cents a day was then [illegible] wage.

In the Sixteenth century the first [illegible] stores began to do business, and hats, heretofore [illegible] decorations [illegible] poetic fancy, began to be standardized. In [illegible] style began to rule. By 1700 styles were very changeable. [illegible] peak of varied types of hat the [illegible] worn.

Our Books and Ourselves.

We should ask questions of our books and of ourselves; what is its purpose, by what means it proceeds to effect that purpose; whether we fully understand the one, and go along with the other? Do the arguments satisfy us; do the descriptions convey lively and distinct images to us; do we understand all the allusions to persons or things? In short, does our mind act over again from the writer's guidance what his acted before; do we reason as he reasoned, conceive as he conceived; think and feel as he thought and felt; or, if not, can we discern where and how far we do not, and can we tell why we do not?—Dr. Thomas Arnold.

GIVE GAS ENGINE ATTENTION

Vibration Tends to Loosen Bolts, Nuts and Various Connections Which Need Tightening.

All screws and nuts on gas engines should be kept tight. The engine should be gone over every day or so when it is used, and all connections tightened and all oil and dirt wiped off. Such practice will go far toward preventing operating troubles, since all gas engines vibrate to some extent and this vibration tends to loosen bolts, nuts and other parts.

WM. S. BATTIS

Mr. Battis has been one of the most popular artists on the American platform for twenty years. He has given practically his whole professional career to the interpretation of the characters of Charles Dickens' novels. The entertainment is educational, full of humor, and holds attention every second through its great dramatic appeal.

Mr. Battis is not an impersonator of the ordinary type. He makes his characters live. They step right out of the books and talk to you.

Essay Contest

A number of the schools of the county have taken part in the essay contest sponsored by the Goodridge State bank and are very much interested in the decision of the judges, which is to be made public on Washington's birthday, February 22.

The essays are based on G. Sheridan Knowles' painting, "The Peace Conference," a reproduction of which forms the 1921 calendar of the Goodridge State bank. A copy of this picture was placed in every school in the county and an opportunity was given all the grade pupils to take part in an essay contest. Three prizes of $15, $10 and $5 in gold will be awarded to the writers of the three best papers.

ANT LION TRAPS HIS PREY

Remarkable Ingenuity Displayed by Small Creature in Securing Food Especially Favored.

One of the most crafty of insects is the ant lion larva. This tiny creature dotes on ants of all sizes and species, and as it is not swift of movement it must trap its victims. It does this by making a cone-shaped pit in the sand. These pits are about an inch deep and two inches across. When it is complete the ant lion buries itself in the very center, with only its head and strong-curved mandibles in sight. It then patiently awaits the [illegible] ants. Ants are Paul Prys, and have a tremendous curiosity. The little depression attracts their attention, and they come to its edge and peer [illegible] into it.

The larva at once starts into a fury of action. It begins a digging operation and at the same time hurls grains of sand in all directions. The sand [illegible] begins to roll down the depression and carries with it other [illegible] until a miniature [illegible]. The curious ant is caught [illegible] and goes tumbling down to the center, where the hard, sharp mandibles of the lion seize it, and the [illegible] is shaken back and forth [illegible] is [illegible], whereupon the lion [illegible] with relish [illegible] the empty husk of body outside the [illegible] once the meal is over.

"Skin Plasters."

The term "skin-plaster" as applied to Civil-war currency is originally said to have been applied to the depreciated Continental currency. During the war people resorted to postage stamps and private notes; the latter, representing 10, 25 and 50 cents, were of little value beyond the particular locality where they were issued, except as "plasters for broken shins," hence their name "skin-plasters."

Earrings Ancient Ornaments.

The custom of wearing earrings comes down to us from the most ancient times, and no custom is more prevalent or more universal. The earliest mention of earrings is found in the book of Genesis. Many people have been struck by the mention in the authorized version of the Bible of the fact that only one earring was brought as a present for Rebekah when Abraham's servant was seeking a wife for Isaac. This is a mistake, for the word means a "nose-ring" and has been rendered correctly in the re[illegible]

[illegible]

Clusters [illegible] Pretty [illegible]

Round [illegible] Calif., is a region [illegible] forest of what is [illegible] Monterey pine. J. Smeaton [illegible] in St. Nicholas tells of a charming phenomenon observed while walking under the trees:

"Gazing up amid the branches, I noticed what looked like a number of large clusters of dull brown, dead leaves, which apparently had lodged by chance here and there among the twigs. As the clouds parted and the warm sunlight struck the tree I was gazing at two or three leaves detached themselves from a cluster and turned into large red butterflies. Faster and faster the cluster dissolved, until in ten seconds there were perhaps 200 or 300 butterflies flitting about. By that time another cluster, bursting like some lovely kind of bomb, and tree after tree adding to its quota, dissolving into a red cloud of butterflies, so that in a minute or two I was standing bewildered in a veritable 'snowstorm' of the charming creatures. How many there may have been in view at one time I am afraid to guess—certainly 10,000, possibly several times as many; so many, anyway, that a distinct murmur of sound came from the softly flickering wings. Gradually many of them dispersed through the neighboring forest; but all day the grove was like a fairy convocation, with hundreds of thousands going to and fro or loitering about the flowering shrubs and herbage, while the sunlit sides of the pine trunks and branches often were so reddened with basking butterflies that at a little distance the trees looked as if they had been painted."

LITTLE TIME NEEDED TO KEEP LABOR DATA

Records Often Are Means of Saving Working Costs.

Farmer Enabled to Determine Number of Days of Man and Horse Power Necessary to Produce an Acre of Any Crop.

A record kept of farm labor does not require much time, yet it is often the means of saving labor costs. The labor records show just how much labor and team work is required on each crop and the time in the season when it is used. They should show what proportion of the labor is devoted to work that produces an income and the amount that is consumed on odd jobs of unproductive tasks. This will enable the farmer to determine the number of days of man and horse labor necessary to produce an acre of any crop, or the care of any class of animals for a year, says the United States Department of Agriculture. Thus he may be able to rearrange his system of management so that he can get along with less labor and at the same time maintain production.

A year's labor records show also just how much man power and horse power is necessary to run the entire farm at different seasons, and point out accurately just when the rush seasons occur. With such records before him, the farmer knows approximately what his labor requirements will be in advance of the rush season. He [illegible]

By RUBY DOUGLAS

(©, 1921, by McClure Newspaper Syndicate.)

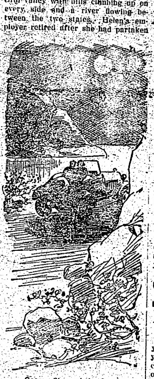
Helen Morrison had come to the Berkshires as traveling companion to an elderly and very wealthy invalid who took the trip each autumn as regularly as she tore off the September sheet from the calendar.

Inasmuch as Helen was eighteen and her employer was eighty, the young girl found herself, at most times, desperately lonely. The chauffeur who drove the big limousine in which they traveled day after day along some of the most wonderfully [illegible] roads Helen had ever dreamed of, was as nearly a machine as the motor he was running.

He spoke of nothing but speeds and spark plugs, batteries and bearings. Helen was sure it was a carburetor that kept his body and soul joined together during this earthly span. And [illegible] could even a desperately lonely [illegible] with a man so mechanically minded?

"Oh," she wrote home, "to be in this gloriously romantic country, in these moonlit mountain paths without so much as a human being to talk with! One of my companions is eighty and dozing continually. The other is a machine guiding according to a speedometer. I'm afraid if I had an even ordinarily attractive male person anywhere near me I should forget that I had such a thing as a brake."

The party stopped for the night in a mountain town that lay in a beautiful valley with hills climbing up on every side and a river flowing between the two states. Helen's employer retired after she had partaken of the simple country supper the hotel offered. Helen, lonely, homesick, wandered to the veranda just in time to see the chauffeur starting out for the garage to put up the car for the night.



George Stopped the Car.

"Hawkins," she called, almost without thinking what she was about to do, "where are you going?"

"To put up the car, Miss Morrison. Do you want something?"

"N—no. That is, I think I'll go with you, just by way of diversion. Madam is asleep and will not need me." Helen stepped inside the big car and the astonished chauffeur closed the door and took his seat.

"I'll walk home alone, Hawkins," she said when the man opened the door for her again after they had reached the inside of the big garage, where there seemed to be many touring cars put up for the night.

"You know the way, Miss?" Hawkins asked.

Helen was sure that she did, and with a short good night she found her way out to the street.

As she was leaving the garage a car bearing an Iowa license was about to enter. Helen stopped short and looked the driver squarely in the eyes.

"George!" she cried. "George Taylor!"

The young fellow stopped his car and jumped out to grasp Helen's two hands.

"Helen, however in this world did you happen to be here—in Brattleboro, Vt.?"

"I have a job—I'm traveling companion to rich Mrs. [illegible]

[illegible] George Taylor had made this trip [illegible] more than once with his people and was surprisingly familiar with the [illegible] beautiful mountain roads about Brattleboro. He and Helen explained to each other in the course of an hour [illegible] how they happened to find themselves so far apart during the summer. There had been another girl at college and there had been another man at home, and they had missed each other more than either of them had realized till Helen's eyes caught sight of the familiar home-town automobile license.

"We are going on to Williamstown, and then round about and back by the Mohawk Trail, George," Helen was saying when George stopped the car beside an exquisitely moonlit view of mountain and river.

He turned squarely toward her, now that he was relieved of the responsibility of guiding the car. "You were saying——"

"Oh, George, weren't you listening?" Helen asked, a little confused by his direct gaze and constantly increasing nearness.

"I could not hear for the beating of my own heart, dear. And what is more, I don't intend to listen to anything but one sentence—do you love me?"

Helen did not answer. He put his arm about her shoulders and lifted her face so that the moon shone full into her eyes. "Tell me, Helen. I cannot wait any longer. I must know. I have been seeing your face in all the mountains, in all the pools, in all the skies, day and night."

"I—I don't like to tell you—way up here so—so far from home, George. It is so strange."

"Love is strange, dear. Do you love me?"

Helen nodded. "Yes—I'm afraid I do. I suspect that was why I was so desperately lonely in all this wonderfully romantic country—because I was longing for you to—to love me."

After a while the car with the Iowa license found its way back to the garage guided by hands that trembled with emotion. And in more than one [illegible] town during the remainder of the trip through the mountains the two parties happened to find themselves staying at the same hotels. Neither [illegible] little companion longed [illegible] care if the chauffeur thought only of cord tires and cylinder oils. She had promised to marry George Taylor at the end of the journey.

CHEERFULNESS AT THE TABLE

Last Place in the World Where There Should Be Bickerings or Long Faces.

A cheerful company at table raises your spirits, animates you and puts you into a more favorable physical condition. Also, I agree with the theory that pleasant subjects only should be discussed at meal. If father sits down to dinner with a hard luck story of bills that are heavy and a purse that is light, or business acquaintances that fail to keep their appointments, of the lowering financial sky, and he doesn't "know what we're coming to, really" that dinner is pretty well spoiled for mother, at least, and what she does take fails to nourish her.

I have wondered if the gayety of their company did not help the people of the Middle ages to survive the horrible messes they used to eat. At the castle everybody sat down to table at once. At the head sat my lord and my lady, their family and noble guests, eating off gold and silver plates. Further down were folk who happened to stop in for the night, perhaps a wandering monk or two, pilgrims, young men in search of adventure, and lower down the servants and retainers. They took their own good time at table with stories, songs and gay laughter, interspersed by tinkling music from the harpist, who warmed himself meanwhile at the huge fireplace. And they enjoyed such dishes as pork and hens ground to powder, boiled with eggs and bread crumbs, ginger, sugar, salt and saffron!—Marion Holmes in Chicago Daily News.

The Girl in the Car

By LULU LANGDON

(© 1921, by McClure Newspaper Syndicate.)

Harkins hurried out of the office building, found his car in the customary spot, disconnected the locking device with his key, and in a moment was threading his way among north-bound vehicles; out on the Parkway he speeded, for the night was cold and clear, and the tang of early autumn was in the air.

In Westchester, a cozy bachelor dinner awaited him, then an easy chair, a pipe and book by the log fire. Why marry? he asked himself doubtfully, as he swung around a curve into a lonely stretch of road.

Something cold and hard touched his right ear. He did not move his head. He knew that some one was holding a gun. "What do you want?" he called back.

"Stop!" It was a soft feminine voice, but very firm.

"The female of the species!" he ejaculated, bringing the car to an abrupt stop.

"Turn around and drive back to 220 Broadway," commanded the voice.

"On the way!" called Harkins cheerily. "Anything else, ma'am?"

No answer, but the something cold and hard still irritated his ear. He hoped she knew what she was about—he didn't; but he obediently swung the car about and headed for his office. He had a great respect for firearms; he had served in France and he knew how short tempered a gun could be. At Columbus Circle he stopped.

"I'm going to look around," he announced.

The gun left his ear, but when he stiffly turned his aching neck he found the rear of the car in shadow and only the gleam of the still menacing weapon.

"Turn Around and Drive Back."

"Miss Hold-Up, put down that gun or I shall call a policeman," he threatened.

"You? Call an officer?" She was contemptuous. "Drive on, please, before I turn you over to the police for stealing my car."

"Your car?" he blurted, but the policeman's whistle ordered them to move with the traffic. "Your car?" he repeated over his soulder.

"Certainly, or my father's car. You are very daring—but please go back to 220 Broadway."

In amazed silence he did drive back to the office building, but it was dark and deserted save for scattered lights.

"What shall I do now?" he asked patiently.

There was a silence, then in a wavering voice she answered helplessly. "I don't know! I never arrested a man before!"

"Neither have I," he confessed, "but perhaps this officer on the corner can straighten things out."

Patrolman Ditty listened to their tales. The girl spoke in a low, cultivated voice, saying that she had driven the car downtown that afternoon to her father's office, had locked it with the safety device and taken the elevator to his private office. Finding him in conference with a client she had gone back to the car, settled herself in the tonneau and in the gloom of the raised top had napped a little. "I woke up out on the Parkway," she ended, "and so I groped and found the place where my father keeps his pistol—and I made the thief turn and drive back here."

"See your license, miss," growled the officer.

She produced it and also repeated the car number.

The officer poked around the machine with a searchlight. "Wrong dope on that miss," he came back to report. "This is the same make but a different number. Now, young feller," he growled at Harkins.

"Something funny about this," he decided presently. "Think I'll lock you up, young man." He took the girl's name and address, put her in a taxi- [illegible] muttered Patrolman Ditty, as he went back to his beat after making his report.

Harkins had called J. B. Porter's New Jersey home but the lawyer was not there. "One of the family will do," he said, but he was advised to call later. This he did and a clear sweet voice responded: "I am sorry but my father is not at home. Any message—?"

"This is Harkins, Mr. Porter's legal associate. I am in the Tombs."

"The Tombs?" she gasped. "I am so sorry."

"Thank you," he grinned into the transmitter. "My automobile was stolen—or taken by mistake and here I am!"

"Oh! How strange—you were arrested because some one stole your car?"

"Well—she said my car was her car—and with the evidence all against her she got away," he sighed deeply.

"Got away?" came the faint echo.

"Because she mentioned her father's name—and—they won't let me talk any more—say I'm talking too much."

"Coming right over," he heard before an officer elbowed him away from the instrument.

"Who do you think you are? A guest of the city—walking into jail as if you owned the whole shootin' match!" growled the policeman.

"Must own some of it—taxpayer—guest of the city! I rather like that," chuckled Harkins. "Can I stay down here—somebody coming along to bail me out."

Then came J. B. Porter, shaking with laughter, and a lovely girl who clung to her father and begged Harkins' forgiveness for her blunder. J. B. Porter bailed his future son-in-law (none of them knew the fact just then) out of jail, and all went happily thereafter.

Harkins says the pleasantest hours of his life were spent in the Tombs' prison, and as for a bachelor home in Westchester—why, a New Jersey home, a log fire, two easy chairs and no book at all is much to be preferred.

DARKEY WAS NOT IMPRESSED

His Opinion of the Chief Justice of United States Supreme Court Decidedly Not High.

John Marshall was a great man and, like many great men, he became at times very much absorbed with his thoughts. Riding along the bad roads of North Carolina one day in a gig the chief justice of the United States Supreme court was revolving a point of law in his mind and not paying a great deal of attention to the road. His horse turned out of its own accord and the gig ran over a sapling, and tilted so sharply that the judge was aroused from his reverie. It seemed to him that he was hung up on the sapling, for he could turn neither to the right or left. An old negro happened along, scratched his head a moment and said:

"Marse, whut fer you-all don' back yo' horse offen that saplin'?"

"That's so," replied Marshall, who had not thought of that simple solution, and promptly backed away from the obstruction. He thanked the old man and was about to reward him, but found he had no money in his pocket. "Never mind, uncle," he said as he drove away. "I'll stop at the tavern and leave something for you."

The old negro was not impressed, but for fear he might overlook a bet stopped at the tavern and there the landlord gave him a dollar, which Marshall had left for him.

"What did you think of him?" the landlord asked.

"Well," answered the negro. "Well, he was a gen'leman, sho' nuff, but," and he patted his forehead significantly, "'pears to this darky like they ain't much o' nuthin' in that man's haid."—Kansas City Star.

Song Values.

The value of songs, in most instances, lies with the artist, the interpreter, because it is the artist who gives a song life and reality.

It is very interesting to observe the various songs spoken of by artists as beautiful, dramatic, thrilling and so on. Each one has an entirely different idea as to value. One will select a song because it happens to suit whichever voice his happens to be. Another will choose a song for the beauty of the lyric, while someone else makes a selection because of the strikingly melodic theme. Others like a song of weird exotic harmonizations or because of original character of form.

When it comes to the subject some prefer sea songs, others dramatic or timely war songs of the declamatory style, while people with different natures lean toward mood or atmospheric songs.

If Only True.

The 8A class of a North side school was having a history lesson. The Civil war was the topic. "The South said 'cotton is king.'" One of the older boys of the class was called on to discuss the subject. In conclusion he said: "The South sent the raw cotton to England and there it was manufactured into woolen cloth."—Indianapolis News.

COME EARLY.

Dr. J. H. Laney

President Almost Impeached.

Andrew Johnson (1808-1875), seventeenth President of the United States, was almost impeached in 1868. Eleven articles charged the President with high crimes and misdemeanors in connection with various matters, the most important of which was the removal of Edwin McMasters Stanton, secretary of war, in disregard of the tenure-of-office act. The trial before the United States senate, sitting as a court, began March 5 and ended May 26. Thirty-five senators voted for conviction and nineteen for acquittal. The vote lacking one of a sufficient number to convict, he was acquitted.

St. Nicholas Doll.

Russia in the old days had its own type of doll, namely, the St. Nicholas doll. There the Christmas holiday is celebrated 11 days after the celebration in other countries, in accordance with the calendar of the Greek Catholic church.

The St. Nicholas doll was clad almost always in woolly white material and sported fierce mustachios and whiskers. He represented the patron saint of the children, who punished or rewarded by the amount of gifts he bestowed.

[illegible] of the State Lawmakers

DRAFT MINERAL BILL

Subcommittee Has Land Lease Measure Ready For Presentation To Senate.

St. Paul—Another of the important measures of the session, a bill to restore the practice of leasing state mineral lands, will be reported back to the Senate this week by the committee on public domain.

A motion will be made to make the bill a special order, Senator John L. Wold of the subcommittee which had charge of the bill, said. The special order porbably will be asked for some day next week in order to give the senators time to study the bill, Senator Wold said.

The bill, as introduced by the interim committee, has been amended by substituting a board for the state auditor in charge of the sale of exploration permits and leasing. The board will consist of the state auditor, the attorney-general and state treasurer.

The subcommittee also has inserted a schedule of royalties to be paid the state on leases. The interim committee provided for a graduated scale of royalties, but left the rates blank, to be filled in by the Legislature. The subcommittee has provided for a minimum rate of 12 cents a ton on 25 per cent ore and the rate is increased at the royalty rate of 5 per cent for each 1 per cent increase in the grade of the ore; thus a 26 per cent ore will pay the state 12.6 cent per ton royalty; a 27 per cent ore will pay about 13 cents per ton royalty, and the rate ascends with the improvement in the grade of ore until a 54 per cent ore will pay approximately 50c a ton royalty.

The old royalties in vogue from the time the first legislation on the subject was enacted until the leasing of state ore lands was discontinued with the repeal of the law in 1907, was 25 cents a ton flat for all grades of ore.

AWAIT TONNAGE TAX OPINION

The house committee on taxes recommended for passage a bill requiring warehousemen to file annually with assessors a statement of all personal property stored in their warehouses. Warehousemen from Minneapolis, St. Paul and Duluth were given a hearing and protested against the bill.

This committee also recommended for passage Representative Thomas Girling's bill exempting the heads of families from taxation on $200 worth of personal property, provided they have more than two children under 16 years of age.

"This is an inducement to have more children. This is the best crop Minnesota raises," said Mr. Girling in sponsoring his bill. He said the Kansas legislature has been considering a bill which would tax bachelors.

The house highway committee revised the committee administration bill and made a few changes.

Attorney General C. L. Hilton announced that his opinion of the constitutionality of tonnage tax bills would be handed to the house taxation subcommittee early this week.

The railroad committee of the house by a vote of 9 to 4, recommended for passage the "full crew" bill. This measure requires railroads to provide an additional brakeman for trains of more than 40 cars. The committee also recommended for passage a proposed law requiring railroads to build crossings over tracks, the same width as the road leading to the tracks. This measure will require the railroads, in many cases, to build crossings from 20 to 30 feet in width.

The senate unanimously passed a bill legalizing acts of the acting state auditor. The object of this measure was to allow Acting Auditor M. J. Desmond to sit on the state bonus board.

Senators James Dwyer and O. A. Devold of Minneapolis attempted to put the senate on record in favor of government owned coal mines, but were defeated. The committee on labor had reported favorably a resolution indorsing the Calder coal investigation by congress, and Senator Dwyer offered an amendment asking for government ownership. The committee resolution was adopted after defeat of such amendment.

Passage of the bill to tax royalties paid to owners of iron ore lands was recommended for passage by the House committee on taxes after a public hearing during which protests were made against such legislation. The main question discussed at the hearing was whether the royalties were incomes or part of the purchase price of ore lands.

Frank Spellman of Duluth made the principal argument against the bill. He contended that the income from royalties in reality amounted to installments on the sale price of the ore, since ever yton of ore removed from the ground constituted a reduction of the principal of the owner, and that when the ore was all gone there would be no more royalties.

Fred B. Snyder of Minneapolis, president of the University Board of Regents, E. C. Gale, Minneapolis, and others backed up the arguments made by Mr. Spellman.

[illegible]

[illegible] Committee by Vote of [illegible] After [illegible] Fight.

St. Paul—Passage of the [illegible] bill to "open" the Minneapolis Chamber of Commerce, the Duluth Board of Trade and the South St. Paul Livestock exchange and to provide regulation for such, was recommended by a vote of 5 to 5 by the House markets and marketing committee of the Minnesota legislature.

Debate on the bill in committee was bitter, Representative Asher Howard of Minneapolis vainly attempting to have the measure referred to the house judiciary committee before the vote was taken on recommendation. Mr. Howard was supported in his stand by Representatives Thomas J. Girling and W. I. Norton.

Mr. Girling said the committee was being "carried away on a wave of possible good intentions." R. A. Wilkinson, author of the bill, charged those favoring referment to the judiciary committee with dilatory tactics.

Representative Howard said no bill should be passed which "would deprive men of property which the state has invited them to build up. If this bill is passed we should introduce another one, writing from our statute books the law which invites organizations similar to the Chamber of Commerce to be formed," he said. "Mr Wilkinson started forming this legislation long before the legislative session began.

Charges Bill is Being Railroaded.

"If you want to railroad this law through you can do it," he told the committee.

After the committee had recommended the bill for passage it instructed Chairman Elias Nordgren to refer the bill to the attorney general and the judiciary committee for legal opinions and constitutionality.

By a vote of 40 to 21 the Senate passed the G. H. Sullivan bill giving the Railroad and Warehouse commission certain powers to regulate the routing and service of suburban street car lines. The bill provides that appeals may be taken from decision of local governing bodies to the state commission. The bill contains some of the principles underlying the Brooks-Coleman bill, now pending in the Senate.

Take Up Bill on "Futures."

The committee then took up H. F. No. 23, which defines gambling contracts, and presents dealing in futures in grain.

Representative Howard said this bill was one of the most important ever considered by a Minnesota legislature, and asked that a time be set for extensive consideration. The committee decided to consider this measure.

LEGISLATIVE SIDE LIGHTS

Creation of a state industrial accident compensation board and establishment of an industrial insurance fund is provided in a bill introduced in the Senate by Senators Jackson and Boylan.

Representative J. O. Grove sent in a bill requiring telephone companies which operate exchanges to furnish physical connections and service to rural lines.

Senator Fred Bessette put in a bill allowing school boards to lease or build structures to house teachers and another measure permitting school boards to hire attorneys when necessary and pay them by the month or year.

Three departments, hotel inspector, boiler inspector and the minimum wage commission are abolished in a series of bills put into the house hopper. The duties of these departments are transferred to the commissioner of labor.

The owner of property on which a mechanics lien has been filed, may have the lien released by posting sufficient cash in court, and $12 for each $100 in the lien, in a bill recommended for passage by the house judiciary committee.

Representative A. J. Saniec, George Nordlin and B. J. Keller have introduce a bill requiring employers to give 24 hours rest each seven days to employees. Exceptions are made in the cases of watchmen, janitors, caretakers of livestock, fire tenders and others.

Counties of less than 100,000 population may appropriate $20,000 or less as a memorial to soldiers and sailors the memorial to be built in the court-house square or public park of the county seat, or, if the county seat has no park, at some other location in that town or city. These provisions are specified in a bill now before the senate.

Rent profiteering went one step nearer to destruction when Representative F. E. Nimock's measure making rent profiteering a crime was recommended for passage by the house general legislation committee. Carrying of firearms without a permit from the police chief or sheriff is made a felony in a measure recommended favorably by the same committee.

It will be unlawful after Jan. 1, 1922, to bring any goods into Minnesota for sale without marking thereon the manufacturer's cost, the manufacturer's selling price, the name of the purchaser and the price to be asked at retail, under H. F. 570, sponsored by Representative F. E. Miner and B. J. Keller.

By vote of 72 to 29, the House of Representatives yesterday passed a bill designed to make it possible for William M. Nash, former county attorney of Hennepin county, removed by Governor Burnquist, to have his case reopened.

[illegible]

Red Clover and Timothy Should Not Be Depended On Entirely for Maximum Crops.

REDTOP FAVORS MOIST GROUND

No Perennial Hay Plants Will Produce Well on Poor, Sandy Soil—Most Grass Seeds Are Small and Require Good Seedbed.

(Prepared by the United States Department of Agriculture.)

While timothy and red clover undoubtedly are the best hay crops on good soils in the northeastern quarter of the United States, they should by no means be depended on to produce maximum yields of soils. Other hay crops are better suited and are more dependable in some cases and under particular soil conditions. Alsike clover, for example, is better adapted to sour and moist soils than common red clover, and the two mixed together and seeded on some uplands often insure a crop where the latter seeded alone would fail. Redtop is the best wet land grass and on such land a mixture of red-top meadow, fescue, and alsike clover usually gives good results. While no hay grasses can be depended upon to make a commercial crop on poor land, redtop, orchard grass and tall oats-grass are better than the others. These are facts discussed in detail in Farmers' Bulletin No. 11[illegible] Meadows for the Northern States, just issued and ready for distribution by the United States Department of Agriculture.

Has Bulk of Tame Hay Acreage.

In that section of the United States north of and including Tennessee, and east of central Nebraska, Kansas and the Dakotas, is found 83 per cent of the tame hay acreage of the nation. Eighty-eight per cent of this acreage is seeded to timothy and clover. While these two plants undoubtedly will continue to hold the popularity they now possess, there are a number of other plants which, though not so well known, are more desirable for particular purposes and for certain conditions of soil and climate. The latter are given special attention in the bulletin.

Field of Bur Clover.

There is little difference of opinion as to the plants to be seeded on rich well-drained land. Timothy is seeded alone if the hay is to be sold on the market, and timothy and clover, often mixed with redtop, where part or all of the hay is utilized on the farm. Some of the advantages of these plants are that they have good seed habits, especially timothy and redtop. Red clover is a deep-rooted legume, and has a beneficial effect on succeeding crops.

Timothy is considered by feeders the best hay for horses, and clover, or clover and timothy mixed produce better yields and are excellent for cattle and sheep. The comparatively long period during which these plants may be left standing without serious deterioration before cutting, together with the fact that the time of their maturity interferes little with the harvesting of the cereals and other farm work, have much to do with their popularity.

The most serious objection to the red clover and timothy mixture is due to the difference in time of their maturity, the former usually being ready to cut two weeks before the latter. For this reason mammoth clover, a variety of the common red, which is somewhat later in maturing, is sometimes substituted for red clover in the seed mixture.

There are many soils along the southern border of the area under discussion which will give a larger hay yield if seeded to orchard grass, tall oats-grass, and alsike clover than if seeded to timothy, redtop and red clover. These soils are usually poor in organic matter and are inclined to be sour. It is important that this mixture be cut when the plants first head out, for if harvesting is delayed they will make a tough, less palatable hay. This is especially true of orchard grass. If cut early, however, this hay will be relished by all classes of live stock. For general use in the localities referred to, the bulletin recommends the following mixture: Orchard grass, 14 pounds; tall oats-grass, 12 pounds; alsike clover, [illegible] pounds per acre.

Gives Best Results.

Raising hay on poor land is unsatisfactory, but when it is necessary this mixture gives best results. In some places in the Middle West sweet clover has given good results under unpromising soil conditions. According to the bulletin, no perennial hay plants will produce well on poor, sandy soil. Under such soil conditions, however, some temporary crop, such as rye or oats and peas, and along the Atlantic coast, early sorghum and cowpeas, are preferable to perennial hay crops.

The best temporary hay plants are the small grains seeded either alone or in mixture with some legume, such as peas, vetch or crimson clover. Millets are sometimes used for this purpose, as are sudan grass and coarse forage, such as corn and sorghum. In the northern states a combination of oats and Canada field peas makes a very good hay crop. Excellent results have been obtained in eastern Maryland and Virginia with the following mixture: Oats, 1 bushel; hairy vetch, 30 pounds; white-blooming crimson clover, 10 pounds per acre.

In order to avoid losing the use of land for an entire season, and to permit late-summer and early-fall seeding, grass crops usually follow small grains. The seedbed should be prepared as soon as possible after the grain is harvested. As a three-inch mellow seedbed with firm soil beneath will give better results for summer seeding than one that is deeper, the disk harrow is usually used in place of the plow for preparing land for grass. Most grass seeds are very small and must have a fine, mellow, well pulverized surface soil in order that the seedling may become established. A good seedbed may mean the difference between the success and failure of the hay cop.

Use Too Little Seed.

Most farmers use too little grass seed for best results, according to the bulletin. Rich land with a well-prepared seedbed does not require as much seed as thin land or land poorly fitted. From 20 to 30 pounds of seed per acre are generally sufficient, and this rate is usually more profitable than lighter seedings of mixtures. Small-seeded grasses, such as red-top and timothy, do not require so heavy a seeding as orchard grass or rye grass. Usually 10 pounds of timothy or 6 pounds of redtop are sufficient when these are seeded alone.

In order that the seed may get a good start, it is frequently advisable to apply some readily available fertilizer. Formerly the grain crop received the fertilizer, but experiments have demonstrated that when it is applied to the grass it will not only increase the yield of this crop but its beneficial effects on the succeeding crop for two or three years [illegible] the yield [illegible] and there is probably no better crop than grass on which to apply it. A great deal of grass and clover seed is wasted every year from seeding on sour or acid soils. Applications of lime correct this condition, and should be made particularly where legumes are to be grown.

DRAFT MINERAL BILL

Subcommittee Has State Land Lease Measure Ready For Presentation To Senate.

St. Paul—Another of the important measures of the session, a bill to restore the practice of leasing state mineral lands, will be reported back to the Senate this week by the committee on public domain.

A motion will be made to make the bill a special order, Senator John L. Wold of the subcommittee which had charge of the bill, said. The special order porbably will be asked for some day next week in order to give the senators time to study the bill, Senator Wold said.

The bill, as introduced by the interim committee, has been amended by substituting a board for the state auditor in charge of the sale of exploration permits and leasing. The board will consist of the state auditor, the attorney-general and state treasurer.

The subcommittee also has inserted a schedule of royalties to be paid the state on leases. The interim committee provided for a graduated scale of royalties, but left the rates blank to be filled in by the Legislature. The subcommittee has provided for a minimum rate of 12 cents a ton on 25 per cent ore and the rate is increased at the royalty rate of 5 per cent for each 1 per cent increase in the grade of the ore; thus a 26 per cent ore will pay the state 12.6 cent per ton royalty; a 27 per cent ore will pay about 13 cents per ton royalty, and the rate ascends with the improvement in the grade of ore until a 50 per cent ore will pay approximately 50c a ton royalty.

The old royalty in vogue from the time the first legislation on the subject was enacted until the leasing of state ore lands was discontinued with the repeal of the law in 1907, was 25 cents a ton flat for all grades of ore.

AWAIT TONNAGE TAX OPINION

The house committee on taxes recommended for passage a bill requiring warehousemen to file annually with assessors a statement of all personal property stored in their warehouses. Warehousemen from Minneapolis, St. Paul and Duluth were given a hearing and protested against the bill.

This committee also recommended for passage Representative Thomas Girling's bill exempting the heads of families from taxation on $200 worth of personal property, provided they have more than two children under 16 years of age.

"This is an inducement to have more children. This is the best crop Minnesota raises," said Mr. Girling in sponsoring his bill. He said the Kansas legislature has been considering a bill which would tax bachelors.

The house highway committee revised the committee administration bill and made a few changes.

Attorney General C. L. Hilton announced that his opinion of the constitutionality of tonnage tax bills would be handed to the house taxation subcommittee early this week.

The railroad committee of the house, by a vote of 9 to 4, recommended for passage the "full crew" bill. This measure requires railroads to provide an additional brakeman for trains of more than 40 cars. The committee also recommended for passage a proposed law requiring railroads to build crossings over tracks, the same width as the road leading to the tracks. This measure will require the railroads, in many cases, to build crossings from 20 to 30 feet in width.

The senate unanimously passed a bill legalizing acts of the acting state auditor. The object of this measure was to allow Acting Auditor M. J. Desmond to sit on the state bonus board.

Senators James Dwyer and O. A. Devold of Minneapolis attempted to put the senate on record in favor of government owned coal mines, but were defeated. The committee on labor had reported favorably a resolution indorsing the Calder coal investigation by congress, and Senator Dwyer offered an amendment asking for government ownership. The committee resolution was adopted after defeat of such amendment.

Passage of the bill to tax royalties paid to owners of iron ore lands was recommended for passage by the House committee on taxes after a public hearing during which protests were made against such legislation. The main question discussed at the hearing was whether the royalties were incomes or part of the purchase price of ore lands.

Frank Spellman of Duluth made the principal argument against the bill. He contended that the income from royalties in reality amounted to installments on the sale price of the ore, since every ton of ore removed from the ground constituted a reduction of the principal of the owner, and that when the ore was all gone there would be no more royalties.

Fred B. Snyder of Minneapolis, president of the University Board of Regents, E. C. Gale, Minneapolis, and others backed up the arguments made by Mr. Spellman.

[illegible]

Representative Howard said no bill could be passed which would deprive [illegible] of property which the state has invited them to build [illegible]. If this bill is passed we should introduce another [illegible] writing from our statute books the law which invites organizations similar to the Chamber of Commerce to be formed," he said. "Mr. Wilkinson started forming this legislation long before the legislative session began."

Charges Bill Is Being Railroaded.

"If you want to railroad this law through you can do it," he told the committee.

After the committee had recommended the bill for passage it instructed Chairman Elias Nordgren to refer the bill to the attorney general and the judiciary committee for legal opinions and constitutionality.

By a vote of 40 to 21 the Senate passed the G. H. Sullivan bill giving the Railroad and Warehouse commission certain powers to regulate the routing and service of suburban street car lines. The bill provides that appeals may be taken from decision of local governing bodies to the state commission. The bill contains some of the principles underlying the Brooks-Coleman bill, now pending in the Senate.

Take Up Bill on "Futures."

The committee then took up H. F. No. 23, which defines gambling contracts, and presents dealing in futures in grain.

Representative Howard said this bill was one of the most important ever considered by a Minnesota legislature, and asked that a time be set for extensive consideration. The committee decided to consider this measure.

LEGISLATIVE SIDE LIGHTS

Creation of a state industrial accident compensation board and establishment of an industrial insurance fund is provided in a bill introduced in the Senate by Senators Jackson and Boylan.

Representative J. O. Grove sent in a bill requiring telephone companies which operate exchanges to furnish physical connections and service to rural lines.

Senator Fred Bessette put in a bill allowing school boards to lease or build structures to house teachers and another measure permitting school boards to hire attorneys when necessary and pay them by the month or year.

Three departments, hotel inspector, boiler inspector and the minimum wage commission are abolished in a series of bills put into the house hopper. The duties of these departments are transferred to the commissioner of labor.

The owner of property on which a mechanics lien has been filed, may have the lien released by posting sufficient cash in court, and $15 for each $100 in the lien, in a bill recommended for passage by the house judiciary committee.

Representative A. J. Samec, George Nordlin and B. J. Keller have introduce a bill requiring employers to give 24 hours rest each seven days to employees. Exceptions are made in the cases of watchmen, janitors, caretakers of livestock, fire tenders and others.

Counties of less than 100,000 population may appropriate $20,000 or less as a memorial to soldiers and sailors, the memorial to be built in the court house square or public park of the county seat, or, if the county seat has no park, at some other location in that town or city. These provisions are specified in a bill now before the senate.

Rent profiteering went one step nearer to destruction when Representative F. E. Nimeck's measure making rent profiteering a crime was recommended for passage by the house general legislation committee. Carrying of firearms without a permit from the police chief or sheriff is made a felony in a measure recommended favorably by the same committee.

It will be unlawful after Jan. 1, 1922, to bring any goods into Minnesota for sale without marking thereon the manufacturer's cost, the manufacturer's selling price, [illegible] of the purchase and the price to be charged at retail, under H. F. 470, introduced by Representative [illegible] and J. Keller.

By vote of [illegible] the House of Representatives [illegible] bill designating [illegible] William [illegible] [illegible]

[illegible]

Redtop is the [illegible] land grass and on such land a mixture of redtop, meadow fescue and [illegible] clover usually gives good [illegible]. While no hay grasses can be depended upon to make a commercial crop on poor land, redtop [illegible] and tall oats grass are better than others. These are facts discussed in detail in Farmers' Bulletin No. [illegible], Meadows for the Northern States, just issued and ready for distribution by the United States Department of Agriculture.

Has Bulk of Tame Hay Acreage.

In that section of the United States north of and including Tennessee, [illegible] of central Nebraska, Kansas and the Dakotas, is found 83 per cent of the tame hay acreage of the nation. Eighty-eight per cent of this acreage is seeded to timothy and clover. While these two plants undoubtedly will continue to hold the popularity they now possess, there are a number of other plants which, though not so well known, are more desirable for particular purposes and for certain conditions of soil and climate. The latter are given special attention in the bulletin.

Field of Bur Clover.

There is little difference of opinion as to the plants to be seeded on rich well-drained land. Timothy is seeded alone if the hay is to be sold on the market, and timothy and clover, often mixed with redtop, where part or all of the hay is utilized on the farm. Some of the advantages of these plants are that they have good seed habits, especially timothy and redtop. Red clover is a deep-rooted legume, and has a beneficial effect on succeeding crops.

Timothy is considered by feeders the best hay for horses, and clover, or clover and timothy mixed produce better yields and are excellent for cattle and sheep. The comparatively long period during which these plants may be left standing without serious deterioration before cutting, together with the fact that the time of their maturity interferes little with the harvesting of the cereals and other farm work have much to do with their popularity.

The most serious objection to the red clover and timothy mixture is due to the difference in time of their maturity, the former usually being ready to cut two weeks before the latter. For this reason mammoth clover, a variety of the common red, which is somewhat later in maturing, is sometimes substituted for red clover in the seed mixture.

There are many soils along the southern border of the area under discussion which will give a larger hay yield if seeded to orchard grass, tall oats grass, and alsike clover than if seeded to timothy, redtop and red clover. These soils are usually [illegible] organic matter and are inclined to [illegible]. It is important that this mixture be cut when the plants first [illegible]

[illegible]tory, but when it is necessary this mixture gives best results. In some places in the Middle West sweet clover has given good results under unpromising soil conditions. According to the bulletin, no perennial hay plants will produce well on poor, sandy soil. Under such soil conditions, however, some temporary crop, such as rye or oats and peas, and, along the Atlantic coast, early sorghum and cowpeas, are preferable to perennial hay crops.

The best temporary hay plants are the small grains seeded either alone or in mixture with some legume, such as peas, vetch or crimson clover. Millets are sometimes used for this purpose, as are sudan grass and coarse forage such as corn and sorghum. In the northern states a combination of oats and Canada field peas makes a very good hay crop. Excellent results have been obtained in eastern Maryland and Virginia with the following mixture: Oats, 1 bushel; hairy vetch, 30 pounds; white-blooming crimson clover, 10 pounds per acre.

In order to avoid losing the use of land for an entire season, and to permit late summer and early-fall seeding, grass crops usually follow small grains. The seedbed should be prepared as soon as possible after the grain is harvested. As a three-inch mellow seedbed with firm soil beneath will give better results for summer seeding than one that is deeper, the disk harrow is usually used in place of the plow for preparing land for grass. Most grass seeds are very small and must have a fine, mellow, well-pulverized surface soil in order that the seeding may become established. A good seedbed may mean the difference between the success and failure of the hay crop.

Use Too Little Seed.

Most farmers use too little grass seed for best results, according to the bulletin. Rich land with a well-prepared seedbed does not require as much seed as thin land or land poorly prepared. From 20 to 25 pounds of seed [illegible]

[illegible] probably no better crop than grass [illegible] apply it. A great deal of grass and clover seed is wasted [illegible] from seeding on sour or [illegible] applications of lime [illegible]

One day it's spring, the next day storm.

Miss Laura Wold is visiting her sister, Mrs. John Sund.

John Nystul spent last Friday night in Thief River Falls.

J. M. Bishop was over from Thief River Falls Tuesday.

Edwin Hanson made a business visit to Thief River Falls Tuesday.

Miss Olga Resan was a Thief River Falls visitor Monday evening.

E. R. Besancon was transacting business in Thief River Falls Monday.

Carl Christianson had a seance with a Thief River Falls dentist yesterday.

M. G. Thoreson visited Thief River Falls last Saturday on a business mission.

Miss Stella Olson, who is teaching near Mavie, was in Goodridge Monpay evening.

Carl Edseth returned Thursday morning from a two weeks' stay in Thief River Falls.

Arne Markuson returned last Friday evening from a few days' visit to the county seat.

Dr. Adkins spent last Friday night in Goodridge after making several calls in this vicinity.

Theo Tandberg went Friday evening to Thief River Falls to spend the holidays at home.

Miss Violet Krohn of Thief River Falls was a guest of Miss Ruby Jensen last Monday.

Wm. O. Gaylord returned Tuesday from a visit to Fertile and went the same day to Grygla.

Miss Louise Besancon, who is attending school at Thief River Falls, spent the week end at home.

H. S. Dahlen of Thief River Falls, president of the Goodridge State bank, was in town yesterday.

Mrs. C. E. Ronken and daughter Esther returned Monday from their visit to Thief River Falls.

Carl Josephson returned Wednesday morning from an extended visit to the southern part of the state.

Sever Anderson returned Saturday from attendance at district court at Thief River Falls as juryman.

Mrs. Christina Vake and little daughter spent Sunday at the home of her parents, Mr. and Mrs. Rime, near Erie.

Mr. and Mrs. Charles Chapman were at Thief River Falls Tuesday in attendance at the wedding of their daughter Olive

N. H. Dahl returned Monday from attendance at the hardware men's convention, which was held in Minneapolis last

Adolph Johnson returned Friday to his home at Strandquist, after a two weeks' visit with his brother, George Johnson.

Miss Sena Christianson returned Monday morning from Minneapolis, where she has been receiving medical treatment.

Ole and Ingvald Giving returned from Gemmell, Minn., Friday evening, where they have been employed in the lumber camps.

Mr. and Mrs. T. O. Berg and daughter returned Monday from a visit to Cass Lake, accompanied by Mr. and Mrs. Martin Johnson.

The Payne house recently vacated by D. A. Danielson is receiving a fresh application of paint and paper. Sigurd Olson is the architect.

Mrs. Peter Peterson and two children came from Thief River Falls Tuesday and are visiting at the heme of her parents, Mr. and Mrs. John Markusan.

A stag party has been arranged for Legion members next Wednesday evening. The gathering will be held at the school house and a big time is anticip

Mr. and Mrs. Oscar Rambec of Thief River Falls called on Mr. and Mrs. Carl Edseth Satrrday evening, being on their way to visit at the home of Robert Lambec.

Miss Kathleen Lang underwent an operation Saturday at the hospital at Thief River Falls for appendicitis, diseased tonsils and adenoids. She is reported to be gaining up nicely.

Misses Violet Josephson, Lillian Stephenson and Olga Grimley and Lawrence Stephenson spent Sunday at the Grimley home east of Goodridge. They stopped at "Debsville" on their way.

Watch for the prize winners essays on the Peace Conference which will be published in these columns in the near future. These essays with others were written for the contest conducted by the Goodridge State bank.

THE GOODRIDGE BANNER

VOLUME XV, No. 10. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, FEBRUARY [illegible], 1921 [illegible]

Eminent Speakers This Evening

Annual Community Club Meeting
Fine Program Arranged
Big Feed

Mr. W. A. McKerrow, state leader of livestock and dairy extension located at the University of Minnesota, who is also secretary of the Central Shippers' association, secretary of the Minnesota Dairy council and recently appointed on the National Committee of Seventeen for the investigation of production and marketing, will speak to a large audience in the school auditorium this evening. Mr. B. T. Scott, secretary of the Minnesota Holstein-Friesian association will also be on the program at the same time. He will emphasize the importance of using good creamery butter and other dairy products rather than butter substitutes, which has a tendency to reduce the dairy profits of the state.

Seldom, if ever, has the county had the opportunity to hear two men so well qualified and informed to give talks on any phase of the agriculture, livestock and dairy industries. We should be able to pack the school auditorium this evening to its fullest capacity. You will miss a rare opportnnity if you fail to be present at this meeting.

Besides the speaking a fine program has been arranged and the band will furnish music. After the meeting a big feed will served, free to all.

The Prize Winners

The prizes in the Goodridge State bank essay contest were awarded Februry 22, Washington's birthday. These prizes were for the best essays on the Peace Conference. The winners were:

Myrtle Iverson, District No. 8, Goodridge, first prize, $15 in gold.

Laura Swanson, District No. 38, Kratka, $10 in gold.

Misses Grace Iverson, Margaret Dix and Irene Patrick, teachers of English in the Thief River Falls High school, acted as judges. They judged the papers without conference, each acting independently of the others, and they were unanimous in the selection of the winners, as above stated. Following we print the prize essays:

Changing the Map of the World

By Myrtle Iverson

In January, nineteen hundred nineteen, delegates from twenty-seven countries, representing nearly nine-tenths of the world's population, met at Salle de la Paix, Versailles to discuss terms of peace.

Versailles, the largest and most magnificent palace in France, forms three sides of a great square. Within and around there are splendid gardens and orange groves with fountains and smaller palaces. It was in this place that Germany in eighteen seventy one made France accept the very dishonorable terms of peace that concluded the Franco-Prussian war.

The leading persons at the Conference were Woodrow Wilson of the United States, Lloyd George of England, Premier Clemenceau of France, Orlando of Italy, Viscount Uinda of Japan and other prominent statesmen from the allied countries.

After six months' debate the terms of peace were finally agreed upon. Some of the important topics in the treaty are the League of Nations, division of territory ceded by Germany, recognition of new states, mandates for German colonies, restriction of German military forces, penalties and reparation for damage done by Germany, and several other things of minor importance.

One of the greatest results of the Peace Conference was the liberation of submerged nationalities. Acting on the principle of self determination for all nations, the map of Europe has been changed and new nations have achieved racial unity and political independence. Poles, Czecks, Slovaks, Finns, Danes, Alsatian-French, Austro-Italians, Yugo-slavs, Rumanians and Greeks have come under governments of their own nationality It has been estimated that over forty million people have attained self government.

As a result of the Versailles Conference a number of other races, such as the Arabs, Armenians, Palestine Jews, Georgians, Ukrainians, White Russians. Lithuanians, Letts, Esthonians and others have more or less broken away from their former rulers, altho their political starus has not yet been settled. The new map of Europe is dotted with new names, such as Esthonia, Letvia, Lithuania, Poland, Ukraine, Checkoslovakia, Jugoslavia; and others will likely follow before final readjustment is achieved.

The League of Nations at the present time has control over the Sarre Basin and Danzig, while other small European countries wwich are now under the control of larger nations, such as Germany, France, Great Britain and Russia will eventually determine their sovereignty by popular plebiscite.

One of the most important sections of the treaty has to do with the League of Nations. The League of Nations is to be located at Geneva in Switzerland. The authority of the League is vested in two representative bodies known as the Assembly and the Council. The Assembly is composed of the representatives of the members, each member state having one vote but being allowed as many as three delegates. To carry on the work of the League, a Council of nine members is provided. This is composed of one delegate each from the United States, Great Britain, France, Italy, Japan and four other states selected by the Assembly. The purpose of the League is to maintain friendly relations between the nations and to settle the disputes that may arise. The United States has not joined the League of Nations because many of our leading statesmen think it inconsistent with our traditional foreign policy, and that it would needlessly involve our country in foreign affairs.

Peace Conference

By Laura Swanson

This picture is painted by Sheridan Knowles, who is a member of the Royal Academy and has exhibited there for many years. He is classified among the greatest artists here and abroad. He has painted many pictures, the "Peace Conference" being his masterpiece.

This scene is in the Salle de la Paix, the Hall of Peace. It was known as the "Clock Room" in the French Foreign office on the Quai d'Orsai. This is one of the most splendid reception rooms in Paris. By looking at the picture we see that directly behind the President's seat stands a heroic staine of Peace, holding aloft the torch of civilization. In front of the soatue is spread the council table, covered with the traditional green baize of diplomacy. This table is in the form of a huge horse shoe. Across the upper end were nine seats of honor, for the presiding officers, the vice presidents and premiers. On each side of the two arms of the horseshoe there were fifteen seats, making sixty seats besides the nine at the head of the table.

Each delegate's chair is covered with red leather and before each place is a complete equipment of writing materials. The fittings of the rooms are in white and gold, with a frescoed ceiling bordered by dancing cupids. It is said that there are four great lustre chandeliers hanging from the ceiling, while five large windows, looking out over the Seine river, cast a flood of light over the sumptuous apartment.

This picture represents the second plenary session of the Peace Conference held on January 25, 1919, with Premier Clemenceau in the chair. It was marked by the adoption of the plan for a League of Nations. The plan was accepted, the principles ubon which it was based being emphasized and firmly supported by representatives of the Allied Powers. After having called the delegates to order, M. Clemenceau, the Lion of France, read the resolution on the creation of a committee on the League of Nations. After the resolution had been read the chair recognized President Wilson, as the picture shows. In his address he said that he considered it a distinguished privilege to be permitted to open the discussion in the Conference, on the League of Nations. He then went on to say: "We have assembled here for two purposes, to make the present settlements which have been rendered necessary by this war, and also to secure the peace of the world, not only by the present settlements but by the arrangements we shall make at this Conference for its maintenance.

The Reclaiming of Peat Lands

The problem of the successful use of the peat lands of northwestern Minnesota is at last being worked out. Just the one best method for all circumstances has not been determined, and probably no single method will be adaptable to all the peat areas named, because peat soils differ very materially. But peat soils of the kind in he vicinity of Golden Valley, Marshall, where experiments provided for by the legislature have been in progress for the last three years under the supervision of Dr. [illegible] E. Alway of the Minnesota Experiment Station, present certain [illegible]lems, and these are being solved. This is clearly apparent from bulletin No 194, "Report of Golden Valley Peat Experiment Fields, 1918 and 1919," by Dr Alway, just being issued by the University department of agriculture.

The experimental fields of Golden Valley selected as typical of the high-lime, grass-and-sedge-covered bogs of northwestern Minnesota, Dr. Alway declares at the outset, are found extremely unproductive when treated like ordinary mineral soils. This is a verdict based upon the experience of the farmer as well as upon the experimental work of two seasons, 1918 and 1919; the former an unusually favorable season and the latter, on account of frosts and floods, very unfavorable.

The unproductivity of these peat soils when treated like ordinary mineral soils results from a lack of available phosphate. When this is supplied, good yields of most crops adapted to the region are obtained, unless frosts or floods intervene. When phosphate is not supplied only flax, of all the crops tried, has given satisfactory yields. The phosphate may be supplied in the form of farm manure or commercial fertilizer. It may also be provided by burning the surface layer of peat, but there are so many dangers and disadvantages connected with burning that it is not recommended.

The natural supply of lime, on the other hand, is abundant, and nitrogen has become available rapidly enough for ordinary farm crops. For the two seasons covered by the report potash has shown no distinct beneficial effects, either alone or in combination with phosphate. The fact that potash is not immediately needed is ground for satisfaction, as potash is still expensive, although the price is falling rapidly. The available supplies of potash in the soils, however, should not be expected to last for any considerable time unless the phosphate treated fields are used for pasture only.

The most promising crops on such areas are flax as a first crop, oats, winter rye and field peas. Wheat is least satisfactory and flax fails on burned areas. Dr. Alway advises a mixture of alsike and red clover with timothy, and also brome grass for hay and pasture. Corn, millet and various other crops which do well on adjacent mineral soils are not suitable for the peat soils because of summer frosts which may be expected in some seasons to ruin even flax and potatoes.

The danger of summer frosts, the possible early exhaustion of potash, a good growth of grasses and clover combine to make the most promising use of these peat lands, when properly fertilized, the production of milk beef, mutton and wool.

While the results in Golden Valley may be expected to apply to other grass covered peat lands in the north western counties of Minnesota, too much should not be taken for granted. The conditions prevailing at Golden Valley may not apply fully elsewhere. However, farmers, in these counties who have peat land which is naturally covered with grass, are advised to try phosphate fertilizers, either from 300 to 400 pound of phosphate per acre or one third as much treble superphosppeate. Although at first phosphate alone appears to be sufficient on most of the grass-covered bogs, some such bogs will probably need the much more extensive [illegible] ing only phosphate has been more fully worked out. Dr. Alway further suggests that inexperienced settlers should not be encouraged to locate on peat lands while the reclamation of such lands is still in the experimental stage. Furthermore, owners of peat lands elsewhere in the state are cautioned against using the Golden Valley results as guides.

Dr. Alway's bulletin is a pamphlet of about 120 pages and goes into the methods used and the results obtained in considerable detail. To persons who are wrestling with problems relating to the reclamation of peat lands in northwestern Minnesota the bulletin should prove very valuable. Copies may be obtained by addressing: Office of Publications, University Farm, St. Paul, Minn.

In the same connection it should be said that any Minnesota farmer on whose land there are peat areas may have the assistance of the University department of agriculture at little or no expense in finding out whether lime is needed, or what fertilization is required to make his peat productive.

Saturday, March 5

WM. S. BATTIS

Mr Battis has been one of the most popular artists on the American platform for twenty years. He has given practically his whole professional career to the interpretation of the characters of Charles Dickens' novels. The entertainment is educational, full of humor, and holds attention every second through its great dramatic appeal.

Mr. Battis is not an impersonator of the ordinary type. He makes his characters live. They step right out of the books and talk to you.

ICE-HARVEST TIME AT HAND

Farmer Should Lay In Ample Supply for Cooling Milk and for Household Uses in Summer.

Farmers who have not already done so should prepare to lay by a store of ice now for cooling milk and for household use next summer. In places where nature provides a sufficiently low temperature, the cost of harvesting and storing ice is low when compared with the saving effected. Ordinarily, it is safe to harvest 2 tons of ice for each cow in the herd. This will allow for melting and leave enough for family needs. Where cream only is sold, about one-third of that quantity of ice will be needed.

Two farmers' bulletins, No. 623, Ice Houses and the Use of Ice on the Farm, and No. 1078, Harvesting and Storing Ice on the Farm, may be had by applying to the Division of Publications, United States Department of Agriculture.

Hold Grudge Against Chameleon.

No African native will have anything to do with a chameleon, under any circumstances whatever. It seems that beyond the dim veils of time, and when the "Great Ancestor" was forming the world, he sent the chameleon to tell the black people that for them life should be immortal, and then, having changed his mind, he sent the lizard to catch up with the chameleon, and, if the message had not already been delivered, to rescind the order.

The legend goes on to relate how the chameleon in its vanity stopped often to change its color, and that, having turned its coat to match its background, it was passed by the lizard, which, arriving first, told the black people that immortality was not for them.

ADDS BEAUTY TO FARM HOME

Shrubs Hide Foundation Lines of Buildings and Screen Many Unsightly Bare Objects.

Suitable plantings are necessary to unite the parts of a farmstead into a pleasing, homelike whole. Trees are used for windbreaks, as frames for the buildings or a background for them, and to give shade. Shrubs are needed in abundance to hide partially the foundation lines of buildings, support their corners, give reasons for turns in drives or walks, and to screen unsightly objects. Native trees and shrubs [illegible]

Business Is Business

By FREDERICK HART

(© 1921, by McClure Newspaper Syndicate.)

"I can't figure what's happening in R. & X.," said Philip Gibney, senior partner of Gibney & Hadman, brokers. "We can't seem to get a majority of stock; some one's holding out on us. Have you had our tracers on the job?"

"I should say I have!" Roger Hadman's voice was weary. "For the past three months Jevons and Harrod have been on the road. They've combed the country, nearly; but they can't account for the three thousand shares we need. That block—"

"But surely there's a record of its original sale!" snapped Gibney.

"Of course! We traced it to a little town in Pennsylvania—a funny old chap with chin whiskers—farmer—held the whole block. Jevons got wind of it and flew down to get it at any price, but he was too late. Somebody beat him to it by less than three hours. The old duffer didn't know who it was—simply said a man came along and offered him twice what the stock was worth, and he sold for spot cash. Jevons even went so far as to put detectives on the job, but they couldn't get any trace except that the fellow was slim and good-looking, wore a light suit, and bought a ticket for Philadelphia at the local station. The train went right up in air then, and there's absolutely no further trace."

"Well—" Gibney's voice was thoughtful. "we've got to get that stock somehow. I wonder if whoever bought it is holding out for a big price? He must know what we're planning, and what control of R. & X. will mean to us. I suppose he thinks he can get whatever price he asks."

"The worst of it is that he's pretty nearly right, at that," rejoined Hadman. "When our deal comes off it's absolutely necessary to have the control, and we can't have it without those three thousand shares, and this fellow knows it—and that's all there is to it. We pay."

"We do, I suppose—and—yet—"

"And yet—what?"

"It strikes me as being rather queer that this chap, whoever he is, hasn't tried to make a dicker. We are going to pull our stunt at the end of the week, and he must know that we want the stock as soon as we can get it. He has inside information, that's sure. Well, the result would naturally be that he would come around here and point his block of stock at our heads and say 'Stand and deliver!' But he hasn't made a move—and today's Wednesday. I don't understand it."

Gibney was a sadly worried man when he went home that night, and his pretty wife, who was waiting for him with her usual smile, received a scanty greeting. During the evening meal she tried to make conversation, but failed dismally. Once she asked what was worrying him.

"Nothing you'd understand," replied Gibney shortly. Alice opened her mouth as though to reply, but thought better of it and confined her attentions to the salad. The evening passed silently for both.

Next morning, the day before Gibney & Hadman's big coup was slated to come off, Gibney was informed by the girl at the door that a young man wanted to see him. On inquiring his business, he was informed that the visitor would make no statement, merely saying that he wanted to see the head of the firm at once. Gibney told the girl to show him in, and called Hadman from his office.

"Dollars to collar-buttons it's the chap with the R. & X. stock, Jim," he said. "I want you here—we'll meet him together. Maybe the two of us can get reasonable figures out of him. But oh, how he has us!"

The man who entered the office seemed hardly more than a boy. He was dressed in a light-colored suit, and wore a derby hat which he did not remove. A white bandage covered most of his right cheek and curved well under the chin.

"Good morning, gentlemen," he said in a voice that betrayed a cold in the head. "I'm sorry to come around looking such a wreck, but the fact is I've met with an accident—automobile—and I'm a little smashed as to the face." A one-sided grin accompanied this information. "The doctor tells me to keep my hat on, too. And now, if you're quite done staring at the bandage and things, we might as well get down to business. I have here"—he tapped his breast-pocket—"a block of three thousand shares of R. & X. stock, which represents the balance of power—the amount needed for control of the road. You want it—I have it. What do you say?"

"You young scoundrel!" roared Hadman. "This is blackmail!"

"Hardly, Mr. Hadman. This is business. You were too slow [illegible] I have it. [illegible]"

"How—how did you find out about [illegible]" [illegible] Hadman.

"Ask me no questions; I'll tell you no lies," replied the visitor pleasantly. "We seem to be wasting time. Let us proceed."

Hadman seemed about to burst into a storm of wrath, but Gibney interrupted him.

"This youngster's perfectly right, Jim. We slipped up, and he has us where he wants us. If he feels like putting on the screws, why, I suppose we'll have to stand for it. May I ask your price on this stock?"

The young man was suddenly afflicted with a violent fit of coughing. When he recovered, he asked that Jevons, the buyer he had beaten out, be sent for. Neither Hadman nor Gibney could see the necessity for this, but they acceded to his request. Jevons entered.

"Good morning, Mr. Jevons," said the young man. "I'm glad to see you are looking so well. The last time I saw you you were feeling strained a bit, I think."

"I never saw you before!" said Jevons angrily, displeased at the badinage.

"That's quite true, Mr. Jevons; but I saw you. It was at the Biltmore, in the tea-room. You were talking to a lady—a very beautiful lady, Mr. Jevons."

"What on earth—" began Hadman, but a glance from his partner silenced him. Jevons had suddenly dropped his air of bluster and was as pale as the white wall behind him. He made a move to go, but with a lightning-like movement the young man intercepted him. His air of pleasantry was gone.

"I was at the next table, behind the palm. I heard you when you planned to acquire the stock yourself with your employers' money, and bleed them for it. I heard you make your plans—and you were incautious enough to give the address of the man who held the stock. I should have exposed you then, but I thought it was better to beat you to it. I—" but Jevons waited to hear no more. He fled through the door and the partners heard the outer door of the office slam.

"The most thorough scoundrel I have ever [illegible] the pleasure of [illegible]ing," said the young man calmly. "And now that we have disposed of that matter, let us take up the other. Mr. Hadman, I should like to ask you to step out for a moment, if you please. I want a word with Mr. Gibney alone."

Hadman left, though with no good grace. When Gibney was alone with the stranger he said: "I don't know how I can thank you for exposing that villain; but I will try. And [illegible]"

"[illegible]" broke in the [illegible]. "Look at [illegible]!" He was [illegible] the window. Involuntarily [illegible] turned to look, and when he [illegible] his gaze to the room the young [illegible] stood before him—transformed. [illegible] was the swathing bandage; [illegible] derby hat, and with its [illegible] cascade of golden hair fell rippling to the young man's waist, and Gibney [illegible] into the face of—

"Alice!" he cried. "Wha—how—why—"

"Oh, Phil, darling, I wanted to tell you at first, but you were so cross and grouchy that I thought I'd give you a little wee lesson. And oh, Phil, it was such fun! Here's your old stock—I bought it with my own money, and it's—guess what? My birthday present to you! And oh, Phil, darling, kiss me, won't you?"

Hadman, impatient at the delay, opened the door and started to enter. He got as far as the threshold, then paused with a look of utter amazement on his face. The look gradually faded to a grin of understanding, and he tiptoed out, closing the door softly behind him.

FARM EQUIPMENT ESSENTIAL

Successful Management of Crops Depends Greatly Upon Efficiency of Implements.

The successful management of a modern farm largely depends upon the efficiency of the equipment with which the work is performed, specialists of the United States Department of Agriculture point out.

The equipment of the average farm can be divided into about three more or less distinct classes, as follows: First and most important, are the buildings, fences, implements, machinery, wagons and all appliances used in the more important farming operations; second, utensils and machinery used in connection with the dairy, garden tools, butchering outfit, and the numerous small things for general use about the place; third, the tools, materials, and facilities for keeping the first two classes of equipment in good working order.

In order to secure the greatest efficiency, all implements and machinery should be properly housed when not in actual service, so as to be in good working condition when required for [illegible]

Goodridge Mercantile Co.,
of Goodridge, say:

De Laval cream makes the best butter

-Like Butter?

WHETHER you make butter yourself or sell butter-fat to a creamery, the value of your cream depends largely on the kind of butter it will make.

It is easy to prove that De Laval cream makes better butter. Every first prize awarded at the Convention of the National Buttermakers' Association since it was started twenty-eight years ago, has gone to butter made by De Laval users, or from gathered cream largely De Laval-separated.

The De Laval Separator is more sanitary; its bowl runs at lower speed and delivers the butter-fat globules unbroken. It is used in practically all of the world's creameries, because it gives not only more cream but better cream as well. And the fact that the De Laval runs at lower speed adds years to its life.

Let us demonstrate to you why the De Laval is the World's Standard Cream Separator

Sooner or later you will buy a

De Laval

MAY CONTROL BOXING

Measure to be Introduced Aims to Eliminate Promoters and Give Militia Control.

Boxing in Minnesota will be taken out of the realms of high finance, if the state legislature passes a bill soon to be introduced by the house and senate committees of military affairs. The bill, as now drawn by the National Guard association, which will press it for passage in legislatures all over the country, does these things:

Places boxing under the sole control of [illegible] National Guard and [illegible] Naval Militia, through a state [illegible] commission to be made up of [illegible] those two organizations; [illegible] be staged chiefly by units [illegible] organizations.

[illegible] in all parts of the state [illegible] on the number of bouts [illegible] tion limit is set from [illegible] to 20 rounds and decisions [illegible] permitted, but made con[illegible]

[illegible] "millionaire purses" for fights [illegible] sota by fixing maximum [illegible] prices at $3.

Co[illegible] Favor Grading Bill.

Designed to prevent conflict and confusion [illegible] and state grain grading in anticipation of restoration of Minnesota grades, a bill by Representative Nels [illegible] was recommended for passage by the house committee on grain and warehouses.

H. C. Flannery, assistant attorney general serving the state railroad and warehouse commission, prepared the bill. Chairman C. M. Bendixen pointed out that warehousemen must protect themselves against the possibility of being compelled to sell under federal grades grain bought on state grades. Representatives A. C. Welch and C. R. Wright answered that Minnesota farmers will be glad, nevertheless, to get back to Minnesota grain grades.

Quality will determine grain values regardless of grades, Commissioner O. P. B. Jacobson of the railroad and warehouse department said, because grain dealing is largely on sample, and favorable action followed.

The house municipal affairs committee recommended the "dog" bill to pass. This proposed law provides that in all communities except first class cities, counties and cities may license dogs, put the license money into a fund and use this money to pay damages to owners of livestock or fowl which are killed or injured by dogs. The county under the bill then may hold the owner of a dog for the damages paid out of this fund. The committee raised the license fee to $5 on male and $5 on female dogs. Country members said they vigorously would oppose this bill on the floor of the house on the ground that the average farmer required from one to three dogs.

Food Bill Killed.

The committee on public health killed Representative F. E. Miner's bill prohibiting the manufacture or preparation of food in basements. Several protested against the bill, saying it would require rebuilding of the finest hotels in the state to comply with this law if passed.

LEGISLATIVE SIDE LIGHTS

Voters, physically unable to get to the polls could cast their ballot by mail under S. F. 500, sponsored by Senator J. H. Hall.

Members of the senate general legislation committee refused to constitute themselves a board of musical experts and killed two bills each advocating a state song for Minnesota.

Mink, fisher and marten may be trapped only from Dec. 1 to March 1, instead of April 1, as the law now stands, if Representative Henry Spindler puts through H. F. 673. The restriction is asked because of the growing scarcity of these animals.

Attorney General Clifford L. Hilton's opinion on the tonnage tax bills seems to have pleased everybody. Messrs. Welch, Bendixen, Warner, Trowbridge and Wilkinson, who introduced tonnage tax laws, all expressed themselves as satisfied, and opponents of any tonnage tax claim the opinion will make a tonnage tax impossible this session.

Sharp words passed before the house educational committee on a hearing over the bill providing part time education for children and adults. Mrs. F. A. Kingsley of Minneapolis said it made a "fetish" of vocational education. Dr. C. A. Prosser vigorously defended the measure and said it would give working boys and girls a chance for training.

Favorable action on the Brooks-Coleman bill giving state control of street railway rates is expected soon by the senate committee on general legislation. Hearings on the bill ended and a subcommittee is drafting amendments to meet constructive criticism of the bill as it stands.

Because chickens may scratch gardens with impunity and there is no remedy, because they are taxable, Representative A. E. Nollet has introduced a bill providing that they may be impounded and damages assessed against owners of the fowls, in case they scratch too freely.

State Lawmakers

PASS FOUR MAJOR BILLS

Public Markets Measure Sanctioned by Majority of 82—Highway, election and Co-Operative Bills Receive Endorsement.

Four measures of major importance were passed by the House of Representatives at the close of last week's session. It was the largest day's business accomplished by the lower branch at this session.

Two of the bills passed have already passed the Senate and the other two now go to upper body for action. The bills follow:

The bill to make the Minneapolis Chamber of Commerce, Duluth Board of Trade and South St. Paul Livestock exchange public markets, opening their membership to all kinds of co-operative organizations. The vote was 95 to 13.

An amendment to the election law which will prevent candidates defeated in the primary from running as independents. The vote was 81 to 36.

The highways administration bill, providing for control by a single commissioner. The vote was 103 to 19.

A co-operative bill, providing that the state commissioner of agriculture shall assist in the organization and conduct of co-operative associations, auditing their books on request, etc. The vote was 98 for and none against.

Vote on Road Bill.

The vote on the highways bill came after consideration at three sessions. Twice attempts were made to amend the bill to provide for a commission to control the building of Minnesota's highways system.

On the final roll call the following representatives voted against the road administration bill: Anderson, Theodore Christianson, [illegible] Eaton, Gertner, C. M. Gislason, [illegible], Haugland, Iverson, Jacobson, [illegible], L. E. Olson, Lars Olsen, Spindler, [illegible], Thompson, Thorkelson, [illegible] and Welch. The following were absent and not voting: Cameron, [illegible], F. J. Green, Levin, Miner, [illegible], Pederson, Tim Perry and West. All the others were recorded in favor of the bill.

Little Debate on Market Bill.

Debate on the bill to make the grain and livestock exchanges was short. Passage of the bill had been conceded, following an opinion by the attorney general that it was constitutional.

Representative Wilkinson of Lake Elmo spoke for the measure. He argued that all marketing machinery was under state supervision and regulation, except the private exchanges, in which prices are fixed for farm products.

Representative Asher Howard spoke against the bill. He said that an identical bill had been passed in Nebraska two years ago and that the first application under it has yet to be made to the Omaha Chamber of Commerce. He said that the question of reasonableness would have to be passed on by the courts, despite the opinion of the attorney general as to legality.

Primary Defeat Final.

By a vote of 81 to 36 the House passed the Senate bill to prevent a candidate defeated in the primaries from running for the same office at the general election following.

In adopting the bill by Senator H. N. Benson, chairman of the Senate elections committee, the House overrode Nonpartisan league and Socialist objections.

At the last primary election Dr. Henrik Shipstead sought the Republican nomination for Governor. He was defeated. At the general election following he sought election as an independent. Under the bill passed, a repetition of this would not be permitted. The bill will now go to the governor for his signature.

LAND BILL IS INTRODUCED

Bills, designed to promote drainage and cut-over land development, a so-called roadhouse bill, and Minneapolis measures for charter curative and city planning enabling acts, featured a list of twenty-seven new bills introduced in the House of Representatives.

Roadhouses, dance halls, pool halls, bowling alleys, theatrical and other shows and even circuses outside of cities and villages will be placed under regulation by county boards of commissioners in the event of passage of the bill by Representative J. R. Sweitzer, St. Paul. It provides that the county boards may prohibit, or license and regulate such places and amusements.

Investigation to determine the most economical and efficient methods of clearing and developing cut-over lands is made the duty of the University of Minnesota through the college of agriculture, under a bill carrying an appropriation of $25,000.

A drainage survey is committed to the state agricultural experiment station under a bill introduced by the drainage committee.

"Soldiers' Rests" will be established as burial places for deceased veterans under a bill by Representative S. W. Child, Minneapolis.

Odd Insurance Policy.

The announcement was made in English papers the other day that a Yorkshireman had taken out an insurance policy against the laying violent hands on his mother-in-law! It appears that the old lady was so frightened of personal injury at the hands of her son-in-law that she made a will leaving him a substantial legacy, if only he would keep his hands off her. Being equally afraid of his ability to hold his temper in check over what might prove a considerable number of years, he went to a firm of underwriters and fixed up an insurance policy covering this queer risk.

Wood in Bowling.

Wood supplies the principal apparatus for playing a number of games where rolling balls have a part to perform, says the American Forestry Magazine of Washington. The bowling alley is well known. The specially made floor of the alley is generally of maple or of longleaf pine. Lignum-vitae is regarded as the best wood for bowling balls. It possesses the requisite weight and is exceedingly hard and tough. The pins are generally of maple. This is sufficiently hard to stand much pounding, and no other of equal cost is so satisfactory.

DISEASE CAUSE OF ANIMAL LOSS

Three-Fourths of Ailments Which Ruin Valuable Herds Can Be Prevented.

STRICT SANITATION NEEDED

Contagious Maladies, Sporadic Ailments, Parasitic Troubles, Accidents and Neglect Are All Quite Disastrous.

(Prepared by the United States Department of Agriculture.)

Every year the people of the United States lose over $200,000,000 directly (and no one knows how much indirectly) through diseases of farm animals. This is a large toll when divided on a per capita basis, and when it comes home to the farm stock-raiser who finds a valuable animal dead in the barn, or an epidemic spreading into his herd, the loss is sometimes disastrous. The most regrettable feature of the case is that probably three-fourths of the loss could be prevented.

Five Causes of Disease.

There are five principal causes of disease and death of farm animals—contagious diseases, sporadic disease, parasitic troubles, accidents and neglect. Contagious diseases can be avoided, or at least their consequences greatly diminished, if farmers will learn to co-operate with the United States Department of Agriculture and the various state livestock and sanitary authorities who are striving to maintain animal health. Farmers should report promptly to the nearest officials any suspicion of the presence of contagious disease, and they should observe carefully all regulations in regard to quarantine, sanitation, and care of animals as protection against contagion.

Tuberculosis is one of the worst scourges among animals and it thrives best in damp, dark, ill-ventilated stables. It is less common among animals running at large. Light, dry, well-ventilated stables and dry, clean barnyards or paddocks are essential to the health of farm animals. One valuable point in combating contagious diseases, especially tuberculosis, is to start the herd with animals that not only are free from disease but are of stock that is not predisposed to disease. Official tests of herds are made on request and through co-operation of the United States Department of Agriculture with livestock sanitary officials. Purchase of breeding stock from these herds is a wise precaution. Care also should be taken to obtain stock adapted to climatic and local conditions. The other sources of animal loss are largely a matter of intelligent and careful handling.

Proper Care Keeps Farm Animals Healthy.

Sporadic and incidental diseases, such as disorders of the digestive and respiratory tracts, can be avoided largely by proper handling and feeding. A proper balancing of rations has a material influence on the health of live stock. Too much of any food element is likely to result in digestive disorders, thus predisposing the animal to disease.

Parasitic diseases also carry off large numbers of valuable animals every year. They are largely the result of improper housing and neglect. The average farmer can not be expected to have the time and aptitude for study which will keep him apace with the latest developments in feeds and feeding, animal nutrition and medicines, hygiene, and other important matters related to the stock-raising industry. He can, however, avail himself of the benefit of the studies and demonstrations of specialists who have devoted their entire time to these subjects. Every state agricultural college maintains a corps of specialists whose publications and services are available.

Department Offers Aid.

The department of agriculture is constantly giving out important information in books and bulletins which may be had on request and in every state the department has representatives combating animal diseases. It is well to consult a local veterinarian in case of any disturbing symptoms and to report to the state veterinarian or the United States Department of Agriculture, any symptoms which indicate the possibility of an epidemic. The wise breeder is ever on the lookout to prevent disease instead of waiting until a cure is necessary.

[illegible] meeting of the board [illegible] of Consolidated School Number 8, Pennington county, Minnesota, was held on the 19th day of February, 1921, at 8 o'clock p. m., at Clerk's office in the village of Goodridge, Minnesota.

Members present: Palmer O. Tvedt, G. C. Gulrud, M. Vaughan, C. Thompson, M. O. Seavey and Nick Bundhund.

Members absent: None.

C. Thompson, a member of said board, offered the following resolution and moved its adoption:

WHEREAS, The qualified electors of Consolidated School District No. 8, Pennington County, Minnesota, at an election called and held for the purpose on the 5th day of February, 1921, have heretofore declared by their votes in favor of issuing the school district's bonds for the purpose of refunding the floating indebtedness of said district, pursuant to a resolution of the board of education of said district passed on the 12th day of January, 1921, and

WHEREAS, It is in the opinion of this board proper and necessary that such bonds be issued in the amount and on the terms and conditions hereinafter hereinafter stated.

Now, Therefore,

BE IT RESOLVED, That said school district issue its negotiable coupon bonds in the sum of ten thousand dollars—$10,000—for said purpose, pursuant to the laws of Minnesota now in force.

That said bonds shall be ten—10—in number, numbered from one—1—to ten—10—inclusive, be of the denomination of $1,000 each, be dated the First day of February, 1921, be payable on the first day of February, 1936, and bear interest at the rate of seven per cent per annum, payable semiannually on the first days of August and February in each year.

That each of said bonds shall be in substantially the following form with the necessary variations as to numbers, which said form is hereby approved and adopted;—

No.......... $1000

United States of America,
State of Minnesota,
County of Pennington,
Consolidated School District Number 8,
REFUNDING BOND.

KNOW ALL MEN BY THESE PRESENTS, That Consolidated School District Number 8, Pennington County, Minnesota, acknowledges itself indebted, and, for value received, promises to pay to bearer the sum of

ONE THOUSAND DOLLARS

—$1000—in Gold Coin of the United States of the present standard of weight and fineness, on the first day of February, 1936, with interest on said sum from date until paid at the rate of seven per cent per annum, payable semiannually on the first days of August and February in each year, upon presentation and surrender of the annexed interest coupons as they severally become due, both principal and interest being payable at the Northwestern Trust Company in the City of St. Paul, Minnesota.

This Bond is issued by said school district for the purpose of refunding its outstanding floating indebtedness, in accordance and full compliance with the laws of the State of Minnesota thereto enabling, including section 3688, General Statutes: Minnesota, 1894, and the acts amendatory thereof and supplemental thereto.

It is hereby CERTIFIED and RECITED that all acts, conditions and things required by the laws and constitution of the State of Minnesota to be done precedent to and in the issuance of this bond, have happened and been duly performed as required by law, and that the indebtedness of said school district, including this bond, does not, nor did the indebtedness refunded hereby, at the time the same was incurred exceed any constitutional or statutory limit.

For the prompt payment of the principal and interest of this bond, according to its terms, the full faith, credit and resources of said school district are hereby irrevocably pledged.

IN WITNESS WHEREOF the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, has caused these presents to be signed by its President and Clerk and countersigned by its Treasurer, as of date this First day of February, 1921.

PALMER O. TVEDT,
President Board of Education.
NICK BUNDHUND,
Clerk Board of Education.

Countersigned,
C. T. THOMPSON,
Treasurer Board of Education

and that there be coupons attached to each of said bonds, which shall be in substantially the following form:—

No $35.00

On the first day of August, February, A. D. 1921,

Consolidated School District Number 8, Pennington County, Minnesota, will pay to bearer Thirty-five Dollars—$35—in Gold Coin, at Northwestern Trust Company, St. Paul, Minn., being the semiannual installment of interest on its Refunding Bond, dated February 1, 1921.

No.

PALMER O. TVEDT,
President.
NICK BUNDHUND,
Clerk.

[illegible] said form, and the [illegible] clerk to sign the coupons [illegible] by their own signatures or the printed lithographed or engraved facsimile thereof, all in behalf of said school district, and that when said bonds shall be so executed, they shall be placed in the custody of the treasurer, to be by him delivered to the purchaser thereof on their sale as hereinafter provided.

RESOLVED FURTHER, That this board will meet at Clerk's office in the village of Goodridge, Minnesota, on the 15th day of March, 1921, at 2 o'clock p. m., for the purpose of receiving and considering bids for the purchase of said bonds.

That notice of said meeting shall be published for two successive weeks on February 25, 1921, and March 4, 1921, and the Goodridge Banner, published at Goodridge, Minn., in said district, is hereby designated as the newspaper in which said notice shall be published, and that the clerk of said board be and he is hereby directed to give two weeks' published notice of said meeting in said newspaper pursuant to this resolution.

That said notice shall be in substantially the following form:—

NOTICE IS HEREBY GIVEN, That bids for the purchase of $10,000 Consolidated School District No. 8, Pennington County, Minnesota, bonds, will be received and considered by the Board of Education of said school district on the 15th day of March, 1921, at 2 o'clock p. m., at Clerk's office in the village of Goodridge, Minnesota. Said bonds are to be issued for the purpose of refunding the floating indebtedness of said district, are to be dated February 1, 1921, to be payable February 1, 1936, to bear interest at the rate of seven per cent per annum, payable semiannually on the first days of August and February of each year, and to be in the denomination of One Thousand dollars—$1000—each.

All bids must be without condition or qualification and must be accompanied by an unconditional certified cheque to the order of the treasurer of the school district, for ten per cent of the total bid, to be forfeited to the school district in the event that the successful bidder fails to take and pay for the bonds in accordance with the terms of his bid.

The Board reserves the right to reject any and all bids.

All bids must be addressed to the undersigned.

By order of the Board of Education.

Dated at Goodridge, Minnesota, this 19th day of February, 1921.

NICK BUNDHUND,

Clerk Consolidated School District Number 8, Pennington County, Minnesota, Goodridge, Minn,

AND WHEREAS, This board has duly investigated the necessary facts for the purpose of fully advising itself as to the validity of the district's warrants hereinafter described, and the legality of the indebtedness represented by said warrants respectively, purporting thereby to be owing by said school district to the different holders thereof, in order to refund the same, or such part thereof, as legally may be, into bonds of said school district, and

WHEREAS, This Board FINDS and DETERMINES that each and every one of the warrants in this resolution described was heretofore legally issued, and that each of them now represents the legal, outstanding and enforceable obligation of said school district, and that each of said warrants and the different items of indebtedness evidenced thereby are proper to be funded into bonds, the total of all of which warrants with the legal interest accrued thereon up to January 12th, 1921, aggregates in excess of the sum of $10,000.

Be it further

RESOLVED, That the proceeds of said school district's Refunding Bonds so to be issued as aforesaid be applied as far as they will avail for that purpose to pay the district's outstanding floating indebtedness which existed on the 12th day of January, 1921, said indebtedness being evidenced by said school district's warrants herein specified, and that as each warrant is paid the same be duly cancelled.

RESOLVED FURTHER, That the full faith, credit and revenues of said school district and of this board of education as such be and the same are hereby irrevocably pledged for the prompt payment of the principal and interest of the said bonds at maturity.

The numbers, date of issue, date of registration, and amount of the principal of each of said warrants so to be refunded, are as specified in Schedule "A" hereto attached.

M. Vaughan seconded the motion to adopt said resolution and the roll being called the same was adopted by the following vote:

Ayes: Palmer O. Tvedt, G. C. Gulrud, M. Vaughan, C. Thompson, M. O. Seavey and Nick Bundhund.

Nays, None.

CLEANING UP INSECT PESTS

Many of Hibernating Species May Be Destroyed in Winter By Cleaning Up Obscure Corners.

Much can be done now to reduce the possibility of insect plagues next summer if a little effort is directed toward the destruction of insect shelter areas. Around the grounds and gardens, under hedges, beside ditches, and in fence corners are bunches of insect-sheltering weeds or grass. By the time cold weather approaches many kinds of insects in the adult or immature stages have taken full advantage of these nooks and hidden away there for the winter. The bureau of entomology, United States Department of Agriculture, says that if these spots are cleaned up and the refuse cut and burned, many of these hibernating insects will be destroyed and the damage from such pests during the coming season will be materially lessened.

PROVIDE BATH FOR POULTRY

Chickens Cleanse Themselves by Wallowing in Soil and Dust Box Should Be Accessible.

Chickens never wash, as many other birds do, but cleanse themselves by wallowing in soil. Where board or cement floors are used in the chicken house, some means for dusting should be provided during the winter months, say poultry specialists of the United States Department of Agriculture. For a flock of 50 to 60 fowls a dust box 3 by 5 feet or 4 by 4 feet will generally be found large enough, and should be placed where it can be reached by sunlight during as much of the day as possible.

Fine, light, dry dust is the best kind with which to fill the box, but sandy loam is good. Road dust is recommended by many, but it is apt to be filthy. Coal or wood ashes may be mixed with the soil if desired.

FARM FOR CENSUS PURPOSES

Is All Land Which Is Farmed by One Person, Either by His Own Labor or With Assistance.

According to the 1920 census there are 6,449,998 farms in the United States. A "farm" for census purposes is all the land which is directly farmed by one person, either by his own labor alone or with the assistance of members of the household or hired employees. When a landowner has one or more tenants, renters, croppers or managers, the land operated by each is considered a "farm."

EMIL GRAMS, THEO. GILBERTSON, A. B. MANDT,
Directors

[illegible]

[illegible]

Miss May [illegible] was in Thief River Falls Saturday.

Miss Serin Tanem was in Thief River Falls Thursday.

Stewart McLeod was in Thief River Falls Monday.

Mrs. M. Vaughan was in Thief River Falls Tuesday.

N. Bundhund spent Tuesday night at the county seat.

Mrs. O. S. Kirklie was in Thief River Falls Wednesday.

Gilbert Gunderson visited the county seat Wednesday.

Albert Rohrer of Germantown was in Goodridge Wednesday.

Gilbert Benson of Malcolm was doing business in town Tuesday.

Miss Carrie Urdahl was the guest of Gretta Gulrud over Sunday.

Mr. and Mrs. M. G. Thoreson visited Thief River Falls yesterday.

Peggy Vaughan returned Tuesday to her home at Thief River Falls.

E. L. Kately returned Wednesday from a trip to the Thorhult country.

Misses Ida and Gertie Anderson were Thief River Falls visitors Saturday.

Miss Ruby Jensen spent the week end with friends in Thief River Falls.

A bunch of young people attended the dance at Ole Giving's Saturday night.

Miss Marie Nelson of Thief River Falls was a guest at the Jensen home on Tuesday.

Henry Clausen of Germantown was looking after business matters in town Wednesday.

Misses Christina Bundhund and Guida Gilbertson went to Thief River Fall Friday evening.

Mrs. Strand and little daughter of North Dakota are visiting her mother, Mrs. Ellen Iverson.

Marshall Race, who is attending school at Thief River Falls, spent the week end at home.

Mrs. N. Bundhund went Saturday to Thief River Falls to visit her daughter, Mrs. Lee Rabcock.

Willard Hegstrom and Mary Anderson of Kratka were in Thief River Falls Wednesday.

Theo. Torgerson returned Saturday Kansas. He has been quite ill during his stay down there.

Misses Gladys Wilson and Eleanor Bauer were entertained at the O. N. Urdahl home Sunday.

Miss Leafy Graff returned Monday to her studies at the Thief River Falls schools after a week end visit at home.

Misses Guida Gilbertson and Christine Bundhund attended the basket ball game at Thief River Falls Friday evening.

For Sale—Sweet Clover Seed, at 12 cents per pound. Also 800 bushels of Oats, cheap.—Sidney Hemmestvedt, Kratka, Minn. f11 4t p

Miss Ethel Vaughan visited friends at Thief River Falls over Sunday. On her return she was accompanied by her cousin, Peggy Vaughan.

Miss Guida Olson, who has been visiting her cousins, Misses Thelma and Guida Gilbertson, returned Saturday to her home at Brooten, Minn.

Harry and Miss Magna Erickson returned Friday afternoon from Bemidji, where they have been employed, and went out to their home east of town.

Owen Olson returned Thursday morning from a visit to Gully. He will be employed there at Knutson & Son's garage and begins his work March 15.

Mrs. Kitty Lang visited her daughter Kathleen Saturday at the hospital at Thief River Falls, where she is recovering from the effects of an operation.

The officers and directors of the Red Lake-Eastern Marshall Telephone company held a meeting Wednesday evening. Only routine business was transacted.

Miss Alice Swanson of Kratka returned yesterday from Thief River Falls, where she has been under medical treatment for the past three months.

Miss Marie Dahl, who has been teaching ten miles north of town, resigned her school on account of ill health and left Saturday for her home at Borup, Minn.

E. A. Carlson of Warren had great success in his canvass for the Farm bureau in Mayfield township Saturday, but he was taken ill and was obliged to return to his home Sunday.

Mrs. R. H. McDonald and Miss Mildred Argall entertained a number of their friends on Tuesday evening, Washington's birthday. The house was beautifully decorated with streamers of patriotic colors. At the close of the evening's entertainment a delicious lunch was served.

[illegible] services at Germantown [illegible] English [illegible]

Sunday, March [illegible]: German services at 10 a. m. English services at 2:30 p. m. at Germantown.

Sunday, Feb. 27. English services 10:30 a. m. at Erie.

H. LUTZ, Pastor.

Lutheran Church

Norwegian services at Erie 11 a. m. and Torgerson 3 p. m. of Feb. 27.

Y. P. S. meets at Goodridge 8 p. m. of Feb. 27.

G. A. HANSON, Pastor.

The American Legion

The American Legion boys held a little "stag" party among themselves Wednesday evening. A little smoke and a little feed was enjoyed and a pleasant social evening passed. They resolved themselves into a business meeting and closed the deal for leasing rooms over the Gaylord Lysbakken land office. The rooms will be run somewhat after the style of a club room. There will be meetings every Wednesday evening and the rooms will be open to Legion members at all times.

Phosphate for Sale

We have come to the opinion that the use of phosphate for fertilizer should be given a trial on our Pennington county lands, and will keep on hand from now on during the spring and early summer a stock of what is known as Acid Phosphate Fertilizer. We can furnish this in large or small quantities, and at reasonable prices.

HANSON & BARZEN MILLING CO.,
Thief River Falls, Minn.

Big Reduction

I will make a reduction of 20 per cent on all Horse Blankets, and Harnesses will be sold at reduced prices.

j20 4t p SEVER ANDERSON.

James Crosby returned Tuesday from Deer River, where he has been employed at the lumber camps.

For Sale—Five hundred bushels of Silver Mine oats and some barley.—Clarence Olson, Golden Valley, Minn. f6 tf 1mp

At the meeting of the Young People's society Sunday evening in the church lunch will be served by Mrs. H. A. Halvorson and Mrs. A. S. Gaudland.

G. A. Aubel, deputy collector, who was to have been in Thief River Falls on February 28 for the purpose of holding income tax meetings, has sent word that he will be unable to be there during February, but will hold meetings on March 1, 2, 3, 4 and 5.

If you want to sell your farm this coming season, now is the time to list it with us, as we are getting our lists of lands for sale ready so we can mail them to the prospective Iowa, Illinois and southern Minnesota buyers. Have yours on the list, it may be just the piece somebody wants.

LAND CO.

High School Party

The High school girls invited the boys to a substantial feed Monday night, on the condition that the boys provide entertainment. The boys certainly did their part well. A series of clever stunts, such as boxing bouts, orchestral music, fake band demonstrations, were pulled off in a very creditable manner. The leading performers were Donald Stein, Roy Olson, Joseph Christianson and Mr. Nystul. After the entertainment the girls made good their promise by serving a most substantial lunch.

INSECT DOES SMALL DAMAGE

Leaf-Roller Has Attracted Attention on Account of Its Attack on Many Vegetables.

A minute, green caterpillar, called the red-banded leaf-roller, has attracted attention through its attack on vegetable crops, particularly beans, sweet potatoes, asparagus and corn, as well as strawberries and other plants. The extent of the damage, however, which has been investigated by entomologists of the United States Department of Agriculture is not large, seldom being sufficient to warrant artificial control measures.

This caterpillar rolls a leaf shelter, the interior of which is rather difficult to reach with insecticides. Ordinarily, the rolled leaves can be clipped and burned, as they are easily detected. Arsenate of lead, two or three pounds to 50 gallons of water, is recommended as a foliage spray when the leaf-roller becomes abundant.

MAKE WOODLAND PROFITABLE

Plan to Have It Permanently Productive by Protecting It From Fire and Overgrazing.

Make your woodland permanently profitable by protecting it from fire and from overgrazing; select for cutting only the mature, defective, overcrowded and inferior kinds of trees, leaving the straight, thrifty and better kinds to grow for a future crop.

Farmers' Short Course

Prominent Men to Be Here All the Week, Monday, March 7, to Friday, March 11

A Farmers' Short Course will be conducted here next week. Prominent men have been secured for every session. Practical farm problems will be given consideration and study. The following is a tentative program:

Monday—Farm Management, by Mr. Calvert.

Wednesday—Live Stock, by Mr. Bauer.

Thursday—Poultry, W. A. Chapman; Club Work, A. S. Kittelson.

Friday—Soils, Mr. Nesarm.

Being that the village and township elections occur on Tuesday, it was thought best not to hold meetings on that day. The sessions will be held in the school house; the morning sessions to begin at 10 o'clock, and the afternoon sessions at 1:30.

This will be an instructive course, and all who possibly can should plan to attend these meetings, whether you are connected with the business of farming, directly or indirectly. These meetings will be of value to you. Every session is important. Plan to be present at the first meeting. Don't wait till your neighbor tells you how much you missed by not being there. Come Monday, come Wednesday, come Thursday, come Friday. Come on time and come for business.

Since the above was written we are informed that a slight change in the program has been made. Mr. Bauer, the live stock man, will be here on Tuesday instead of Wednesday.

A Big Meeting

The Community club meeting Friday evening brought together an unprecedentedly large crowd. Two men well posted in topics of interest to farmers had been booked to speak and the turn out was immense.

B. T. Scott, secretary of the Minnesota Holstein Friesian association was the first speaker. He spoke of the value of having purebred sires as compared with the common grades now used largely in the United States. He said that only two per cent of the dairy cows of the state are registered. He advocated the purchase of a purebred sire and the upbuilding of the dairy herd.

W. A. McKerrow, head of the live stock and dairy extension division of the state university, spoke. His talk dealt entirely with marketing conditions. As one of the Committee of Seventeen in the United States, which was appointed by President Howard of the American Federation of Farm Bureaus for the investigation of production and marketing conditions throughout the nation, he stated that the committee was about to present the greatest marketing program to the people that has ever been laid out.

There was music by the band and singing by the Glee club.

After the conclusion of the program there was a business meeting. Officers were elected as follows: President, Stuart McLeod; vice president, N. H. Dahl; sec'y-treas., M. G. Thoreson.

Program committee; John Nystul, Mrs R. H. McDonald, Mrs. M. G. Thoreson, Mrs. N. H. Dahl, Mrs. Morgan Vaughan.

Resolutions committee: B. O. Norby, John Nystul, Theo. Tandberg.

Committee on Arrangements for Short Course, J. J. McCann, B. O. Norby.

The meeting was followed by a big free lunch in the basement.

Big Reduction

I will make a reduction of 20 per cent on all Horse Blankets, and Harnesses will be sold at reduced prices.

j20 4t p SEVER ANDERSON.

MARRIED

Mr. Oscar Iverson and Miss Dora Swendz of Grafton, N. Dak., were married at Grand Forks on Friday, Feb. 18. They arrived here last Friday on their wedding trip and are at present guests of the groom's mother, Mrs. Ellen Iverson.

Caucus

The voters of the village of Goodridge will meet at the hall this evening to nominate candidates for village officers to be voted upon at the annual election next Tuesday. As the fourth number of the Lyceum course is scheduled for tomorrow night it was thought best to call the caucus for this evening.

Federal Farm Loan Act Constitutional

The Federal Farm Loan act is constitutional, according to a decision of the supreme court of the United States, announced Monday.

The act has been on trial in various courts for more than a year. The clause which caused the litigation is that which provides that its bonds, secured by mortgages on farm real estate, shall be tax exempt.

Interests opposed to the farm loan act used this feature as a basis for fighting the entire scheme of operation of the Federal Farm Loan bank bill the supreme court has upheld the act in its entirety and the bank will again function as before the injunctions were served.

The St. Paul farm loan bank will at once recommence operations, according to announcement made Monday. Employes who have been without work for the past year already have begun to plan the business for 1921, which, local bankers believe, will furnish immediate relief to the financial interests of the Northwest.

The decision came in a suit which has halted the business of the farm loan system for several months. The vote of the court on the question was 6 to 2. Justices Holmes and McReynolds dissented on the ground that the court had no jurisdiction. Justice Brandeis did not sit in the case.

The decision is expected to aid greatly in relieving the financial distress now confronting agricultural interests, as it will now be possible to extend more loans to the farmers.

MAKE COMPOST HEAP FOR USE IN GARDEN

Start By Laying Down Bed of Fresh Stable Manure

[illegible] Vegetables [illegible] and Other [illegible] Size [illegible] Varies.

(Prepared by the United States Department of Agriculture.)

[illegible] decayed vegetables [illegible] vines [illegible] and the organic rubbish that collects about the place during a busy summer may be cleaned up and put to work again through the agency of a compost heap. Start the heap by laying down a bed of stable manure which has not been burned or heated. The size of the plot will vary with the amount of refuse to be used; for ordinary uses, if the bed is made 8 feet long by 6 feet wide and 2 feet deep it will serve the purpose. Over the manure spread a two-foot layer of refuse and cover it with another layer of manure. This last layer [illegible] only a foot in thickness. Repeat the layers until all the waste has been disposed of and then cover the whole with a layer of earth.

Don't Leave Manure in Piles Exposed to Weather Conditions Favorable to Loss By Washing—Use It to Make a Compost Heap.

If it is desired to add to the heap from time to time the top layer may be opened and the new material emptied into the hole thus made. This is convenient for the suburban home where there is no animal to consume the kitchen waste. In the spring the heap is well mixed with a fork and the compost is ready to be spread on the garden plot. The heating manure will effectively destroy any weed seed present and will also break down the structure of most of the materials that have been thrown upon the pile. The process may be continued indefinitely by simply adding enough manure to insure heating. Compost is especially valuable for use in hotbeds and coldframes.

Classifying It.

"I hear they penalize bachelors in France."

"How do they classify the impost?"

"Luxury tax."—Louisville Courier-Journal.

WM. S. BATTIS

Mr. Battis has been one of the most popular artists on the American platform for twenty years. He has given practically his whole professional career to the interpretation of the characters of Charles Dickens' novels. The entertainment is educational, full of humor, and holds attention every second through its great dramatic appeal.

Mr. Battis is not an impersonator of the ordinary type. He makes his characters live. They step right out of the books and talk to you.

COWPEAS FIRST USED AS FOOD FOR HUMANS

Earliest Published Record in America Was in 1798.

Plant at Present Is Best Known and Extensively Grown Leguminous Crop in Southern States—Can Be Grown in North.

(Prepared by the United States Department of Agriculture.)

The cowpea is undoubtedly a native of Central Africa. A wild plant differing little from the cultivated cowpea occurs throughout much of that continent. Hybrids of this wild plant and the cultivated cowpea are readily obtained. The cultivated cowpea consists of three main groups—the asparagus bean, the catjang, and the cowpea, each of which represents a group of varieties having much in common but connected through intermediate varieties. The cowpea is the most important of the three groups.

The large number and great diversity of cultivated varieties throughout Africa and over the southern half of Asia and the adjacent islands as well as the Mediterranean region of Europe indicate that the cowpea is of ancient cultivation for human food. It was early introduced in the Spanish settlements in the West Indies and was grown in North Carolina in 1714, probably coming from the West Indies. Its culture in Virginia was reported about 1775 and no doubt was quite general in the United States early in the Nineteenth century.

A Good Stand of Cowpeas.

Without doubt, the cowpea is the Phaseolus mentioned by the old Roman writers. In Italy the Blackeye cowpea is still called by the same name as the kidney bean, namely, "fagiolo," which is the Italian equivalent of Phaseolus. In East Africa both the wild and cultivated cowpeas are called "kunde," while in India, where the catjang is more extensively cultivated, the name "lubia," with many others, is used. In America the cowpea was first known as "callivance" and later as "Indian pea," "southern pea," "southern field pea," and "cornfield pea." The first published record of the name cowpea was in 1798 and applied apparently to a single variety.

The cowpea at present is the best known and most extensively grown leguminous crop in the Southern states, but it can be grown profitably much farther north. Although it succeeds under a greater diversity of climatic, soil and cultural conditions than most other legumes, the best results are obtained in [illegible] provement, and seed production by a thorough understanding of the [illegible] quirements and the best varieties [illegible]

Romance and James

By DORA MOLLAN

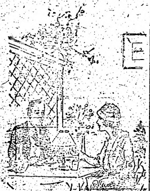
(© 1921, by McClure Newspaper Syndicate.)

James Manning was in love with two girls at the same time. If you can imagine a worse predicament for a young man who is both shy and conscientious—I can't. James belonged to the serious, good-looking type. He was dark almost to swarthiness. Back of him, undoubtedly, was an Italian ancestor, but very well plastered over with New England's reserve. Stick your finger down through the crust of Puritan constraint and there was a bubbling well of romance in James.

First, there was Miss Merritt in the office—and right here we must own up that there was a flaw in the dark eyes of our hero—he was a trifle near-sighted and would not wear glasses. Still it was not entirely due to that unfortunate fact that Miss Merritt had worked within ten feet of James for a month before he discovered what a really nice girl she was.

She was so negative in appearance that one missed her fine points at first. The highest paid writer on "Advice to business women" could but have approved of her dress. Spectacles, yellow tinged, gave her eyes a greenish tint. Her light brown hair was severely coiffured and cheeks were guiltless of color, either natural or naturalized.

First accidentally, and then intentionally, James formed the habit of walking with Miss Merritt to the corner, where, after business hours, she took her car. It followed as a matter of course that he called. Then he came regularly twice a week. Sitting in the dim gas light of the stiff boarding house parlor, their conversation ranged from the latest increase in trolley fares to the League of Nations. James decided that Miss Merritt was a most sensible young woman and all his sober judgment could wish for.



It Began by His Passing the Salt.

But there were evenings when sober judgment and James had nothing to do with each other, when the [illegible] for [illegible] the cracks of his reserve like the [illegible]

[illegible] bings he spoke, not at all to Miss Merritt.

Then James would [illegible] himself to a Bohemian tea room which frequented by fashionably gowned young women. Over the supper he would revel in the life and gayety of his surroundings without ever joining it, though the way was made easy for him as it always is for fine young men of interesting appearance. Then a picture featuring some beautiful [illegible] would lure him. Afterward [illegible] would return to his [illegible] [illegible] at the [illegible]

That [illegible] night he [illegible] Pauline [illegible] Pauline of the [illegible] and wonderful marcelled [illegible] cheeks, vividly [illegible] a kissy little [illegible] [illegible] [illegible] the [illegible] that [illegible] [illegible]

[illegible] and another girl, a girl [illegible] shell-rimmed spectacles and [illegible] clothes [illegible] same, though they had [illegible] for months. Miss Merritt's first name was Pauline, too.

It passed that evening, like a rapturous dream. They parted in front of the theater, Pauline insisting that "Jimmie" leave her there, hinting mysteriously at reasons why. Yes, she would try to slip away on the same evening of the following week. And she did.

So it went on for a month. Pauline grew more and more beguiling, and lost nothing of the air of mystery which concealed her identity as completely as the fur-trimmed wrap concealed her figure, and meanwhile Miss Merritt grew more interesting and companionable.

Came a Sunday when the temperature fell into the icy arms of the arctic winds, and that part of James' Italian ancestor within him crawled down into the depths of his nature and fell fast asleep. But his Puritan principles were right in their element. They decided that never, no never, would James be happy with anyone as frivolous as Pauline. It was in this frame of mind that James went to call on Miss Merritt that evening.

That seventh sense, which warns all women when a man is about to propose, was on the job, and Miss Merritt's reply was prompt.

"Mr. Manning," she said calmly, "are you sure you would rather marry me than any other woman in the world? I will leave you for 20 minutes, then I shall return and ask you the same question again."

James Manning gazed at the door through which Miss Merritt had passed until the sound of her footsteps ceased. He hid his face in his hands. How did she know? Then deep within him something stirred and there came a great longing for Pauline—Pauline who, soft and fragrant and elusive in her luxurious garments, typified all that Miss Merritt lacked. He would find her. He would take her in his arms and tell her how he loved her. James raised his head, stood up, stretched out his arms involuntarily to the vision—and some one entered the room and walked straight into them!

"Would you rather marry me than any other woman in the world, Jimmie?" The voice came with muffled sweetness from James' shoulder. Utterly confused, supremely happy, while at the same time loathing himself for his vacillation, James answered, "Yes, dear."

Pauline drew away from James' embrace. She removed the kippy little hat and the beguiling veil, slid out of the enveloping wrap and from somewhere produced a pair of shell-rimmed spectacles. Putting them on she looked at the bewildered-to-the-point-of-speechlessness James. His eyes roved helplessly back and forth from the girl to the discarded garments.

Pauline Merritt laughed merrily. "It's as simple as this, Jimmie James. A wealthy cousin of mine was married last month. She sent me all her old clothes. And as for these"—touching the shell-rimmed glasses—"why, they are a penalty for having gone without too long."

"But I—loved you both!" James [illegible] to be [illegible] himself the [illegible] to [illegible] [illegible] Pauline [illegible]

[illegible] in the past [illegible] [illegible] Most men are [illegible] [illegible] the said.

CAVES OF WONDROUS BEAUTY

Those Known as "Marble Halls" in Josephine County, Oregon, Are Marvelous Formations

[illegible] limestone caves in various parts of the country have been set [illegible] national monuments, the most [illegible] of all being the Oregon [illegible] known as "Marble Halls" in Josephine county, Oregon. [illegible] underground chamber of [illegible] chiseled limestone [illegible] ceiling 200 feet in [illegible] mountain, 6,000 feet [illegible] honeycombed with [illegible]

[illegible] are at an elevation [illegible] other openings [illegible] entire mountain [illegible]

[illegible] stalactites and stalagmites [illegible] caves and passages [illegible] appearance of a [illegible] the actual extent [illegible] wonderful galleries is unknown.

[illegible] passageways lead in all [illegible] which have never been explored. Streams of water are found [illegible] and in places larger [illegible] heard plunging into [illegible] currents of wind are [illegible] passages that will [illegible] extinguish an open light, no [illegible] the rush of water. [illegible] to describe the [illegible] the formations.

[illegible] TO SHELTER ALL FARM EQUIPMENT

[illegible] Is Proper Time for Making Needed Repairs.

Careful Inspection of All Implements Should Be Made and Everything Got in Readiness for Farm Operations in Spring.

(Prepared by the United States Department of Agriculture.)

Much of the loss and annoyance caused by breakage of farm equipment may be avoided by careful inspection and repair of weak parts before the season's rush begins.

The proper time for making repairs is during the winter and at times when the regular farm work is not urgent, specialists of the United States Department of Agriculture say. As the season advances, implements which will be needed for the next farming operations should be gone over and given any attention required to make them ready for immediate use. If the farm machinery is not properly housed during periods of disuse, it is all the more important that it should be given a careful overhauling. After inspecting the implement, tightening bolts, strengthening weak parts, and renewing broken pieces, the necessary painting should be done. Frequent applications of dark metallic paint, consisting either of red lead or venetian red and raw linseed oil, not only improve the appearance of farm implements, but add greatly to their durability.

This is an age when appearances count, and a farmer's standing in the community frequently is governed by the appearance of his farm equipment. The man who spends his spare moments in the repair of fences and gates and maintaining a neat appearance of the entire farm has a better chance of becoming a leader in his community than the man whose farm has a slovenly appearance.

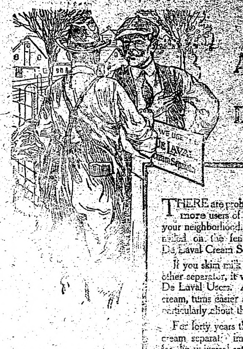
ANALYSIS OF FARM BUSINESS

Extensive Studies Have Been Conducted by Department of Agriculture During Past Year.

In order to put at the disposal of farmers information which will enable them to place their farming operations on a more businesslike basis, the United States Department of Agriculture has conducted extensive studies in farm business analysis. During the last year 400 records were obtained in farm business analysis surveys on two general crop and live-stock areas in Iowa, 800 on a fruit and truck area in Florida, 136 on a general farming area in New Hampshire, 50 on a similar area in Ohio, 100 on a co-operative tractor and farm organization study in two areas in Ohio. Several of these surveys have been in progress for a number of years.

Similar studies on specialized types of farming are being made in co-operation with state agriculture colleges. In Kentucky the tobacco crop on 75 farms in each of two areas has been intensively studied, with a complete farm survey record taken on many of the farms at the end of the year. In New Jersey about 100 enterprise surveys [illegible]

Goodridge Mercantile Co., of Goodridge, say:



WE USE DE LAVAL Cream Separator

Ask your neighbor about the De Laval Separator

THERE are probably a number of the 2,500,000 and more users of De Laval Cream Separators right in your neighborhood. You can find them by the signs nailed on the fence or barn, reading "We use the De Laval Cream Separator."

If you skim milk by the gravity method or with any other separator, it will pay you to talk to some of these De Laval Users. Ask them if the De Laval gets more cream, turns easier and requires less attention. Ask them particularly about the De Laval wearing qualities.

For forty years the De Laval Company have led in cream separator improvements. There must be a reason for the universal satisfaction which the De Laval gives.

Ask your neighbor about the De Laval
Then stop in and see us

TAX PAYERS RESPITE

Solons Pass Emergency Measure Giving One Month's Respite to Tax Payers.

St. Paul—Upon recommendation of Samuel Lord, chairman of the tax commission, both houses of the Legislature rushed through special legislation to extend the time for payment of personal property taxes from March 1st to April 1st.

Mr. Lord appeared before the house committee on taxes and explained that thousands of men and women in the state who have large personal property taxes to meet would be unable to pay them. He advised an extension of time.

Mr. Lord told the committee that the personal tax delinquencies will exceed all previous records this year unless relief is granted. High taxes and tight money were assigned as reasons for the condition.

Representative C. F. Serline has already introduced a bill to change permanently the personal property tax delinquency date to April 1st. Another change in personal property tax laws has been proposed by Representative Sherman W. Child. It would increase the exemption from $100 to $200. Representative Thomas H. Girling has also introduced a bill granting heads of families with two or more children additional exemptions.

The House committee on taxes has not acted upon many of the important tax measures before it. It has let everything go until the proposed tonnage tax bills or their substitutes were acted upon.

The state highways bill will be the center of interest in the Senate during the next ten days and to some extent in the House, for although the House has passed the administration bill the county refundment and motor fee bills of special interest to the public are still to be passed in that body.

Motor Tax Rate Set.

The Senate and House sub-committees on refundment and on motor fees have agreed upon the tax rate of 1.8 per cent on the cost of passenger cars f. o. b. the factory with a minimum of $12 for cars under 2,000 pounds weight and $15 for cars of 2,000 pounds or over.

The joint sub-committee on refundment has agreed upon the plan to take care of county bonds issued to raise cash to pay for trunk line construction, and to permit them to issue bonds for the purpose of taking up warrants issued for road construction which also will be taken care of by the state, the interest to be paid annually and the bonds retired when they become due.

Bills Nearly Ready.

Senator L. H. Nord said that both the fee and the refundment bills would be submitted to the full committee, and Senator F. L. Cliff, chairman of the sub-committee in charge of the administration bill, already passed by the House, said that bill would be ready for this full committee by the latter part of the week.

There will be hearings on the bill in the Senate as there was in the House some of the senators say one hearing, but Senator P. H. McGarry, who still stands for the board of commissioners as opposed to the single commissioner plan of administration, declared that there would be public hearings continued over two or three days to which men from all over the state would be invited to come and express their views.

A committee of three members of the Minnesota service men's memorial commission conferred with Lieutenant Governor Collins and Speaker Nolan as to best means for presenting the proposal to the Legislature to erect a memorial to the men who fought in the World War. The commission, which was recently named by the American Legion and consists of one member from each congressional district, decided legislation must be presented this week.

Death Penalty Act Killed.

Senator James H. Hall's bill for the restoration of capital punishment in Minnesota lies dead in the Senate committee on judiciary. Senator Hall has taken a poll of the committee, finding the sentiment unfavorable to his bill, and accordingly has decided not to press for action on his measure.

The abandonment of the Senate bill leaves the Nimocks bill for a constitutional amendment the only proposal involving capital punishment now before the Legislature. Representative Nimocks' bill for a statutory law already has been killed in the House.

Fight Seen on Short Day for Women.

The eight hour day for women will

DECIDE ORE TAX RATE

House Committee Votes for Six Per Cent Tax as Proposed Tonnage Tax Rate.

Attorney General Clifford L. Hilton has reaffirmed his opinion that the proposed state tonnage tax bill is unconstitutional, the committee on taxes of the house of representatives [illegible] rate on iron ore at six per [illegible] motions setting the figure at [illegible] 8 per cent, respectively, were [illegible] whelming. The vote for [illegible] carried, 9 to 7.

[illegible] James A. Carley introduced two [illegible] tax bills in the senate [illegible] the action taken by the [illegible] sub-committee. One bill provides a 6 per cent tax on net profits [illegible] output as an addition to the [illegible] ad valorem tax. The other bill is a constitutional amendment, [illegible] half the proceeds of the [illegible] will go to current revenue and the other [illegible] into permanent funds. The [illegible] originates in the house, but the Carley bills can be considered in the senate while it is waiting for house action.

The committee voted to ask the house for a special order on the two bills Thursday at 2:30 p. m. The [illegible] per cent rate was included in the constitutional amendment bill by a vote of 11 to 4, after voting down a motion to strike out all reference to the rate. The bills were introduced in the house as committee bills.

Compensation Bills Passed.

St. Paul—Bills creating the state industrial commission and making numerous important changes in the compensation schedules for injured workmen, were passed by the house with only slight amendments to the drafts prepared by the house interim commission.

Provision for a rate making bureau to prescribe minimum rates and a transfer of the boiler-inspection department and the minimum wage commission to the department of labor and industries, were included in three other bills and passed as part of the industrial program.

The industrial commission as provided in the bill takes over the present state labor department. The only material amendment adopted to this bill was by J. B. Pattison, retaining civil service for inspectors and statisticians. It was adopted, 55 to 44, without serious opposition from the sponsor of the bill. W. I. Norton and John I. Levin of the interim committee, led the fight. They defeated an amendment by O. D. Nellermoe, taking appointment of the industrial commission away from the governor.

There was prolonged debate over amendments to the compensation schedules. Mr. Levin pointed out that the benefits in the bill, including increases in the weekly maximum to $18 and the minimum to $12, all had been agreed to by representatives of labor and of the employers. The only important amendment adopted was by Erling Swenson, classing the loss of both legs as "total permanent disability."

There was a long fight over an amendment by Representative Nellermoe, providing compensation for an accident causing disfigurement, even when it does not affect the employability of the injured person. Supporters of the bill said the amendment conflicts with the whole theory of the law, which is to compensate for loss of earning power. It was defeated on a roll call, 24 to 78.

Farmers Ask Flood Relief.

Minnesota valley farmers, who have been drowned out by floods, appeared before the senate drainage committee urging a relief appropriation and measures to check future overflows of the river. They blamed drainage operations for increasing the river's flow in flood times. The hearing was continued.

Bills introduced in the house include one by Representative George E. Wicker creating a state public safety commissioner whose duty it shall be to co-ordinate the efforts of all the peace and prosecuting officers of the state to bring about the capture and prosecution of criminals; a bill by Representative F. J. McPartin forbidding the establishment of so-called "army and navy stores" by any one other than an officer of the United States army or navy; a bill by Representative E. W. Cameron authorizing the appropriation of money for soldiers' tuition accrued and unpaid for lack of funds, and one by Representative James Cummings providing old age and disability pensions for Ramsey county employes.

Bank Bill Passed in House.

A bill authorizing state banks to engage in the trust company business and act as trustee, assignee, and so forth, was passed 92 to 12 after an extended debate in the House.

Representative George Rodenberg objected to the proposed law on the ground that it would operate to reduce the capital stock of the banks taking advantage of it and reduce the margin of safety for depositors.

Drafting Primary Reform Bills.

Hope for definite steps towards reform of the primary election laws through the introduction of bills providing for at least indorsement convention is strengthened. Members of the sub-committees met and discussed what should be done. It was determined that the Senate committee make the first move. A bill will be drafted at once providing for legalized conventions to recommend candidates.

POULTRY PACKED FOR CITY TRADE

Producers Must Carefully Study and Cater to Peculiar Requirements of Market.

NEAT PACKAGE IS ESSENTIAL

Specialists of Department of Agriculture Give Directions for Killing, Dressing and Packing—Dry Picking Favored.

(Prepared by the United States Department of Agriculture.)

Poultry profits often depend largely on the marketing, and the producer should study demands to learn how, where, and when to dispose of his products to the best advantage. It often pays to dress the fowl at home for certain markets, the difference between the prices for live and dressed fowl making it worth while.

Attractive appearance is of much importance in selling poultry; therefore, the producer who plans to market his poultry dressed should study the details of killing, dressing and packing in order to prepare the products in the best possible manner. Requirements for dressing and packing vary somewhat in different markets, and it will pay the producer to learn any special demands of the distributing point to which he intends shipping.

Killing, Dressing, and Packing.

The birds should be kept without feed from 18 to 24 hours before killing unless they are to be drawn, specialists of the United States Department of Agriculture say. In the latter case they should have no feed for at least 30 hours before killing. When ready to kill, suspend the fowl by the feet and, using a knife, cut the vein at the back of the throat through the mouth. As soon as this vein is cut run the point of the knife through the roof of the mouth into the brain, which causes the bird to lose all sense of feeling. The fowl can be paralyzed also by a blow on the head, instead of piercing the brain.

In most markets dry-picked birds are preferred. Immediately after killing, while the bird is still bleeding, the picker removes the feathers, being careful not to tear the skin. If the picker waits until the bird is nearly cold, removing the feathers will be more difficult. As soon as picked, the fowls should be hung in a cool place until thoroughly cold. If the weather is warm and the fowls are to be packed in ice, they should be placed in a tank of ice water and left until all the animal heat has left the body.

The Old-Fashioned Axe-and-Chopping-Block Method of Killing Poultry for Market Is Rapidly Being Abandoned for the More Scientific Process Described in the Accompanying Article.

When birds are scalded before removing the feathers, they are immersed in water slightly below the boiling point, as soon as they are through bleeding. The birds should be immersed three or four times and then picked clean, care being taken not to break the skin. Be careful not to overscald, as this will cause the outer surface of the skin to rub off. Then it is placed in cold water, where it should remain for 15 to 20 minutes. If the fowl is to be shipped dry it should be hung up until the skin becomes thoroughly dry.

Poultry which is to be sold direct to the consumer should be drawn before it is cooled. Poultry which is sold to the market should not be drawn, as it will keep better not drawn than if drawn. A slit large enough to admit the fingers is made from near the end of the keel bone toward the vent. Then cut carefully around the vent and pull out the intestines, leaving in all the other organs, unless the consumer's requirements are otherwise.

Should Be Packed Solidly.

When the birds have been thoroughly cooled, they are ready for packing. Packages for dressed poultry vary, but they should be neat and small enough to be easily handled. Line the inside of the boxes or barrels with clean, unprinted paper, and pack the birds solidly, so they will not shift in the package, but be careful not to bruise them. For delivery to retail customers, pasteboard boxes of sufficient size to hold one or two birds are very attractive. When poultry is to be packed in ice, barrels are generally used, packing them with alternate layers of ice.

[illegible] meeting of the board of [illegible] of Consolidated School District [illegible] Pennington County, Minnesota, held the 16th day of February, 1921, at [illegible] o'clock p. m. at Clerk's office in the village of Goodridge, Minnesota.

Members present: Palmer C. Tvedt, G. C. Gulrud, M. Vaughan, C. Thompson, M. G. Seavey and Nick Bundhund.

Members absent: None.

C. Thompson a member of said board offered the following resolution and moved its adoption:

WHEREAS, The qualified electors of Consolidated School District No. 8, Pennington County, Minnesota, at an election called and held for the purpose on the 5th day of February, 1921, have heretofore declared, by their votes in favor of issuing the school district's bonds for the purpose of refunding the floating indebtedness of said district, pursuant to a resolution of the board of education of said district passed on the 12th day of January, 1921, and

WHEREAS, It is in the opinion of this board proper and necessary that such bonds be issued in the amount and on the terms and conditions hereinafter stated.

Now, Therefore,

BE IT RESOLVED, That said school district issue its negotiable coupon bonds in the sum of ten thousand dollars—$10,000—for said purpose, pursuant to the laws of Minnesota now in force.

That said bonds shall be ten—10—in number, numbered from one—1—to ten—10—inclusive, be of the denomination of $1,000 each, be dated the First day of February, 1921, be payable on the first day of February, 1936, and bear interest at the rate of seven per cent per annum, payable semiannually on the first days of August and February in each year.

That each of said bonds shall be in substantially the following form with the necessary variations as to numbers, which said form is hereby approved and adopted:—

No........ $1000

United States of America,
State of Minnesota,
County of Pennington,
Consolidated School District Number 8,
REFUNDING BOND.

KNOW ALL MEN BY THESE PRESENTS, That Consolidated School District Number 8, Pennington County, Minnesota, acknowledges itself indebted, and, for value received, promises to pay to bearer the sum of

ONE THOUSAND DOLLARS

—1000—in Gold Coin of the United States of the present standard of weight and fineness, on the first day of February, 1936, with interest on said sum from date until paid at the rate of seven per cent per annum, payable semiannually on the first days of August and February in each year, upon presentation and surrender of the annexed interest coupons as they severally become due, both principal and interest being payable at the Northwestern Trust Company in the City of St. Paul, Minnesota.

This Bond is issued by said school district for the purpose of refunding its outstanding floating indebtedness, in accordance and full compliance with the laws of the State of Minnesota thereto enabling, including section 3688, General Statutes Minnesota, 1894, and the acts amendatory thereof and supplemental thereto.

It is hereby CERTIFIED and RECITED that all acts, conditions and things required by the laws and constitution of the State of Minnesota to be done precedent to and in the issuance of this bond, have happened and been duly performed as required by law, and that the indebtedness of said school district, including this bond, does not, nor did the indebtedness refunded hereby, at the time the same was incurred exceed any constitutional or statutory limit.

For the prompt payment of the principal and interest of this bond, according to its terms, the full faith, credit and resources of said school district are hereby irrevocably pledged.

IN WITNESS WHEREOF the Board of Education of Consolidated School District Number 8, Pennington County, Minnesota, has caused these presents to be signed by its President and Clerk and countersigned by its Treasurer, as of date this First day of February, 1921.

PALMER C. TVEDT,
President Board of Education.
NICK BUNDHUND,
Clerk Board of Education.

Countersigned,
C. T. THOMPSON,
Treasurer Board of Education.

and that there be coupons attached to each of said bonds, which shall be in substantially the following form:—

No........ $35.00

On the first day of August / February, A. D. 1921,

Consolidated School District Number 8, Pennington County, Minnesota, will pay to bearer Thirty-five Dollars—$35—in Gold Coin, at Northwestern Trust Company, St. Paul, Minn., being the semiannual installment of interest on its Refunding Bond, dated February 1, 1921.

PALMER C. TVEDT,
No........ President.
NICK BUNDHUND,
Clerk.

[illegible] and that when said bonds shall have been executed they shall be placed in the custody of the treasurer [illegible] delivered to the purchaser [illegible] said as hereinafter provided.

RESOLVED FURTHER, That this board will meet at Clerk's office in the village of Goodridge, Minnesota, on the 12th day of March, 1921, at 2 o'clock p. m. for the purpose of receiving and considering bids for the purchase of said bonds.

That notice of said meeting shall be published for two successive weeks on [illegible]nuary 25, 1921, and March 4, 1921, in the Goodridge Banner, published at Goodridge, Minn., in said district, is hereby designated as the newspaper in which said notice shall be published, and that the clerk of said board be and he is hereby directed to give two weeks' published notice of said meeting in said newspaper pursuant to this resolution. That said notice shall be in substantially the following form:—

NOTICE IS HEREBY GIVEN, That bids for the purchase of $10,000 Consolidated School District No. 8, Pennington County, Minnesota, bonds, will be received and considered by the Board of Education of said school district on the 15th day of March, 1921, at 2 o'clock p. m., at Clerk's office in the village of Goodridge, Minnesota. Said bonds are to be issued for the purpose of refunding the floating indebtedness of said district, are to be dated February 1, 1921, to be payable February 1, 1936, to bear interest at the rate of seven per cent per annum, payable semiannually on the first days of August and February of each year, and to be in the denomination of One Thousand dollars—$1000—each.

All bids must be without condition or qualification and must be accompanied by an unconditional certified cheque to the order of the treasurer of the school district for ten per cent of the total bid, to be forfeited to the school district in the event that the successful bidder fails to take and pay for the bonds in accordance with the terms of his bid.

The Board reserves the right to reject any and all bids.

All bids must be addressed to the undersigned.

By order of the Board of Education.

Dated at Goodridge, Minnesota, this 19th day of February, 1921.

NICK BUNDHUND,
Clerk Consolidated School District Number 8, Pennington County, Minnesota, Goodridge, Minn.

AND WHEREAS, This board has investigated the necessary facts for the purpose of fully advising itself as to the validity of the district's warrants hereinafter described, and the legality of the indebtedness represented by said warrants respectively, purporting thereby to be owing by said school district to the different holders thereof, in order to refund the same, or such part thereof, as legally may be, into bonds of said school district, and

WHEREAS, This Board FINDS and DETERMINES that each and every one of the warrants in this resolution described was heretofore legally issued, and that each of them now represents the legal, outstanding and enforceable obligation of said school district, and that each of said warrants and the different items of indebtedness evidenced thereby are proper to be funded into bonds, the total of all of which warrants with the legal interest accrued thereon up to January 12th, 1921, aggregates in excess of the sum of $10,000.

Be it further

RESOLVED, That the proceeds of said school district's Refunding Bonds so to be issued as aforesaid be applied as far as they will avail for that purpose to pay the district's outstanding floating indebtedness which existed on the 12th day of January, 1921, said indebtedness being evidenced by said school district's warrants herein specified, and that as each warrant is paid the same be duly cancelled.

RESOLVED FURTHER, That the full faith, credit and revenues of said school district and of this board of education as such be and the same are hereby irrevocably pledged for the prompt payment of the principal and interest of the said bonds at maturity.

The numbers, date of issue, date of registration, and amount of the principal of each of said warrants so to be refunded, are as specified in Schedule "A" hereto attached.

M. Vaughan seconded the motion to adopt said resolution and the roll being called the same was adopted by the following:

Ayes: Palmer C. Tvedt, G. C. Gulrud, M. Vaughan, C. Thompson, M. G. Seavey and Nick Bundhund.

Nays: None.

MOVIE REVEALS BOLL WEEVIL AS VILLAIN

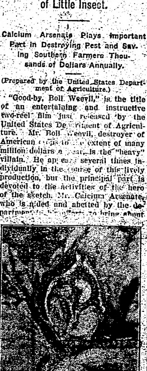
Two-Reel Film Shows Activities of Little Insect.

Calcium Arsenate Plays Important Part in Destroying Pest and Saving Southern Farmers Thousands of Dollars Annually.

(Prepared by the United States Department of Agriculture.)

"Good-by, Boll Weevil," is the title of an entertaining and instructive two-reel film just released by the United States Department of Agriculture. Mr. Boll Weevil, destroyer of American crops to the extent of many million dollars a year, is the "heavy" villain. He appears several times individually in the course of this lively production, but the principal part is devoted to the activities of the hero of the sketch, Mr. Calcium Arsenate, who is aided and abetted by the department in its efforts to bring about Mr. Weevil's overthrow. "Cal" descends upon Mr. Weevil from a battery of horse-drawn machines, of which 40 are shown in one spectacular scene taken in early summer. Work is shown in the department's laboratories at Tallulah, La., and in Washington, D. C., where the methods which save cotton planters $20,000,000 or more annually were devised.

One interesting feature is the laboratory work by which bogus weevil exterminators are detected. The second part of the film, taken in the fall, shows thousands of acres of snowy cotton fields with pickers gathering the snowy bolls. Two or three contrasts are shown between fields where calcium arsenate dust has been applied and adjoining rows which were neglected. From actual experience the saving to one 5,000-acre planter is given at more than $64 an acre. The film is designed primarily for demonstration work in the South, and is one of about 500 films covering more than 100 subjects showing different phases of the work of the department. Copies of the film may be bought from the department by institutions and organizations interested in boll weevil extermination. Its use is suggested for state agricultural colleges, boards of commerce, etc.



[illegible] Weevil in Boll of Cotton.

RATS ARE HARMFUL ON FARM

Rodents Use Surprising Ways to Get Into Cellar and Can Be Exterminated in Many Ways.

Rats are the busiest creatures on the farm. They take surprising ways of getting into the cellar. Make a trip all round before you go to bed tonight, and fill every hole with powdered glass and cement. Use traps, poisons, gas, cats and terriers to get rid of rats.

Nick Bundhund was transacting business in Thief River Falls Tuesday.

County Agent McCann was in town between trains Tuesday afternoon.

Mr. and Mrs. Albert Halvorson were Thief River Falls visitors Saturday.

Albert Halvorson and family spent Sunday at the Ted Halvorson home.

M. G. Thoreson and two little daughters were in Thief River Falls Wednesday.

Misses Hilda and Sena Christianson were shopping in Thief River Falls Monday.

Misses Pella and Gjertson of Thief River Falls were over-Sunday guests of Miss Bauer.

District Manager Evenstad of the Yeomen was over from Thief River Falls Monday.

Mrs. T. J. Cummings was called to Detroit Monday by news of the illness of a daughter.

D. J. Gavin, one mile west of Mavie, announces an auction to take place on Wednesday, March 9.

Mr. and Mrs. Ben Hildedank came from Thief River Falls Saturday to visit at the Tegelson home.

Just received at the Farmers' elevator, a car of Shelled Corn. Also will have this week a quantity of Blacksmith Coal.

Mrs. Carl Eseth and daughter Violet are in Thief River Falls a few days this week while the young lady has dental work done.

Albert Johson, who has been very ill following an operation for appendicitis, returned Saturday from the hospital at Thief River Falls.

Eddie Halvorson, John Hanson an Swen Swenson returned Wednesday from Kelliher, where they have been employed in the lumber camps.

Mrs. N. Bundhund attended a Ladies' Aid meeting at the August Kistau home near Germantown Wednesday afternoon, returning home Thursday.

J. Lidelbes has posted bills for an auction on Friday, March 11, at his place three miles northeast of Erie.

Miss Elearor Cummings returned Wednesday from Detroit, where she has been employed for several months.

For Sale—Five hundred bushels of Silver Mine oats and some barley.—Clarence Olson, Golden Valley, Minn. j6 tf 1mp

For Sale—Sweet Clover Seed, at 12 cents per pound. Also 300 bushels of Oats, cheap.—Sidney Hemmestvedt, Kratka, Minn, f11 4t p

Carl Froiland of Cottonwood, Minn, has purchased the Carl Prucha farm and left Monday to return with his family and moveables.

John Roe of Benton Harbor, Mich., who has been visiting his cousin, Mrs O. S. Kirklie, left Monday to visit friends at Grand Forks.

Prof. Norby and Theo. Tandberg attended the first entertainment given by the Thief River Falls Choral club at that place Tuesday evening.

The Lutheran Ladies' Aid will be entertained by Mrs. T. Gilbertson and Mrs. M. Olson at the church on Thursday, March 10. Everybody invited.

Mrs. George Larson and children of Golden Valley, N. D., are visiting relatives here. They will visit friends in southern Minnesota before returning home.

Twenty lady friends gave Mrs. George Josephson a pleasant surprise Monday evening, the occasion being her birthday. The evening was spent in social chat and games and a delicious lunch was served. Mrs. Josephson was made the recipient of a number of [illegible] presents.

[illegible] Sunday, March 13, German services at 10 a. m., English services at 2:30 p. m. at Germantown.
H. LUTZ, Pastor

Lutheran Church

Services at Goodridge in Norwegian at 11 a. m. and in English at 8 p. m. of March 6.

Communion services at Bethania 11 a. m. of March 13.

Services at Goodridge at 8 p. m. of same date.

G. A. HANSON, Pastor

Ole Giving returned Friday from a few days' visit to Thief River Falls.

Arthur Erickson, who has been employed in the lumber camps at Clementson, returned home this morning.

Mrs. Manda Strand and daughter returned Monday to their home at Fisher, accompanied by her mother, Mrs. Ellen Iverson.

John Gangenes returned Saturday from Thief River Falls, where he had an operation for appendicitis last week. A little thing like a surgical operation doesn't bother John for long.

Four young boys who had broken into an unoccupied house southwest of town the other day were soundly horsewhipped by a man who caught them just as they were leaving the building.

Stuart McLeod has recently sold a half section of wild land 1½ miles north of Goodridge for $25 per acre to a Chicago real estate man. The same party bought the Joe Oski farm, west of town.

Mr. and Mrs. T. W. Hamm of Parkers Prairie were guests of her sister, Mrs. Carl Lindstrom, this week. Mr. Hamm purchased the A. T. Olson farm last fall. Tuesday he arrived here with two cars of moveables and stock, including thirteen head of Holstein cattle. Mrs. Hamm arrived here yesterday.

If you wnat to sell your farm this coming season, now is the time to list with us, as we are getting our lists of lands for sale ready so we can mail them to the prospective Iowa, Illinois and southern Minnesota buyers. Have yours on the list, it may be just the piece somebody wants.

Phosphate for Sale

We have come to the opinion that the use of phosphate for fertilizer should be given a trial on our Pennington county lands, and will keep on hand from now on during the spring and early summer a stock of what is known as Acid Phosphate Fertilizer. We can furnish this in large or small quantities, and at reasonable prices.
HANSON, & BARZEN MILLING CO.,
Thief River Falls, Minn.

Lumbermen Meet

Jay Payne attended the annual get-together meeting of the Winton Nichols lumber company managers held at the head offices in Thief River Falls Friday afternoon. Following the business session the out of town managers, in company with local employes of the concern, were the guests of General Manager C. A. Nason at an evening banquet served at the Hotel Evelyn.

School Notes

The eighth grade pupils entertained seventh graders at the school house Monday evening. The evening was spent in games and a good lunch was served.

A novel performance was given by the pupils of the eighth grade at the assembly meeting Tuesday. The inauguration of the new president was acted out with the following cast of characters: President-elect Harding, Myrtle Iverson; Vice President-elect Coolidge, Emma Gilbertson; President Wilson, Luella Urdahl; Vice President Marshall, Gertrude Anderson; Chief Justice of the United States Supreme Court, Harry McDouald.

Besides this number, short oral biographies of the president and vice-president-elect were given by Luella Urdahl and Vivian Thoreson respectively.

A breakfast was served to the faculty by the members of the domestic science class Wednesday afternoon at 4 o'clock under the direction of Miss Giefer. This is a part of the regular work in domestic science. Two other meals, luncheon and dinner, will be served before the school year is over. Following is the menu:

Grape Fruit
Creamed Cereal, with Bananas and Cream
Muffins Jelly
Baked Egg on Toast Bacon
Coffee

The members of the class are: Gertrude Anderson, Emma Gilbertson, [illegible] Hakes, Jennie Kabachek, Edith [illegible], Grace Day, Vivian Thoreson, Luella Urdahl.

THE GOODRIDGE BANNER

VOLUME XV, No. 11. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, MARCH 11, 1921 $1.50 PER YEAR

Much Interest in The Short Course

The Farmers' Short course has been fairly well attended and much interest has been shown in the talks and discussions of the different farm topics.

On Monday Assistant County Agent McFetridge for eastern Marshall county spoke on dairying in general, making the point that dairying has been and must be the salvation of this country.

Our county agent, Mr. McCann, took up the topic of poultry. He spoke at some length on the balanced ration and laid great stress on the necessity of culling out the poor layers at the end year. He said that 100 good layers would yield as much or more than 150 poor ones.

On Tuesday, Mr. Bower, the live stock man, was kept busy the whole day. In the morning he addressed the school and at 10 o'clock spoke to the farmers, with horses for his subject. He pointed out the desirability of getting into heavier horses. In the afternoon he took up the topic of dairying, dairy cows and dairy feeding. He emphasized particularly that the outlook for marketing of dairy products is very promising. He said there is only one cow to each seven of population. He enlarged at some length on the proper feeding and care of dairy cattle, and advised going more into the raising of dairy cattle.

The Wednesday session was conducted by Mr Covert, who also took up the stock question but along different lines from his predecessors. He also turned his attention to sheep, and gave a very interesting talk. He said that for farmers who desired to go into sheep raising now was their time to make a start, while prices are low.

There was no session yesterday, Mr. Kittelsen, who was to have had the floor, failing to put in an appearance.

REDUCE LARGE WASTE IN CELERY SHIPMENT

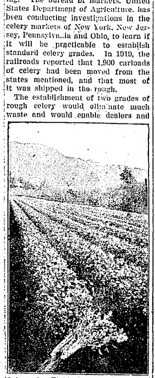
Transactions Indefinite Because of Lack of Grading.

Establishment of Two Grades of Rough Product Would Enable Dealers and Receivers to Work on More Profitable Basis.

(Prepared by the United States Department of Agriculture.)

"Rough celery" is the market term applied to celery that is taken from the field and packed in crates with little or no trimming. Transactions in rough celery always are more or less indefinite, because of the lack of grading. The bureau of markets, United States Department of Agriculture, has been conducting investigations in the celery markets of New York, New Jersey, Pennsylvania and Ohio, to learn if it will be practicable to establish standard celery grades. In 1919, the railroads reported that 1,900 carloads of celery had been moved from the states mentioned, and that most of it was shipped in the rough.

The establishment of two grades of rough celery would eliminate much waste and would enable dealers and receivers to place their orders and sales on a more definite basis. The first grade, as contemplated by the specialists who are conducting the investigation, would include sound stock that is practically free from pithy stalks, stalks that have gone to seed or are damaged from disease or insects. A minimum diameter for this grade of 1¾ inches would be fixed. The second grade would include any celery that did not meet the requirements for the first grade.



Celery in Field Almost Ready for Marketing.

The Elections

GOODRIDGE VILLAGE

The election passed off very quietly, there being no strife whatever. There were two tickets in the field, but they were identical except in candidates for trustees and clerk. The caucus held Saturday evening nominated Carl Christianson, Carl Edseth and H. A. Halvorson for trustees, and H. B. Rockne for clerk. The citizens ticket that was put out Monday named M. G. Thoreson, N. H. Dahl and Carl Edseth as trustees and Palmer O. Tvedt as clerk.

For trusteen Thoreson received 33 votes, Dahl 39 and Edseth 52, and were declared elected. Christianson received 20 and Halvorson 19.

For clerk Tvedt was elected by vote of 31 to Rockne 22.

The balance of the ticket received practically the full vote, there being no opposition. The following were elected:

Treasurer, J. P. Jensen.
Assessor, M. O. Seavey.
Justices, G. Gunderson, Albert Halvorson.
Constables, M. J. Lysbakken, H. Tellefson.

In the townships named officers were elected as follows:

TOWN OF GOODRIDGE

Supervisor, Willard Hegstrom,
Clerk, N. Urdahl.
Treasurer, Peter Lovly.
Assessor, E. A. Besancon.
Justice, Gunder Erickson.
Constable, D. A. Danielson.

CLOVERLEAF

Supervisor, Ole Holmen.
Clerk, Carl M. Telley.
Treasurer, A. Dehiem.
Assessor, John Scheie.
Justice, Clarence Peterson.
Constable, Julius Svensgaard.

STAR

Supervisor, Elling Ramsey.
Clerk, Henry Dahlen.
Treasurer, Joseph V. Hoffman.
Assessor, Ole Thaaalson.

HIGHLANDING

Supervisor, Elo Sanders.
Clerk, H. Finstad.
Treasurer, Wm. Vaughan.
Assessor, Severt Nelson.
Justice, H. Crampton.
Constable. Oscar Olson.

MOYLAN

Supervisor, John Kast.
Clerk, Henry Clausen.
Assessor, Helmer Bjerken.
Constable, Elmer Blaine.

GRAND PLAIN

Supervisor, Olaf Tharalson.
Clerk, Paul Stock.
Treasurer, Oscar Hovelsos.
Assessor, Lewis Hemre.
Justice, Paul Stock.

A Referendum

The county commissioners—except Mr. McGinn, who did not sign the notice on the back of the ballot—sent out a ballot to be used by the voters election to express their opinion, if the county should continue to pay $1,000 per year for the maintenance of a county agent. We have only the results of the vote in three townships, as follows;

Goodridge,	for agent	8,	against	2.
Cloverleaf,	"	10,	"	19.
Highlanding.	"	3,	"	42.

We do not suppose that this is any indication as to how the farmers of the farmers of the entire county voted.

New Loop Road

A. W. Hanson has written several communications to the Times regarding a proposed spur of the Electric line to run south from Goodridge east of Highlanding to Rhoda, then west to strike the Soo two miles south of Hazel. We understand the matter has had considerable discussion among the residents of the territory affected. On election day petitions were exhibited at the polling places for signature by those who fovor the issue of bonds of the townships in aid of the proposed line.

For Sale

BERKSHIRE BREEDERS BOOST BETTER SIRES

Plan Suggested to Increase Use of Purebreds.

American Association Urging Various State Organizations to Favor Exchange of Registered Boars for Grade Animals.

An indication of the active and widespread support being given to the better-sire campaign now systematically fostered by the United States Department of Agriculture is illustrated by a proposal recently made by the American Berkshire association. This association, according to a letter recently received by the department, is suggesting to State Berkshire Breeders' association a plan designed to broaden the market for Berkshire boars and increase the use of purebred animals on farms.

The association is urging the various state organizations to mail circular letters to their members suggesting that breeders exchange purebred boars for grade boars now being used by farmers, pricing the registered boar at a close figure and taking the grade boar at the market price as part payment, the breeder then sending the grade boar to the butcher. In their letter to the state associations the national body points out that every Berkshire breeder who follows this suggestion does three things:

He puts a Berkshire boar on an additional farm.

He provides a means of getting good Berkshire feeder hogs for the market.

He puts the purebred sire on a farm where formerly there was a grade or scrub.

Signs bearing the legend, "Registered Berkshire boar used on this farm," will be furnished by the American association to all farmers who take advantage of this plan.

There is nothing in the plan, say specialists of the United States Department of Agriculture, that does not seem practicable for any other hog breeders' association to use.

Purebred Berkshire Sow.

WINDBREAK FOR PROTECTION

Should Be Located on Side of Building and Yards Against Which Prevailing Winds Blow.

Windbreaks for protection of the home and buildings should be located on the side of the structures and the stock-feeding yards against which the prevailing winter winds blow, say forest specialists of the United States Department of Agriculture. If a narrow windbreak of only a few rows is planted, it should be several rods distant from the building or yard. Snow drifts under the lee of such a windbreak and lies deep around buildings or a feed lot close to it. This drifting may be partly prevented by planting two narrow windbreaks parallel to each other, about two rods apart. Snow then will drift into, and for the most part be held in, this intervening space.

Windbreaks for crop protection should be arranged to protect the crop from the most damaging winds, which usually come in the summer. As efficient windbreaks give protection along the surface for a distance of from 15 to 20 times their height, the intervals between them should be about 15 or 20 times the height of the trees at their maturity.

POTATOES LOST IN STORAGE

Decay, Shrinkage and Sprouting Are Caused by Too Much Light and High Temperature.

Losses of potatoes in storage can be minimized if proper care and attention are given through the winter. Adequate ventilation must be provided. Storage places should be kept uniformly cool, dark and frost-proof. These precautions are emphasized by potato men of the Minnesota College of Agriculture. Decay, shrinkage and sprouting are caused by [illegible]

PUREBRED SIRES ARE INCREASING RAPIDLY

Have Proved Worth for Improving Range Herds.

Scrub Bull Has Been Blacklisted on Big National Forest Pastures—Great Improvement Seen in Grade of Steers.

(Prepared by the United States Department of Agriculture.)

Purebred bulls have proved their value for improving range herds, and the number being bought in the cow country of the West is rapidly increasing each year, according to reports to the United States Department of Agriculture. The scrub bull is now blacklisted on the big national forest pastures.

During the season of 1919 three local live-stock associations, the members of which use the ranges of the Sierra National Forest in California, adopted rules for the purchase of purebred bulls. Under a special rule each association was required to place on the range a sufficient number of purebred Hereford, Shorthorn, or Aberdeen-Angus bulls. A committee to purchase and pass upon the credentials of each animal to be turned loose on the ranges was appointed.

Under this plan, during the grazing season of 1920, 105 Herefords, 97 Shorthorns, and six Aberdeen-Angus bulls were purchased by the stockmen through their associations and placed upon the range. It is estimated that at the end of the season of 1920 the stockmen had not less than 200 registered bulls on their ranges, resulting in a great improvement in the grade of steers turned out.

The Forest Service of the United States Department of Agriculture assists these local associations in enforcing the rules which require that the same kind and grade of bulls be placed on the same range. Permits to graze on the national forest pastures are refused those who do not conform to the association's ruling and who have not paid their share toward the purchase of the association bulls.

Cattle on Western Forest Range.

FEEDING VALUE OF SOY BEAN

Cannot Be Compared to Fodder Corn Because of Protein Content—Supplement Each Other.

Soy beans can scarcely be compared to fodder corn in feeding value because soy beans are very much richer in protein than the corn plant. They are splendid foods to supplement each other in a ration.

SUITABLE FEED FOR HORSES

Timothy Hay, Oats and Corn Are Recommended for Animals Doing Average Work on Farm.

Rations recommended for average horses doing average work are, fifteen pounds of mixed hay, ten pounds oats, four pounds wheat bran. If you would rather feed your timothy hay to the horses and save the clover for cows the following ration might have use on your farm: twelve pounds timothy hay, seven pounds oats, seven pounds corn. These are for one day's feeding.

SECOND CUTTING OF COWPEAS

Under Favorable Circumstances Plant Will Sprout Again, After Being Cut for Hay or Seed.

Under favorable conditions cowpeas after being cut for hay will sprout again from the base. Considerable pasturage or even a second crop of hay or seed is sometimes produced, especially in the Gulf coast region, if good moisture conditions follow the first cutting. Ordinarily, however, but [illegible]

Vincent's Vamp

By R. RAY BAKER

(© 1921, by McClure Newspaper Syndicate.)

"We see too much of each other, Vincent."

Vincent Ellsworth's eyes opened wide.

"What do you mean?" he demanded.

They sat in his roadster in front of Grace Watkins' home. He had just brought her from the department store, where she had a position as a bookkeeper. It was a cold day in late fall, and when they talked vapor formed before their mouths. Grace was preparing to get out of the car, when she suddenly made the remark that caused him surprise.

"I mean," she explained, "you and I have been going together ever since we were kids, until it's got to be a habit. I never had another fellow, and you never had another girl. It's the wrong idea. We think we care a lot for each other, but perhaps it's because we never had a chance to care for anybody else."

The motor had been running free, but now he shut it off.

"This is not exactly a pleasant surprise, Grace. It never entered my head you might care for somebody else."

"I can't say that I do," she returned. "That isn't the idea. I ought to have an opportunity to care for another man, and you should have the same chance with other girls. We'll tire of each other if we keep on this way. Let's call it off for a while. Then, if we've satisfied ourselves that we were made for each other, we'll resume relations."

"But, Grace—"

"Please don't object," she insisted. "I'm satisfied it's the proper course to pursue. Let me have my way, Vincent."

Vincent was glum, but he shrugged his shoulders, got out of the car, walked around to the other side and opened the door for her.

"Very well, we'll do it—because you wish it."

She went into the house and he went down the street at such a rapid rate that several pedestrians at the next corner leaped frantically in a variety of directions.

Vincent headed for the club. When he entered the lounging room a strange sight met his gaze. A number of club members were gathered about a person who apparently was relating some amusing incident, for they were laughing uproariously.

Vincent blinked in amazement, for the person in the center of the group was attired in fashionable feminine clothes, and had beautiful pink cheeks, and fluffy hair done up fashionably, and two feet resting on a table, and was smoking a pipe.

"Good gracious!" Vincent gulped. "How did that girl get in here?"

The other young men spied him.

"Come on, Vincent," cried one. "Join the merry throng." And he was escorted to the center of it.

"Madame Z," said another of the group. "let me introduce Mr. Ellsworth."

Madame Z blew a cloud of smoke toward the ceiling, took her feet from the table, and smiled dazzlingly on Vincent.

"Ah, Vincent," said the madame; "my old friend Vincent;" and Vincent's hand was wrung in a very firm clasp. "You don't remember little Paul—little Paul Wenkel—eh?"

Vincent started hard.

"You can't be—"

"Sure I am," said the madame. "I'm Paul—all dressed up and nobody to take me to the place where I want to go. You see, I've become a great female impersonator on the vaudeville stage. The 'great' is taken from the programs. I've come home for a couple of weeks—first time in six years—to visit the folks, and I thought I'd surprise them, so I hiked up here to the club and put on my costume, and I've been relating some of my experiences for the boys while waiting for some one to appear with nerve enough to be my escort and drive me around to call on my various relatives. All the fellows are afraid they'll get in bad with their girls, but of course it won't affect you that way."

"Won't it, though," jibed in one of the others. "You don't know what a case Vincent has."

This brought up a rather unpleasant topic. Vincent hesitated, turned it over in his mind, then declared suddenly:

"I'm your man, Paul. The car's out in front. Come on."

Grace Watkins came weeping into the presence of Arabella Grant, who lived next door.

"Why the tears?" inquired Arabella, laying aside her novel.

"It's Vincent!" Grace sobbed. "I think he's the horridest thing in the world. He's getting himself vamped, [illegible]" said Arabella. "What's he doing?"

When Grace could control her emotions she explained:

"Vincent and I decided to see less of each other. Half an hour later I was downtown getting supplies for dinner, when who should drive along the street but Vincent; and in the car with him—in the place where I always have sat—was a—a regular vampire, with painted cheeks and eyes that were—were devilish; that's what.

"I was on my way home, when back came Vincent with his vampire. They were smiling so sweetly, and Vincent lifted his hat so graciously to me, and I saw the vamp ask him who I was—and then they went out of sight.

"I met several girls, and how they laughed, especially that Lulu Stanton, who has tried repeatedly to cut me out with Vincent. I hadn't been home ten minutes when I happened to look out of the window and see Vincent sail past—with his vampire! How I hate that woman! I could scrape all the paint off her face if I had her here."

Arabella, who had been looking out the window, suddenly exclaimed, "Good gracious, Grace. You're going to have the chance. Vincent just drove up and he's bringing his vampire in here."

"The wretch!" breathed Grace. "I mustn't be seen. I've changed my mind about that paint-scratching job. What'll I do?"

"Get into the kitchen," Arabella directed, as the doorbell rang.

Grace did as suggested and Arabella answered the door.

"Miss Grant, let me present Mme. Z," said Vincent, and Arabella escorted them to chairs. Several moments of embarrassment were broken by a loud laugh from the vamp and Vincent.

"Oh, Arabella!" cried the vamp. "Don't you remember little cousin Paul?"

Arabella scrutinized the madame's features, and slowly a smile spread over her face, and she broke out laughing, too, and allowed the vampire to greet her with a cousin's kiss.

A sound of scratching from the kitchen attracted the attention of Arabella. She looked startled for a moment, then smiled on Vincent and told him:

"You're wanted in the kitchen, young man."

Although puzzled by the remark, Vincent opened the kitchen door and strode in. Grace was standing in the center of the floor, looking very meek.

"Vincent," she pleaded, "let's cancel our arrangement—and be to each other just as we used to be."

A light of understanding dawned on Vincent.

"That suits me. It was your idea in the first place, you know. And I'm ready—to kiss and make up, if you are."

She nodded her head vigorously.

"I am."

GROWING COWPEAS FOR SEED

Highly Profitable in Localities Suited to Production of Crop, Say Federal Specialists.

Localities well suited to the production of cowpeas will find it highly profitable to grow seed on a large scale, especially if the best machinery for handling the crop is used, say specialists of the United States Department of Agriculture.

SUGAR BEETS YIELD PROFIT

No Other Crop on Commercial Scale in Temperate Zone Furnishes as Much Human Food Per Acre.

An average acre of sugar beets yielding ten tons produces besides the by-products, 2,500 pounds of granulated sugar. No other crop in the temperate zone raised on a commercial scale furnishes as much human food per acre.

SHIPPING TO SMALL CITIES

As There Is Little Opening for Carlot Shipments, It Is Advisable to Mix the Produce.

In small cities there is little opening for carlot shipments of fruits or vegetables. Shippers of carloads should never consign to such markets unless previous arrangements have been made with a dealer, say specialists of the United States Department of Agriculture. The small cities are easily oversupplied and only at certain times offer an opening for a carload of any kind of perishable produce. Often a mixed carload is more salable in such markets than a car filled with one kind. The most reliable plan is to load and ship the car according to requirements previously ascertained from the dealer who handles the sale. It is still better to dispose of the car f. o. b. shipping point. This may be done when the dealer is in need of the supply and when the shipper is able to convince the buyer. [illegible] regarding the grade and quality of the produce.

Goodridge Mercantile Co.,
of **Goodridge,** *say:*

The De Laval puts money in the bank

MONEY in the bank is the final test of any piece of farm equipment. It is especially true of a cream separator.

Butter-fat is the most valuable product of the farm. Twice a day, every day in the year, gravity skimming or a poorly constructed separator wastes this high-priced food.

A De Laval Cream Separator stops this loss of profit. It supplies the extra money that is needed for current expenses, improvements about the farm, or for the purchase of new stock.

More than 2,500,000 De Lavals are in daily use throughout the world. These De Laval owners represent the most progressive and most prosperous farmers in every country and locality.

A De Laval Cream Separator will make your farm more profitable, too, and put money in the bank for you.

You can buy a De Laval on such terms that it will actually pay for itself while you are using it. Come in and talk it over

Sooner or later you will buy a
De Laval

SHIPPING CONTAINER IS QUITE IMPORTANT

Factors to Be Considered in Selecting Receptacles.

Basket, Crate or Carton Should Be Suited Especially to Produce to Be Marketed—Desires of Customers Must Be Met.

(Prepared by the United States Department of Agriculture.)

One important requirement for marketing farm produce from producer direct to consumer is a proper and satisfactory shipping container, say marketing specialists of the United States Department of Agriculture. A container should be suited especially to the produce to be shipped and should be selected only after considering such factors as durability, size, appearance and cost.

Durability. — Much dissatisfaction with direct-marketing has been caused by using containers which were not sufficiently strong. This is especially true when containers are used more than once. Shipping containers should be light in weight but sufficiently durable to carry the produce.

Satisfactory Basket for Potatoes.

Size.—The size of a container depends upon the desires of the customers. Most persons wish to obtain small quantities of each product at a time. Containers should be just large enough for the produce shipped. If the carton is too large or too small, both the produce and the container are likely to be damaged, for the produce will not be kept in place and the container will be crushed. The larger the quantity of produce shipped in one parcel the lower will be the cost per pound for transportation and the lower the container cost per pound.

Appearance.—A container should present an attractive appearance, both on arrival and when opened, and should show the produce to advantage. Of course, new containers are more attractive than those which have been used; and only those second hand containers which are clean should be used again.

Cost.—The cost of containers puts a distinct limitation on small shipments of farm produce. A shipment must have considerable value in order that the transportation charges and cost of container may not equal a large percentage of the price. The price which can be reasonably paid for a container will depend on the value of the contents, the cost of transportation, and the price received for the produce as compared with the price that could be received locally. A maximum price that should be paid cannot be stated, as each case must be decided by studying all of the factors involved.

Cheap splint baskets are satisfactory for many kinds of produce. For products that need no special type, attractive and satisfactory containers often can be made by the producer at a low cost from clean, discarded paper-board boxes in which merchandise has been shipped.

TRACTORS ARE TIME SAVERS

First Impluse of Purchaser Should Be to Obtain Fullest Information Regarding Machine.

Farm tractors are time savers for the average farmer. After a farmer gets a tractor his first impulse should be to get all the information possible about it and then manage it to get the full benefit from that information.

SUPERIOR RATION FOR EWES

According to Feeding Tests at Iowa College Soy Bean, Corn, Corn Silage is Excellent.

Soy bean hay, corn, corn silage and salt is an excellent winter ration for pregnant ewes, according to feeding tests of the Iowa State college. Less corn is required when soy bean hay is used instead of alfalfa and pound for pound of soy bean hay excels alfalfa.

GRAIN GAMBLING HIT

Futures Bill Designed to Abolish Grain Speculation Passed in House by Decisive Vote.

St. Paul—The Futures bill, designed to abolish grain speculation contracts in Minnesota, passed the House by a vote of 101 to 18, after a short but warm debate in which Representative R. A. Wilkinson argued for the bill and Asher Howard against it.

The vote was no surprise either to friends or opponents, amendments having been added by the House committee on markets, which removed some principal objections of the opposition. The galleries were crowded and many visitors were present on the floor to hear the debate.

Mr. Howard, in talking against the bill, said he hoped "further amendments would be offered in the Senate."

Opening the debate, Mr. Wilkinson said it would bar gambling but permit hedging. He maintained the original bill would have done likewise and said the legislation was called for by marketing conditions, that producers felt they were discriminated against and passage of the bill would restore the grain business to a point where supply and demand would govern.

He said Julius Barnes had admitted there was gambling and that "consciences of the business men would finally bring a remedy," and interpreted Mr. Barnes' statements to be "we are cherubs and if you will let us alone we will become full grown angels." J. Ogden Armour received respects of the speaker, who alleged that Mr. Armour was active in "cornering" grain. Mr. Wilkinson closed by quoting figures showing that thousands of members of the Farm Bureau federation were unanimously for the bill.

At present the Senate does not consider House bills until all Senate measures on general orders or the calendar have been passed upon. Senator C. W. Gillam moved to amend this rule so that bills would be taken up in the order printed, but the motion was defeated. This means that important House measures, already passed by the House, may not be considered for weeks.

For Sunday Passenger Service.

In response to complaints from many towns in Minnesota that they have no Sunday passenger trains, Representative C. F. Serline, of Mora, introduced a bill requiring the Railroad and Warehouse commission to hold hearings in county seats regarding train service, and providing that each county seat, located on a railroad, shall be entitled to at least one passenger train daily, including Sunday.

Minnesota voters may ballot on the eight-hour day if the legislature gives serious consideration to a constitutional amendment, introeuddehqdo mf resentatives O. D. Nellermoe, F. E. Miner, George Nordlin and others. Workers in mechanical, mining, telephone or telegraph exchanges, industrial establishments, mercantile, luandry, bank, hotel, public lodging, apartment house, school, hospital, theater or restaurant work, come under the provisions, and shall not work more than 48 hours a week.

Motor Tax Rate Set.

The Senate and House sub-committees on refundment and on motor fees have agreed upon the tax rate of 1.8 per cent on the cost of passenger cars f. o. b. the factory with a minimum of $12 for cars under 2,000 pounds weight and $15 for cars of 2,000 pounds or over.

The joint sub-committee on refundment has agreed upon the plan to take care of county bonds issued to raise cash to pay for trunk line construction, and to permit them to issue bonds for the purpose of taking up warrants issued for road construction which also will be taken care of by the state, the interest to be paid annually and the bonds retired when they become due.

Death Penalty Act Killed.

Senator James H. Hall's bill for the restoration of capital punishment in Minnesota lies dead in the Senate committee on judiciary. Senator Hall has taken a poll of the committee, finding the sentiment unfavorable to his bill, and accordingly has decided not to press for action on his measure.

Under a bill introduced by Representative Sherman Child, chairman of the Public Welfare committee, the benefit of the mothers' pension law would be limited to those who have been residents of the United States and residents of the counties from which the applications are filed for two months.

Colonization Measure Up.

A bill, said by Representative F. J. McPartlin of International Falls, "to be the most important measure before the legislature for northern Minnesota," was recommended for passage by the House, sitting in committee of the whole. This proposed law creates a state land colonization committee, provides for the settlement of northern Minnesota lands, gives preferential privileges to soldier settlers and, if passed, will greatly enhance development of the unsettled parts of the state, according to Mr. McPartlin's statement.

To Legalize Party Conventions.

Draft of a proposed law to legalize party conventions and authorize them to adopt platforms and endorse candidates for county, state and national offices was reviewed by the elections sub-committees of the House and Senate.

Few changes were made from the plan recently made public and the committeemen expressed the belief that the bill would command the support of all who concede that political conventions should have official standing and that the election laws could be improved without making material sacrifices.

To safeguard the convention against gang politics or objectionable manipulation is the main purpose of the carefully drawn bill. Precinct delegates are to be chosen on the second Tuesday in March of every even-numbered year. County conventions are to follow within 10 days, and the state convention during the last week of the same month, on dates to be fixed by the respective party committees. Similar provisions are made for senatorial legislative, judicial and congressional district conventions.

Three delegates at large from each county, in addition to the number fixed by representation, to be determined by committees, will be entitled to seats in each state convention. The full vote for each county shall be cast except where less than half of the delegates are present, when 50 per cent of the vote shall be received.

Vote Change in Boxing Law.

Extension of the boxing law to cities of the second and third class, was approved in the House by the narrow majority of 55 to 52. The law, as introduced, also gave cities of the fourth class boxing privileges, but the general legislation committee amended it so only cities of 10,000 or more could stage bouts. During the debate it was said the American Legion was backing the bill, but Representative Sherman W. Child, a Legion member, denied this. Representative L. O. Teigen moved indefinite postponement, and F. J. McPartlin said he would introduce a bill killing the entire boxing law, if smaller cities were not allowed to have boxing.

Proportional Voting Bill Before House.

Seeking to facilitate adoption of the voting system known as "proportional representation," and to guard against its rejection on grounds of unconstitutionality, advocates of the system have induced introduction of a bill for an amendment to the Minnesota constitution, to be submitted to referendum at next state election. The bill, introduced in the House, provides for amendment of Section 6 of Article 7, of the state constitution, to read as follows:

"All elections shall be by ballot except for such town officers as may be directed by law to be otherwise chosen. The legislature may provide for equal preferential or cumulative voting and counting to secure proportional representation for minorities in the state or any of its subdivisions."

This measure, its sponsors say, is merely intended to validate proportional representation if it be desired to make it a part of the voting system by which a city council or other body may be chosen. It is a system already in use extensively in European countries and it has been adopted in some American cities as the means by which members of their legislative bodies are chosen. It is used only when several persons—certainly more than one—are to be chosen, as aldermen or members of a school board.

It follows, from the nature of the system, that it can be used only to place more than one person in office as representing a given district or the city at large. For it is a system of voting by which it is declared every group of citizens can obtain their proportionate share of representation on elected bodies.

5 Per Cent Royalty Bill Passed.

By a vote of 103 to 14, the House of Representatives passed the bill imposing tax of 5 per cent on royalties received for rights to mine ore. The measure is practically the same as was passed in the House two years ago by a vote of 101 to 18. It was killed in the Senate at that time. Under the terms of the bill a "royalty" is defined as meaning any fee received by owners of land for the right to explore or to mine.

Representative Ralph J. Parker of Spring Valley, was the only legislator to speak on the bill. He argued that it is in line with the tendency of tax those best able to pay. He insisted that it will reach [illegible] which is paying no taxes and contributing nothing to the wealth of the state, although profiting from its natural resources.

Amended so as to give privileges of grain exchange membership to the Equity Co-operative exchange, the House bill to require the Minneapolis Chamber of Commerce and the Duluth Board of Trade, as well as tS.eht Paul Livestock exchange, to admit to membership co-operative organizations granting patronage dividends, was recommended for passage in the Senate committee on agriculture.

Advocates of the so-called Nash bill, which met with an adverse vote in the Senate judiciary committee, decided to make no further efforts to pass the bill. As the vote in the committee was very close, they considered putting in a minority report and carrying the fight to the floor of the Senate. The bill would have changed the procedure for removal of public officials by the governor.

Representative A. J. Praxal would make it harder to confiscate the guns and other equipment of hunters by requiring the game wardens to take the case into court and get an order.

LAND VALUATION CAN BE DOUBLED

Improper Utilization of Soil in High-Grade Agricultural District Is Related.

STREAM WASTES MANY ACRES

Farmer Can Redeem Much Valuable Soil By Regrouping Different Buildings Without Sacrificing Convenience.

(Prepared by the United States Department of Agriculture.)

"Stappard, on the next farm, has offered me 5 acres of land next to the line fence for $200 an acre. I need more land, and I've half a notion to take the offer."

The Sunday quiet and the warm spring sunshine had lured the farmer and his visitor to a perch on the top rail of the cow-lane fence, where they fell into discussion of United States Department of Agriculture reports. The visitor thought for a moment while his eyes roved across the flat farm land before them.

"Why pay $200 an acre?" he inquired finally. "Why not buy the few acres you need from a man who can sell it to you for half as much?"

Land Gets Full Price.

"One hundred dollars an acre for farm land in this country? I guess not! Pete, you don't know farm values out here. Back in your New England hills you may find land as cheap as that, but you can't buy a rod of tillable land in this section without paying the full price for it!"

He laughed as he said: "If you can find 5 acres for sale in this township at the price you mention, I'll buy it—provided it is within 3 miles of my home."

"Closer than that," said the New Englander cheerfully. "In fact, you're standing on a part of it right now—sitting on it, I mean."

"But this is mine already!"

"Of course," retorted the other. "It's your cow lane and you're the man. You can sell yourself a few acres of first-class farm land at $100 an acre—less for some of it, perhaps. I bought a few acres from myself last spring, after I had learned how simple the transaction was."

The farm owner laid a firm hand on his friend's broad shoulder.

"Quit talking riddles," he warned, "and come out with the story or I'll tip you off into the nettles!"

"You can get all the land you need by making your wasted land productive. You own the wasted land, and you can buy it from yourself at the price of making it tillable; that's what I mean."

"But the waste land on this farm can't be made productive. There's only an acre or so in that stony hillock over there—and I'm even getting cash returns from that by planting cherry trees among the stones!"

"I didn't say 'waste land'; I said 'wasted land,'" the other reminded him. "Waste land is land made unprofitable by nature; wasted land is productive land that man himself has failed to make use of. That's the difference.

This Unconfined Brook Wastes Many Acres.

"The size of your farm business has more to do with your income than any other feature. While you've been planting cherry trees among the rocks on a stony acre you've been using this long lane for no other purpose than as a path for cattle to pasture. You could use the public road almost as conveniently. This lane is right in the heart of your corn land, too. It must be 500 yards long and it's a rod wide at least. There's about three-quarters of an acre of prime soil right there for the price of taking out one of these fences.

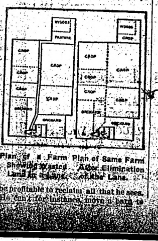
"And the road borders your farm for the whole length of your field. I don't know what the highway laws in this state are, but certainly they don't require all the land that lies between your fence and the road. Find out how much the highway encroaches on your land and move your fence up. There's another fat acre there.

"Then, there's that Osage orange hedge fence your father planted along the line running west from the house. That hedgerow robs you of more land per rod than any other fence on the farm. It not only occupies an acre to every 200 rods but renders worthless for cropping a strip 20 feet wide on each side of it. It will be money in your pocket to take the tractor out some time when work is slack and snake that old hedge out by the roots. You can put this rail fence there. Or you can put a wire fence there and use these rails to stake-and-rider some of your other rail fences.

"Look to your brooks and ditches. A brook that wanders at will through good farm land will put much of it beyond the reach of the plow—a ditch will set it straight.

Scattered Over Rich Soil.

"Many farmsteads have their buildings scattered widely over rich land. The farmer can buy back a lot of valuable soil by regrouping the clusters more economically without sacrificing either beauty or convenience. Where farm land increases in price, as it has in this section, it pays the farmer to go over his place with an eye open for wasted territory. It won't always be profitable to reclaim all that he sees. He can't, for instance, move a barn to gain a rod or two of land, but he'll be sure to see much that can be done. Every foot brought under profitable cultivation increases the farm business and the farm profit."



Plan of a Farm Showing Wasted Land in a Lane. Plan of Same Farm After Elimination of the Lane.

"I never realized that the matter was so important," mused the farm owner.

"Neither did I," was the reply, "until the Department of Agriculture wiped the economic dust off my business spectacles!"

POOR EGGS INCREASE PRICES

Percentage of Spoiled Product Shipped to Markets Is Very High and Discourages Trade.

In a shipment of three cases, or 90 dozen eggs, recently received by a Washington (D. C.) commission firm, 18¾ dozen were condemned by the local health department as unfit for food. The percentage of bad eggs shipped into the markets is very high, reducing trade and discouraging consumption, say specialists of the bureau of markets of the United States Department of Agriculture.

If a few eggs in the dozen are bad the housewife pays exorbitant prices for the sound ones. The dealer always prefers to handle good eggs, for spoiled ones injure his business reputation. A deduction for spoiled eggs also makes the shipper feel that he is not being treated in good faith by the commission merchant.

Bad eggs then are a loss to every one who handles them. Every egg marketed should be of unquestionable quality.

STRONG SEED IS REQUISITE

That of Alfalfa, When Properly Matured, Has Clear, Light Golden Color, With Green Cast.

Good seed is the first requisite in getting a stand of any crop. Alfalfa seed should not only be of good quality and strong in vitality, but it should be clean and free from foul weed seeds. Properly matured seed of alfalfa has a clear, light golden color, with a faint greenish cast. Immature seeds are greener and seed which has been bleached or heated becomes discolored. Brown or blackened seeds are likely to be dead or low in vitality. Greenish colored seed, if not too shrunken, may germinate well. Prefer plump, heavy seed; badly shrunken seed, even though it may sprout, will produce weak plants.

INTRODUCTION OF MILO CROP

First Grown in This Country About 1882 and Was Not Uniform in Height or Maturity.

Milo was grown first in this country about 1882. It was not uniform in maturity and in height, most of the plants being tall. Standard milo is a direct descendant of the original type, reduced by systematic selection to a uniform height of from 5 to 6 feet under dry land conditions.

VOLUME XV, No. 13. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, MARCH 25, 192[illegible] $1.50 PER YEAR

Senate Passes Farmers' Bills

Rural Minnesota's demands for legislation to improve farm and market conditions were answered when the state senate, in less than three hours, passed four of the principal bills of the so called farmers' program. These bills already had been passed by the house. Three were amended in the senate, but the house quickly accepted the changes and repassed the bills the same day. They then went to the governor.

The four measures, in the order in which the senate passed them, are:

First—A bill to prohibit short selling and gambling in farm products, but protecting legitimate hedging. The vote was 50 to 11.

Second—A bill to compel all boards of trade to admit farmers' co-operative marketing organizations to equal membership. The vote was 47 to 14.

Third—A concurrent resolution requiring re-establishment of Minnesota grain grades and sendidg a delegation from the state legislature to urge congress to modify federal grades accordingly. The vote was 57 to 1.

Fourth—A bill for a constitutional amendment, permitting the stnte to establish a rural credit system, and loan its funds to farmers. The vote was unanimous for the bill.

The rural credit amendment to the state constitution does not require the governor's signature. It will go before the voters of the state at the next general election. A majority of all those voting at thh election will be required to pass it. South Dakota already has such a law in successful operation.

Called to Rest

Little Freddie Habestroh, son of Mr. and Mrs. Ed Haberstroh, died at his home Thursday evening. He was two years and ten months old at the time of his death. He had been lingering between life and death for six weeks.

He leaves to mourn his death his parents, Mr. and Mrs. Haberstroh, four brothers, Edward, Carl, John and Emil, three sisters, Lena, Leona and Hilda, Freddie being the youngest in the family. Freddie had one little sister besides the angels waiting for him and he is now across the river, safe, where no sorrow or danger will come to him, and is waiting in the arms of Jesus for his relatives and friends. Funeral services were held at the home at 1 o'clock, conducted by the pastor, Rev. H. Lutz. Many friends were present to pay their last tribute of love to the memory of the deceased.

Peace to His Memory

Never a day but his name is spoken,
Never an hour but he's in their thoughts:
A link in that family chain is broken;
He is gone from his home, but not from their hearts.
Never shall his memory fade;
Sweetest thoughts shall ever linger
Round the grave where he is laid,
Sadly missed by father, mother, brothers and sisters.
Asleep in Jesus! Blessed sleep,
From which none ever wakes to weep;
A calm and uudisturbed repose,
Unbroken by the last of foes.
Asleep in Jesus! Oh, how sweet,
To be for such a slumber meet,
With holy confidence to sing
That death has lost his venomed sting.
Asleep in Jesus, peaceful rest,
Whose waking is supremely blest.
No fear, no woe shall dim that hour
That manifests a Savior's power.
Asleep in Jesus! Oh, for Freddie
May such a blissful refuge be!
Securely shall his ashes lie
And wait the summons from on high.

FOR SALE

Fordson tractor, good as new; 20 double disc tractor drill, new; double disc, good as new; Fordson gang, with extra set of breaking bottoms; also pulley and fenders for the tractor. Absolutely guaranteed. At a bargain price if taken at once, $1050. Will take good team of horses and oats. Balance on easy terms.

Also, John Deere triple engine gang, in first class shape, with three set extra shares and three breaking bottoms: one P. N. O. brush breaker, 16 in., good as new; steam engine, 25 horse power, Coline; double disc Van Brunt drill, good as new. All at bargain prices.

Moylan News

A bunch of young folks called on the Fiskeaold young folks Wednesday evening.

hTomas Cullen, Richard, Willie and Henry Kiesow returned home Tuesday from she woods.

Herman Kiesow and daughter Lena were business callers at Goodridge Thursday.

Mr. Lewis hauled a load of cordwood to Goodridge Thursday.

Martha Girrulat visited with Myrtle Erickaon Tubsday evening.

James Blaine was a visitor at Ed Fiskevold's Wednesday.

Arthur Erickson and Herman Sulley were hunting jack rabbits the other day. Results unknown.

Herman Zinter made a business trip to Thief River Falls Tuesday.

Mrs. Girrulat returned to her work Tuesdae after a few days' visit in the country.

For Safe

1,000 Oak Fence Posts, at 10 cts. apiece, and 25 cords of Poplar Cordwood, four miles south of Erie postoffice, by Frank Savage,
In section 6, town of Hickory.

FEARED FOR HIS OWN TRELLIS

Chinese Humorists Tell Good Story With Henpecked Magistrate as the Central Character.

Managing wives and henpecked husbands are not uncommon in China, in spite of the subordinate position that women are supposed to occupy in that country. A considerable part of the humor of the Chinese is concerned with households where the woman is master; one popular story, quoted by a writer in the Open Court, is as follows:

A district magistrate was sitting in his court, trying cases. When the chief clerk appeared and took his seat the magistrate saw that his face was full of scratches; so he asked him. "What have you done to your face?"

"Yesterday evening," replied the man, "I was sitting under my vine trellis, enjoying the cool breeze, when all at once a gust of wind overturned the trellis, which fell upon me and scratched my face."

But the magistrate did not believe the story. "Evidently these are scratches of finger nails," he said. "I am sure that you had a quarrel with your wife and were scratched by her. Is it not so?"

"Sir, you have guessed right," said the clerk blushing.

"Is your wife such a dangerous person?" inquired the magistrate. "I shall avenge you by summoning your wife before my tribunal and giving her a good thrashing."

Just as he uttered those words his own wife came rushing in from the next room and said, "Whom are you going to beat?"

The magistrate hurriedly said to his attendants, "The sitting is adjourned. Leave the hall quickly. My vine trellis may collapse at any moment!"

Consistency.

We hear so much of consistency. Carlyle said: "Wise men sometimes change their opinions, fools never." Emerson has written:

"With consistency a great soul has simply nothing to do. He may as well concern himself with his shadow on the wall. Speak what you think now, and tomorrow again speak what tomorrow thinks, though it contradict everything you said today. 'Ah, so you shall be misunderstood.' Is it so bad to be misunderstood? Pythagoras was misunderstood, and Socrates, and Jesus, and Luther, and Copernicus, and Galileo, and Newton, and every pure and wise spirit that ever took flesh. To be great is to be misunderstood."

SHELTER SAVES IMPLEMENTS

Farmer Would Be Surprised to See How Much Trouble Could Be Avoided by Keeping Off Rain.

"Shelter will double the life of farm machinery," says O. R. Zeasman of the agricultural engineering department of the University of Wisconsin. "If farmers would only keep the rain and rust away from their implements, they would be surprised to see how much trouble would be saved.

"Rust can cause many troubles. For example, an adjustment may become so badly rusted that it cannot be used. It is often damaged or broken in loosening."

MISDIRECTED LABOR OF MAN AND HORSE REDUCES FARMER'S PROFIT

able Culture Requires More Labor From Man Than From the Horse.

(Prepared by the United States Department of Agriculture.)

"Jimmy is too contented," declared James Henderson, Sr. "He'll work 16 hours a day here on the farm and never stop to wonder why he doesn't get more money than one of those slick-haired soda clerks in the drug store. Something is wrong with our farm system. I think I know what it is, but it'll do Jimmy more good if he finds out for himself. I want to teach him to think."

Perplexed by Losses.

He was right about his farm system, but he was wrong about his son. Jimmy, in his own quiet way, had realized long ago that a business which required from 14 to 16 hours of steady effort daily, should pay more than he received as his share of the farm profits. He had indulged in all sorts of mental gymnastics in an effort to locate the trouble, but had never reached a sound conclusion. He knew that certain crops produced a profit, while others probably involved a loss. How was one to know one from the other; the difference between poor farm practice and good farm practice?

He found the solution in a bulletin which came to him from the United States Department of Agriculture. "A Method of Analyzing the Farm Business," was its title, and Jimmy realized, after a glance at the pages, that he had the secret of success so far as the Henderson farm was concerned. He devoted a good many evenings to studying the bulletin, then finally sought the elder Henderson on the farmhouse veranda one night and surprised him by remarking that their farm system was as full of holes as an old boot. Once launched upon the subject the young man displayed an interest that caused his father to settle back in his chair with a sigh of content.

"We've never made money here because we spent too much," Jimmy asserted. "We haven't spent money exactly, but we have spent things that are equivalent to money—time, labor and farm acreage. If we permit Jack, the hired man, to put in a day's work on a job which isn't profitable, we've lost the amount of his wage and, in addition, the amount of profit over and above his pay which his work would have earned for us. We've wasted his labor income.

"We've spent a good deal of horse labor income, too. That's our sore spot, I guess. We have 12 horses—fine ones, I'll admit—but they're eating up profits in the barn. I've made some calculations based on the figures contained in this bulletin. Arranging the problem to suit our crop rotation and the size of our farm, I find that we've just work enough for eight of these horses. Eight horses would pay us a profit, but four more will eliminate that profit in food and care."

"Where did you get all this information, son?" queried his father.

"From a farmers' bulletin," confessed Jimmy, unabashed.

"Humph!" grunted James Henderson, Sr., in no wise displeased. "Maybe the bulletin can tell us how to get out of the hole?"

"Yes, sir! We've been paying Jack good wages the year around just so we'd be sure we had him for the summer's work. We've lost most of his labor income during the winter months. Our dairy is small. If we build up a larger dairy it will give us an opportunity not only to employ Jack's labor at a profit in the winter season, but it will also use up some of our excess horse labor. Similarly we can plan crops that will require more horse work and less man work. The fundamental information we need has already been obtained for us by the Department of Agriculture, and a good bit of it is in this bulletin.

"They've studied a large number of farms and calculated to average so a farmer can tell more accurately just the amount of labor he will need to plant, cultivate and harvest any particular crop. For instance, one cutting of hay on the average farm re-[illegible] day [illegible] one [illegible] each horse [illegible] days of [illegible] of horse [illegible] different [illegible] the acre and ten [illegible] to these tables [illegible] more main [illegible] Griggs, for in[illegible] hours of work [illegible] by a horse [illegible] will not fit [illegible] average estimates [illegible] basis from which [illegible] can make his own calcul[illegible] the specialists say that careles[illegible] of the labor item, is one of [illegible] influences in reducing [illegible] profits." He paused. "The [illegible] thing I'd like to know—why [illegible] Department of Agriculture sent me [illegible] bulletin. I didn't ask for it—didn't even know they had it."

The [illegible] old man in the chair glanced [illegible] at his son with a gleam of merriment in his eyes.

"N[illegible]" he replied. "You didn't—but [illegible]"

Medals and Things

By MARTHA M. WILLIAMS

(©, 1921, by McClure Newspaper Syndicate.)

There was frost in the air; also in Mrs. Hubert's manner, as she went between gorgeous ragged ranks of late growth to meet the Trevors. Aunt Bab had halted them there to see the choice late roses and chrysanthemums she was busy hooding and shrouding against the strengthening cold. "I could cut them, to be sure," Aunt Bab explained. "But it is a shame not to let them die happy in the sun on their own stalks."

"How I wish humanity ran in families!" Archy Trevor laughed, taking Mrs. Hubert's hand. "If it did—but there; I won't speculate on the impossible. Instead, here are thanks for what I may or may not be about to receive."

"Vivian, dear—please snub him—hard," Anna Trevor entreated with a plaintive accent. "He has been insufferable now for three days over—he won't tell what. Say right off you won't listen, no matter what it may be. Then he will run away to sulk—and we can have a beautiful gossip—"

"About me, of course—I am—fixed—as the laws of Medes and Persians," Archy interrupted.

"Good boy!" Aunt Bab murmured, patting his arm.

He kissed her hand, saying with twinkling eyes: "Do your worst, ladies! I'm ready for anything—even to have you set the cats on me—"

"You'd like that, no doubt—now that you have grown a cat fancier," Mrs. Hubert said silkenly.

Archy smiled, not quite easily, answering: "There are cats—and cats. I am not fond of—everything that has claws."

"Stop fussing and be human," Aunt Bab commanded. "When you are as old as I am, you'll feel how wicked it is to waste life getting grouchy about nothing. Go on and tell us your great secret, Archy—whether it's about money, marbles or matrimony."

"It might concern all three—only it doesn't," Archy answered, shrugging. "It's only—all these came in a bunch," pulling from a deep pocket a huddle of ribbons, crosses and medals. "Near-affidavit along with them, saying they're all due me. I can't quite believe it—[illegible]"

"Archy! You darling!" Anna cried, hugging him close. Aunt Bab did the same as soon as he was free. Mrs. Hubert looked on with [illegible]

[illegible] the whole long while, Archy had been so silent as to what had befallen in those months overseas. He had come back without a scratch, and had seemed to avoid comradely gatherings, though he had clung to his buddy—Joe-George Green by name—closer than to a real brother. They had had many things together about something they would not name. When Joe-George went on to California his last shouted goodby had been, "Lordy, old son—they'll git you yet. Don't I wish I could stay and see the fun!" Even after that Archy had held his tongue. And Vivian Hubert, whom he had loved and lost as Vivian [illegible], had been hurt and chilled—there must be something terrible behind this reticence—nothing could make her believe Archy had played the coward—but there were so many, many other ways wherein he might have tripped and fallen. She had been far from happy. [illegible] had begun dangling after [illegible] woman—who affected the intense in everything. Just now she [illegible] humanitarian craze—went about doing good, according to her own [illegible] animals that she might better have left alone. Cats were her latest specialty—hence Vivian's thrust at Archy—he had actually carried home for the Francis person a litter of blind kittens rescued from drowning, which she insisted were entitled to an easier death. Vivian had laughed easily over the story—thereby confounding the gossip who had told it. But she had cried stilly half the night after—she had so hoped Archy would understand her marriage had been hardly of her own making, but a yielding to what her elders in their wisdom had decreed. By a cynical jest of fate, death had freed her six months after the wedding day. Now the freedom was Dead sea fruit, turning to ashes on her lips.

But she had rallied, as women will, veiled her heart by playing with other suitors, telling herself the while she would never marry anybody. She was striving to hold fast to that mental attitude—even with Archy proven a rare hero they were friends only. He stood tossing the decorations lightly from hand to hand, his sister and Aunt Bab trying hard to snatch them away. Gripping the hands, he held them out to Vivian, saying with his most winning smile: "Hold fast what I give you. Remember, Viv, how many times we played that game?"

"Several million, I think," Vivian managed to answer, her fingers clutching hard what he had dropped within them. "I'm wild to look at them—may I?" she went on.

Archy shook his head. "No, I'll drive my bargain sight unseen. These tokens come to me from three fine fellows—Johnny Crapoud, John Bull, Esq., and our kind kinsman, Uncle Sam. You know, it is a privilege to pin any one on an honest-to-goodness hero—how much will you offer for it? And which will you choose?"

"Uncle Sam's—if it's no more than a shoestring," Vivian cried, flushing happily.

"Highest priced in the lot," Archy commented. "But now I think of it, you're fond of high prices—"

He caught himself up sharp. Vivian had grown white as death—she thought he was throwing her marriage in her teeth—could she ever forgive him? His heart turned leaden as she turned from him saying clearly: "Yes, but I have grown wiser with age. So I drop out. Anyway, I could never outbid Mrs. Francis—I'm not in her class."

"Hight-o!" Archy flung back, as he took the glittering bundle and passed it to Aunt Bab. "Nan can take a week off for pawing 'em over," he went on. "Think I'll start to California soon."

"On a wedding trip?" Vivian asked, trying to speak lightly. Archy caught something in her voice that made him wheel, look hard at her, then take her hands, and say joyously: "Why, come to think of it, that would be nice—not to say economical. I'm due there, anyway, between this and Christmas. It was surely kind of you to think and speak of it. How long will it take you to pack?"

"Pack? What do you mean?" Vivian began primly, her cheeks, though, belying her austerity. Archy kissed her handsomely.

"You can't think I'd turn down an old friend cold," he said. "Indeed, I didn't hesitate the least bit—made up my mind to accept before you were half through proposing."

"Don't you dare tell Joe-George I had to do it," Vivian said from the depths of his shoulder, where her face was hidden. "Nor Mrs. Francis," Aunt Bab supplemented. Anna had pity; she dragged Vivian away from them, saying over her shoulder: "Of all the stupid courting I ever heard or read, or dreamed of, this is the very worst."

"Still and all—your 'ero brother was never more a 'ero," Archy half chanted, running after them. Imperatively he stopped the young woman, stuck out his chest and said in his deepest voice: "Adorn me, women! If I must go a lamb to the altar, let it be with all my blushing honors thick upon me." [illegible]

[illegible] coming to them sadly, out of breath.

Archy giggled. "Yes, ma'am. I never will do so no more while I live."

GIVE ATTENTION TO GARDEN PLOT

Likely to Be Most Profitable Acreage on Farm for Producing Food for Family.

REFUSE SHOULD BE REMOVED

Considerable Increase in Farm Income Can Be Made by Sale of Young Plants in Hotbeds Ready for Transplanting.

(Prepared by the United States Department of Agriculture.)

Whether it is conducted on an extensive scale to supply the market or whether it is to produce food for the family the garden plot is likely to be the most profitable acreage on the farm.

Any [illegible] dead vines or plants, and bean [illegible] or tomato stakes should [illegible] away.

The earl[illegible] and choicest vegetables are harvested by the man who maintains a few hotbed sashes and uses them to start his garden. He is able to handicap the frost line by several weeks, and to set strong, well-developed plants in his garden at a time his neighbors are planting seed.

Increase Farm Income.

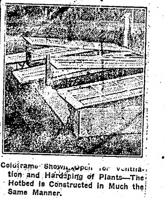
The farm income is at its lowest point in the early spring, but it can be increased considerably by the sale of young plants grown in the hotbeds and ready for transplanting. Tomato, cabbage, eggplant, and pepper plants are always snapped up when the first warm planting days come, and they are easily grown in the hotbed. A little more space and a little more seed than the grower needs for his own use are likely to bring good profits. Before the ground freezes in the fall is a good time to clean out the old hotbeds.

Unless the soil used in the hotbed is to be exchanged for fresh earth it should be shoveled from the bed and tossed into a pile nearby. The decayed manure from the bottom is scattered over the pile and thoroughly mixed with it to form rich soil for next year's beds. Over this goes a coat of straw or leaves held down by bits of board to keep it from blowing.

Some farmers find it convenient to use evergreen boughs instead of straw for the outer covering.

Hotbed Should Face South.

New hotbed pits should be dug so that they will face the south, and the location should be selected so that the beds will be protected from cold north winds and late spring storms. Sometimes the earth taken from the new pit is suitable for use in the hotbed, but this is the exception rather than the rule. A few loads of leaf mold from the woods mixed with the natural soil will often form a smooth, rich, stoneless mass which gives an ideal hotbed filler.



Coldframe Shown Open for Ventilation and Hardening of Plants—The Hotbed Is Constructed in Much the Same Manner.

The back or north side of the frame is usually made from 12 to 18 inches high, while the south end is about eight inches, so that the whole bed may have pitch enough to get the sun upon all parts. The standard hotbed sash is handled by most dealers, and measures three feet in width and six feet in length. A frame just wide enough to support the sash seems to be the most satisfactory, though wider beds are sometimes used with supporting ridges placed at six-foot intervals. A well-painted cypress sash, glazed with good double-strength glass well set in putty should give the careful gardener 12 to 15 years' service.

Heat for the hotbed is furnished by means of a bed of horse manure 8 to 16 inches thick in the bottom of the pit. Permanent hotbeds are often heated with coils of steam or hot-water pipes under the bed.

Hotbeds require constant care to prevent their becoming overheated, or [illegible]

Easily Prepared Emulsion of Soap and Oil Is Excellent for Plants and Animals.

Kerosene emulsion is one of the best lice killers on plants and animals, says North Dakota college. It is easily prepared and very cheap. Dissolve one-half pound of soap in one gallon of kerosene and stir very vigorously, or better yet, churn with a force pump for a few minutes. For use, dilute one gallon with nine to ten gallons of water. Stir well. It is best to use rain water. If only a small quantity is wanted use one to two ounces of soap, two quarts of boiling water and one pint of kerosene and dilute to two gallons.

How Birds Eat.

A nuthatch will carry a fragment of a hickory nut to a tree and wedge it into a crevice in the bark. Jays and chickadees hold the nut or seed they would peck under the foot, but the nuthatch makes a vise to hold it of the bark of the tree, and one act is just as intelligent as the other; both are the promptings of instinct.—John Burroughs.

CARE OF EWES IN LAMBING SEASON

Success of Flock Depends Greatly on Protection Given to Mothers and Lambs.

PROPER FEED IS ESSENTIAL

Separate Pens Should Be Provided With Openings to Permit Ewe to See Other Sheep, Thus Preventing Nervousness.

(Prepared by the United States Department of Agriculture.)

The lambing season is the time for particular care of the mothers of the flock, and precautions against any illness or injury either to ewes or lambs.

The ewe should have a quiet, dry, sufficiently warm place in which to bring forth her young, should be insured against molestation by other sheep, and should be guarded against possible mishap.

Avoid Heavy Feeding.

Care should be taken before lambing time, specialists of the United States Department of Agriculture advise, to see that the ewe is not fed too heavily, as heavy feeding is likely to cause udder trouble. The wool should be clipped from around the teats, to enable the lamb to find them readily.

Just before lambing time, the ewe will become restless and show sunken places in front of the hips. She should be placed in a separate pen, which can be made of two panels of board fencing about four feet high, hinged together at right angle and hooked or otherwise fastened to the walls of the sheep shed. These panels permit the ewe to see the other sheep, thus preventing her from getting excited and nervous. At the same time, they protect the lamb from trampling, give the ewe opportunity to get acquainted with her offspring and reduce the danger of disowning later.

The lamb that is born strong and vigorous will need little care. If conditions are not so favorable, first-aid measures will be necessary. In cold weather lambs become chilled and die, unless prompt remedies are used. Wrapping the lamb in hot flannel cloths, which are renewed as often as necessary, is an excellent method of warming it. Another method is to place the lamb for a few minutes in water as hot as the hand will bear; then dry with cloths and wrap for an hour or two in fresh cloths or a sheepskin. Milk should be given freely and the lamb returned to the ewe and allowed to suckle as quickly as possible.

Well-Nourished Lambs Give Little Trouble in Rearing.

Little trouble is experienced with disowned lambs when lambing pens are used. With a ewe that refuses to own her lamb it is sometimes sufficient to draw some milk and rub it upon her nose and also upon the rump of the lamb. A heavy milking ewe with only one lamb sometimes can be persuaded to adopt an orphan or a disowned lamb of a lighter milking ewe.

After lambing, the ewes should be watched to see that their udders are in good condition. Ewes should be kept in lambing pens for about three days after lambing and then turned into a pen by themselves, where they can have special feed and care. After lambing they should be fed lightly at first, being put on full feed about the third or fourth day.

Troublesome Ailments.

Well-nourished lambs from properly fed ewes have little difficulty, but some troublesome conditions are to be expected in any flock. Constipation is one of the most frequent ailments. It is indicated by straining and distress, and can be remedied by a teaspoonful of castor oil. Indigestion is shown by distress and frothing at the mouth. This also usually can be relieved with castor oil. Scours can best be cured by giving one-fourth ounce of cooking soda, one ounce of sulphate of magnesia and a pinch of ginger in flaxseed tea or gruel, following the dose in four hours with two ounces of flaxseed oil. Sore eyes are common and can be relieved with a few drops of silver nitrate solution known to all druggists as "eye wash," or 15 per cent. [illegible] or even a very small drop of pure [illegible]

M'PARTLIN BILL KILLED

Mining Tax Only Survivor of Levy Wreck—Eight Hour Day Limited for State Employes.

St. Paul—The tax which would have been virtually levied on every business under the McPartlin bill was killed in the House committee, leaving the mining tax the sole survivor of the taxing measures.

Representative F. J. McPartlin's occupational tax bill which would have levied upon practically every business and profession, was killed by the House committee on taxes.

Foes of the McPartlin bill had charged that it was designed as a backfire against tonnage tax legislation, but this the author denied.

Three Favor Passage.

There were but three votes in the committee in favor of the bill, those of Representative M. B. Cullum, Duluth; G. T. Murphy, Aurora, and H. A. Putnam, Ottertail county. Those who voted against the bill and in favor of indefinite postponement were Representatives Bendixen, Briggs, Haugland, Nealy, Warner, Welch and Wicker.

Eight Hour Day Limited.

The state house, by a vote of 50 to 43, went on record in favor of repealing the eight hour day for state employees engaged in agricultural or highway work. At present all Minnesota employees come under an eight hour day law, passed in 1919, but the committee on civil administration introduced a bill providing the eight hour day only for "employees engaged in inside work in all charitable, correctional and penal institutions."

Representative R. A. Wilkinson succeeded in having the house adopt an amendment to include prison and reformatory guards in the eight hour day.

F. E. Miner moved to postpone indefinitely the bill and one of the liveliest debates of the session followed. Representative O. D. Nellermoe made the main speech against repealing the eight hour law for certain employees and Theodore Christianson, N. T. Moen, J. A. Baxter and others opposed Miner's motion.

Bills Recommended for Passage.

Among the bills recommended for passage by the house are:

Making it a felony for any person convicted of a felony to carry concealed weapons.

Authorizing the railroad and warehouse commission to regulate distribution of railroad cars for grain during car shortages.

Permitting state auditors to make agreements with lessees of state mineral contracts for weighing iron ore in crude state.

Permitting railroad and warehouse commission to supervise installation of track scales at terminal warehouses.

Raising salaries of certain court reporters to $2,400 a year.

Measures to Speed Up Justice.

Following the suggestions of Governor Preus in his special message to the Minnesota Legislature last week, both houses have had under consideration measures intended to halt the crime wave prevalent in the larger Minnesota cities.

While house members were considering two rival bills aimed at "gun toting," Senator Charles R. Fowler introduced a bill in the other branch carrying out the governor's ideas for bringing criminals speedily to justice.

The Fowler bill, which has the governor's approval, reverses the rule in handling criminal cases. It provides that bail cases shall have precedence in trial instead of jail cases. It provides for expediting trial of all criminal cases, with strict rules against granting continuances.

After a prisoner has been found guilty, he is to be sentenced forthwith and kept in custody, bail not being allowed unless the trial judge or three supreme court judges sign a certificate of probable cause for granting a new trial. Sureties on bail bonds are required to file detailed schedules of information as to their property and county attorneys are permitted to examine them under oath as to their statements. No stay is permitted in a criminal case except as provided in the act. It applies only to counties of 200,000 population.

Meat Animal Inspection Bill Killed.

Provision for state inspection of meat animals before slaughter was killed by the house committee on public health. Women's organizations supported the measure, but dealers said it was not practical. Many defects were found in committee and it was decided to leave the entire matter to the next legislature.

Prohibition Bills Stir Lawmakers.

A hot fight has been started in the house over some stringent measures for the better enforcement of the prohibition law. One of the bills would limit the sale of flavoring extracts to druggists and require the intending purchaser to obtain a permit good for two years, and to sign an affidavit at the time of purchase that he or she is 21 years of age or over, is temperate and has not violated the prohibition laws. Another measure provides for the search and seizure of automobiles suspected of carrying liquor contrary

House Adopts Colonization Plan.

A Northern Minnesota development bill for the creation of a state colonization commission, to foster an elaborate settlement plan has received the sanction of the lower house.

The colonization bill bore indorsement of the Northern Minnesota Development association, is similar to that passed by the Senate, but defeated in the House toward the end of the last session, and provides a plan like that in successful operation in Wisconsin.

The bill provides for the creation of the state colonization commission, made up of the governor, who shall be chairman; the state auditor and the commissioner of agriculture, who shall be the secretary and active officer of the organization. The commission shall further proper efforts in land settlement work through bulletins and other publications, supervise the colonization companies, organized under the proposed act, with more than $25,000 paid up capital; appraise lands offered as security and approve bonds to be issued by such companies.

Income Tax Proposal Passed.

Provisions for submitting an income tax amendment to the state constitution are contained in a bill passed by the House of Representatives by a vote of 95 to 5.

The proposed amendment is almost identical to the one submitted to the people and defeated at the last election. The only difference in the present bill is that it does not provide for taxes on occupations or privileges. In his opinion on the tonnage tax matters, the attorney general held that an occupation tax was now constitutional.

The income tax amendment proposed does more than merely provide for a tax on incomes, gains and profits, but it provides for certain definite exemptions from taxation. It provides that "there may be exempted from taxation household goods, wearing apparel, agricultural products in the possession of the producer thereof, and tools, implements and machinery, in such manner as the Legislature may determine."

Would Curb Expenditures.

Taxes are rapidly becoming confiscatory and a halt must be called on state expenditures. Theodore Christianson, chairman of the House committee on appropriations, declared in a statement showing that Minnesota taxpayers will pay $74,000,000 to the state in the next two years if all requests for money are granted by the Legislature.

Appropriations requested of the Legislature this year total $43,000,000. This is in addition to $20,000,000 to be raised by standing tax levies and $11,000,000 that must be raised for the proposed Babcock road fund. This total tax will be $37 for every man, woman and child in the state.

Monument to Civil War Dead.

A commission to erect a monument in the national cemetery at Jefferson Barracks, Mo., to the memory of 156 known and many other unknown Minnesota soldiers in the Civil war who are buried there, would be created under the provisions of a bill by Representative L. K. Eaton, Minneapolis. The commission would be made up of Gen. C. C. Andrews, Henry B. Dike and Levi Longfellow, former members, respectively, of the Fourth, Fifth and Sixth Minnesota regiments.

Highway Bill Advanced.

The Senate committee on highways, by a vote of 12 to 5, approved of the single commissioner plan of administering the state highway department. Debate on the question was brief and was enlivened by an exchange of sharp words between Senators James H. Hall and W. A. Nolan.

Senator Hall wanted the matter decided by the committee, contending that a decision was necessary in order that the sub-committee preparing the administration bill might complete its work. Senator Nolan replied with the charge that Senator Hall was blocking early consideration of the bill by raising the question and precipitating a fight in the committee.

Early Adjournment Not Likely.

A joint resolution providing for adjournment of the Legislature on April 9th was introduced in the Senate by Senators Cumming, Wold, Bonniwell and others. A similar resolution is reposing in the House rules committee, where it probably will be allowed to die, inasmuch as the appropriations committeelhas announced that it could not possibly complete its work in time for such an early adjournment.

Ask Uniformity in Grading Laws.

Under suspension of the rules, a bill already passed by the senate, was put through the house, providing for three representatives and two senators to go to Washington, after the session is over, and petition the secretary of agriculture to change the federal grain grades, so they will more nearly conform to the old Minnesota state grades.

Bonus Proposals for Vets Fall.

Two attempts to overturn house appropriations committee reports were unsuccessful. The committee killed a proposal for the state to pay for a "white way" on the capitol grounds, and another to give the state bonus to veterans of the Spanish-American war, Boxer rebellion and Philippine insurrection.

Would Sell Historic Tablet to State.

Professor Knute Haaland of the University of Wisconsin, formerly of Minnesota, has offered to sell the runestone he discovered at Kensington, many years ago, to the state for $5,000, and laid his proposal before Governor J. A. O. Preus late yesterday. Professor Haaland claims the stone has a runic inscription, stating that a party of Norwegian explorers passed that way in 1362, and that 10 members of the party were murdered near a lake, a day's journey north of the point where the stone was discovered. It is seven feet

Fairbanks-Morse "Z" Farm Engines

Big reductions in prices have just been announced on "Z" engines. Remember that one or more of these engines on your farm will lighten your labor and help you get more work done.

The manufacturers have accepted their loss—we have accepted ours. You've been waiting for just this opportunity to buy at lower prices. Now you can do it.

Come in soon and let us show you the "Z" and prove the quality, design and workmanship, which convinced a lot of our farmer friends in this community that it is the one farm engine to buy.

THE BANNER

Taking Her Order.

His parents were what is popularly known as "high-brow," but they also were good sports, despite their air of culture and breeding. So when he suggested taking them to a restaurant in the market district of Boston, they agreed. The mother's exquisite clothes stamped her as a society woman, but democracy reigns supreme at Durkin and Park's. They sat down at the table. The waiter handed the mother a menu and then leaned confidentially forward over the back of the chair and said: "Well, sister, what's the good news?"—Indianapolis News.

Ancient Grinding Stones.

"And there shall be two women grinding at the mill," is a quotation from Holy Writ. It harks back to the primitive days when every household ground its own meal, mixed it and baked it. Grinding stones are found in prehistoric ruins, and away back in the hills you may find hollows bowled out in the rock in which Indian squaws used to grind corn with a pestle.

Ducks and Drakes.

Sending a smooth stone skimming across the water, skipping from wave to wave, is a very ancient game. It was played by Scipio Africanus and his friend Laelius more than two thousand years ago, and was probably a favorite pastime even then. The ancients called it "epostracismus." Its full English name, according to

GREAT EVENT FOR ST. IVES

"Fairy Mow," Held Twice a Year in Little English Village Had Origin 600 Years Ago.

As long ago as 1400 the little township of St. Ives obtained the charter allowing it to hold a market twice a year, on May 10 and December 3, and so on these dates, to this day, the winding, narrow streets are filled with busy people, and stalls are put up, and cheap-jacks ply their roaring trade, for the Fairy Mow is a thing that is not to be missed.

Along the cliffs above the blue-green sea the children are coming with their parents, and over the hills from little hamlets groups of friends are making their way on foot or in carts or jingles. The pleasant autumn air is warm in the sunshine, the summer visitors, or foreigners, as they are usually called, have departed, and St. Ives is once more herself again, and there is time to stand about and talk and gossip and laugh, as laugh they can, while great shoppings go on, and much deliberation is needed over the choice of the dinner of a coming festive winter' night.

But where do the fairies come in? Surely it is just for the Fairy Mow that the children have tramped those long miles and submitted to the drastic ablutions that took place the night before. And fairies they will find of some kind or another, if it is only on the hills on the way back. But the name Fairy Mow is just the English way of pronouncing the Celtic words "Fer-a-moh," which mean no more or less than the pig fair, and they have meant that for upward of 600 years.—London Mail.

THE GOODRIDGE BANNER

VOLUME XV, No. 14. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL 1, 1921. $1.50 PER YEAR

Farmers Approve Grain Sales Plan

Minnesota's producers, through 150 delegates sent to the state ratification convention here, have approved the national co-operative grain marketing plan drafted by the Committee of Seventeen.

As a result of the meeting six Minnesotans, representing five farmer organizations, will meet with the representatives of 22 other states in a convention in Chicago on April 6. They will go to Chicago empowered to ratify the plan for a national sales agency to market the farmers' grain on a co-operative basis.

With ratification by the national convention considered virtually certain, the Minnesota Farm Bureau federation announces that it will throw its full support to the establishment of the new co-operative grain marketing system in this state. More than 100 farmers, representing county farm bureaus, voted unanimously to help put the plan into effect if it is approved at Chicago,

Is There Money in Cows?

What may be accomplished with a well bred cow by proper care, feeding and housing, has been brought out by J. H. Berg, herdsman at the P. Frost Spaulding farm, with the establishment of a new state record in milk produced in a thirth day period. It is very evident that the day of the scrub and illfed animal is passing on those farms where cattle are kept as a paying investment.

Dairying does not pay when cows are kept in a hap-hazard way, while on the other hand it does pay when good stock occupy the barns and feeding and living conditions are made agreeable. Some figures on the Spaulding cows might prove enlightening provided a herd of such animals could be kept.

Figuring a pint a pound and two pounds a quart, the seven day record of the Spaulding cows show a production of four hundred and thirty and one-half quarts of milk. At 12 cents a quart, the local price, the milk would bring $51.66. The monthly record of 3,622 pounds or 1,811 quarts would bring a return of $217.32 for the monthly production, which is not so bad for one cow. The average cow gives from 40 to 50 lbs. of milk per day which gives a total of 280 to 350 pounds a week. This at 12 cents a quart would bring in $16 to $21 for the week or [illegible] a month from the average cow under ideal conditions, and many cows on local farms will not produce even this amount. According to these figures it would seem that the dairy industry is a paying proposition if given the proper attention and when the herds consist of producing animals instead of loafers. --Warren Sheaf.

A Large Part of The Wool Sold

Many of the wool growers of Pennington county have asked for information in regard to whether the wool which was pooled in Chicago has been sold. A letter from the farm bureau federation states that [illegible],000 lbs. have already been sold at prices averaging 40 per cent of last year's value, which would be about 20 to 40 cents per pound, depending on the grade of wool. Many of the wool growers are again making plans for having an association and pooling their wool for the coming year. A meeting is to be called later to discuss the proposition and elect officers and directors for 1921.

FOR SALE

Ford-on tractor, good as new; 20 double disc tractor drill, new; double disc, good as new; Fordson gang, with extra set of breaking bottoms; also pulley and fenders for the tractor. Absolutely guaranteed. At a bargain price if taken at once, $1050. Will take good team of horses and cats. Balance on easy terms.

Also, John Deere triple engine gang, in first class shape, with three set extra shares and three breaking bottoms: one P. N. O. brush breaker, 18 in., good as new; steam engine, 25 horse power, Coline; double disc Van Brunt drill, good as new. All at bargain prices.

Residence Burned

The farm house of Nels Lien, in Star township, was totally destroyed by fire Monday afternoon. Nothing was saved but the clothing worn by the occupants, and there was no insurance. The fire had made such headway when discovered that it was impossible to do anything to check it. It is supposed to have started in the roof, where the stove pipe passed through. The family have taken shelter, temporarily, in a vacant house across the rood from them.

Erie Echoes

Salve Omlid and Sacharias Hole made a joint business trip to Goodridge Thursday, bringing home with them a large load of goods. They report the roads as pretty "heavy."

The Henry Tommerdaal family are shortly to leave for their new home in Thief River Falls. Mr. O. K. Lien has rented the Tommerdahl place and with his family intends to move thither at an early date.

Z. J. Hole has purchased a pedigreed bird dog.

Christine Lien called on her friend, Bertine Hovet, Friday afternoon.

L. B. Johnson and G. A. Iverson sawed up a supply of wood Wednesday and Thursday for their summer use for the kitchen.

Halvor Folkedahl, Jr., was a caller at Camp Suburban Tuesday morning.

Ed Vatne and Christian Amundson were business visitors at Z. I. Hole's Monday evening.

H. C. Iverson returned Monday via Gully from Margie, where he had been employed in a logging camp for the past two months.

Ludvig Johnson has grown another bumper crop of whiskers during the winter months. Though Ludvig may not have the least knack for the position, he looks very much like a deacon Scribbs once once knew down yonder in Iowa.

Ole Lien recently returned from International Falls, where he had been employed on the big dam which the Backus & Brooks concern is building across the Rainy river.

Esplee News

Mr. and Mrs. Carl Erickson and family were visitors at the James Cullen home Tueshay evening

Otto and Carl Zinter were visiting with Melvin Wilkens Thursday.

A few young folks gave Otto Kiesows a pleasant surprise Tuesday evening, the occasion being Florehce's 5th birthday. She received many nice gifts.

Ottar Fiskevold was a visitor at Erickson's Sunday.

Thomas and John Cullen were visiting with the Erickson young folks Wednesday evening.

Joen Lamporter was a business caller at Goodridge Thursday afternoon.

Seymour Evensen is visiting at the Ed. Johnson home,

Mrs. Fred Solley and daughter Selma left for her home Thursday for a few days' visit.

Mr. and Mrs. Erickson and family were present at the Ladies' Aid at Esplee Thursday.

Christ and Henry Becker were callers at the H. Kiesow home Sunday.

Garfield Erickson returned from Baudette Wednesday, where he has been working for some time.

Mrs. H. Zinter and children were visiting at the A. Wilkens home Friday.

Dan Payne was a visitor at the Moylan school Thursday afternoon.

Fiskevold brothers are getting their Ford ready for a summer's drive.

Albert, Elmer and Ottar Fiskevold Henry Olson and Herman Solley were callers at the H. Kiesow home Sunday evening.

Christ and Henry Becker took in the dance at Grygla Monday eve. Report a good time.

H. Zinter was a business caller at Goodridge Monday.

Ed and Norman Johnson and Seymour Evenson were callers at the Fiskevold home Tuesday evening.

Germantown

Clifford and Frank Rohrer and Edward Haberstroh left last Thursday for Grygla, where they were to be confirmed on Easter Sunday by Rev. H. Lutz, and returned Monday evening to their homes near Germantown.

Mr. and Mrs. Ed Haberstroh and Mrs. A. Rohrer left Sunday morning for Grygla, where they were present at the confirmation. They had a pretty hard trip on Sunday facing the wind. They returned Monday.

Mr. and Mrs Ed Haberstroh and children were dinner guests at the Blakkestad home on Tuesday.

Mr. and Mrs. Henry Limesand were guests at the M. Johnson home on Good Friday.

Matt Skogstad called at the Blakkestad home on Monday.

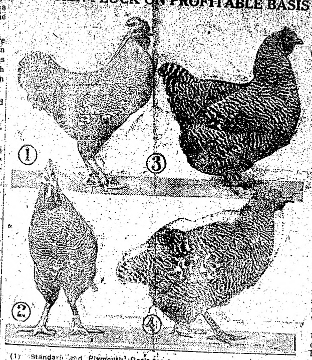
John Ellingson and Matt Skogstad skated on the ice to Germantown and enjoyed their trip.

Mrs. A. Blakkestad called at the Rohrer home one day last week.

Everybody is busy hauling hay, for fear of worse roads.

E. D. Blakkestad stayed at the Haberstroh home over Easter.

SPRING IS PROPER TIME TO PUT HEN FLOCK ON PROFITABLE BASIS



(1) Standard-bred Plymouth Rock rooster of good type; [illegible] with knock-knees; (3) hen possessing good appearance; (4) poor type and weak constitution.

(Prepared by the United States Department of Agriculture.)

Late in the winter or early in the spring the poultry owner should select and mate his best hens to use for reproducing his flock. To do this he must choose the season's breeding stock with care.

Progress will be made most quickly by selecting and using the best individuals in the flock as breeders rather than by breeding the flock as a whole. Standard-bred roosters of the right type should be used with the selected birds; the chickens then will be of a much higher quality than the birds of last year's flock.

Selecting Healthy Roosters.

The selection of a male should be influenced largely by the character of the females used. Any general weakness in the hens should be offset, so far as possible, by strength in that particular in the male.

Only by continuous selection for health and vigor is it possible to build up a flock that will produce fertile eggs, strong chicks capable of making quick growth, and pullets with sufficient stamina to stand the strain of heavy egg production.

The appearance of a bird is not always a sure indication of its vigor, but appearance and action taken together are a fairly reliable guide, say poultry specialists of the United States Department of Agriculture. The comb, face and wattles should be of a good bright color, the eyes bright and fairly prominent, and the head broad and short, having a fairly short well-curved back and showing no tendency to be long, "snaky," or "crowheaded."

The bird should be alert and have a strong, vigorous carriage; the legs set well apart and strongly supporting the body, with no indication of weakness or knock-knees. The bone in the shank should be strong and not too fine for the breed, with the toes strong, straight and not too long. Clean, smooth plumage is desirable, as a lack of condition often accompanies soiled, roughened plumage. Choose a bird in good flesh, as a very [illegible] bird is usually in poor health. [illegible] fowls, or those apparently recovered from sickness, ought never to be used for breeding.

In selecting stock for [illegible] the purpose of the breeding [illegible] clearly in mind. To [illegible] fowls, select a breed [illegible] standard type, or a [illegible] able for carrying an [illegible] meat. This type has [illegible] body, good length of [illegible] and especially a broad [illegible] ered with meat.

To breed for eggs, [illegible] far as possible, that [illegible] ducers or are the [illegible] birds and that conform [illegible] requirements of the [illegible] layers in the hens sh[illegible] banded or marked in [illegible] fall, at which time the[illegible] fairly well indicated [illegible] ance. The earliest [illegible] should be banded when [illegible] lay in the fall and [illegible] these early maturing [illegible] make the best producers [illegible] used for breeding this year [illegible]

When to Mate the [illegible]

Mating should be made [illegible] weeks before beginning to [illegible] eggs for hatching. It is often [illegible] to mate even further ahead [illegible] few eggs can be incubated for five or six days to see whether they are fertile. If they are not fertile, there is still time to change the male bird.

The breed of birds influences the [illegible] of the matings. If the fowls are confined to a yard, it is usually desirable to run from 12 to 15 females of a small breed with one male, while the females of the heavier breeds, only eight to ten are mated usually with one male. When the fowls have free range and the male is strong and vigorous, it is often possible to obtain fertile eggs with a much greater number of females to each male.

Notice to Correspondents

The notice of correspondents is again called to the fact that to insure the appearance of communications in this paper it is necessary that they bear the signature of the writer. We must insist on this, for our own protection.

If you want to sell your farm this coming season, now is the time to list it with us, as we are getting our lists of lands for sale ready, so we can mail them to the prospective Iowa, Illinois and southern Minnesota buyers. Have yours on the list, it may be just the piece somebody wants.

LAND CO.

Big Land Deal In Norman County

Undoubtedly the largest land deal ever made in Norman county was made last week when A. V. Everett of Jackson county became the owner of 2,352 acres of land near Lockhart. The deal includes all of Section 9 and good farms in Sections 8, 10, 17 and 22 in Lockhart township, says the Ada Herald. Mr. Everett is a heavy land owner and also owns tile plants and other property in southern Minnesota. He will supervise the work on his farms here and will make needed improvements to buildings, etc. In exchange Mr. Everett traded to Iver Brevik 1,329 acres of land in Lyon and Redwood counties. This deal totals $656,700 and was made by the Erickson Land Co., of Ada.

The Erickson Land Co., also sold Section 7, Lockhart, to Mr. Bowman and the Hagan farm to Mr. Wade making a total sale in ten days amounting to $1,232,700. Besides the above the local company sold some smaller farms.

Uncle Jim's Opposition

By MARTHA Mc WILLIAMS

(©, 1921, by McClure Newspaper Syndicate.)

"So this is little Madge!" Uncle Jim planted a hearty kiss on the pink cheek of his niece. "Grown into a regular young lady, too! I'll wager she has lots of attention!" Madge's uncle exchanged a knowing glance with his sister, Madge's mother, at whose invitation he had consented to leave his farmhouse for a visit at her summer home.

"Just at present she's receiving a whole lot of attention from one man in particular, I assure you!" declared Mrs. Evans, a voluble little woman, whose thoughts tripped from her tongue the moment of their birth.

Madge blushed becomingly, but a shadow of annoyance clouded the hazel depths of her eyes, and the keen glance of Uncle Jim took note of the fact. Was it possible that his sister, whom he had always credited with more heart than brains, was set upon some match for his niece which was repugnant to the girl herself? That would never do.

That evening, at the supper table, Uncle Jim found himself being introduced to one Bob Stratton, with whom he doubtless felt himself somewhat acquainted. For previous to his arrival, Madge's mother had found time, in the presence of Madge, to comment gushingly on that youth's attractions, his looks, his money, his position, his family. Not one of his qualifications had escaped her extravagant phrases.

As Uncle Jim shook the young man's hand he was thinking to himself. "So this is the paragon our little Madge must marry! Well, if clothes make the man, this young feller is there with bells on!"

But it was later, just after young Stratton's departure, that Uncle Jim uttered the remark which caused his sister to be haughtily displeased and brought a queer look into Madge's soft eyes.

"How did he strike you?" Mrs. Evans had wanted to know at once.

Uncle Jim had delayed his reply a moment, thoughtfully [illegible] smoke rings to the ceiling. [illegible], with one eye on his niece, he calmly offered: "Ain't kind of stuck on himself, is he?" Madge looked up quickly.

"Jim!" Mrs. Evans' voice was one of shocked disappointment.

"Oh, mebbe I'm wrong. Mebbe I'm wrong!" her brother returned hastily. And by mutual consent the conversation was steered into safer channels.

As the days passed it seemed to Uncle Jim that Madge and her mother were playing a game of battledore in which Bob Stratton was the shuttlecock. As often as her mother threw Bob at her daughter, her daughter found a way of tossing him back. If a sailing party was arranged, Madge devoted herself to Uncle Jim. If Bob was casually asked to drop in for tea, Madge developed a headache and neglected to appear at all.

Incidentally, Mrs. Evans was regretting her invitation to her brother to visit her, he seemed never to lose an opportunity of commenting unfavorably on young Stratton. His most recent and caustic remark grated his sister to such an extent as to cause her abruptly to leave the room, while even Madge herself, who doubtless possessed a sense of justice, was roused to Bob's defense.

"These white-flanneled chaps—bah! What they lack is elbow grease. I'd like to see one of them tackle a real job successfully!"

"But, Uncle Jim," had remonstrated Madge, "it really isn't fair to judge until the emergency arises!"

The emergency arose sooner than either Madge or her uncle expected. Madge had managed to entice Uncle Jim, who was a confessed coward on the water, out for a ride in the Sea Gull. The Sound waters were sparkling and comparatively calm at first, but as Madge rounded the breakwater preparatory to turning back, she noticed a leaden cloud ascending the sky and an intimation of approaching wind.

At that moment the engine, for the first time in its honorable career, hiccoughed, sputtered and stopped, and then refused to be coaxed into running. For an instant Madge gazed in astonishment. Then as the boat bounced aimlessly on the swells, she attempted various stunts with the coil and spark plugs and carburetor, all to no avail. An anxious glance confirmed her fears that the launch was drifting unmistakably seaward. Uncle Jim had no suggestions to offer. Marine engines were not in his line.

Suddenly around the breakwater shot a long, slim speed boat and Uncle Jim, who could recognize a neighbor's horse by the cut of his mane, but to whom all boats looked alike, wondered why a slow blush mounted to Madge's cheek as she st[illegible] up and waved newspaper.

An hour later they were safe in port. Bob Stratton had climbed aboard, rolled up his silk shirt sleeves, kneeled on the engine bed on white flanneled knees, poked a finger here and there, diagnosed the trouble as a leaky gasket, partly demolished the engine and put it together again, and finally started them home under their own power.

That evening Uncle James, who felt that he was out of grace all around, wandered disconsolately down toward the summer house. [illegible] could make good his retreat, he caught snatches of a conversation obviously not meant for his ears.

"Bob, darling, I wouldn't admit I loved you as long as mother kept throwing me at your head! But when Uncle Jim was—he's an old dear, but of course doesn't understand men, said [illegible] things about you, I simply couldn't stand it! But I imagine he's cured [illegible] afternoon."

"[illegible]" Bob's voice was beautiful. [illegible] "What is Uncle Jim to [illegible] we have each other?"

"[illegible] to clear out!" said [illegible] himself. "I'm popular, I [illegible] have a little talk [illegible] to be." But first he [illegible] with his sister, who [illegible] he crossed the veranda.

"[illegible] you've spoiled everything," [illegible] tearfully. She [illegible] learned the details of the afternoon's escapade, having just returned [illegible] out.

"[illegible] worry," said Uncle Jim [illegible], as he jammed a [illegible] into his pipe with a [illegible]. "The minute I set eyes on that young man I knew he was the young fellow for Madge. But didn't it ever occur to you that a little bite of opposition goes further with these modern girls than anything else? Take my word, it'll all turn out to your liking."

At that moment at the turn of the walk leading to the summer house appeared Madge and Bob, hand in hand, with an unmistakable halo of happiness radiating about them.

"Well, of all things!" Mrs. Evans looked thunderstruck, then directed a glance of suspicion at Uncle Jim. "But how on earth did you guess?"

"Oh, I dunno," responded Uncle Jim innocently. "I may be an old codger from the country, but human beings are the same the world over." Then he chuckled reflectively.

QUEEN MAY HAVE USED IT

Subterranean Passage Discovered in English Town Recalls Fate of Mary Queen of Scots.

During excavations that were being made at Sheffield, England, an underground passage was discovered on the south side of the town. There is a tradition that there was such a passage from the castle to Sheffield manor house during the time that Mary Queen of Scots was prisoner there, and the passage discovered would answer to that description.

During the time of the duke of Norfolk's trial the queen was guarded and allowed but little freedom. Sir Ralph Sadler had taken the place of the earl of Shrewsbury as custodian of the woman who was the chief asset in the political-religious game that was being played for the throne of England.

Sir Ralph lets us look through the windows at this time, and it is to his credit that during the time he had to guard the woman, who would have revived the old form of religion and crushed the new movement of Protestantism, he showed tact and sympathy.

"All the last week the queen did not once look out of her chamber, hearing that the duke stood upon his arraignment and trial, and being troubled by all likelihood by a guilty conscience and fear to hear of such news as she hath now received. And my presence is such a trouble to her that unless she come out of her chamber I come little at her, and for my part I have not since I come hither so behaved myself toward her as might justly give her occasion to have any such mislike to me."—Christian Science Monitor.

Engineers and Pioneer Infantry.

In the field, the engineers are primarily builders; when they become fighters it is more or less the result of circumstances. They are trained for the construction of permanent works, and their organization includes such special units as railroad builders, foresters, searchlight operators, and miners. The pioneer infantrymen, on the other hand, are primarily fighters with special training for makeshift engineering work, such as the construction of temporary bridges, fortifications and roads. But their primary work is to hold sectors as any other infantry. Their engineering training is intended to serve the army in emergencies only.

Goodridge Mercantile Co., of Goodridge, say:

Users are proud of their De Lavals

THERE are more than 2,500,000 users of De Laval Cream Separators, and practically all display the sign of separator satisfaction. These little signs reading "We use the De Laval Cream Separator" are nailed on fences and barns and other prominent places all over the world.

Each sign is a personal recommendation of the owner. Each sign indicates the pride with which the owner regards his De Laval.

The most progressive and most prosperous farmers in nearly every dairying section own De Lavals. They know the De Laval skims closer, runs easier and lasts longer than any other separator; and that it may be depended upon to put more money in the bank.

The De Laval is particularly well liked by women. It turns easier than other separators; is more easily cleaned, and does its work in less time.

Come in and let us demonstrate the superiority of the De Laval.

Sooner or later you will buy a De Laval

RAISING WINNER IS GREAT HONOR

Heredity Plays Important Part in Helping Owner to Secure Blue Ribbon.

FIRST OBSERVE CALF'S DAM

Good Breeders Should Be Familiar With Individuals and Blood Lines Instrumental in Building Up Favored Breed.

(Prepared by the United States Department of Agriculture.)

It is a science and an art to produce a famous breeding animal or a noted winner in the show ring. Every year thousands of stock breeders contest for this honor, and as soon as the blue ribbon is placed the owner of the animal is besieged with questions as to just how the winner was originally selected and reared.

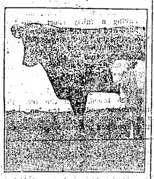
Kings and queens of the beef-cattle world sometimes are selected when they are calves only a few months old so they can be taught to eat grain before they are weaned say specialists of the United States Department of Agriculture. The first step is to observe the calf's mother, noting whether she is a wide, deep-bodied cow with plenty of size, and is giving a liberal supply of milk. If the mother qualifies in these respects and was bred to a good bull, it may be reasonably expected that the calf will grow into a useful breeding animal and can be developed into a type suitable for show purposes.

Studying Calf's Pedigree.

The calf's parents, grandparents, etc., should have been useful and profitable to their owners. These facts may be learned from a study of the calf's pedigree. To know a good pedigree requires study, and in this connection it is advisable to read a history of your chosen breed. It is essential that the good breeder become familiar with individuals and blood lines which have been instrumental in building up the breed.

In every breed there are certain blood lines that are known to "nick" well with one another. Ascertain what "nicks" or crosses have produced the best results, and look for these combinations in a pedigree. Do not be misled by family names, which in some cases are derived from a female that appears as far back as the twelfth or fifteenth generation. Cattle breeders are fast losing sight of family connection on the female side and are giving more attention to the bulls that appear in the first, second, and third generations.

The calf which is selected must have good form, which is sometimes spoken of as type or conformation. To become familiar with types of the breed, study pictures of famous animals. Make use of a score card in selecting and judging stock. Learn the different parts of the animal and become familiar with the methods of examination used by experienced judges.



In selecting a calf, first get an idea of its general appearance by looking it over carefully at a distance of 10 or 15 feet. When viewed from the front it should have a short face, large muzzle, wide forehead, short neck, and a wide, deep chest, indicating a strong, vigorous constitution. When looked at from the side, its back should be straight and level from the top of the shoulders to the tail. It should have a deep body and smooth, long hind quarters. When viewed from the rear, it should present a wide deep appearance. While as much width as possible is desired, it should not be accompanied with roughness about the shoulders and the hips or hocks. The legs should be rather short, stout, and set wide apart.

Indications of Quality.

Quality may be determined by the eye of the experienced judge, but the hand may also be used in determining the "condition" or "quality" which has reference to the flesh or fat. The beef calf should have deep natural flesh but should not be excessively fat or coarse. The flesh should be smooth and firm, but not hard [illegible] the back, sides, and over the shoulders.

NOLAN BILL ADVANCED

Coordination of Police Activities Sought by Measure—Dozen Measures Claim Early Attention of Lawmakers.

St. Paul—The Wicker-Nolan bill, creating the office of a state public safety commissioner with power to coordinate the police activities of the State, was advanced to the calender of the senate subject to amendment. The bill was introduced in both houses after J. A. O. Preus had delivered a special message to the legislature on the crime wave.

Senator W. I. Nolan, coauthor of the bill, said he did not care to make two arguments for the measure and the vote for advancement was 25 to 13. Senator F. M. Erickson, of Duluth, said he had a resolution from the Duluth city council against the proposed law.

Big Measures Coming Up.

Prospects of disagreement between the house and senate on important measures loom as added difficulties in the way for Minnesota lawmakers during the closing weeks of their session.

There are just 21 days left for the passage of bills, several of which will be taken up with the big appropriation measures, so there is every outlook for a legislative jam of more than usual proportions.

April 21 is the day for final adjournment, and April 20 at midnight is the last call for the passage of bills.

Bills that have passed one house and still are hanging fire in the other include:

Iron ore "occupational" tax bill and iron ore royalty tax bill, passed by the house and still before the senate taxes committee.

State regulation of street railway fares, passed by the senate and still before house public utilities committee for hearings.

Preprimary convention bill, passed by the senate and recommended by house committee, to be made a special order for Thursday.

Highway administration bill, passed by the house and a special order in the senate for Wednesday; automobile taxation bill just passed by the house may be added to the special order.

Gjerset bill to class Nonpartisan league as a political party, passed by the senate and before house elections committee.

Gillam bill adding a member to the state board of control and giving governor a vote in case of tie, passed by the senate and before house board of control committee for hearing this week.

Bank deposit guaranty bills, two contradictory bills, passed by the house and now before senate banking committee.

Iron Range Trial Bill Favored.

The senate judiciary committee has favorably recommended a measure permitting the trying of railroad and mining cases on the range at the courthouse nearest the place where the cause of action arose. The present law was objected to on grounds that corporations tried a majority of these cases at Duluth to the inconvenience of witnesses and litigants on the range.

House Approves Motor Tax.

The House passed the motor tax bill as submitted by the highways committee, voting 110 to 0. Following the passage of this the Child bill was taken up for consideration. The bill provides for limiting the wheelage tax that may be levied on motor vehicles by any city or village to half the tax levied by the state.

The motor tax bill as passed, provides a tax of 1.8 per cent on the value of passenger cars, F. O. B. factory, and 2 per cent on the value of trucks. The minimum tax on passenger cars under 2,000 pounds weight is $12; over 2,000 pounds, $15. The minimum on trucks is $15. An effort to reduce the minimum tax on light cars to $8 was defeated this morning.

The House rejected by vive voce vote the Keller amendment to the Child bill limiting wheelage tax to half the state motor tax and then unanimously passed the Child bill.

The House also passed the Dilley-Sweitzer bill permitting the St. Paul council to refund excess wheelage taxes collected under the city ordinance, which will be made invalid by the passage of the Child bill.

No sooner had the bill passed by just the necessary votes than the Farmer-Labor contingent began an offensive to put over the Welch bill. Representative Welch, Nonpartisan league floor leader, led the fight for his bill, which establishes a system whereby all banks must come into the fund.

Senate Adopts Political Party Bill.

After a debate the senate passed Senator Oluf Gjerset's bill "to define political parties," which would class the Nonpartisan league as a party and compel it to disclose its receipts and expenditures under the corrupt practises law. The bill will now go before the house elections committee. The vote on the bill was 35 to 21. Opposition to the bill was based on the ground that it would apply to such organizations as the State Federation of Labor, Farm Bureau Federation, Anti-Saloon league, League of Women Voters, etc.

Two Systems Favored.

Two bills providing for guaranty of deposits received favorable action in the Senate.

By a vote of 66 to 54 it passed a bill for a voluntary system for the guaranty of bank deposits, after having first killed the same bill.

By a vote of 68 to 55 it passed a bill providing for a compulsory system for the guaranty of bank deposits.

By a vote of 50 to 71, it killed one voluntary bill.

It postponed indefinitely still another voluntary bill.

It returned to its author one compulsory bill.

Two Bills for Senate.

As matters now stand, two bills will go to the Senate from the House, one of them establishing a system whereby banks have the option of participating, and the other of establishing a system whereby banks will be forced to participate in a guaranty fund.

The first bill passed had been killed receiving only 65 votes, lacking the one vote necessary to insure passage. After a recess, and after a remarkable changing of votes, the bill turned up with the required 6 votes.

This measure was the one recommended by the committee on banking and it had the approval of the bankers of the state because it provided for the optional system. Under its terms, it was left to the banks themselves to determine whether or not they wanted to participate. It was argued that the advertising participating banks received would make all banks enter the system.

Capper O. K. Defeated.

Following a long drawn out battle in the house committee on markets, in which the measure to memorialize congress to pass the Capper bill to prevent dealing in futures failed of favorable action, a subcommittee was appointed to draft another measure. Objection was made to the wording of the bill under consideration.

Insanity Divorce Bill Killed.

Insanity will not be a ground for divorce in Minnesota for some time to come. The house judiciary committee killed a bill by N. T. Moen, making insanity for 10 years ground for permanent separation. Members of the committee expressed the opinion that unfortunates are sometimes driven crazy by erring spouses and should not be victims of something over which they had no control.

Contempt Measure Up.

The judiciary committee is considering a measure which will give a probate judge power to adjudge a guardian or administrator guilty of contempt of court for not obeying court orders with reference to renewing bonds, which have expired or were canceled.

"Full Section Crews" Favored.

After hearing both railroad workers and officials, the house railroad committee has recommended to pass a bill requiring "full section crews." Officials contended it would add heavy expense and employees countered with the argument that public safety and efficiency demanded the crews.

Livestock License Bill Recommended.

Authority of the railroad and warehouse commission to license brokers, factors and agents, who handle live stock, is given in a bill sent to the house with recommendation to pass by the markets committee.

Newsboy Measure Kept Alive.

After rollcall on the bill prohibiting newsboys under 12 years of age from selling papers on the streets, had been started, Senator F. L. Palmer, author, was permitted to withdraw his motion for final passage and the bill was kept alive on the calendar. Due to light attendance, the bill would have failed to pass, had the rollcall continued.

Elections Bill Favored.

The committee on elections gave the Senate elections bill legalizing party conventions for the purpose of adopting platforms and indorsing candidates for state offices a clean bill of health, and not only recommended that it pass, but that the bill be printed that the members may study it.

Teachers' Tenure Bill.

After further consideration, the committee on education amended and recommended to pass the teachers' tenure bill, introduced at the request of the St. Paul division of the Minnesota Educational association. The bill would provide that after three years no teacher should be dismissed or reduced in rank or pay without a hearing before an impartial tribunal. The amendment merely repeals inconsistent acts.

Experimental Farms Meet Defeat.

County boards will not be able to provide for county experimental farms, the senate committee on towns, counties and municipalities having killed a bill making this provision. This committee also put the ax on a measure authorizing county boards to acquire land for public parks and tourist camping grounds up to $25,000.

Bonus Proposals for Vets Fail.

Two attempts to overturn house appropriations committee reports were unsuccessful. The committee killed a proposal for the state to pay for a "white way" on the capitol grounds, and another to give the state bonus to veterans of the Spanish-American war, Boxer rebellion and Philippine insurrection.

Flood Control Up in Both Houses.

Both the senate and house have a measure appropriating $60,000 for a drainage and flood control survey of the Red River valley and Minnesota valley districts. It is probable that all drainage bills will be made a special order early in April.

Gambling Prevention Bill Favored.

Officials who do not enforce the law and prevent use of punchboards, slot machines and other gambling devices, may be summarily removed from office by the governor. This is provided in a bill recommended to pass by the house commerce committee.

PAIR OF SCALES MOST ESSENTIAL

Selling Various Farm Products by Guess Is Seldom Profitable to Farmer.

PRACTICE PLEASING TO DEALER

Experienced Buyer Has Advantage of Skill in Estimating Not Possessed by Seller—Small Platform Device Is Best.

(Prepared by the United States Department of Agriculture.)

"Guessed weights and measures" are seldom profitable for the farmer. This practice is unbusinesslike. It indicates a carelessness of the value of the thing he is selling, and the buyer would be more than human if he did not take some advantage. A "guessed bushel" of potatoes is more likely to measure [illegible] Where sales are based on weight the grower is paid for what he delivers. When the pair balances at 100 pounds both parties know that full value has been given and received.

An Argument for Scales.

The best argument for the installation of a good set of scales in a convenient place on the farm is that, while the produce dealer is nearly always willing to buy "by guess," he is seldom willing to sell that way. The most conspicuous piece of equipment in the vegetable stand, the market, or the grocery is an accurate pair of scales. The produce that is bought "by guess" is sold by ounces. The dealer is a practical buyer and attains some degree of accuracy in making his estimates. Thus he has the advantage of skill not possessed by the farmer, who lacks experience in making his estimates.

The dealer has another advantage not held by the farmer. As he sells by weight, he has a means of checking the accuracy of his guess. If he finds that the weight of a steer, for instance, was less than he estimated it to be when he purchased it, he may recover his loss by charging the customer more or by taking out the loss on the next "guessed" purchase he makes. The loss is likely to fall not on the dealer, who incurred it, but upon innocent parties.

The bureau of markets, by publishing the prevailing market prices for meat and farm produce, offers free information to the farmer that will place him on the level with the dealer so far as knowledge of prices is concerned, but unless the farmer has a set of scales available he cannot use this knowledge.

Accurate Weights More Profitable Than "Guessed Weights."

An accurate set of small platform scales should be a part of the farm equipment, and every farm sale should be referred to them. If mounted upon rollers they can be moved from place to place as their services are required. If without rollers, they can be moved in a wheelbarrow. They should be kept in a building that is as free from dust and moisture as possible, and should be tested with standard weights at least once a year. In some states the tests are made by law by an official who makes the adjustment necessary to restore the scale to balance, or, if this cannot be done, condemns the apparatus and seals it so that it cannot be used again until repaired.

Answers Most Purposes.

Such equipment will answer most farm purposes, but a larger set of scales is occasionally required to weigh cattle, hogs, hay or other materials too heavy or bulky to lift upon the small platform. Very often a merchant whose place of business is centrally located or a farmer who lives on a main road leading into town finds it a profitable investment to put in a set of pit scales for the use of farmers and others who are bringing bulky material to market. When a farmer knows that he can drive his cattle or his loaded wagon upon the platform of pit scales without going out of his way, he will be less inclined to lump off a barnful of hay or sell his stock by the head. The owner of the scales receives a small fee for his services and the farmer a signed statement of weight which is the basis of payment when he delivers his load at the market or shipping yard.

GREEKS HELD BEAUTY SACRED

No Sculptor of Repute Would Descend to Grotesqueness in Depicting the Human Form.

Many persons wonder why among all the hundreds of statues of ancient Greece there were no grotesque, ugly or comical bits. Very rare specimens have been found, but nearly always these have been miniatures and evidently the work of inferior artists. The reason is that the Greeks worshiped beauty of line and color so thoroughly that the creation of an ugly representation of a human being would have been looked upon as a profane and wicked act.

Among the few grotesque statues known is a little marble made in Athens over 2,000 years ago of a dwarf doing a dance that seems to resemble the movements of the cake-walk, once popular in the United States. The little woman wears a hobble skirt, and her head, looking back over her shoulder, is rather attractive. It is thought to be a statue of some well-known Roman dwarf cabaret artist made by a sculptor at the solicitation of a Roman friend, or else a satire on a larger and perhaps very fine dancing bit done by a rival and hated workman.

Not Always Common.

"Common sense," remarked Jud Tunkins, "sometimes gets so scarce that it seems like one of the uncommonest things on earth."

Spreading Knowledge.

The great men of culture are those who have had a passion for diffusing, for making prevail, for carrying from one end of society to the other, the best knowledge, the best ideas of their time; who have labored to divest knowledge of all that was harsh, uncouth, difficult, abstract, professional, exclusive; to humanize it, to make it efficient outside the clique of the cultivated and learned, yet still remaining the best knowledge and thought of the time, and a true source, therefore, of sweetness and light.—Matthew Arnold.

Resistance Not Matter of Strength.

A sturdy frame and big muscles do not necessarily presuppose great powers of resistance to infection. These are an individual matter, depending on the ability of the cells to react, and our knowledge of these matters is still vague according to the observations of a medical expert who recently read a paper on the subject at a convention of his fellow practitioners.

Cruel Criticism.

"A motion picture comedian says he has moments of deep depression," remarked Mr. Gadspur.

"Why should he?" growled Mr. Woppit.

"Why, indeed?"

"He never has to sit through one of his pictures."—Birmingham Age-Herald.

A Boon.

"How has the general health of this community been of late?" asked the tourist who had an inquiring mind.

"Finer than frog hair!" triumphantly replied the landlord of the tavern at Typwopplty. "You see, we had only two doctors. One of 'em run off with another man's wife and the other was took on the jury and held so long that all the sick got well."—Kansas City Star.

DEFECTIVE PAGE

THE GOODRIDGE BANNER

VOLUME XV, No. 15. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL 8, 1921. $1.50 PER YEAR.

A Tariff That Doesn't Help

The biggest tariff ever laid against grain by the American government hurts instead of helps both the American grain grower and the American bread consumer.

It is the railroad rate from the wheat country of the middle west to the Atlantic seaboard.

Under this rate it costs today 38 cents to ship a bushel of wheat from Minneapolis to New York.

At the same time it costs only 12 cents a bushel to ship the same amount of wheat from Argentina to New York.

That amounts to a tariff of 26 cents a bushel against the American wheat grower.

Even if congress should enact the provision of the emergency tariff bill establishing an import duty of 40 cents a bushel on wheat, more than half the apparent protection would be wiped out by transportation charges alone.

Ths is merely one of the situations emphasizing the necessity for a revision of existing railroad rates.

Any reduction on railroad rates on wheat from the middle west to the coast will help the former exactly as much as a corresponding import tariff.

And at the same time it will help the railroads by giving them traffic that is not now being moved, according to one view of the situation.

"If existing rates are continued," says one cabinet official who has studied the situation carefully, "we may expect the whole Atlantic seaboard to be fed with Argentine wheat and all demand for American wheat for export to be killed."

The effect of existing freight rates on our grain market is only typical of their effect on our whole commercial and industrial fabric. They threaten to put the railroads in receivership by July.

The whole railroad situation, in all its aspects, must come up for revision—and that at once!—Daily News.

Fishing Season Opens May 15

The law setting the opening of the hook and line fishing season fifteen days later than it has been in past years has been passed by the legislature and signed by the governor. This law applies to pike, pickerel, croppies, sand pike or suckers, muskellunge, perch, sunfish and rock bass. The number which may be taken in one day is as follows: Pike, 15; pickerel, 25; muskellungs, 5; perch, unlimited. The setting back of the opening of the fishing season will make practically no difference here in the northern part of the state, for while the pike season has heretofore opened on May 1, yet the water always is so cold that the fish do not bite until about the 15th, or later, depending on the weather. The purpose in adding two weeks to the closed season is of course to permit the fish to complete their spawning before they are caught and thus aid in keeping them from being exterminated.

Cash Necessary To Bind Land Option

Options for purchase of property, unless a cash consideration is actually paid for them are mere scraps of paper.

The Minnesota supreme court has so held in a case appealed from the Meeker county district court.

Its ruling will have the effect of invalidating scores of "paper" options for purchase of real estate, where there has been no cash payment.

The case passed upon by the supreme court was that of Jacob G. Morrison vs. John W. Johnson. Morrison took an option from Johnson for the purchase of farm land. There was no consideration. Johnson repudiated the agreement. Morrison sued to establish its validity. The supreme court held that as no cash was paid there was no binding contract, but that the consideration of $1 would bind a contract.

FOR SALE

Fordson tractor, good as new; 20 double disc tractor drill, new; double disc, good as new; Fordson gang, with extra set of breaking bottoms; also pulley and fenders for the tractor. Absolutely guaranteed. At a bargain price if taken at once, $1050. Will take good team of horses and oats. Balance on easy terms.

Tell It to The Editor

Every newspaper editor is desirous of printing all the legitimate news of his subscription field. That is the object of his paper.

But unfortunately an editor is partly human—at least he is molded in human form. He does not possess a dozen pair of hands or legs, or eyes, or ears for the collection of this vast fund of information.

That is why the editor urges you to tell him what you know—to keep him informed of the doings of yourself and family, of your friends, or of the community in general.

It is the only way to make a good paper and is one of the prime requisites to a good community in which to live and do business.

Tell it to the editor.

He'll tell others—if it is tellable.—Ex.

Community Club Meeting

The Community club will meet Friday evening, April 15. A special program has been arranged for this occasion. The business session will be held after the program, in which plans for the coming year will be discussed. At this meeting it will also be decided whether or not a Tri-County fair will be held here next year. The question of a lyceum course will also be considered. City Superintendent W. A. Ziegler of Thief River Falls will deliver an address.

Parent-Teacher Meeting at Erie

A parent-teachers meeting was held last Saturhay evening in the Singer hall at Erie and was exceptionally well attended. The meeting was opened by County Superintendent Geo. Gunderon, who introduced the speakers of the evening. Miss Dora Parry of the normal training department of the Thief River Falls schools addressed the meeting on community work, pointing out the necessity of co-operation between teacher and parents in the schools. Mrs. J. M. Bishop adressed the meeting on public health and child welfare and Mayor John Bratrud gave a short talk on the Chinese relief drive that is being made over the state and the conditions existing in China. Following the meeting lunch was served.

Goodridge Consolidated School district draws $3,120.42 from the March 1 tax apportionment.

A Boarding House Romance

By FRANCES MAY

(©, 1921, by McClure Newspaper Syndicate.)

A strong odor of [illegible] and boiled fish assailed [illegible] Dean's nostrils as she stepped into the narrow hallway of the boarding house. She knew by the distant sound of chairs grating upon the [illegible] carpeted floor of the basement dining room that the boarders were already assembling about the long table to begin that solemn and most important meal of the day—dinner.

Hastening upstairs to her little fourth-story room, the girl hurriedly rearranged her thick, dark hair and slipped into a cool lawn dress, appearing in the dining room just as the last soup plate was being removed. With one exception, everybody was breathlessly watching Mrs. Frazer, the landlady, serve the fish, and little heed was paid to the girl's entrance beyond a perfunctory "Good evening." The exception, a handsome young Frenchman, who sat in the relative position on Mrs. Fraser's right that Eleanor occupied on her left, looked up smilingly and said "Good evening," cordially and with a decided accent.

"It is warm," suggested the young man.

"Very warm," assented Eleanor.

"No warmer than it was at this time last year," asserted a large, florid gentleman aggressively.

"That don't make it cool now, Franklin," snapped his wife. "I wonder whether you will find it cool in France when you go back, Mr. Le Visconte?" she questioned, turning to the Frenchman.

Eleanor raised her eyes quickly and glanced across at her vis-a-vis.

"Are you going to France, Mr. Le Visconte?" she asked.

"Why, hasn't he told you?" exclaimed Mrs. Franklin, significantly. "I should think he would have told you at once! We were all talking about it just before you came downstairs. It seems odd that you haven't heard!"

Miss Dean's great, dark eyes opened very wide for an instant and stared coldly into Mrs. Franklin's little blue ones. Then she turned away and resumed her dinner and the Frenchman said suavely:

"Why, what need had I to inform Miss Dean when Mrs. Franklin is here to speak for me? I go, Miss Dean, to France, yes; but today only I know it; I have told Mrs. Frazer this afternoon and she has told all zese good people this evening. It is quick, is it not?"

"Very quick," responded the girl, "and very unexpected, isn't it?"

"Most on-expected!"

Mrs. Franklin's tiny eyes searched the girl's face curiously.

"I should think you would miss Mr. Le Visconte," she said.

"I shall, indeed."

The young man glanced gratefully at her. "You are the only one who has so expressed herself," said he, smiling.

"And you will miss him all the more because he's going for good," continued the lady, with emphasis.

"For good!" exclaimed Eleanor. "Ah—yes—well, perhaps he will come back and visit America some day."

"I will surely come," said Le Visconte. Then there was a silence and the girl felt herself the object of covert scrutiny.

"Will you go for a walk with Mr. Franklin and me, Miss Dean?" asked Mrs. Franklin, as the dreary meal terminated.

"Thank you, I have had a hard day at the office and am too tired," was the response. "Good-night," and Eleanor went upstairs to her room, and sat down at the window that looked out upon the backs of a row of tenement houses, resting her cheek wearily upon her hand.

"What a dreary place this city is for a woman to come to alone!" she said half aloud. "It will be worse by and by," and then with an attempted laugh, "What a goose I am. I'll get out of this stuffy room into the air."

Putting on her hat, she slipped downstairs and out of the house. The air was sultry and oppressive and the pavement seemed to radiate heat. Swarms of insects fluttered about the electric lights. Everywhere rose the incessant hum of voices and the rattle of wheels and clang of trolley bells; and over all hung a cloudless sky, with a half of a silver moon in its midst.

Eleanor had turned into a quieter street, where she could walk more comfortably, when a quick footstep sounded behind her and a voice at her elbow said:

"Miss Dean—pardon!" and turning her head, she saw Le Visconte. "May I walk with you?" he asked.

She did not reply at once; he had startled her and the beating of her heart seemed to choke her. So they stood for an instant looking into one another's faces. Then, without a word, he drew her hand through his arm and they went on, together.

"So, you were taking an evening walk, alone?" he inquired.

"Yes," she replied, smiling; "but how do you come to be walking here, too?"

"I? Oh, I heard you go out and I came also. Will you forgive me that I follow you?"

"Yes."

"You were too much tired to walk with Mrs. Franklin?" interrogatively.

"Yes," she replied with a little laugh.

"Are you too tired to go where I would take you?" bending down, the better to look into her face.

"Where is that?" she asked.

"To that great fountain in the park; to see the moonlight shining on the water. There I will tell you why I go away. Come, let us go to the fountain," he concluded rather abruptly.

Half an hour later they crossed the stone-paved square in the midst of which a fountain played refreshingly, sending up into the air tall jets of water that fell back with a cool splash into the great basin and rippled away softly to its outer rim.

"Ah, what a relief to escape the noise of the city streets!" exclaimed Eleanor, seating herself on the stone seat that surrounded the basin. "Now tell me what you are going to do when you go back to France?"

"I? Oh, my uncle, he offer me a very fine position in his business in Paris with ze great salery—and I must not refuse it—and so I go for some years. But I think I cannot live always there."

"No?" she questioned. "It is your home. You ought to be contented."

"I love my country," he said, "oh, more than I can say. But what makes home? It is there we love—is it not so?"

"But you have told me of your [illegible] and of the happy [illegible] you had together."

[illegible]

[illegible] Le Visconte rose and [illegible]

"What a d[illegible] place this would be [in] winter," murmured Eleanor with a [little] shudder.

"But it is now summer and you will [not] come here in winter."

"No," he replied with a laugh. "I'm not likely to."

A silence followed, broken presently by Le Visconte, who said in a low voice:

"Miss Dean, it has been a joy to me to know you. You have made my life happier. I wish to tell you this and to say that I shall think of you—ah, when will you not be in my thoughts?"

Eleanor was silent.

"I cannot hope that you will very much miss me when I go away. But I—"

"Not miss you!" she exclaimed with sudden energy. "You who have been a friend to me; almost the first I made in this great, desolate city! You who have done so much to make the six months I have been here happy! Why should I not miss you? It is not fair of you to doubt it," she concluded, a mist of tears gathering before her eyes.

She felt his strong fingers close over her hand as it grasped tremblingly the edge of the stone basin. She did not withdraw it, and he raised it and held it against his breast.

"Will you turn your face to me?" he pleaded gently, and as she did so and lifted her eyes, still luminous with tears to his, he went on softly, "One dream has been mine since I first saw you—that you might some day love me well enough to be my wife. When I find today that I must go back to France, I think of all that has passed between us, and I see not one leetle sign that you love me. Like me, yes—but that is not enough. So, I think if she cares, it is but a leetle and she would not leave her country for mine. She will forget me, soon. I will say nothing. But, oh, dear heart, my love is too strong! It will speak. It says that you are my dearest on earth—that life without you is bitter—bitter. It cries out that we belong to each other, and something most precious that I see in your dear eyes tells me that you would not wish me to be forever silent!"

The fountain splashed and sparkled in the moonlight—how many times had it overheard such words before?—and the sound of laughter and voices in a distant part of the square rose and fell musically.

* * * * * * *

"Well," said Mrs. Franklin at dinner, ten days later, "I suppose the happy couple are far out at sea, by this time. I can't for my life understand his infatuation. She's not even pretty—hadn't a cent in the world nor a relative to leave her anything—just a poor, ordinary struggling creature."

"I always found Miss Dean a perfect lady," interrupted Mrs. Frazer, stoutly. "She worked hard and paid her board regular. And she's pretty as a picture. Sarah," to the waitress, "fetch that bottle of claret."

"Oh, Mrs. Frazer," insinuated Mrs. Franklin, archly, "what about prohibition; how—"

"The occasion warranted an effort," responded the landlady, oracularly. "Ladies and gentlemen, we will drink the health of Mr. and Mrs. Le Visconte!"

Nest Building Time

By LAURA R. MONTGOMERY

(©, 1921, by McClure Newspaper Syndicate.)

Doris looked anxiously at the cheap alarm clock as she shrugged into the thin jacket. "I wonder," she blushed a little as she calculated the time required to walk to the park, "if Dick will be waiting?"

Doris had felt much more at home in the crowded city since her chance meeting with her old friend. Dick had left the village years before she had taken her courage in her hand and made the plunge, and she felt sure that he had already gained success, although he did not mention it.

He dressed very well and had a competent, up-to-the-minute air of affluence. She recklessly squeezed the package of sandwiches she had made from the remnants of her hurried breakfast cooked over the gas-flame so that she could fit it into her old muff. She would have hated to have had Dick guess that she carried her luncheon.

"Oh, Miss Weeks," the landlady's voice hailed her as she opened the front door, "here's a letter I forgot to give you last night, must have come while you were away."

Doris had been home since the previous Wednesday. Her mother had been ill and the family had wired her, but the illness had been less serious than they had feared and Doris had returned to the city Sunday night to be in readiness for her work Monday morning.

Taking the letter she inserted her thumb under the flap as she went down the tall steps of the dingy, old-fashioned house. The envelope bore the name of Gribsy & Son, and her heart pounded as she read it; that was the firm that employed her. "They will keep me a week longer to give me time to look about for something else," she murmured, gloomily, "and every firm is cutting down expenses and laying off people."

At the entrance to the park she stopped doubtfully. "I'd hate to have him know I've lost my job," she reflected, but she walked on again as she saw the familiar gray overcoat hurrying toward her.

All the Gayety Left Her Face.

"Hello, Doris, in a big hurry?" he greeted.

She shook her head.

"Well, I'm not. I've thrown up my job. I only came out here on the chance of seeing you. Dad wants me back in Franklin, and I'm going. There isn't anything to this city life; every cent goes out for living, and that living is a mighty dreary affair. Dull back room in a boarding house, with cold, scrappy meals. Gee, I'll be glad to taste some real food again. Remember those lemon layer-cakes you used to make? All thick with white icing on top?"

"But I thought you were such a success," she looked significantly at his well-made clothes and shining shoes.

"I'll do better back home, but—" he paused and studied her downcast face. "I've been thinking of going back for some time, but when I found you were in town I kinda hated to go."

Absently Dick dropped down on a bench beside her and he cleared his throat nervously.

"You see," he went on, "you wear such awfully good clothes and look so spiffy that it makes a fellow afraid to say anything. You must be earning a lot to pay your way and buy those clothes." Although the day was crisp his face was damp with perspiration, and he tugged at his collar as though it strangled him.

Doris did not feel the chill winter air. In her heart had sprung a curious delicious warmth. She knew now why she had awakened with such a gay zest for each workday, had hurried over the inadequate scramble that she named breakfast; it was so she could reach the park in time for the daily chat before going on to work.

And Dick, also, had been intrigued by the inconsequent chatter in the wide spaces of the windswept park where the trees stretched bare, tangled branches above them [illegible] sunshine made gay golden patches on the pavement beside their favorite bench. A fat sparrow alighted near them and in her bill she carried a bit of string.

Dick colored furiously. "See there, that sparrow thinks it's nest-building time. She is a bit ahead of the season, but it's a good idea. Would you be satisfied to live back in Franklin? I'm going in partners with dad."

"I'm thinking of going back," her words came slowly and with embarrassment.

Dick stood up very straight. "Is it Fred Miller? I thought that—that is, oh, of course, it is none of my business," he ended coldly.

The brightness faded from the day, the chill of the winter and the lost job suddenly overwhelmed her. How had she so misunderstood him? "I have not seen Fred Miller for over a year. I must be getting on. I'll be—" she stopped; she could scarcely be late. Gribsy's would not want to see her again.

"Don't let me keep you," his miserable young voice fell dully upon her ears. "Of course you'll want to marry a city man—"

She had started to rise when the magical word "marry" stunned her with its unexpected entrance into their conversation.

She looked up at him, but he was staring at some late, shriveled leaves that were making ghostly progress over the frozen grass. She wished ardently that he would go on and propose properly, but, instead, he stood dejectedly and in silence. She could scarcely snatch at the magical word and urge him on, but all the time her heart ached with loneliness. She wanted to be back home where the houses wore familiar faces instead of the bleak city wilderness of bricks and granite.

Jumping up blindly because of the unwelcome tears that had suddenly blurred her vision she held out her hand in its much-mended glove: "Well, good—" At that inopportune moment her muff slipped and fell to the ground. She made a retrieving gesture toward it, and stepped backward in dismay. The soft, round package that she had mercilessly squeezed into the muff's interior had fallen out, and the stale-bread sandwich, spread with lumpy butter because of the almost freezing temperature of her room, lay exposed for criticism.

"Why, Doris! Do you carry your luncheon? Then you would be willing to save and—" He had grasped both her hands and looked directly into her misty eyes. "Marry a poor man," she finished dominantly.

KEEP RECORD OF FARM WORK

Few Minutes Each Day Will Enable Farmer to Record Important Details of Business.

A few minutes given at a definite time each day will keep a record of the farm business, and with accurate figures at the end of the season a person can see at a glance where money is being made and lost.

DECREASE IN CROP ACREAGE

Total in 1920 Fell to 346,462,000 Acres, or Less Than 2 Per Cent Below Previous Year.

Crop acreage for all crops for which the bureau of crop estimates, United States Department of Agriculture, estimates acreage, had the total of 300,622,000 acres in the census production year 1909, and 352,332,000 acres in 1918, the second year of this country's participation in the World war. This acreage remained almost exactly the same in 1919, but in 1920 the total fell to 346,462,000 acres, or less than 2 per cent. The acreage of these estimated crops in 1920 was only 11,000,000 acres below the total acreage of all crops in 1909.

Goodridge Mercantile Co.,

of Goodridge, say:

You get all the cream with a De Laval

GETTING all the cream means getting all the profit. It means that more money can be saved, or that more is available for use in building up the farm, or for paying expenses.

Not every separator is designed so that it will get all the cream; some may do so for a short time.

But there is one machine that can always be depended upon to skim clean—the De Laval. You don't have to take our word for it, ask any De Laval user.

A De Laval user gets more cream from the milk of each cow, gets longer service from his machine, and spends less time turning and washing it. Even if you have only one good cow it will pay you to own a De Laval.

Wouldn't you like to know more about the De Laval? Stop in the next time you are in town

Sooner or later you will buy a

De Laval

WAGE RATE ADVANCED TO HIGHEST AVERAGE

From $17.69 a Month in 1895 to $64.42 in 1920.

War Conditions Greatly Accelerated Upward Movement of Farm Labor Wages—One of Causes for Increased Cost.

(Prepared by the United States Department of Agriculture.)

Wage rates for farm labor reached their highest point in the history of this country in 1920, as national averages. As ascertained by the bureau of crop estimates, United States Department of Agriculture, the average wage rate for labor hired by the month was $46.80 with board, and $64.95 without board; for day labor at harvest, $3.60 with board, and $4.36 without board.

War conditions greatly accelerated an upward movement of farm-wage rates that began after 1895. The rate of that year for hirings by the month without board was $17.69 as an average for the United States, and no other year in the record of the bureau extending back to 1866 had a lower rate, except 1879 with $16.42.

By 1902, this wage rate had increased to $22.14, by 1914 to $29.68, followed by $30.15 in 1915, with no evidence of war effect. This effect appeared, perhaps, as a small beginning in the next year, 1916, when the wage rate was 32.83, when followed rapid rise to $40.43 in 1917, to $47.07 in 1918, to $56.29 in 1919, and to $64.95 in 1920.

City Residents Helping Harvest Wheat During Period of Farm Labor Shortage.

The rate of gain over 1895 was 70 per cent in 1915 and 267 per cent in 1920, so that the gain of 70 per cent in 20 years, from 1895 to 1915, was followed by a gain of 197 per cent in five years, from 1916 to 1920, or nearly three times as much in a quarter as many years.

From 1915 to 1920, farm labor working by the month without board received a gain in wage rate as high as 115 per cent. This was one of the causes of the greatly increased cost of producing things on the farm, which has hit the farmer so hard in the declining market for his crops of 1920. So high had the farm-wage rates become in the last two or three years that they were prohibitive in a considerable degree when labor could be found, and farmers more generally depended exclusively on themselves and members of their families, in addition to extending the use of labor-saving machinery.

RICH FERTILITY IS WASTED

Comparatively Small Lots Where Cows and Other Animals Are Kept Are Often Overlooked.

Where a large number of dairy cows or other animals have to be kept in comparatively small lots at night, during the spring and summer months, the ground becomes unusually well fertilized. In most cases these lots are used year after year for the same purpose, thus allowing this rich fertility to be wasted. A fine way to utilize this is to have two or three lots of about two acres each, using one for pasture each year, and the other two for cropping. Such an arrangement purifies the soil, besides changing tons of manure into feed.

BURNING STRAW IS WASTEFUL

All Trash, Weeds, Manure, Etc., Plowed Under Will Supply Needed Plant Food for Soils.

The man who burns straw or corn stalks is robbing not only himself of larger crops, but he is robbing his children and other people's children who will farm those acres in the years to come. Plow under all trash, weeds, straw, manure and other wastes and let them enrich your soil. Remember that "rich farmers live on rich lands, while poor farmers live on poor lands."

BUSY TIME IN PROSPECT

Big Appropriation Bills Coming Up As Legislature Nears Last Lap of Session.

St. Paul—Just as the session is approaching the last lap many important appropriation bills are not yet in shape for committee action. A general rush, characteristic of the closing days of former session, is due for re-enactment.

Most of the 21 members of the senate finance committee and house appropriation committee have been faithful in attending committee meetings and almost daily for months they have given extended hearings to those interested in the various appropriation estimates.

Requests for appropriations for the next two years aggregate more than $43,000,000 compared with a little more than $33,000,000 appropriated for a like period two years ago.

The fact is, the docket of requests this year has been far heavier than ever before. More time has been required to consider them. Several matters have had to be left open, pending a decision as to bills pending. For instance, the new state industrial commission could not be provided for until the bill had been passed and signed, the new commission appointed and its budget prepared. The educational bill has hung fire on account of the debate over revision of state school aid.

The committees have shown a determination already to pare requests to the bone. The chairmen of the two committees have announced a purpose to bring appropriations within about the same limit as two years ago. This means cutting out some $10,000,000 from the requests. Much of this will be done by eliminating new buildings asked for, on the ground that, however much they are needed, the need for economy just now is greater, and building costs will be lower later on.

Hospital Cut Out.

The proposed psychopathic hospital at the University of Minnesota already has been cut out, a matter of $250,000. It is proposed to take care of track removal at the university, which is estimated to cost $750,000, by taking the money from the ten year building program allowed in 1919, trusting to some future legislature to put it back. Other cuts aggregating $1,500,000 are proposed in the university's budget. Some of the cut will be on maintenance, and it is predicted that the requests for additional teaching staff will be denied, though increase in pay will be allowed to men now in the institution.

The house appropriations committee has voted already to cut down the biennial budget of the board of control from the board's original estimate of $8,527,625 to $7,236,950, but the bill has not been reported out yet.

Department Bill Almost Ready.

The state department bill is about ready to be reported. The public domain bill, which has been under consideration, evidently will probably not get through at this session and will not be allowed to delay matters longer. The house committee yesterday cut the industrial commission's annual budget more than $200,000, from $575,123 to $371,473.

State School Aid.

The question of state school aid still is pending in a bill to revise the schedule of payments to high schools. Increases totaling $766,805 have been asked in this budget, and regardless of the final result on the state aid bill, they are likely to be denied, is the general opinion. The state aid bill is a special order this week.

Working at high pressure, the best the two committees can do will be to get the big appropriation bills in early for the last full week of the session, and final passage of the bills is not expected until almost the final day. As usual, there will be four main appropriation bills, one for the state departments, one for the institutions under the board of control, one for educational activities, and the claims bill with various miscellaneous matters included.

Following passage of these bills on figures prepared by the state auditor, the legislature will pass the bill authorizing the maximum tax levy for the next two years.

State Aid Granted Dowling School.

State aid will be granted to the city of Minneapolis for the Michael Dowling school for crippled children, under the bill by Senator W. F. Brooks and Thomas H. Girling, which now has passed both houses. The state aid amounts to $200 a year for each pupil. The senate passed the bill Tuesday and on motion of Mr. Girling the house suspended the rules yesterday and rushed the bill through.

Hospital Bill Approved.

The bill creating a Minnesota General hospital at the University of Minnesota, to work in harmony with the hospitals throughout the state, and also with institutions under the board of control, has been recommended to pass to the senate.

Death Penalty Urged to Pass.

F. E. Nimocks' proposed constitutional amendment, permitting the people to vote on the question of restoring the death penalty for Minnesota, was recommended to pass in the house. A statutory bill restoring the death penalty was killed in committee.

Safety Body Favored.

After a bitterly fought battle over the Nolan police bill its passage was finally secured by a vote of 41 to 22. The bill is a companion of one introduced in the house by Representative Wicker, and provides for creating the office of state safety commissioner to co-ordinate police activities.

The measure was introduced by Senator W. A. Nolan. There is a companion bill in the house introduced by Representative George Wicker.

Under the terms of the bill the state safety commissioner, who is to be appointed by the governor, has power to direct all peace officers within the state, local and county. It is provided that the commissioner establish a bureau of identification at the capitol to assist local police officials in tracking criminals. It is also provided that the commissioner hold a school in criminology for local peace officers.

Motor Vehicle Regulation.

A complete code of regulations for vehicles using the highways of the state was introduced in the house by the committee on highways. In addition to all the rules now in use with regard to driving, stopping, rounding curves or parking, the bill provides numerous rules and regulations of the committee's own. For instance, no motor vehicle may be left standing on any street or road with the motor running. Trailers may be provided with blocks to prevent their running back, if they should break loose while being pulled up hill.

Ordinary motor cars, however, are forbidden to use chains or lugs, except in "particular places" and at particular times, when they may be necessary, and then the cross pieces on the chains must be at least one foot apart.

Cars must be provided with mufflers, but NO cutout may be used within the limits of any city or village, or when passing teams or livestock on the road

The width of tracks is limited to 96 inches, but tractor engines may be 108 inches wide. NO single vehicle may be longer than 30 feet, nor longer than 85 feet with trailers.

Soldiers' Bonus Bill.

The long looked for soldiers' bonus bill, to take care of deserving service men who were excluded from the benefits of the bonus act passed in 1919, was introduced in the house by the committee on soldiers' home and state bonus.

The bill provides that men who claimed exemption on account of marriage when the marriage took place after they had been rejected for age or physical disability shall not be considered an attempt to evade service.

It provides that any soldier who entered the service prior to November 11, 1918, or who saw active service on or after that date, or who still is in the service under honorable conditions, at the time of making application, shall be entitled to $15 per month for the time of service up to July, 1920.

The bill expressly deprives deserters, or those who left service under dishonorable conditions; conscientious objectors who refused to serve, those who refused to don the uniform; aliens who were discharged from the service because of their lienage, and slackers generally, of the benefits of the bonus act.

It also provides that soldiers who left the ranks to accept commissions and those who accepted pay as civilian employes, shall not participate. Officers and civilians were also barred under the original bill. The bill was referred to the Soldiers' Home and State Bonus committee.

Amend Road Measure.

After unanimously passing the highway administration bill, as amended, the senate ordered 1,000 copies printed for consideration of the house members and public in general. The bill will now go to the house for final consideration.

One of the most important amendments to the bill in general limits the amount that might be spent for hard surfacing to 20 per cent of the construction fund for each year. The house had fixed the limit at 25 per cent. The idea back of the limit is to permit the proper grading and graveling of the roads within the next two years before much hard surfacing is done.

After a sharp debate an amendment striking out the provision prohibiting advertisements along the trunk highways, was adopted.

One of the amendments, made by agreement with the Hennepin county senators, will make it possible for Hennepin county to raise $750,000 and to continue improvements on certain street extensions, leading into southern Minnesota.

An amendment was adopted permitting counties to hire engineers for county work without getting the permission of the state highway commissioner and to remove the engineer without his approval.

Peat Experiment Plan Changed.

After killing a bill providing for an appropriation of $50,000 for peat experiments under the state auditor, the house and senate appropriations and finance committees favor a bill to spend this amount for this purpose under the university school of mines, which has the equipment and can do the work cheaper.

To Show Deed Considerations.

A bill to require filing affidavits showing considerations which are not disclosed in deeds presented for record, was advanced to the calendar subject to amendment after a long debate. It was claimed that the consideration would guide assessors and that the bill was indorsed by tax officials and experts, but Representative Theodore Christianson asserted that affidavits would not be necessary in case the deed contained the words, "$1 and other good and valuable consideration." Then it was advanced subject to amendment.

START WORK IN GARDENS EARLY

Of Great Importance That All Rubbish and Dead Plants Be Removed and Burned.

KILL INSECTS AND DISEASE

Kind of Manure Applied Is Not Important So Long as It Is Free of Weed Seeds—Give Young Trees Protection.

(Prepared by the United States Department of Agriculture.)

Home gardening was undertaken by thousands of families in the United States last season and the garden habit seems to have become fixed with a large number of persons.

In most sections the late fall gardens were killed by frost and in many cases the debris still litters the ground.

Bean poles and tomato stakes with their burden of frosted vines, are toppled over and give the garden an unkempt and ragged appearance. Aside from the esthetic influence of cleaning up the garden, it is important that all rubbish and dead plants be removed and burned to protect the crops of next season from the insects and disease spores which infest the debris. A few hours of work in the garden now will save serious losses another year. Gather the bean poles, tomato stakes, and any removable trellises or wires, store the good ones until they are again needed; then pull, rake together, and burn all the dead vines and plants left in the garden. If these are too wet or green to burn, they may be gathered in small piles for a few days to dry and then piled together and burned.

Spread Manure.

Heavy clay soils should be broken up and left rough and lumpy before applying the manure. The kind of manure to use for this purpose is not important, so long as it is not filled with weed seeds or trash of any kind. Manure in which straw has been used for bedding can be taken direct from the stable and spread on the garden as a surface cover during the winter, the rough part being either plowed under in the spring or raked off and put in the compost heap.

Protecting Young Trees.

Experienced gardeners keep a compost heap going in one corner of the garden from one year's end to another, and all surplus manure and sod are placed in it. As a consequence, these gardeners always have a supply of good loam for preparing special plant beds or top-dressing a piece of land for the growing of lettuce or other intensive crop.

Prepare Garden Seed Bed as Early as Possible.

If there is a particularly good young apple tree or two in some part of the garden, do not fail to clean the grass or weeds away from its base and protect the trunk from mice and rabbits with fly screen or closely-woven galvanized wire. Thousands of young apple trees are lost every winter, in certain sections, from being gnawed by field mice and rabbits. As a rule, the mice work just at the surface of the ground, especially where grass and rubbish is left around the roots of the trees. Rabbits are more likely to gnaw the bark from the trunk above the ground, especially while there is a deep snow and they are prevented from getting green food on the ground. For this reason the protectors should extend at least two feet above ground and two inches under ground.

Fruit trees that have borne during the last year should be gone over, and all mummified fruits removed and burned. Any suckers or shoots which have grown up from the roots or on the trunk of the trees should be trimmed off. It also is a good plan to give the trees a thorough spraying with lime-sulphur solution to kill scale insects.

SILOS ARE MOST ESSENTIAL

None Has Ever Been Discarded When Properly Built and Filled at Right Moment.

No silo which was properly built and filled with corn at the right stage of maturity has ever been discarded. Neither is there any farmer who has had a silo on his farm and used its succulent, nutritious feed that is willing to do without one.

Miss May Wildes was shopping in Thief River Falls Saturday.

Aluminum helmets are now used as head dress in rainy weather.

Mr. and Mrs. Henry Roller of Germantown were in town Wednesday.

M. O. Seavey went to Thief River Falls Tuesday on a business mission.

Colben Lovstad returned Tuesday from a visit with friends near Kratka.

Miss Kathleen Lang visited over Sunday with a sister at Thief River Falls

George Wold was looking after business matters at the county seat Monday.

Mrs. Carl Christianson was in Thief River Falls Monday having dental work done.

Mrs C. O. Stephenson and Miss Mabel Tveeten were Thief River Falls visitors Saturday.

Mr. and Mrs. N. Bundhund and two daughters visited at the Chester Boyse home Sunday.

Dr. Adkins was in Goodridge Monday on his way to make a professional call east of town.

S. Stefanovitz, the wrestler, was down from the north country Tuesday and Wednesday.

Mrs. Christine Vake went out Tuesday for a few days' stay with her father, E K. Rime.

Miss Lena Resan, who has been visiting friends in Thief River Falls, returned home Monday.

Maynard Halvorson and Roy Olson drove to Thief River Falls Saturday evening via auto route.

Mel Converse, who spent the winter with his brother, the editor, went Saturday to Thief River Falls.

P. C. Halvorson is rejoicing over the safe arrival at his home on Monday last of twins, a boy and a girl.

Rev. Larson of Thief River Falls was in town Wednesday and attended the meeting of the Ladies' Aid.

Mrs. Gunder Erickson returned Tuesday from an over Sunday visit with friends in Thief River Falls.

Mrs. R. H. McDonald has been quite ill with pneumonia this week, but is reported as now out of danger.

Owen Olson was over from Gully the first of the week to visit his family and arrange for the moving of his house.

I have a Metz run-about in good condition which I will sell cheap for cash, trade for stock.—M. J. Lysbakken.
m8 3t

Harry Frickson and Herman Aakre went to Warren Tuesday to resume their studies at the North Star college.

Edmund Johnson came Monday for a week's visit at home. He is chief engineer at the Brumund hotel, Thief River Falls.

For Sale—Sweet Clover Seed, at 10 cents per pound. Also 300 bushels of Oats, cheap. Sidney Hemmestvedt, Kratka, Minn. m11 tf

We learn that Andrew Lasta sold his farm east of Kratka on the river bank last week, to a party from Crookston. The consideration we can not give.

I have just received a line of samples of wall paper and am satisfied that I can save you money by placing your orders for you.—S. Lysbakken. m11 4t

George Sanders was in town Saturday and Sunday on his way for a visit to Grygla. He is teacher of agriculture in the Park Rapids, Minn., High school.

At a meeting of the Board of Education Wednesday evening Prof. B. O. Norby was re-appointed to the position of principal of the schools for another year.

Jacob Ravenstad and Carl Holman, of Mason City, Iowa, who purchased land on section 25 in Moylan township, have been in town this week making preparations to move out onto their farm, buying teams, etc. They have also rented plow land on the Victor Bolley place. The families will arrive here about the 16th of April. Messrs. Ravenstad and Holman figure on building a new house this summer.

[illegible] Sunday, April 10, [illegible] communion services [illegible] Christian instructions as usual. Special collection for Synodical purposes.
H. LUTZ.

Lutheran Church

Services at Goodridge in Norwegian at 11 a. m. and in English at 8 p. m. of April 3.

Services at Torgerson 2:30 p. m. of same date.

Services at Erie 3 p. m. of April 10.

English services at Goodridge 8 p. m. of same date.

Sunday school at 10 a. m. of every Sunday.

G. A. HANSON, Pastor.

J. A. McEnelly was in Thief River Falls yesterday.

W. O. Gaylord was a county seat visitor Tuesday and Thursday.

Lawrence Nelson of Germantown was a Goodridge caller Thursday.

Julius Stephenson was a business caller at the county seat yesterday.

Mr. Kately has been kept quite busy this week getting rid of the surplus water and mud.

Rev. H. Lutz returned Thursday evening from his trip to Dubuque and Dennison, Iowa.

Iver and Martin Westby went to Thief River Falls yesterday to attend a ditch hearing.

Mrs. Argall of Mobridge, S. Dak., arrived here yesterday for a visit with her sister, Mrs. R. H. McDonald.

Conrad Trotlner came yesterday from Dakota and will work this season in company with his friend, Theo. Torgerson.

Robert Kirkconnel of Spooner visited his brother, Stuart McLeod, the first of the week, and on Wednesday they went to Nevis, Minn., to inspect some real estate.

Adolph Johnson came over from Strandquist Tuesday morning. He will be employed this summer by his brother, George Johnson, handling Standard oil.

If you want to sell your farm this coming season, now is the time to list it with us, as we are getting our lists of lands for sale ready so we can mail them to the prospective Iowa, Illinois and southern Minnesota buyers. Have yours on the list; it may be just the piece somebody wants.

New Cafe Now Open

The Tollefson cafe and confectionery is now open and ready for business at Sorenson's old stand. Hot or cold lunches, confectionery, tobacco and cigars.

The Proposed Road

The Goodridge Commercial club met Saturday evening, April 2, to discuss the proposed state road from Oklee to Roseau. The general sentiment expressed by the members of the club was to co operate in boosting the plan.

The petition circulated by Mr. A. C. Tvedt and signed by more than forty farmers along the proposed route through Marshall county was to have been presented to the county commissioners at Warren Wednesday, April 6. On account of the bad roads, however, it was decided to wait until later, when a large delegation is expected to make the trip to Warren and present the plan to the commissioners.

School Notes

A goodly number of new library books arrived this week.

Hazel Hakes substituted in the Intermediate room the first two days of this week, Miss Argall being ill.

We are all happy to learn that Miss Vaughan is recovering from her serious illness and it is very probable that it will not be very long before she will be able to be around again.

At the general assembly period Wednesday morning the following program was rendered:

Song	School
Paper, Expositions	Edna Brown
Talk, Farm Animals	Daniel Vaughan
Song	Girls' Glee Club
Song	School

Robert Kirkconnel, superintendent of the Spooner public school, was a pleasant caller on Wednesday afternoon.

The program for the Community club meeting promises to be very interesting. Don't forget the date and time, Friday evening, April 15, 8 p. m.

THE GOODRIDGE BANNER

VOLUME XV, No. 16. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL [illegible] 1921 $1.50 PER YEAR

Mr. Protzeller Fears Loop Will Not Pay

The noonday meeting of the Commercial club yesterday was well attended and many matters of considerable interest to the city and surrounding country were brought forth for the consideration of the members.

Perhaps the most important of the many matters discussed was the extension of the electric line between this city and Goodridge, the same to be extended so it would cover a radius of at least fifteen miles in addition to the present route and take in the towns of Rhoda and Hazel and completing the loop back into this city.

The matter from the viewpoint of the farmers in the eastern half of the county was presented by W. A. Swanson of Rhoda, who gave a very interesting talk on the need for such an extension and the possibilities and value to be gained by the entire county by such a move. Mr. Swanson stated that a canvass of the eastern half had been taken among the land owners and the right of way would be donated and money in addition for the extension of the line.

H. W. Protzeller, in speaking for the line, explained it would prove unprofitable for the company to contemplate such an action at this time in view of the fact that there would be an increased dead mileage, and as matters stand at the present time it all the company can do to make the road pay and in taking on this additional territory it would without doubt call for a larger loss in addition to the sum required for the extension, which in all probability would run around half a million dollars.

The matter, after being discussed from all angles, was voted on by the club as a body and upon motion a committee of five was appointed to work in conjunction with Mr. Swanson and other members of the territory affected for the purpose of determining whether or not the matter can be put through in some manner and the loop created.—T. R. F. Tribune.

The Situation of Erickson

If any city readers of The Daily News have the impression that complaints of the farmers are based upon a semi-political "peve" at low prices, rather than upon conditions of actual hardship, their attention is respectfully called to the statement of Adolph Erickson, a bona fide Minnesota farmer.

We aren't saying exactly where he lives for his letter was written in connection with another matter and it might be an abuse of confidence to reveal his identity fully.

"We farmers out in the west here sure got a hard blow last fall," writes Mr. Erickson, "we got eight or nine bushels an acre and to sell for $1.35 a bushel. We paid $110 a month for labor and harvesting and for threshing we paid $6 and $7 a day. I paid out $1,053.63 for labor on my farm. I had 200 acres of wheat, 40 acres of flax, 65 of barley, 35 of oats and the balance in pasture and corn. The farm is 400 acres. March 1 I went over my books to make out my income tax and then I felt like quitting farming. I worked for nothing last summer and would have been better off if I had summer followed my farm."

Mr. Erickson says that this year he will have to do his seeding alone on 100 acres, which is all he can handle by himself, and that he will not hire any help before haying. Despite reports of falling prices, he says a drill that cost $170 a year ago is now priced at $210.

There are a great many northwestern farmers in Mr. Erickson's predicament and also in a more or less embittered frame of mind. It is no help for the farmer to tell him what he ought to have done or what is likely to happen. No amount of moralizing, hindsight or theorizing can alter the cold, hard, present facts confronting him. It may help him to realize that those in other occupations understand his situation and are ready to co-operate in practical plans to bring about improvement. The situation is one where an injury to one is injury to all.—Daily News.

For Sale

1,000 Oak Fence Posts, at 10 cts. apiece, and 25 cords of Poplar Cordwood, four miles south of Erie postoffice, by

Frank Savage,
In section 6, town of Hickory

Timothy Seed for Sale

One thousand pounds, at 6 cents per pound.

TOM HARMS,
Goodridge, Minn.

Moylan News

Almost half of April gone and no sign of any farmers starting their spring work yet.

The sale at V. Bolley's place was well attended. Everything sold for a fair price.

Edmund and Norman Johnson were callers at the H. Fiskevold home Sunday.

Garfield and Arthur Erickson were visiting with Henry Olson Thursday evening.

Lillie and Thelma Erickson were visiting with the H. Kiesow girls Saturday evening.

The services at the Carl Erickson home Sunday afternoon were well attended. After the services a delicious lunch was served.

Garfield, Arthur, Lillie, Thelma and Viola Erickson, Thomas and John Cullen were pleasant visitors with the Kiesow young folks Sunday evening.

Garfield Erickson and Willie Kiesow made a flying trip to Fred Solley's Sunday afternoon. The trip was made on Garfield Erickson's motorcycle.

Erie Echoes

Miss Thelma Hovet shopped in Erie village Thursday.

H. Folkedahl is busy taking orders for woolen goods for the Northern Woolen Mills of Fergus Falls and is meeting with good success.

"Outers" are pretty much in vogue these nice spring days.

Ludvig Johnson left for Thief River Falls Monday.

G. A. Iverson installed a phone recently.

The community school meet at Erie hall last Saturday evening was fairly well attended, but 'tis said the attendance could have been better for variety. The meeting, true to form, had a "universal ending," i. e. the light fantastic ended the program.

The George Solberg and Hans Svare families, having recently held auctions, are shortly to depart for their new homes at Pelican Rapids and Fargo respectively.

L. B Johnson and Zakarias Hole have each lost a head of valuable stock through accident recently.

H. C. Iverson is busy at repairing roofs and burning hay meadows.

Rev. Hoyum of Esplee and Mr. Halvorson of Reiner delivered sermons in the school house in district No. 14 Sunday afternoon.

Statement of The Ownership.

Management, etc., Required by The Act of Congress of August 24, 1012,

Of Goodridge Banner, published weekly at Goodridge, Minn., for April 1, 1921.

State of Minnesota, County of Pennington, ss.

Before me, notary public in and for the state and county aforesaid, personally appeared I. D. Converse, who having been duly sworn according to law deposes and says that he is the publisher of the Goodridge Banner, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, towit:

1. That the name and address of the publisher, editor, managing editor and business manager is I. D. Converse, Goodridge, Minn.
2. That the owner is I. D. Converse, Goodridge, Minn
3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of tatal amount of bonds, mortgages, or other securities are: Farmers State Bank, Mavie, Minn.

I. D. CONVERSE.

Sworn to and subscribed before me this 2nd day of April, 1921.

| SEAL | H. B. ROCKNE.
My commission expires March 10, 1923.

If you want to sell your farm this coming season, now is the time to list it with us, as we are getting our lists of lands for sale ready so we can mail them to the prospective Iowa, Illinois and southern Minnesota buyers. Have yours on the list, it may be just the piece somebody wants.

BETTER PRODUCTION AND BIGGER PROFITS FOR GROWERS OF WOOL

Keeping the Fleece Intact Is One of the Things Graders for Co-Operative Pools Have Emphasized With the Growers.

(Prepared by the United States Department of Agriculture.)

They are being "shown" down in Missouri and they like it.

For the first time the wool growers of that state have been marketing their wool co-operatively, and the plan is proving a great success. At 70 concentration points the wool has been brought in from the country for [illegible] told, several thousand growers [illegible] in the big co-operative [illegible] and wool amounting to [illegible] of pounds has been [illegible] It has been [illegible] the growers brought it in, [illegible] grader [illegible] to the bureau [illegible] United States Department of Agriculture, [illegible] The [illegible] of the grader [illegible] in connection [illegible] Department of Agriculture [illegible] the immediate [illegible] resulting from [illegible] that [illegible] they promise [illegible] well or better than the average [illegible] year's market, which is far [illegible]—but it is the benefit they [illegible] derive next year and the [illegible] following from their experience [illegible] season.

The "showing" in Missouri—and [illegible]—has consisted in demonstrating the value of grading as carried on under the co-operative plan. The growers have been quick to see their mistakes and propose not to repeat them. As a result, the entire wool industry is to profit by a general raising of standards among the growers.

Amazing Variety of Wrappers.

The seemingly incidental—but really very important—matter of wrapping the fleece illustrates the benefits of co-operative wool marketing. One of the regulations which must be observed, if the wool grower is to suffer no penalty when his wool is graded, is that each fleece shall be wrapped in paper twine or a hard-glazed twine. If other twine is used fibers from it are almost sure to become mixed into the wool and may cause serious trouble in the spinning machinery, or if these fibers are woven into fabric they become conspicuous owing to the fact that they take the dye differently than the wool fibers. This often results in the cloth having such defects as to be almost worthless.

Many wool growers had never understood this until it was explained to them by the grader, consequently some of the lots of wool brought into the warehouses were done up in ways that would have been amusing had it not meant considerable financial loss to the uninformed growers. Some used binder twine and sisal, others bark, smooth wire, and barbed wire, and still others cotton rags torn in strips. The majority, of course, had their fleeces tied with the proper materials.

Incidentally the bureau of markets explains that Missouri is not alone in the matter of being "shown," since wool growers in all sections of the country have discovered that they have been following practices that often seriously penalized them.

"No More Wet Wool for Me."

But the use of proper wrapping material is not the only thing which the co-operative wool growers are learning. "Shear the sheep when the wool is absolutely dry," say the Department of Agriculture and wool experts everywhere. But many growers apparently do not know of this requirement. One grader in Missouri was amazed to find all of the wool in a certain lot thoroughly soaked. Pressed for an explanation the grower admitted that he did not know that moisture made any difference in the grade, but realized that moisture added to the weight. When asked how he could account for the condition of his fleece, he admitted that he had allowed his load of wool to stand in the creek all night. When he discovered that this was responsible for his wool being rejected he took the decision smilingly and with a "Never again!" drove away.

Burs Cause Trouble.

One class of "rejects" in wool grading is known as "burry." Many farmers have become indignant when some [illegible] of their fleeces were thrown into the burry class. But in each case the grader has been able to show them by careful examination that the condemned fleeces contained large numbers of burs—sometimes 50 or 60. Every such experience has sent the grower back to his farm resolved to clean up those burs." "Next year you'll see an improvement in my wool," more than one man has told the grader.

It is experiences like these that are making wool growers in many sections of the country realize that they have not been getting the full returns for their product. They see that the co-operative system not only lessens the cost of handling, and so benefits both grower and seller, but that the grading which is an essential feature of the system permits them to better meet market demands. "It is a case of how, when and where," say the marketing specialists. The system which has had such a promising beginning in Missouri and other states enables the producer to grow the kind of wool most desired and to sell it in the form desired; it enables him to hold his wool until the best marketing time arrives, and through a large organization he is able to sell his wool to the buyer who makes the most satisfactory offer. He is not at the mercy of any one buyer.

The bureau of markets is prepared to furnish information to any person interested in learning more about co-operative wool marketing as well as co-operative marketing in numerous other fields in which success has been equally pronounced.

Rush Hour in Cairo.

To know what the other half thinks is often more important to common happiness than to know how they live. Men of many sorts have railed against crowded trolleys and trams in all the civilized cities and towns of the world, but how few in the vein of Al-Kashkul when writing to the Egyptian Mail last month. He does not raise his objection because he cannot jam himself into the mass of traveling humanity before the car door is slammed in his face, as men in New York well may. He does not object because he has to rise and give his seat to a woman, as men in many places do. He states plainly that he ceased to observe this custom, when he discovered that women seemed to expect it, rather "enjoying seeing on their feet men for half an hour, tottering right and left like a reed in a storm." No. He objects because women use the cars when they see that men want them. "As ladies are not in a hurry as men are, they can wait a little to take the next tram."—Christian Science Monitor.

For Thoughtful Mothers.

Just as soon and so far as we pour into our schools the songs, poems and literature of mercy toward the lower creatures, just so soon and so far shall we reach the roots not only of cruelty but of crime.

The Good Morning Man

By R. RAY BAKER

(© by McClure Newspaper Syndicate.)

[illegible] dash, dot, pause, dash, dash. [illegible] a gloomy, rainy morning, and [illegible] Clark had been in anything [illegible] frame of mind when [illegible] opened the telegraph office a few [illegible] set the umbrella in a [illegible] where it could dry, shed [illegible] her hat, gave her [illegible] of black hair a [illegible] prepared for business. [illegible] joining the clouds [illegible] of a rainy day seemed [illegible] dampening effect on [illegible] the average person. [illegible] her only love [illegible] such a day four [illegible] Glen Hartlow went [illegible] a furious quarrel [illegible] back. And Stella [illegible] willing to give her [illegible] she would not [illegible] argument that [illegible] misunderstanding at a [illegible] the quarrel and the [illegible] happened in a distant [illegible]

[illegible] was little excitement in [illegible] manager and chief operator [illegible] the telegraph office in this [illegible] city. There was plenty [illegible] the summer, and she had [illegible] in the fall things [illegible] She was sitting at [illegible] table waiting for things [illegible] when she took note of that [illegible] the language of Morse:

[illegible] dash, dot, pause, dash dash.

The [illegible] meant "G. M.," which [illegible] "Good morning."

"I can't say that it is, but I like his spirit, and I also rather fancy the [illegible] clear, decisive manner in which he handles the key. Wouldn't he make a wonderful husband? You don't

[illegible] Paralyzed With Astonishment.

[illegible] operators to send out a good-morning greeting along the wire. [illegible] I believe I'll [illegible] no one else is going to. [illegible]

Stella [illegible] key and clicked off [illegible]

"Good morning yourself, in spite of the rain. [illegible] it isn't raining in your town."

"It isn't," was the quick answer. "It's just a [illegible] here, that's all, lady."

Ah, he had detected the feminine in those clicks she sent over the wire. In addition to his other qualities this man had a keen brain.

She was trying to think of something to say when he resumed:

"Of course it had to rain today because I just arrived in town last night. That makes you like a place right at the start. This is Center City, and I'm the new operator. Well, here's a message for a place named Carson. I suppose I'll have to send the regular call and wake somebody up."

"No need," Stella telegraphed. "This is Carson. Let it come."

He sent rapidly, but he was easier to read than many slower senders, because his touch was almost perfect. Stella became quite fascinated with that touch and with the man who possessed it, before the day was over; for it happened Center City has a great deal of business with Carson during the ten hours the Carson office kept open.

The next morning the same greeting was flashed at large by the same man, and again Stella was the only one to answer. Again pleasantries were exchanged before the daily grind got under way.

Before that week was over Stella had lost her heart to the "good morning" operator. From this it must not be supposed that Stella was one of the kind that carry their hearts on their sleeves, or, in this case, on the finger tips. Stella was good to look upon, and many men had courted her, but four years ago she told a certain man that she would never care for another, and up until now she had remained faithful to that statement, even though the one to whom she had made it was no longer a part of her life. Men of wealth and power, and handsome men had wooed her in vain, and now she was in love with a strange person who popped over her horizon suddenly with a "good morning" and forced his way into her affections without even showing his countenance.

It was no passing fancy, she was certain. Stella was quick to make decisions, but they were lasting. She believed in love at first sight because that was the way she gave her heart to Glen, and she could see no reason why love at first sound could not be as sincere. The sense of hearing is as discriminating as the sense of sight, she argued in defense of her attitude toward the Center City operator. Of course, the affair probably would come to naught, she thought, for probably the "good morning" man was already married, and, anyhow, it was unlikely [illegible] felt [illegible] to [illegible] For Stella was [illegible] her mother having [illegible] years ago and she [illegible] in a little upstairs [illegible]

Stella came to look forward to that cheery Morse "good morning," and one day about two weeks after she first heard the greeting, she was greatly disappointed when it was not flashed over the wire. During the day she learned that her telegraphic sweetheart had gone away—probably to [illegible] she told herself bitterly.

For two days she was morose, but on the third "good morning" came in the [illegible] after she entered the [illegible] and she smiled again.

"Missed you," she told him, taking care to make it sound more or less perfunctory.

"Went to Chicago to pack up," he explained. "I'm moving here."

Stella sighed a deep sigh of relief and her smile became brighter.

That week was a happy one, for the Center City operator showed signs of [illegible] Little personal remarks that he edged in between business matters during the day made Stella joyful. The remarks were not familiar in an objectionable sense, but they were intimate, in a conservative, apparently sincere way. She wondered what the other operators on the wire thought of it, but she didn't really care.

Then came the climax to the affair. She was just ready to close up for the evening when the "good morning" man called her.

"This is strictly business," he said. "I'm in love, and you're the one. I can't wait any longer. Will you marry me?"

Stella was dazed. It was really "so sudden," but she was a business woman, and he had stated this was strictly business. So she answered with the expression that so often traverses telegraph wires, where every letter means time:

Dot, space, dot, pause, dash, dot, dash.

It was simply "O. K."

* * *

"Good morning" was missing the next day, but there was a reason. The man was on his way to Carson, and Stella's heart was fluttering expectantly.

In the middle of the afternoon a young man entered the office and advanced to the counter. When he and Stella saw each other they both became paralyzed with astonishment for several long seconds.

"Glen!" [illegible] managed to gasp. "Why—what [illegible]"

He smiled [illegible]

"[illegible] glad [illegible] "that I have [illegible]

[illegible] the floor [illegible] she [illegible]

[illegible]

"I didn't [illegible]

[illegible]

"As [illegible] Stella [illegible] business [illegible]

"I never [illegible] word," [illegible] "and I [illegible]."

Co-operative Creameries Lead in Marketing

A. J. McGuire of University Farm, dairy authority with the agricultural extension division, says that the co-operative creameries of Minnesota paid for themselves last year in the increased price which they paid for butterfat. There is no marketing system in the United States, he declares, equal to the system developed by the creameries.

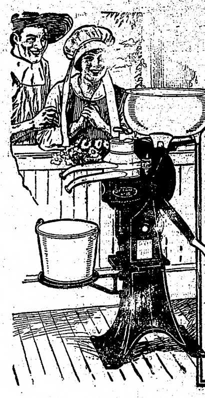
The year 1919 will be remembered as a great year for dairy farmers, but Mr. McGuire demonstrates that 1920 was even better for co-operative creameries. Records of the 600 co-operative creameries of Minnesota show that they made about the same amount of butter in 1920 as in 1919. However, the 1920 price was a little higher than the 1919, and the creameries that made first grade butter in 1920 showed good gains.

Mr. McGuire says the best paying co-operative creameries paid an average price of 70 cents a pound for butterfat in 1920. A great number paid from 67 to 69 cents, and the average for the 600 co-operative creameries in the state was around 65 1-2 cents. The average net price paid by cream stations for centralized creameries was not above 57 cents.

Alleged Forger Taken

W. J. LaBree, Pennington county sheriff, on Saturday apprehended H. J. Johnson in the eastern part of the county. Johnson, formerly of Pelican Rapids, was wanted at Fergus Falls on a note forgery charge.—T. R. F. Times.

Goodridge Mercantile Co.,
of Goodridge, *say:*



They're starting right with a De Laval

A DE LAVAL Separator starts you right because it provides a steady income the year around. There is no waiting for crops to mature before money is received; no long winter months with nothing to sell, when you have a few cows and a De Laval.

When you start right with a De Laval you have an assurance of a steady income, for every year as long as you want to use it.

And separator trouble is rare indeed among De Laval users. More than forty years of experience in building cream separators are back of the De Laval.

It skims closer, turns easier, has a greater hourly capacity and is easier to keep clean. In short, it is the most economical and most satisfactory separator that it has ever been possible to buy.

We'll start you right with a De Laval that will pay for itself every year you use it

Sooner or later you will buy a

De Laval

WELL-KEPT DIARY IS VALUABLE TO FARMER

Profit Gained From Record of Daily Happenings.

Many Farm Problems Encountered Every Year That Might Be Solved More Easily if History of Property Was Handy.

(Prepared by the United States Department of Agriculture.)

A well-kept diary is the most interesting and valuable volume in its owner's library. For the farmer, the diary will preserve a record of farm happenings and personal experiences which will be valuable in the future conduct of his business. If, when he finds his alfalfa field swarming with grasshoppers, he can look back in his diary to a summer ten years before and find the poison-bait formula that controlled the insect then, he will save much valuable time. He may wish to know the exact location of a tile drain that was laid down when he was a youngster. If the event was noted in his own, or his father's diary, a ten-minute perusal will give him more definite information than a day's digging with a spade. There are dozens of farm problems encountered every year that might be solved more easily if the farmer had access to a complete chronological history of his property.

Preserve Farm Records—They May Prove Valuable.

The diary may be given a prominent place in the bookkeeping records of the farm business. Generally speaking, there are three purposes to be served by farm accounts:

(1) To determine the farm investment, receipts, expenses, and the net income of the business.

(2) To furnish the net returns from any individual farm enterprise and to supply specific information as to its details.

(3) To obtain a memorandum of what other people owe you and what you owe them.

The blank forms necessary for a simple accounting system can be worked out by the farmer himself, or he can apply a system recommended by his county agent. He also can obtain information direct from the office of farm management and farm economics, United States Department of Agriculture. The chief advantage of a farm accounting system, which is a part of the farm diary, is in the additional interest furnished by the personal items. The diary supplies items of supplementary interest which usually are left out of the accounts. Without the diary the task of keeping the books of the farm business becomes dry and uninteresting. Only persistency and practice will make one an adept at writing a diary.

HONEST FIGURES OF BENEFIT

Farmer Gains Nothing by Using Estimates Too High or Low—Best to Stick to Facts.

Good judgment, coupled with experience, should enable a farmer to come fairly close to the right figures in making a farm appraisal, say farm management specialists of the United States Department of Agriculture. A middle course is the safest, since the results of an appraisal either far too high or far too low will be of little or no value. False appraisal, to make the figures show up well, is labor thrown away, since the one who indulges in this pastime is only fooling himself. Stick to facts. Use market values, adding expense of getting to the farm all those things the farmer buys, and subtracting the probable expense of marketing from the market value of all those things he has to sell.

Chinese Education.

In Chinese schools, just before the noonday recess, the teacher writes a sentiment, a proverb or a proposition on a slip of red paper and pastes it on the door. Each boy as he goes out reads the lines, and in the afternoon gives to the teacher another line which will, with the first, make a couplet.

TAX BILL BECOMES LAW

Advocates of Tonnage Tax Win As Governor Preus Signs Bill—Next Inning in Courts Certain.

St. Paul—After a fifteen-year battle the advocates of tonnage tax won out when Governor Preus appended his signature to the mine tax bill recently passed by both houses of the state legislature.

The chief executive, still in bed recovering from an attack of influenza, affixed his signature to the measure as soon as it reached him.

The fight for increased taxation of iron ore properties in northern Minnesota, waged in political campaigns and Legislatures for the past 15 years, now will be transferred to the courts.

Clifford L. Hilton, attorney general, told members of the House committee on taxes some time ago that if the bill passed Minnesota would have on its hands "one of the biggest lawsuits in the history of the state."

There was rejoicing in the ranks of those who have long been advocating a tonnage tax. Most of these advocates admitted that the big court battle would now start. But they expressed satisfaction that the matter had been settled so far as the legislature and the governor were concerned.

No State Supervision.

After a strenuous battle the House defeated the Wicker-Nolan police bill, and substituted one providing for the state identification bureau to co-operate with the police officers of the state, and expressly prohibiting the bureau from acting in strikes, lockouts or disturbances growing out of labor disputes, by striking out of the appropriations of $5,000 for the establishment of the department and $25,000 a year for its maintenance.

Then the substitute bill was defeated, 53 to 58, so both the state police control and the identification bureau proposals are dead unless this vote is reconsidered at some future date. Amendments offered by W. D. Washburn of Minneapolis and others so mutilated the measure, advocates said, that it was virtually a blank.

Another amendment by J. W. Sweitzer providing that the head of the state police department shall co-operate with rather than co-ordinate local police officers, was adopted.

The developments in the House are summarized as follows:

/University of Minnesota budget for next two years was cut almost in half by vote of the house appropriations committee, and normal school requests reduced about 30 per cent.

Conference committee of 10 members from each house named to reach agreement on big appropriation bills.

Iron ore taxation bill repassed by the house with a slight amendment and sent to Governor J. A. O. Preus for his signature.

Resolution for an interim commission on taxation reported for passage by senate rules committee, after striking out special reference to iron ore taxation.

Se[illegible] conference committee report on highway administration bill, which also is ready for the governor's action.

[illegible] committee began drafting [illegible] the A. C. Welch inquiry [illegible] charges of bribery in a [illegible] newspaper, repudiated by [illegible] ves Welch as far as the [illegible] house members.

[illegible] guaranty bills laid on tal[illegible] te to be taken up and m[illegible] order.

C[illegible] f Wisconsin and Minnesota [illegible] ive committees at capitol [illegible] agreement for co-operation on interstate bridges.

Resolution received in the senate for an interim commission on insurance other than life, to report to the next legislature.

Bill introduced by house highways committee to permit crews on trunk highways to work more than eight hours.

Control Bill Revived.

The Gillam board of control bill, providing for increase in the membership of that board and appointment of a woman as one of its personnel, will again be brought before the house following its recent defeat. Representative F. J. McPartlin, International Falls, moved reconsideration of the measure just before the house adjourned, and this was carried by a close vote, 56 to 54. Mr. McPartlin immediately moved that the bill placed on special orders.

House Approves Drainage Bills.

The house on a special order passed seven drainage bills. One provides for an interim commission to codify drainage laws. Others provide for experiments in drainage, amend the flood control act by exempting high land farmers from assessments, and appropriate $60,000 for a topographic survey of the Red Lake and Minnesota valleys.

Senate Passes Hotel Bill.

The senate passed a new bill relating to the liability of hotel keepers, limiting liability as to loss from rooms

Bill Before Governor.

Imposing an assessment of 6 per cent on the net income derived from iron mining will be made possible under the occupational tax bill which was concurred in by the senate and which bill is now before Governor Preus, awaiting his signature.

Only one amendment was offered on the floor of the senate. That was to strike out the word "occupational." Friends of the bill split on this amendment, about half of them voting for it and the other half opposing. Opponents of the bill voted almost solidly to retain the word, with a view to killing the bill by keeping an objectionable feature. The amendment lost, 17 to 48.

The bill was passed by a vote of 38 to 27. The net result was almost the same as on the Bendixen bill in 1919, when the vote was 38 to 28. The roll-call yesterday was as follows:

Ayes—Anderson, Baldwin, Benson, Blomgren, Bonniwell, Catley, Cashel, Cliff, Cumming, Devold, Gandrud, Gillam, Gjerset, Gooding, Hall, Hamer, Hopp, Jackson, Johnson, Kingsley, Kuntz, [illegible], Lindsley, Loonan, Millett, Naplin, Nolan, Orr, Peterson, Putnam, Rask, Rockne, Romberg, Sageng, Schmechel, [illegible]pan, Ward, Wold—38.

Noes—Adams, Bassette, Boylan, Brooks, Callahan, Coleman, Conroy, Cosgrove, Denegre, Dwyer, Erickson, Fowler, [illegible]lford, Handlan, Hegnes, Larson, McGarry, Palmer, Reed, Ribenack, G. H. Sullivan, J. D. Sullivan, Swanson, Turnham, Van Hoven, Vibert, W[illegible]ll—27.

As passed and submitted to the governor, the bill imposes a tax of 6 per cent on net income from operation of iron mining, termed an "occupational" tax on the business. The net income is figured by deducting labor and transportation costs, royalties, etc., but not certain overhead expenses. It was stated on the floor that about 80 per cent of actual costs of mining will be exempt from the tax.

Redrafted Bill Gets O. K.

Under the state traction control bill, rewritten and recommended for passage by the house committee on public utilities, state railroad and warehouse commission permits would supersede city franchises now issued to street railway companies. The committee recommendation was secured by a vote of 16 to 2.

The bill purposes to empower the state railroad and warehouse commission to give street railway companies indeterminate permits in place of present city franchises, and to investigate and value systems to fix reasonable consideration for which cities may purchase the systems and reasonable rates of fare, all subject to appeals to district courts in counties in which involved properties are located, to be treated as original actions.

The jurisdiction and rights of the district court in appeals from findings of the state railroad and warehouse commission on applications for rate adjustments or purchase of railway property by the city are clarified in the amended bill. The measure also increases the city council's supervision over service, sanitation of cars and types of equipment and provides, as had been foreseen, that street railway companies shall pay the cost of property valuations and the preparation of cases by either the city council or the railroad and warehouse commission looking toward rate changes or the taking over of property.

"U" Appropriation Slashed.

Wholesale slashes in University of Minnesota appropriation requests were taken by the house appropriations committee. In the main, it was announced, they have been agreed to by the board of regents and that they will approximate $3,000,000.

The house committee has decided, however, to eliminate all building requests, except three minor ones, leaving everything else to be taken care of out of the 10 year building program fixed by the legislature two years ago.

Removal of the Northern Pacific tracks will be met out of the building certificates of indebtedness. The only building items allowed were $10,000 for the home management house at university farm, $9,000 for a farm building at Duluth and $4,000 for completing a house at Waseca. The $50,000 asked to complete the University high school addition was cut out by a close vote.

Three Dry Bills Recommended.

The senate temperance committee recommends for passage, with only one amendment, the three prohibition bills passed by the house, reducing the minimum jail sentence for first offenders from 60 to 30 days. It refused to incorporate an amendment offered by Dr. George B. Safford of the Anti-saloon league, limiting the number of liquor prescriptions a doctor can issue to 100 in three months.

Passenger Rate Bill Passes.

The bill authorizing the railroad and warehouse commission to make new maximum passenger rates for Minnesota, in place of the present statutory 2 cent rate, was passed by the senate

School Pay Proposal Defeated.

Considering educational bills, the house defeated a proposed general revision of county superintendent's salaries on the basis of the number of schools. The vote was 65 to 53

Road Construction Fund.

Amended to provide that the highway commissioner may at his discretion spend 33 1-3 per cent of the annual road construction fund for hard surface roads, provided that is necessary to obtain federal aid, the highways administration bill as agreed upon in conference between house and senate committees was passed by the house. The bill retains the 20 per cent limitation on expenditure for hard surface roads and a special proviso authorizing expenditure of the additional 13 1-3 per cent if necessary.

USE RIPE SEEDS TO START TREES

Few Varieties of Seed Such as Elm, Maple, Willow and Poplar Ripen in Spring.

LOAMY SOIL IS PREFERRED

Proximity to Farm Dwelling Is Desirable Because Rodents Are Not Abundant—Transplant Seedlings When Ten Inches High.

(Prepared by the United States Department of Agriculture.)

Perhaps the cheapest and frequently the best way to start a forest plantation is to collect seed from hardwood trees and grow seedlings, say forest specialists of the United States Department of Agriculture in Farmers' Bulletin 1123, "Growing and Planting Hardwood Seedlings on the Farm," just published by the department. Home-collected seed, says the bulletin, will be fresh and the seedlings grown from it should be thoroughly acclimated so far as climate is concerned.

Should Be Collected in Autumn.

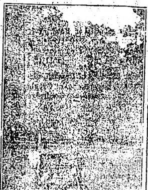
Seed should not be collected before they are ripe, and this means for most kinds of seed that the work should be done during autumn, usually after frost. Collecting may be extended into the winter for such species as ash, catalpa, honey locust, sycamore and others which retain the seed on the trees until that time. A few varieties of seed, such as elm, silver maple, red maple, willow and poplar ripen during the spring and summer and should be gathered promptly before they are scattered.

Middle-aged trees growing in the open, where they have been permitted to develop broad, spreading crowns, ordinarily produce seed in greater abundance than trees growing in a dense forest. The fruit of some hardwood trees requires special treatment to separate the seed from the fleshy covering, pod or hull before they are planted.

The best time to sow seed, either in the nursery or in the permanent planting site, is soon after it is ripe, but when this is not possible the seed must be stored until spring. If this is done, the seed must not be allowed to dry out excessively, because this impairs its power to germinate. Seed should be stored in a cold place.

Loamy Soil Preferable.

When the seed are to be planted a good, well-drained, preferably loamy soil should be selected. Proximity to the farm dwelling is desirable, because rodents are less likely to be abundant there. Preparation of the seed bed should be similar to that of getting the soil ready for a vegetable crop. Except on commercial plantings, where the seed are sometimes sown broadcast, it is best to plant with a drill in rows sufficiently far apart to permit horse cultivation. With small or thin seed, such as that of birch, elm or sycamore, best results will be obtained by sowing broadcast rather thickly over the beds, pressing the seed into the loose soil with a board and covering it very lightly with soil and a light mulch of leaves or straw. When the seedlings are ten or more inches in height they are large enough to be transplanted to the field. Most of them reach this size in one growing season. In digging them care should be taken to injure the roots as little as possible. Injured portions of the roots should be cut off with a sharp knife. The seedlings should not be dug until the time for planting them in their permanent location, for exposure of the roots to the air for any length of time will kill them.



Well-Managed Timber Stand Is Source of Fuel and Shelters Farmstead From Severe Winter Winds.

GROW SOY BEANS WITH CORN

Combination Will Produce Larger Amount of Dry Matter Per Acre Than Corn Alone.

There is a decided advantage in growing soy beans with corn for silage purposes. The combination will produce a larger amount of dry matter per acre than corn alone, and the beans, being rich in protein, help materially in improving the feeding value of the silage. Less high-priced oil meal or cottonseed meal will be needed to balance the ration when the silage contains a goodly proportion of

The roads [illegible]

Palmer Wold of Kratka [illegible] Goodridge Monday.

Mrs. H. B. Rockne spent the week end at home.

M. O. Seavey was in Thief River Falls Thursday.

Carl Lindstrom is building an addition to his residence.

Miss Ruby Jensen visited at Thief River Falls over Sunday.

Oscar Rambec of Thief River Falls was in Goodridge yesterday.

Carl Kerstad, the Highlanding merchant, was in town Monday.

Henry Tollefson made a business visit to Thief River Falls yesterday.

Miss Eleanor Bauer visited friends in Thief River Falls over Sunday.

Mr. and Mrs. M. O. Seavey made a business trip to Kratka Monday.

Mrs. George Johnson was having dental work done at Thief River Falls last Friday.

Joseph Prucha loaded his car of moveables and shipped yesterday to Laporte, Sask., Can.

Victor McLeod moved yesterday into the house formerly occupied by D. A. Danielson.

Fred Stucy, who has been spending the winter at Waseca, Minn., returned yesterday.

Linton Palmer was over from Thief River Falls Tuesday shaking hands with old friends.

Miss Rachel Baker of Esplee was a guest at Carl Johnson's home Monday and Tuesday.

Mr. and Mrs. Bundhund and two little girls visited with Emil Ristau and family Sunday.

Mr. and Mrs. Carl Erickson and daughter Myrtle were Thief River Falls visitors Tuesday.

Mr. and Mrs. Ole Prestebak of Thorhult have been visitors at the Christ Urdahl home this week.

Found—A watch. Owner please call at the O. K. restaurant, prove property and pay for this notice. a 15

Magnus and Syver Lysbakken, Gilbert Gunderson and W. O. Gaylord were at the county seat Tuesday.

Mrs. Tillie Torgerson and Miss Sadie Sand accompanied Andrew Sand to Thief River Falls Monday.

Owen Olsen's house was moved Saturday to its new location on a lot north of Mrs. Vake's residence.

George Josephson drove yesterday to three miles north of Thief River Falls, hauling the engine for a dredge.

I have a Metz run about in good condition which I will sell cheap for cash, trade for stock.—M. J. Lysbakken. m8 3t

M. J. Lysbakken, Aune Strandem, Reuben Gunderson and Allard Iverson transacted business at Highlanding yesterday.

For Sale—Sweet Clover Seed, at 10 cents per pound. Also 300 bushels of Oats, cheap. Sidney Hemmestvedt, Kratka, Minn. m11 tf

Rev. Blaine Lambert of Bemidji, district missionary, held services at Grygla Wednesday evening and at Goodridge Thursday evening.

Several of the Goodridge boys took the pass to Mavie and return Sunday. They also enjoyed a picnic lunch at the Mavie city park.

Ole Larson of Lincoln county, this state, came yesterday and went to visit his brother, Ludwig Larson, whom he has not met for twenty years.

I have just received a line of samples of wall paper and am satisfied that I can save you money by placing your orders for you.—S. Lysbakken. m11 4t

T. A. Rolfson came from Thief River Falls Wednesday. He has recently returned from southern Wisconsin, where he spent most of the winter.

Walter Sorenson went to Middle River Monday and delivered his pool tables, which he had sold to a party there. The tables were taken over on George Johnson's truck.

F. Robinson, who lives southwest of town about six miles, was in Goodridge yesterday. He says they sowed their wheat last week and have in the ground most of their acreage of oats.

Harold Gunderson, Eddie Halvorson, Oscar Kulseth, Theo. Torgerson, Conrad Stottner went to seek their fortunes Monday. They were not sure when they left whether they were going to Hibbing or Duluth.

Twelve young girl friends of Alice Stephenson gave her a surprise party Monday evening, the occasion being her eleventh birthday. A nice lunch was served and she received a number of handsome presents. The party broke up about 9 o'clock, after a very pleasant evening.

[illegible] Sunday [illegible] 10 a. m. English services at 2:30 p. m. at Germantown [illegible] April 19, 1921, the pastor will be attending conference at Grand Rapids.

Prof. Norby spent Sunday in Thief River Falls.

Mrs. McDonald is convalescing nicely from her illness.

Mr. and Mrs. J. J. McCabe were in Thief River Falls Tuesday.

County Agent McCann was in Goodridge yesterday between trains.

Misses Hilda and Sena Christiansen were Thief River Falls visitors Thursday.

Alfred Dybvik of Thief River Falls visited at the J. P. Jensen home Saturday.

Mrs. Will Wayne and son were visitors with Mrs. Jay Payne the first of the week.

I. C. Richardson of Thief River Falls is in town this morning on a business mission.

Mr. and Mrs. Carl Christianson autoed to Thief River Falls and return Monday.

Ole Sand of Highlanding went on Wednesday to International Falls, where he will be employed.

The Farmers mill has been doing considerable custom grinding of late. The farmers claim they save quite a bit in that way.

The Goodridge band will give a concert at the Highlanding pavilion tomorrow evening April 16, at 8 p. m. The concert will be followed by a dance.

The Farmers mill was grinding nearly all night Wednesday night. Knut Solheim and Ole Helgeland brought in big loads of wheat, which they converted into flour.

Married

On Tuesday, April 12, at 12 o'clock, at the Catholic church in Goodridge, Rev. Father Noessen officiating, Mrs. Kitty Lang and Mr. Frank Pittman, both of this place. Both parties are well and favorably known residents of this community.

School Notes

If the weather is favorable the entire school will turn out at the last period on Friday afterooon to clean up the school premises.

On Wednesday morning the following program was rendered:

Several Songs by the School.

Paper, Care of the Sick, Martha Bundhund.

Recitation, Spring, Genevieve Ferdinandsen.

Three selections by the High school orchestra.

Donald Stein and Stuart Ferdinandsen will give an Irish jig as their part of the progfam at the Community club meeting Friday night.

The Girls' Glee club will sing at the Community club meeting. Don't forget the date, Friday night, 8 p. m.

The boys have organized a base ball team, and a few supplies have already been procured. After a few practices they expect to have a few real live competitive games.

FOR SALE

Fordson tractor, good as new; 20 double disc tractor drill, new; double disc, good as new; Fordson gang, with extra set of breaking bottoms; also pulley and fenders for the tractor. Absolutely guaranteed. At a bargain price if taken at once, $1050. Will take good team of horses and oats. Balance on easy terms.

Also, John Deere triple engine gang, in first class shape, with three set extra shares and three breaking bottoms; one P. N. O. brush breaker, 18 in., good as new; steam engine, 25 horse power, Coline; double disc Van Brunt drill, good as new. All at bargain prices.

THE GOODRIDGE BANNER

VOLUME XV, No. 17. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL 22, 1921. $1.50 PER YEAR

Land Banks Must Resume Gradually

L. A. Lampert, secretary-treasurer of the Valhall branch of the Federal Land bank, returned this week from a conference of Executive Council and officers of the bank at St. Paul. He states that the future ability of the branches to take care of the farmers in their neighborhoods will depend upon the success of a drive now being made to sell the bonds of the parent institution. Whatever money is secured in this manner will be prorated among the branches and the Valhall will naturally come in for its share. What this will be Mr. Lampert was unable to discover.

One thing was made plain at the conference. Activities must be resumed very gradually because of the general financial condition of the country. Efforts will be made to take care of borrowers who are in actual need of the money and applications will be closely investigated. This leaves the bank's status somewhat indefinite as regards this springs' business but it is hoped that matters will so shape themselves that fall demands can all be met. — T. R. F. Times.

Farmers Advised To Pool Wool

To pool or not to pool? This is a question which must be answered soon by wool-growers of Minnesota regarding their clip for 1921. Some farmers may be reluctant to pool again when they have not receivd payment for their 1920 clip, but W. A. McLerrow of University Farm, state leader of livestock extension, and W. L. Cavert, farm management demonstrator, believe that when the pooled wool is sold the farmer will receive materially more than he could have received through the old time plan of selling his fleeces to a small dealer. The University Farm men say that "the idea of marketing wool in large lots through an organization that can offer the product to the big buyers in graded lots is absolutely sound." They advise county agents to make every effort to get wool-growers to continue the pooling system.

Emergency Tariffs

The house has passed the emergency tariff which President Wilson vetoed in the last hours of the old congress, without crossing a "t" or dotting an "i" except to make its terms six months instead of ten.

To it has been added the anti-dumping law. So far as the emergency tariff law is concerned, it is difficult to see why every reason that President wilson marshaled against it in March does not hold against it in April. There may have been some especial reason in December, when the bill was originally introduced, why an emergency tariff bill might have helped the producer, especially of wheat, but the pooducer who could have been helped then is far out of reach of the protection of the bill now. If he is holding his wheat for a rise, the 35 cents tariff will not satisfy him, for he wants more than that. If he has been forced to dispose of his wheat, the benefit of the emeegency tariff now will go to the speclator or or the miller and not to the farmer.

So far as benefiting the producer is concerned, the present emergency tariff bill is buncomb. Even Republicans in the house admit this.

It is intended not only to deceive the discontented farmers, without in any way reaching the source of their trouble, but also to estop farmers from complaing when the Republican majority brings in its real tariff bill, a tariff bill that will make the Payne-Aldrich bill look like a tariff for revenue only, and a tariff bill which in spite of the fact that the consumers of the country are groaning under the existing high level of prices, will add directly to those prices and take millions and millions of dollars out of the pockets of the consumers to put them into the pockets of the favored few for whom the tariff is framed.—Daily News.

School Notes

Miss Sarah Vaughan, teacher in the Intermediate grades, returned on duty Monday morning, after an absence of three weeks due to illness.

Mrs. Edwin Hanson visited school on Thursday of this week.

The members of the baseball nine are putting in strenuous practices every day. Negotiations are being made for a game or two with neighboring school teams.

Mayflower News

Miss Jennie Sparby is now teaching in Dist. 119. School opened last Monday.

Frank Rohrer, who has been on the sick list for the past two weeks, is now feeling better.

Mrs. John Ellingson called at the home on Monday.

Miss Jennie Sparby called at the Blakkestad home last Tuesday evening.

Mr. and Mrs. Henry Limesand visited at the Wm. Jones home one day last week.

Miss Gigstad called at the P. Bolanger home one day last week.

Miss Jennie Sparby visited at the Emil Hanson home over Sunday.

Corporation Held Legal

The Minnesota Farm Bureau federation has been advised by government authorities in Washington that the farmerss' corporation to be formed to sell its members' grain in foreign markets is legal. It is hoped to put the plan into operation shortly.

New Coal Rates
Effective July 6

The Interstate Commerce Commission has ordered new coal rates from the head of the lakes to points in Minnesota, and North and South Dakota, said rates to become effective July 6. According to the new tariff the rate on hard coal is fifteen cents a ton higher than on soft coal for distances exceeding 40 miles.

The charge from Duluth to Thief River Falls, a distance of 259 miles, will be $2.15 per ton bituminous and $2.30 per ton on anthracite. These are the basic rates with an increase of 33 1-3 per cent to comply with the decision of the commission in the increased rate cases promulgated last fall. The tariff on coal moved from Duluth to Thief River Falls at present is $3.10 1-2 on bituminous and $3.64 1-2 on anthracite. A reduction of something like a dollor per ton in freight charges on coal will be most welcome to the people of the northwest. Now let the coal operators and profiteers follow the example of the railroads and cut coal prices to a reasonable figure and thereby ease their consciencences to that extent.

The Haunted House

By FREDERICK HART

(©, 1921, by McClure Newspaper Syndicate.)

"Pshaw! There's no such thing as a ghost!" Cordelia Davis' voice was defiant. "I think you're all silly to believe such stories. There's no more harm in that old house than there is in a chicken coop."

"But Cordelia, old Bates says—"

"Oh, don't tell me what old Bates says! I wouldn't believe that old reprobate on a stack of bibles. He's always telling the most awful whoppers, and he tells them so often that he thinks they are true himself. Why, you've all heard his story about the catfish that was so big that they had to use a calf for bait! He's the worst liar in the county!"

The object of Cordelia's outburst of skepticism was a group of young people who were sitting around the fireplace in the Davis country house enjoying the heat of the flames; for though it was early October there was a chill in the air that made the crackling logs very comfortable.

The talk had drifted from golf and bridge to ouija boards and haunted houses and some one had mentioned the deserted house up the road, stating that it was haunted, and adducing the evidence of old Bates, the peripatetic gardner of the Davis menage, as evidence in support.

A weird tale of moving lights and hollow groans had caused the company to sit a little closer around the fire—all except Cordelia. She shouted her derision at the idea, and overrode the objections of the company as she usually overrode anything that opposed itself to her sweet will.

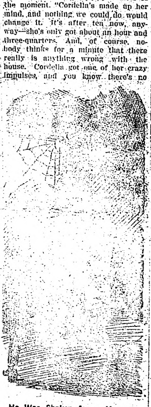
"Why," she finished, as a sort of crusher to trample all opposition, "I wouldn't be afraid to spend the night in that old place any time. I'm not afraid of Bates' groans and lights. There never was a haunted house, and there never can be. I'll go there tonight!"

There was a chorus of protest, and even Cordelia saw the absurdity of the suggestion. But she was not to be so easily turned from her position.

"Well, of course I couldn't stay all night," she amended. "Mother would have a fit—but I will do this—I'll go up to the house now and stay till midnight. Mother won't be in from the club till after then and I can prove that I'm right just as well in two hours as all night. Now don't try to dissuade me, for I've made up my mind. I'm going, and what's more, I don't want any of you to follow me and put up a crazy joke by making a lot of noises. I'm going up to the house, and I'm going to stay there till I hear the village clock strike twelve. It isn't far off and I'll be perfectly safe. I just want to show you how foolish you are to believe in ghosts and all that rot. I'm going now—good-night!" And before anyone could protest she was out of the room. Looking out of the window they could see her in the early moonlight walking rapidly toward the path that led to the haunted house with a shawl which she had caught up in her progress through the hall thrown over her head. The company returned to their seats by the fire a little sobered by the incident.

"I think Cordelia's very foolish to rush off like that," said Betty Sterne, a pretty blond girl who was one of the most popular of the guests. "She might meet a tramp or a dog or anything. Don't you think some one might go after her?"

"Whoever went after her would run an awful risk of being eaten alive," retorted Charles West, Betty's suitor of the moment. "Cordelia's made up her mind, and nothing we could do would change it. It's after ten now, anyway—she's only got about an hour and three-quarters. And, of course, nobody thinks for a minute that there really is anything wrong with the house. Cordelia got one of her crazy impulses, and you know there's no doing anything with her till the mood passes. Let her go if she wants to. She'll come back about midnight and tell us all about it and everybody will be happy."



He Was Shaken for a Moment.

So the crowd continued its chatter, apparently forgetful of the obstinate Cordelia. But one man was moody and silent. This was Jimmy Westlake. He did not like the idea of Cordelia's being out alone, even though the ruined house was on her own property and there was nothing to be apprehended from tramps or other prowlers of the night. His solicitude was not entirely based on disinterestedness; Cordelia had long ago entangled him in the meshes of her attractiveness, but he was by nature a silent man, who did not show well in the company of the more brilliant, if shallower, group that surrounded Cordelia. So he had never spoken.

As the hour wore on toward half past eleven, Jimmy's uneasiness increased. Finally he could bear it no longer, and with a word of excuse about going out to the garage to see about something he had forgotten to do to his car, he slipped from the room. Once outside he headed for the haunted house.

The broken edifice was ghostly enough in the pale moonlight, with its crumbling walls, glassless windows and shattered door. The weeds grew rank and unkempt all about it. He stole cautiously up the path to the doorway, and even as his foot touched the worn sill he heard a muffled shriek from within. Every nerve on fire he rushed through the littered hall and came to a door from behind which came sobs mingled with an unearthly clanking sound.

It was locked, but his shoulder sent it crashing inward and he found himself in a room dusty with the accumulations of years, in which the moonlight filtered dimly through dirty panes; in one corner a huddled heap of white which he knew to be Cordelia and across the floor something black and shapeless was moving accompanied by that ghostly rattle.

Jimmy's nerve was good, but even he was shaken for a moment. Then reason reasserted itself, and he kicked savagely at the thing; it leaped away with a snarl, and the moonlight fell on it—a small dog with a collar from which dangled a few feet of rusty chain!

In his relief Jimmy laughed aloud, and took two strides to where Cordelia crouched, her hands over her face. At the sound of his voice she looked up, then suddenly sprang to her feet and threw her arms around his neck, hiding her face on his shoulder.

"Oh, Jimmy, Jimmy! I'm so glad you came! I'm so glad! Oh, it was dreadful! Please, please take me away!"

Even when he explained that it was only a dog she refused to be comforted, shuddering against him and begging to be taken home. He helped her out doors, and in the open air she found relief in tears. Somehow Jimmy's shoulder seemed a good place as a repository for her grief, and she wept unrestrainedly with his good right arm holding her close. And as she realized her need of him he felt surging through him his love for her, and then and there, on the path that led to her house he told her all that his heart had ached to express. Her tears ceased; but she did not draw away from his protecting arm. At the threshold of the house they paused. From within came sounds of laughter.

"And you were the only one to think of coming for me!" murmured Cordelia.

"I had to come—something made me. I had to come because—because—"

"Because what, Jimmy?"

"Because of what I said before—because I love you and have always loved you. Cordelia, dear, you do care, don't you?"

"Oh, Jimmy, I'm so glad I was foolish and willful and went to that horrible house! I might never have known—just think, I might never have found out that you love me, and that—and that I love you, Jimmy."

Jane's Pink Gingham Dress

By BARBARA KERR

(©, 1921, by McClure Newspaper Syndicate.)

"Mother! Where is my pink gingham dress?" demanded Jane Bryant, tumultuously entering her mother's room.

"Why, er—what dress?" parried her mother helplessly as she snipped off a thread.

"Then it's true!" wailed Jane dramatically, mopping an angry tear from her cheek. "You sent it down to the rummage sale and that horrid Clem Traceter bought it. Mrs. Sands said he did."

"Well, what if he had, Janey? He wanted to buy something, I reckon, to help along the clubhouse fund. What difference does it make? You said the other day you never intended to wear it again. I'd ransacked the house to find something, and I thought I might as well send that as anything," said her mother soothingly.

Jane and Clem Traceter had quarreled over politics. Jane declared that she intended to always vote and make most of her new independence and would not surrender it to any man just for the sake of being his household drudge.

Clem at first thought her merely fooling, but, when he found her serious and challenging him to an argument and an expression of his ideas, he said: "Well, I guess I am a bit old-fashioned, Jane, for I should not want nor would tolerate my wife's going into politics in the strenuous way some of these flighty sisters are doing. I don't think I should ask her to be simply a drudge, though I must confess, Jane, that you were never so charming to me as when I caught you in that pink gingham dress washing down the front stairs."

"Oh, I dare say!" retorted Jane angrily, "the utilitarian did appeal to the man who proposes to regulate his wife's comings and goings, didn't it?" Then turning abruptly she left him standing in the long shady lane leading to the village.

Traceter was angry. His first thought was, "If that's the way she feels about married women I'm glad I found it out in time." But better judgment prevailed. He knew that with her rearing, her practical tendencies, her really domestic nature that she only half way believed what she said.

They were both determined not to give in, yet each was secretly wishing something would turn up to furnish excuse for their seeing each other to pave the way to a reconciliation. [illegible] rummage sale was [illegible] engrossed the minds of both women and men, for the men had to keep all their belongings or keep them under lock and key or be compelled to go to the rummage and retrieve them.

Clem was walking past the store-room where the sale was held and looked in the window when he caught sight of Jane's pink gingham, with its perky little bow in the back, hanging on a hook.

"So, she got rid of it because I admired it," he thought bitterly. Idly he sauntered into the store. Mrs. Sands, the energetic and gracious saleslady, met him. "So glad to see you, Mr. Traceter. Of course you are going to buy a brick for the new clubhouse?"

"A gold brick?" laughed Clem.

"Hardly," denied Mrs. Sands. "You know we don't deal in anything of that sort." Then she noticed his eyes lingering on the pink gingham. Smiling she turned it around on the hanger—"her mother just brought it." Engagingly—"Now, I suppose, you would not be interested in the dress as it is?" and her laughing, teasing eyes dared him.

"Why, yes, Mrs. Sands, I think I would. Come to think of it that is [illegible] exactly," and he took off [illegible] his fingers through [illegible] had been labeled—

Turning Abruptly She Left Him.

or libeled—pink at one time or another.

She hastened to make it a bargain. "It will be only ten dollars, Mr. Traceter, and I am sure it will give you splendid service."

"I couldn't think of taking advantage of your generosity, Mrs. Sands. I must insist on paying something like the worth of the garment," declared Clem gallantly as he handed her twenty-five dollars and received his package.

Mrs. Sands was jubilant and so pleased with Mr. Traceter's manner of carrying off the joke that she hailed Jane as she was driving by next day to tell her how much her pink gingham brought, and hadn't she some more old duds?

Of course Jane had to pretend interest and agree that Mr. Traceter was too nice for anything to help out in that way.

"Fudge!" rallied Mrs. Sands. "You know it was your dress he wanted. He's not going around buying women's second-hand clothes for an investment."

Jane laughed, blushed and hurried on. She would have an accounting from that mother of hers. But her face sobered. She was remembering something. In a little pocket inside the belt of that pink gingham was a little old locket. That day when scrubbing the stairs she broke the chain, then slipped the locket in the belt for safekeeping.

Excitedly she called, asking her mother if she had taken anything from the dress pocket.

"Why, no, dear. I didn't know the dress had a pocket. What was it? I'll call Mrs. Sands. No, I'll call Mrs. Traceter."

"No, no, never mind. Don't call any one. It was nothing much, just that little old locket I've worn so long. Let it go. I promised Mrs. Sands I'd help out some, so I'm going now, for an hour or so."

When Mrs. Sands again rallied her on the splendid sale of a dress, Jane said soberly, "Do you suppose he ever unwrapped that package?"

"Of course, he did," argued romantic Mrs. Sands. "I'll bet he hung it right where he can see it whenever he goes in his room. But why?"

"I'll tell you, Mrs. Sands, there was a locket in the pocket and mother didn't know it. [illegible]"

"[illegible] me!" breathed Mrs. Sands. "Why don't you go right over? I'll go with you and [illegible] Mrs. Traceter."

"No, no, not for the world. Clem—we had a quarrel—"

"Well, there's no harm in my asking for it," declared Mrs. Sands, "or I didn't sell that, just the dress."

But when she went in, she found Clem at home, and he banteringly reminded her that he had bought the dress "as is," but that he would get it and she could look it over. "Oh, dear," he murmured. "No doubt it dropped out. Jane will be so sorry for she seems to set a lot of store by the locket or the picture that was in it."

Clem was sympathetic but noncommittal. He did not say that when he was smoothing the dress out in his closet his hand struck the hidden pocket and that the locket was now safe in his pocket. That story was for other ears, and as it was his day to call at Bryants', he would not tell it until evening.

Jane herself let him in. She was as matter-of-fact as if he had called regularly every Tuesday, right along. After the weather had been respectfully catalogued and laid by, Clem slowly drew forth the locket. "Oh, it didn't get lost after all," smiled Jane, then she blushed as she thought of the picture.

"I have wondered a good many times what was in that locket," he said softly.

"You didn't dare—" began Jane, her eyes flashing.

But Clem dropped on one knee beside her chair, caught her hand and, opening the locket, laid it in her palm. "Of course, I opened it, and I approved the contents. He's not much for looks, Jane, darling, but he is all yours, politics or no politics, if you'll only have him."

He knew she'd been wearing his picture! And there was no place to hide her shamed face except on his shoulder!

Later Jane would have abjured politics forever, but Clem said firmly: "I've been doing some thinking. Some of those flighty sisters are not to blame for looking outside for interests. The Lord knows they need diversion. But I'm going to try to make our little house and your husband so dear to you that we will keep our hearts at home. Of course, we will take enough interest in politics to be desirable and patriotic citizens—won't we, dear?"

And Jane, her cheeks the color of the pink gingham, agreed.

HONEST FIGURES OF BENEFIT

Farmer Gains Nothing by Using Estimates Too High or Low—Best to Stick to Facts.

Good judgment, coupled with experience, should enable a farmer to come fairly close to the right figures in making a farm appraisal, say farm management specialists of the United States Department of Agriculture. A middle course is the safest, since the results of an appraisal either far too high or far too low will be of little or no value. False appraisal, to make the figures show up well, is labor thrown away, since the one who indulges in this pastime is only fooling himself. Stick to facts. Use market values, adding expense of getting to the farm all those things the farmer buys, and subtracting the probable expense of marketing from the market value of all those things he has to sell.

For Thoughtful Mothers.

Just as soon and so far as we pour into our schools the songs, poems and literature of mercy toward the lower creatures, just so soon and so far shall we reach the roots not only of cruelty but of crime.

DRILLING RYE FOR PASTURE

Practice Not Generally Followed Because of Poor Results—Fallen Corn Often Impedes.

Theoretically, the drilling of rye in corn for late fall and early spring pasture should give very good results. But as a matter of practice this plan is very little followed. Perhaps it is because the corn is oftentimes down so badly that drilling is difficult.

Her Model Youngster.

A new neighbor called on me the other day for the first time. Among other things I was telling her what a fine boy I had, when suddenly the bell rang, and there stood a policeman, holding my youngster by the ear, informing me in the worst voice imaginable that he had tied a tin can to a cat's tail, which caused the cat to spring through the basement window, consequently breaking it. The officer demanded I pay $250 for the same.—Chicago American.

ACCOUNT OF FARM BUSINESS

Memorandum of Various Items Will Prove Valuable When Calculating Profit and Loss.

In making a record of the farm business, the item of labor income cannot be determined accurately without some system of accounting. Some farmers will require accounts showing the amounts expended for labor, others on the amount paid for feed, and still others on the amount received for crops sold. A memorandum of such items will prove valuable when the time comes to calculate the year's business. The matter of farm accounting, according to the specialists who have studied the problem for the United States Department of Agriculture, is not dependent upon any particular form or blank book—the real secret of success lies in knowing what accounts to keep and how to make use of them. Farmer's Bulletin 661 suggests the sort of accounts most needed.

RULE FOR BORROWING MONEY

Farmer Should Make Sure That Purpose Will Return Greater Return Than the Debt.

Farm credit is a good agency in the hands of those farmers who know how to use it, but it is a dangerous element of farm business if its nature and purpose is not fully understood. An unproductive enterprise is not a safe basis on which to borrow money under any conditions. It is more important that the enterprise shall be productive than that the rate of interest at which one can borrow money be high or low. Farm-credit specialists of the United States Department of Agriculture lay down one essential rule to be followed by the farmer who proposes to borrow money: Make sure that the purpose for which the borrowed money is to be used will produce a return greater than is needed to pay the debt.

HAD BRIEF PERIOD OF POWER

Two Men Other Than Those Chosen by the People Have Been Country's Chief Executive.

The United States has had just one "President for a day" in John Gaillard of South Carolina—in 1821. Millard Fillmore has the distinction of having been President for two hours, until Zachary Taylor took the reins of office. His biographers erroneously claim that David A. Atchison, senator from Missouri, was "acting President" on March 4, 1849. Thomas White Ferry, senator from Michigan, in 1877, just missed being "President for a day." It was the falling of March 4 on Sunday that occasioned these makeshifts.

The official records show that twice—in 1849 and again in 1877—this country was for 24 hours without a legally qualified person to perform the services of President of the United States. It is a matter of history that President-elect Taylor did not arrive in Washington until the morning of March 5, but fortunately nothing happened to call for the speedy action of a chief executive. Senator Ferry's term ended with that of Grant on March 3, 1877, and he was not sworn in again until March 5, otherwise he might have shared honors with Senator Gaillard. As it was, the United States was again without a head for [illegible] hours.

TEMPLES IN DEEP JUNGLES

Burmese Buildings So Ancient They Seem to Have Been Forgotten by Father Time.

In the heart of the jungle in Burma, where the tiger and the lizard keep guard, and herds of wild elephants roam smashing through the undergrowth you sometimes come upon sights that make you doubt you are on earth. You may break through cordons of vine and thorn and stumble upon crumbling temples, ancient of days, so ancient—as time goes in the moist tropics—that neighboring villagers cannot tell you who built them there nor when. Some are vegetation-covered heaps of rounded bricks; some preserve the changeless traditional form; bell-shaped, with lofty pinnacle surmounting a basal tower—tottering, but untumbled. No trace of road may lead to them, no remains of old villages nearby.

"Old, unhappy, far-off things, and battles long ago" may have devastated their sites and driven their people like chaff before the storm. Once their spires were surmounted by glittering caps of purest gold; their corners watched over by idols of jeweled eyes and awesome mien; carving relieved their snow-white slopes—now, only romance hovers there, romance and [illegible]—Christian Science [illegible]

MANY BILLS GO THROUGH

Measures Making Women Liable for Jury Duty Passed—Highway Administration Bill Signed.

St. Paul—Women will be liable for jury service according to the three bills passed and which are now before Governor Preus for his signature.

These three were among a dozen measures of importance to reach final action in an all day session of the two houses.

Other bills passed were as follows:

Amendment to soldiers' bonus act, passed by the senate but with amendments in which the house refused to concur.

Revision of school aid law, passed by the senate but radically amended, so the house is certain to ask for a conference.

Reorganization of state securities commission, senate bill passed by the house, creating a new commission of three members.

Creating a secretary to the state pardon board at $3,000 a year; senate bill passed by the house.

New mineral lease act permitting development of state owned mineral properties; senate bill passed by the house.

New district judge for Hennepin county; repassed by the house with senate amendment.

Reorganizing the University hospital and health service and correlating it with county hospitals; senate bill passed by the house.

Auxiliary court with five special judges created to clean up 10,000 forest fire claims against railroads; senate bill passed by house.

State department appropriation bill, carrying $6,500,000 in appropriations, agreed to by conference committee and repassed in both houses.

Bill to eliminate "death trap" bridges over railroad tracks, giving the state railroad and warehouse commission power to order new bridges; senate bill passed by the house.

Bill for payment of state employees twice a month.

Governor Signs Bills.

There were other developments on road legislation. Governor J. A. O. Preus signed the highway administration bill in front of a movie camera with highway department officials as witnesses.

Governor Preus also signed a bill by Senator Henry N. Benson, providing for party conventions in advance of the primaries, to indorse candidates for state office and congress, and adopt platforms.

Hospital Bill Up to Governor.

Bills of application to Minneapolis and Hennepin county are practically cleaned up. The senate committee on cities, pleading that the measure had come up too late, killed the bill authorizing the twin cities and the University of Minnesota to equip an electric power plant at the high dam, in case the government agrees to a lease.

The University general hospital bill, passed by the house and now up to the governor, provides that counties hereafter may send patients to the hospital but shall pay half the cost of their care. It unifies the hospital, the dispensary and the university health service, and gives county hospitals and sanatoriums the benefit of association with the university hospital system.

The state department appropriation bill, as agreed to in conference and repassed by both houses, increases some of the allowances made by the house. Notable is an increase of $15,000 a year in the game and fish department fund, to be used for patrolling game refuges.

House for "U" Track Removal.

The house passed by unanimous vote the bill providing for removal of the Northern Pacific tracks from the University of Minnesota campus. The bill amends the building program law of 1919 to provide that the money necessary for track removal shall be taken from proceeds of certificates of indebtedness sold for building purposes.

The bill was amended to provide that money to equip university buildings also may be taken from this fund. This is with the understanding that only $200,000 will be used in the next two years for equipment purposes.

The bill also speeds up the building program so that $1,120,000 a year will be available for building equipment and track removal. The bill has yet to pass the senate.

Constitutional Amendment Bill Passed.

Voters of the state will have an opportunity to ballot on a constitutional amendment providing an occupational tax on iron and other ore production at the next general election. The senate adopted, 49 to 13, the bill already passed by the house.

Auto Tax Figure Agreed Upon.

Two per cent of the first cost of an automobile will be the basis of the new state license tax for benefit of the road fund. This figure was agreed upon by the conference committee, the senators yielding their amendment increasing the tax to 2¼ per cent. The compromise increases trailers from 1 to 2 per cent, and trucks also are at that figure, making all new motor vehicles pay an annual tax of 2 per cent on the factory cost. The bill allows 25 per cent off for depreciation after the third year, and 50 per cent after the fifth of a car's life.

Act Changes Control.

Municipalities relinquish absolute control over street railway under the measure to which Governor Preus appended his signature.

The bill allows all street railway companies to surrender existing franchises and in return take indeterminate permits.

The companies, after doing so, become subject to regulation as to their fares by the state railroad and warehouse commission and the district court. In other respects the cities will control, making regulations as to service, and extensions, except that new securities cannot be issued without approval of the state commission.

$33,500,000 for State Expense.

Appropriations by the Minnesota legislature for the coming two years will total between $33,500,000 and $34,000,000, it was estimated by managers of the appropriation bills. This represents a cut of more than $9,000,000 from the amounts requested by different departments and institutions.

In spite of the growing needs of the state and the higher costs of maintaining institutions, the total allowed this year will not exceed the appropriations made two years ago. The total then, including amounts allowed in the extra session, was about $33,000,000.

All the appropriation bills are subject to change but the approximate totals can be determined very closely today. They will run about as follows:

Educational	$16,000,000
State departments	6,500,000
State institutions	7,700,000
Semi-state activities	3,000,000
Claims	500,000

The last two bills have not been framed by either committee and only roughly are estimated.

The senate finance committee appointed a sub-committee of five to pass on the University of Minnesota requests.

Tax Bill Becomes Law.

After a fifteen-year battle the advocates of tonnage tax won out when Governor Preus appended his signature to the mine tax bill recently.

The chief executive, still in bed recovering from an attack of influenza, affixed his signature to the measure as soon as it reached him.

The fight for increased taxation of iron ore properties in northern Minnesota, waged in political campaigns and Legislatures for the past 15 years, now will be transferred to the courts.

Clifford L. Hilton, attorney general, told members of the House committee on taxes some time ago that if the bill passed Minnesota would have on its hands "one of the biggest lawsuits in the history of the state."

There was rejoicing in the ranks of those who have long been advocating a tonnage tax. Most of these advocates admitted that the big court battle would now start. But they expressed satisfaction that the matter had been settled so far as the legislature and the governor were concerned.

Agricultural Bills Passed.

Farmer senators opposed an amendment to the farm bureau bill offered by Senator Magnus Johnson, Nonpartisan league leader, which would have withheld state aid from farm bureaus unless all their officers were farmers. The amendment would have prevented businessmen from co-operation in farm bureau work. The amendment was lost, 10 to 38. The bill then was passed, increasing state allowances for the farm bureau organizations. In all, 12 agricultural bills were passed on a ment to the farm bureau bill offered by cluded the new cold storage act, the Serline bill prohibiting use of the word "butter" in advertising butter substitutes, and the Wilkinson bill for enforcement of the act regulating trading in grain futures. The senate also passed the bill for licensing architects, engineers and surveyors, and the bill authorizing five additional auxiliary judges to settle the northern Minnesota fire claims against railroads.

Prohibition Measures Pass.

Three prohibition bills, passed by the house, were passed by the senate on special orders by overwhelming majorities. Only one of the bills, that adding new teeth to the state enforcement law, was amended. Amendments adopted provide that the act shall take effect June 1st, and strike out the provision that private citizens as well as those charged with the enforcement of the law, can bring action for the removal of officials for nonfeasance or malfeasance. The second bill passed makes the law regarding transportation of liquor conform to the Volstead prohibition measure. The third permits local government units to make ordinances on prohibition enforcement consistent with state and federal laws.

Fixing Expenditure Limit.

In order to curb extravagant expenditures of villages and cities on the iron ranges of Minnesota, 23 members of the house of representatives, with the consent of Governor Preus, introduced a bill fixing definite limitations.

Within a few hours after the measure had been introduced, the house committee on taxes met and recommended it for immediate passage, despite vigorous protests.

The bill is sponsored largely by men who were responsible for passing the so-called tonnage tax bill.

The proposed measure fixes a limit of expenditures for local purposes of $50 per capita and a limit for school purposes of $40 per capita. It further provides that tax levies for the purpose of caring for outstanding indebtedness is to be permitted.

There is no question about there being a widespread sentiment in the legislature for carbing expenditures for local purposes on the iron ranges. For years legislators from other sections have looked askance at the pace set by the cities and villages in the iron section.

At the meeting of the house and

The Best Laid Plans

By JESSIE DOUGLAS

(©, 1921, by McClure Newspaper Syndicate.)

"There are just three things that I can do to perfection," Molly Monroe said gravely, "scramble eggs, flirt, and arrange flowers."

"I'm quite sure you're right," John Adams answered. "You're right about most things."

He stood up suddenly and the laughter went out of Molly's red-brown eyes and she opened her lips to say, "You're not going?" but she closed them again as John looked at her with his mouth rather hard and unpleasantly firm and his eyes that held no ray of laughter said: "Good-night."

"Good-night," she answered.

He did not offer his hand and she watched him go out of the room and out of the house without moving. But when she was sure that he had gone she flung herself down among the pillows and buried her red-brown head into their soft depths.

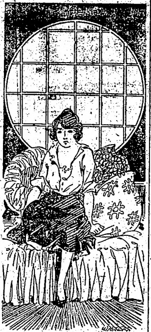
He wasn't coming back! She knew it. For three months she had provoked him and teased him and laughed at him, and all because she knew the moment she ceased she would begin to do something else, and John Adams would know.

He had seemed to like it all at first. He had laughed and teased back until on the sudden he changed. He had an odd way of looking at Molly, and then dropping his eyes. And Molly had been cold with terror one moment and thrilling with joy the next.

All because a young man with straight brown hair and a pair of steady blue eyes and a mouth that was clean and kind had a certain way of looking at her.

And then tonight he had said: "I wonder if a girl would marry a man if she knew she had to live very simply, do her own cooking and keep house herself?" He had fumbled and grown darkly red, and Molly had answered:

"I'm sure most girls would love to do that sort of thing, but there are just three things that I can do to perfection—scramble eggs and flirt and arrange flowers!"



Instead, She Sat Straight Up.

He had taken it the wrong way, of course, and had gone—he thought she had been laughing at him all the time, and this was her way of showing it.

"Oh, why did I ever have such a troublesome tongue in my head!" Molly groaned. "It's done bad enough things to me before, but look what it's done now."

Although she was in the very depths of despair she did not give way to tears. Of what use are tears when they only redden their nose and make you worse off than before?

Instead, she sat straight up among her pillows and decided on a course of action.

Several minutes later she had taken off her frilly blouse and her silk skirt. She had slipped on an enveloping gingham apron of such a delectable pink that it made housework almost fun, and she had run down the back stairs and thrust open the kitchen door and fallen to work.

Daddy was coming home from that tiresome board meeting, and with him those three men, and she knew what they would like as well as anything they could eat.

Coffee that bubbled in the blue enamel pot and biscuits that were beaten up in a yellow bowl and put in deep iron pans, and oysters with a cream sauce steaming hot with just the hint of a lemon in it!

When she heard her father's key in the door, she called: "I hope you all will eat a little something," and she [illegible]

she felt very tired, after all the emotions of the evening. Molly saw with surprise that it was only ten o'clock. And she had thought it must be midnight!

But what was she going to do? She couldn't write to John Adams, he would be just stiff-necked enough to—oh, she couldn't write him. Besides, what could she say? "That she did know a girl who would keep house for a man and cook and live simply, and that her name was Molly Monroe, and her address 74 West street?"

She scouted the idea!

John Adams was proud; she knew he would never let any girl laugh at him—besides he would always believe just what she had said, that scrambling eggs was the extent of her knowledge, and flirting was what she had been doing the last three months—instead of falling in love.

But it was not until midnight that she hit on the scheme that was to smooth the rough path of her heart's desire.

John Adams boarded with the crochety Miss Porter. And Molly found herself more and more cultivating Miss Porter. At first she just dropped in, then she had a cup of tea, and at last went so far as to exchange recipes on cake. Not until she had known her for a week did Molly Monroe confide what she wished to do. "If Miss Porter would let her get dinner some night, one of those nights when Miss Porter was going to the Ladies' Aid—she, Molly, would be so glad! Mr. Adams would never know the difference, she would just lay the things on the table and ring the bell as Miss Porter always did."

Very meekly Miss Porter acquiesced. [illegible]

[illegible] something that has been planned to the last detail!

Such a dinner as she would get! She had bought the plump capon herself, and the vegetables, too, were hers. Miss Porter was only to supply the odds and ends, the flour and the butter and all the seasonings.

By five o'clock everything was getting along nicely. Molly was already planning the sentences she would say when John Adams cried: "But I didn't know you could cook! And where is Miss Porter?"

It seemed at first as though the very top of her finger had been cut off, and as she gave a sudden startled cry, the swinging door was thrust open and she found John Adams holding the finger under the running water, and saying: "There, Molly, sweetheart, does it hurt very much? Here, I'll bind it up with my handkerchief!"

But Molly looked at him aghast. "But what about my dinner—all my lovely dinner; I'll never be able to cook it now—"

"Let the beastly old dinner go. I'm not hungry; we'll sit out here and eat some milk and pie. You are all right, Molly?"

"And what are you doing here?" Molly demanded suddenly. "How did you come home at this time?"

But he caught her rebellious little chin and tilted it back and kissed her squarely on the lips.

"What does it all matter, when I have you—"

"But how—"

"Miss Porter told me two days ago what you were going to do, and I got the afternoon off to be here, and, Molly, I wonder if you know how much I love you?" he asked.

And Molly with her red-brown head against his coat didn't care if the best-laid plans sometimes go astray.

LAND CO.

DIED

Word was received here yesterday of the death at 11:30 of Abraham W. Dolson at Thief River Falls. Mr. Dolson was in town Tuesday on his way to Thief River, apparently in his usual health. He had had heart trouble for several years and had been informed that he might expect sudden death at any time. He was 75 years of age and a veteran of the civil war. He was one of the old timers here, having homesteaded near Thief River Falls about 35 years ago. He leaves one daughter, Mrs. Curtis Smith, and one son, Charles Dolson.

Mrs. Martinus Johnson's father died Monday at his home north of town, of cancer in the neck. The old gentleman had been a sufferer for some time and the past two years had made his home with his daughter, Mrs. Martinus Johnson. Funeral services were held Wednesday and interment was made in the Germantown cemetery.

The six months old baby boy of C. A. Liedberg died Tuesday evening. The funeral will be held Sunday at Germantown.

Community Club Meeting

The regular meeting of the Community club was held last Friday evening in the school house. A large number of people were present, the auditorium being packed to capacity. The program rendered was well received by the audience and much credit is due the performers. Detailed program follows:

Several Selections ....Goodridge Band
An Irish Jig........................Donald Stein and Stuart Ferdinandsen
Selection ....Girls' Glee Club
Address, Supt. W. A. Ziegler, T. R. F.
Selection ....Quartette, Miss Argall, Miss Giefer, Mr. Nystul and Rev. Hanson

Supt. Ziegler's address was interesting and instructive throughout. He opened his discussion with a general talk on the advantages derived from co-operation and general get together meetings, where the people of a community meet to discuss problems of mutual interest. Later, he dwelt at considerable length on the progress in the public schools, referring particularly to the scientific methods of measuring a person's intelligence and ability. After the program a short business session followed. Resolutions were adopted, but we did not obtain them in time for publication this week.

DEFECTIVE PAGE

THE GOODRIDGE BANNER

VOLUME XV, No. 18. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL 29, 1921 $1.50 PER YEAR

The New Law for State Aid for Schools

The main features of the new State Aid law are: The law becomes operative for the school year 1921-22. Schools are classified and aided as follows:

Graded elementary, four or more thachers. If 6 year course, $300; if 8 year course, $400.

Ungraded elementary, one or more teachers, but not ranked as graded; with first grade teacher $150, and with second grade $100, with eight months' term; three-fourths amount with seven months; superior, under standards set by state board, not to exceed $125 additional.

Four year high school, 4 years beyond eight elementary grades $1,000.

High school department, at least 2 years beyond eight elementary grades, $400.

Junior high school, 3 year course beyond six elementary grades, $300.

Senior high school, 3 year course beyond Junior high school, $300.

Consolidated schools are classified and receive aid under above headings.

Special industrial departments:
- Agriculture, $1,000.
- General Industrial Training, $600.
- Home Training, $600.
- Commercial, $505.

High school tuition, $7.00 per month, plus apportionment. Tuition to be deducted by State department from special aid—not apportionment—due to district from which pupil comes, should the tax rate of such district be less than 4 mills.

Consolidated Schools. Special consolidated aid discontinued, Transportation aid under rates determined by State board, to $1,000 [illegible] Building aid, 40 per cent, not to exceed $6,000. A change has been made relaxing somewhat the special requirements on consolidated schools.

Library aid for purchase of books, $20 per teacher instead of $10 at present; [illegible] $40 per building, [illegible] at present.

To assist school districts with high tax levy. [illegible] school district whose tax levy for maintenance lies between 20 and 32 mills the state shall pay as supplemental aid one-third of the excess above 20 mills. If the tax levy for maintenance exceeds 32 mills, then, in addition to the above amount, the state shall pay as supplemental aid one-half of such excess above 32 mills, provided that no such district shall receive supplemental aid if a tax levy of 20 mills in such district will yield the equivalent of $100 for each pupil enrolled in the public schools of such district; and provided also that no school district shall receive supplemental aid equivalent to more than $200 for each elementary teacher employed and $250 for each high school or special teacher employed. In school districts maintaining only ungraded elementary schools if a 20 mill tax levy does not raise the equivalent of $600 for each teacher employed for at least 7 months during the school year, then the state board of education at its discretion may grant to such school district an amount, which together with the proceeds of a 20 mill tax levy, will give such school district the equivalent of $600 for each teacher employed as herein provided, but such state aid shall in no case exceed the equivalent of $200 for each such teacher employed, but shall be in addition to all other state aid, including supplemental aid as otherwise provided in this section.

The change in the law will mean to the Goodridge school from $700 to $1,000 additional flat aid, besides what it may be entitled to from the special supplemental aid—one third of the excess of the maintenance tax levy above 20 mills.

Resolutions

Adopted at the Commenity club meeting last week.

1. That the Community club will continue to co-operate and futher the general interests and welfure of the community at large.

2. That if arrangements are made for a Tri-County Fair this year, the Community club will give its undivided support to the success of the undertaking.

3. That the Community club give its loyal support to provide an agricultural exhibit from Eastern Pennington County at the next Pennington County Fair.

4. That the Community club will be the first to give their support to the proposed plan of arranging for a Pennington county booth at the next Minnesota state fair.

5. That the Community club considers the existence of a band an asset to the village and community and expresses its appreciation of the good will the members of the band have shown in community activities during the past year.

6. That the Community club realizes the social and edubational value of a Lyceum course, and in view of the fact that few other entertainments of a like character exist, we suggest that the business men of Goodridge, following the precedent of other villages, procure and maintain a course for the coming year.

7. That the Community club appreciat the work of the Farm Bureau and County Agent J. J. McCann in providing a Farmers' Short course and for his general services to this section of the county throughout the year.

8. That the Community club recognizes and commends Mr. A. C. Tvedt the president of the Goodridge Commercial club, in his untiring efforts to establish a state highway extending from Oklee to Roseau and that the Community club will do everything in its power to promote this cause.

9. That the Community club co-operate with the local board of health in arranging for a general "clean-up" day in the village of Goodridge.

New Game And Fish Laws.

The opening day of the fishing season in Minnesota, formerly May 1, has been postponed 15 days.

Angling season for all fish exept trout and black bass will open May 15.

Trout and bass season is unchanged.

Size limit on crappies is increased from 6 to 7 inches in length.

Not more than 30 crappies are to be taken in one day.

The deer and moose season has been shortened 11 days—Nov. 10 to Nov. 20 inclusive.

The new law relatives to prairie chickens provides for an open season from Sept. 16 to Oct. 1 this year.

The law provides for open seasons on alternate years, so there will be no hunting for this game next year.

The bag limit is to be nine birds a day and 18 birds for each hunter for the season. Dogs are permitted in prairie chicken hunting.

Auto Listing Law in Effect May 15

Auto owners will be furnished with blank forms for registering their machines before May 15, when the new law becomes effective.

These forms may be obtained at banks, county registers of deees offices and at the capitol in St. Paul.

Rate books, factory lists and other information nece-sary to the auto owner will be supplied.

Applications should be in by May 15 and copies of certificates of title must accompany applications.

Applicants will be given a recdipt upon aproval of the application and will be permitted to drive their motor vehicles upon the 1918-20 license plates until the new plates can be issued.

The rate for automobiles, trucks, tractors, trailers, and semi-trailers is 2 per cent of the list price at the factory with a $12 minimum for automobiles weighing less than 2,000 pounds and a $15 minimum for automobiles weighing more than 2,000 pounds and for trucks under two ton carrying capacity.

For trucks whose carrying capacity is more than two tons and less than four tons, the minimum is $30 and for all trucks of over four tons carrying capacity the minimum is $50. The minimum for trailers and semi-trailers is $2.

The value of the vehicle during the fourth and fifth years of its life is placed at 25 per cent less than the factory list price. After the fifth year the valuation will be 50 per cent of the factory price.

GOOD INCUBATION HINTS

Follow the manufacturer's directions in setting up and operating an incubator.

See that the incubator runs steadily at the desired temperature before filling it with eggs. Do not add fresh eggs to a tray containing those which are undergoing incubation.

Turn the eggs twice daily after the second and until the nineteenth day. Turn them before caring for the lamps. Cool them once daily, according to the weather, during this period.

Attend to the machine carefully at regular hours.

Keep the lamp and wick clean.

Test the eggs on the seventh and fourteenth days.

Do not open the machine after the eighteenth day until the chickens are hatched.

Recodification of the state educational and social aid laws.

Enactment of an elaborate program of farmers' legislation.

Per capita tax limitation for local and school purposes, affecting particularly communities on the Iron Range.

Increasing the membership of the Board of Control to five members to permit the appointment of [illegible]

[illegible] of laws making women [illegible] serve as jurors.

[illegible] more teeth in the [illegible] enforcement acts, [illegible] to permit the seizure [illegible] liquor.

[illegible] of a Constitutional [illegible] an occupation tax.

[illegible] of a Constitutional [illegible] providing for rural [illegible]

[illegible] of a state securities [illegible]

[illegible] of the military [illegible]

[illegible] of the laws relating to [illegible] and foods.

[illegible] of the laws relating [illegible]

[illegible] amendments to the [illegible] law.

St. Paul—Among the important bills passed by the Minnesota 1921 Legislature the foregoing is a brief summary. Two of the laws enacted, the tonnage tax and the "farmers program," formed principal issues in the campaign. A short review of the important legislation is as follows:

Tonnage Tax.

After three months of discussion, a law was passed providing for a 6 per cent tax on the occupation of mining. The attorney-general had ruled that the original tonnage tax bills should be so redrafted as to provide for an occupation tax. Considerable opposition to a tax, based on the occupational theory, developed, but it was not sufficient to stem the tide for some sort of a tax on the iron mining industry.

Enactment of the occupation tax on mining, the so-called tonnage tax substitute, means that the issue has now been transferred to the courts of the land. It is certain that the mining companies will wage a bitter legal battle in testing the validity of the law.

Constitutional Tax Amendment.

The people of Minnesota will have an opportunity to pass on the theory of an occupation tax on mining. Both houses passed the bill to submit a constitutional amendment on the subject to the voters at the next election.

Limiting Tax Expenditure.

Following the signing of the so-called tonnage tax measure, Governor Preus got behind a bill to limit the expenditures on the Iron Ranges. A bill finally passed both Houses, placing a limitation of $100 per capita for local purposes and $60 per capita for school purposes. The fight on the per capita tax bill, coming in the closing hours of the session, was one of the most spectacular and acrimonious of the entire 90 days. The original bill provided for a limitation of $50 for local purposes and $40 for schools. The House made the amendments to increase these amounts.

The Farmers Program.

Legislation affecting the farmers of Minnesota took the lead from the very start. As result an agricultural program of far-reaching importance was enacted into law, the outstanding features of which are:

The co-operation law of 1919 was extended to permit the Federation of local co-operative associations into large buying and selling units.

The law of 1919, establishing the state Department of Agriculture, has been so amended as to give that department supervision over all dealers in farm products outside of hay, grain and livestock.

Anti-Futures Law.

An anti-futures law was passed, defining "gambling contracts."

A law to prevent unfair discrimination in the price paid for milk by wholesale dealers protects the local creamery or cheese factory from price cutting competition.

A law, establishing an auditing division within the state Department of Agriculture.

Additional funds are provided for the completion of the state test mill for the purpose of testing the breadmaking qualities of Minnesota wheat.

Rural Credits.

[illegible] an act passed, the matter of [illegible] state rural credits will be submitted to the voters at the next general election.

Provision is made for the organization of land mortgage associations.

Counties are permitted, under the Bissette law, to appropriate money for the clearing of lands that are agricultural in character.

A resolution passed by both the House and Senate provides that unless the desired changes in the federal grain standards be granted by the Bureau of Markets at Washington, the state Board of Grain Appeals is required to re-establish Minnesota grades based upon the standards in vogue prior to the passage of the Federal Grain Standards act.

Highway Legislation.

The state road tax on motor vehicles was fixed at 2 per cent of the list price of a car. The House originally fixed the tax at 1.8 per cent, and the Senate at 2.25 per cent. The 2 per cent tax was the compromise. This [illegible] provides for a tax of 2 per cent of the list price of a car for the first [illegible] years. The tax for the fourth and fifth years in the life of a car is fixed at 2 per cent of [illegible] of the list price. After [illegible] year the value of a car is figured at one-half of the list price. The minimum tax under this law is $12 and it is said, that the average tax will be approximately $18.

Under the terms of the third big bill in the highway program, counties which had the foresight to develop the trunk highways included in the Babcock system will be reimbursed out of the highway fund. Approximately $23,000,000 was spent in this manner by 28 counties.

Workmen's Compensation.

A series of laws was passed covering this whole subject. The main one provides for the creation of an industrial commission, made up of three members, which will not only administer the compensation insurance law, but will take over supervision of the Labor department and all its branches.

Pre-Primary Conventions.

A law was passed during the session, permitting political parties to hold pre-primary conventions, for the purpose of endorsing candidates for state and congressional offices.

Only one other law affecting elections was passed. It prohibits a candidate defeated at the primaries from filing again for the [illegible] office as an independent.

Public Utilities.

Street railway systems in Minnesota are placed under control of the State Railroad and Warehouse commission so far as the making of rates and valuation are concerned.

The law gives to city councils complete control over service, extensions, and routing, and makes the local governing bodies parties to the valuation porceedings before the state commission. The state commission, however, is given exclusive and initial right to regulate rates, subject to appeal to the courts.

Taxing Telephone Earnings.

Gross earnings of telephone companies, now taxed at 3 per cent, will be taxed at 4 per cent, under the law.

Women Jurors.

Three bills, having for their purpose the making of women eligible as jurors, were passed. The first amends the law, specifying the qualifications for jurors to include the words "men or women, or both." The second gives the district court the power to excuse women from jury service at its discretion. The third provides for the appointment of women bailiffs in all cases where there are women on juries.

Maternity Hospitals.

A bill permitting cities to take advantage of the so-called Shepard-Towner bill appropriating money for maternity and infancy work was passed.

Street Trades Law.

The so-called street trades bill, affecting newsboys, was sponsored by women's organizations, particularly the League of Women Voters, so it can be included under the general head of women's bills.

Tax Commissions.

Both House and Senate authorized the appointment of interim commissions to study the whole question of taxation and revenues in Minnesota.

City Measures.

During the closing hours of the session both branches passed a bill to permit the state and the city of Minneapolis to exchange certain pieces of property in order to provide a site for an Armory-Auditorium adjacent to the grounds of the Dunwoody Industrial institute.

Two laws having to do with the charter were passed. The first, termed the charter-enabling act, was practically a repassage of the original charter bill, in order to cure all possible defects. The second, known as the charter curative act, defines more clearly the purposes of the charter. It specifically includes all "special and general laws" as being included under the purposes of the charter. It also includes all moneys and credits in the city valuation on which bonded indebtedness may be made to the amount of 10 per cent.

The bills affecting Minneapolis and Hennepin county were restricted, however, due largely to the stand taken by delegations in both senate and house against the consideration of matters which could be cared for under the Home Rule charter.

A law to permit the sale of Elwell bonds at less than par was passed in order that Minneapolis might market approximately $1,200,000 worth of bonds for public improvements.

The Legislature authorized the issuance of $750,000 worth of bonds for an [illegible] to the tuberculosis sanatorium [illegible] Lake.

SUREST WAY TO HATCH TURKEYS

[illegible] if She Is Given [illegible] Management and [illegible] Free From Vermin.

[illegible]

[illegible] Out [illegible] Cov- [illegible] Straw [illegible] Are [illegible] Is Imp[illegible]

([illegible] the United States Department of Agriculture.)

[illegible] can be used [illegible] eggs [illegible] United States [illegible] poultry [illegible] the turkey hen [illegible] management. [illegible] and will [illegible] so there [illegible] danger of [illegible] from [illegible] the size of [illegible]

Nests for setting turkey and chicken hens are best made on the ground by hollowing out a little earth, so the center is deep enough to keep the eggs from rolling out of the nest. [illegible] covering of clean straw or hay can then be used to prevent the eggs from being directly on the ground, and a large, roomy coop should be placed over the nest to keep the hen from being disturbed. When a number of hens are to be set, a long row of nests can easily be made on the ground, separating them with board partitions. If this is done care must be taken to see that when the hens come off the nests each returns to the right one instead of crowding into a nest with another hen and leaving some of the eggs to become chilled. With only a few hens it is better to set them some distance apart, as they will then require less attention.

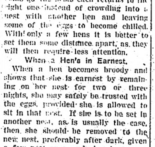
When a Hen's in Earnest.

When a hen becomes broody and shows that she is earnest by remaining on her nest for two or three nights, she may safely be trusted with the eggs, provided she is allowed to sit in that nest. If she is to be set in another nest, as is usually the case, then she should be removed to the new nest, preferably after dark, given a few nest eggs, and shut in to prevent her from returning to the old one. If she sits quietly on the nest eggs she should be taken off on the evening of the following day, and the eggs to be incubated placed in the nest. On being freed, she probably will return to her old nest; if so, she should be carried back and set quietly on the eggs. She should be handled in this manner until on being let off she returns to the new nest rather than to the old one. It sometimes takes only two or three days, and seldom more than a week, to break a hen from returning to her old nest. Turkey hens do not ordinarily come off for feed and water more than once every two or three days, but when [illegible] she should [illegible] Occasionally [illegible] does not come off [illegible] such case she should be taken [illegible] a day, as otherwise she [illegible] the nest. [illegible] coming off her nest the first [illegible] turkey hen does is to stretch [illegible] flaps her wings for a few [illegible] and then she often takes a [illegible] flies for a short distance. Exercise of this sort helps [illegible] to keep a sitting hen in good [illegible] and for this reason it is not [illegible] confine her to a small space. [illegible] bath [illegible] enjoyed by sitting hens and helps to keep them [illegible] vermin. Whole corn is a [illegible] and fresh water and grit [illegible] always be accessible.

[illegible] great annoyance to sitting hens and are one of the worst [illegible] of young poults. To prevent [illegible] getting a start, the hen should [illegible] dusted thoroughly with sodium [illegible] or some good lice powder before she is placed on the nest. The [illegible] material should be kept clean, and if the eggs become dirty they should be washed with a soft cloth dipped in lukewarm water. Just before the poults are to hatch, the old nesting material should be replaced with clean straw.

Incubation Period.

The incubation period of turkey eggs is 28 days. The first egg is usually pipped during the first part of the twenty-seventh day, the first poult hatched by the middle of that day, and the hatch completed at the end of 28 days, although in extreme cases all the poults are not hatched before the end of 30 days. Turkey eggs are tested for fertility and for dead germs, as a rule, on the tenth and twentieth days.



Large Roomy Coop Should Be Used Over Turkey Hen While She Is Sitting.

WART DISEASE HITS ROOTS OF TOMATOES

Injury Probably Does Not Reduce Yield of Fruit.

Affected Plants Serve to Carry Ailment Over From Year to Year in Absence of Potatoes—Other Plants Suspected.

(Prepared by the United States Department of Agriculture.)

Recent investigations made by the United States Department of Agriculture on the control of the potato wart disease, a European trouble found in this country in 1918, disclosed the fact that this disease also attacks tomatoes. Out of 28 varieties of tomatoes planted in wart-infested gardens in eastern Pennsylvania in 1920, 26 were found to be susceptible to the disease.

Wart is a very serious disease of potatoes, causing practically a total loss in badly infested soil. It attacks the tubers, causing warty outgrowths, which may practically cover or consume the potatoes. Its present known occurrence in the United States is confined to gardens in a few mining villages in Pennsylvania, West Virginia and Maryland, from which its spread is restricted by state quarantine laws. The disease attacks only the stems and roots of the tomato plant, causing small warts; it probably does not reduce the yield of fruit.

There Is Much Satisfaction in Producing Tomatoes of the Finest Quality.

The importance of the discovery of the susceptibility of tomatoes to potato wart lies in the fact that affected tomato plants will serve to carry the disease over from year to year in the absence of potatoes, and to introduce it into new localities through the transplanting of tomato seedlings grown in infested soil. It is not yet known definitely whether all varieties of tomatoes are susceptible to the wart disease, but it is feared that such may be the case. Other plants belonging to the potato family are suspected of being susceptible to wart, and some of these have been tested, but with inconclusive results. These tests will be repeated.

WE USE THE
DE LAVAL
Cream Separator

Ask your neighbor
about the
De Laval Separator

THERE are probably a number of the **2,500,000 and more** users of De Laval Cream Separators right in your neighborhood. You can find them by the signs nailed on the fence or barn, reading "We use the De Laval Cream Separator."

If you skim milk by the gravity method or with any other separator, it will pay you to talk to some of these De Laval Users. Ask them if the De Laval gets more cream, turns easier and requires less attention. Ask them particularly about the De Laval wearing qualities.

For forty years the De Laval Company have led in cream separator improvements. There must be a reason for the universal satisfaction which the De Laval gives.

**Ask your neighbor about the De Laval
Then stop in and see us**

**Sooner or later you will buy a
De Laval**

A Loving Cup

By MARTHA M. WILLIAMS

(©, 1921, by McClure Newspaper Syndicate.)

Mrs. Gleeson sat down with a bang. Few women are equal to that, but she was, at many points, out of common. Whatever she did gave an impression of noise and finality. Her husband was certainly of those classed as ciphers on the wrong side of significant figures.

She was tired—dead tired—yet sat bolt upright, going on with the knitting that had occupied her fingers while she made the tour of orchard, garden and barnyard. She had found them, each and several, deserted. That was sufficiently aggravating, but not quite the worst. The Benton boy had fetched a scrawl from her absent husband: "Caught on jury—dunno when I'll be home." Considering that it was mid-October and fine sunshiny weather, with a slue of hard work accumulating, it is plain the lady had reason to be angry.

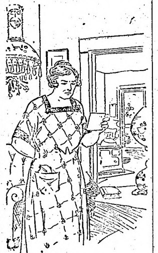
Now, to be very angry and have nobody to quarrel with, breeds a parlous state of mind. Had Jimmy Rand known the situation he would have realized the fact and waited. Instead he burst in, the incarnation of happy love, crying joyously: "Miss Sue, Nan says Yes, and Granny says Yes—now you make it unanimous—we both know good old Pete don't count."

"Indeed! Who says so?" Mrs. Gleeson asked in her most blatant voice. It ought to have warned Jimmy—but he was fairly drunken with happiness, so only giggled: "Why, nobody! I found that out by my lone self about the day I cut eye teeth."

"So. Well, you're due to find out something else," Mrs. Gleeson snapped. "It is that we'd rather see our Nancy dead than married to a horse jockey and a gambler—Stephen and me."

"As I'm neither, that has nothing to do with the case," Jimmy flung back, flushing deeply.

"No. With everything you've got on four hoofs showing at that fool county fair—and you yourself to ride there for money this afternoon?" Mrs. Gleeson blazed out.



She Began to Understand.

"And you the kingpin of it all! That's the reason everybody's work is going undone—so you shiftless, thriftless wasters can have your sport. Sport! Heavenly masters! What sport is it to turn what ought to be decent hard-working folks into an imitation circus!"

"Sorry you take it this way, Miss Sue," Jimmy said humbly, "but we'll work double turn, all of us next week—to catch up for our play-time. If only you'd go once yourself I think you'd understand—"

"When I waste time and money that way—" Mrs. Gleeson began, almost apoplectic.

"But you ought to use your exhibitor's pass—here it is," Jimmy interrupted, thrusting a card into her hand. "Don't ask how you came by it—go see for yourself. It will pay you—in several ways."

With that he dashed away, leaving her quite speechless for a minute. She flung down the card, but took it up almost instantly, pursing her lips, her eyes speculative. She began to understand certain gaps in the farm stock, the disappearance of her fine saddle mare and colt. Then Stephen's staying away all right—this was Saturday—in a flash it came to her that courts usually adjourned over the week-end, even without a fair.

She had been fooled, tricked—the farm hands had gone with the stock—Nan and Granny would be there to see them, also to see Jimmy win first in the riding ring. Suddenly her molten anger turned solid—she would go and confront the tricksters—confound them before the world, and so avenge the insult she was suffering.

CHRIST CHRISTIANSON
Thorhult, Minn.

Around one o'clock that afternoon, black-gowned and heavily veiled, she parked her sedan far down the line, and, after securing, made her way unobtrusively through the crowd. In all her life she had never moved so easily, so silently—It amazed her to find how very smooth was such progress. Way was made for her sympathetically—beside the show ring where cattle were being judged, more than one program was offered her by friendly strange hands. Looking [illegible] behind her ample veil she saw her own name more than once. And even as she scanned the lists the marshal shouted loudly: "General purpose cow, any breed; first prize, Mrs. Susan Gleeson."

In spite of herself she smiled, as equally in spite of herself, half an hour later, she frowned when her pet Jersey heifer, the apple of her eye, won only honorable mention. She thought she saw Stephen at the far side shaking his head, but without waiting to make sure, she slipped away to the grand stand, already fairly crowded, as the horses were coming on.

Here she had to raise her veil; however, she held it in both hands, making a shield of it for her face. A saddle ring was on—as her own Trix went by to halter, with black Moses leading her gently. The creature half turned her head and whinnied softly—not all the veils nor all the crowds could hide from her the mistress she loved so well. And at the whinny something seemed to melt within her mistress—all the rage and hate she had been cherishing became folly of the worst. She flung up her veil and leaned forward, one hand on the rail—and shed tears of joy when Trix won the blue. But to make up for that, the colt she loved even better was unplaced, partly because of bad ring manners. After that she dared not wait for the trots, the riding ring—alone as she was, she did not care to risk the crush of the late-homing crowd.

It was later than usual. Around 10 o'clock Stephen came in, his air a cross betwixt a victorious fighting cock and a man with murder in his soul. Supper; he wanted none—in fact, he had stopped to see Nan and Granny, also he wouldn't trouble her, not for the world, and he had seen to everything about the place before coming, so bed was the thing for them both and a late rising tomorrow.

"Court held mighty late, didn't it?" Mrs. Gleeson asked maliciously. Stephen looked blank, then smiled foolishly, saying, "Jurymen are the obstinatest lot." Whereat his wife smiled a twisted smile, retorting: "Same as married men, I reckon." Then trying to speak sourly: "Did that scallawag Jimmy Rand win the silver cup?"

"Why, how should I know?" Stephen asked aghast.

"Because you stayed to see," his wife countered, running on quickly. "Stephen, I ain't mad at you for but one thing. I expect you to lie to me now and then—all married men do it—but I hope they ain't quite so clumsy as you—"

"Why, Susan; how you talk," Stephen began feebly. Then he stopped short. Susan was laughing as he had not seen her laugh since the day he married her. "You—you must a been there—yet you couldn't!" he went on jerkily.

She wiped her eyes and nodded, saying: "I was there—went all by myself to spy out evil—and found nothing but good. Folks learn how to be kinder and friendlier for getting together—and nobody worse for looking at good dumb beasts. Even they seemed to feel proud of themselves. Maybe Crumple Horn wasn't set up over her blue ribbon, but I know Trix was—nearly as much as I was. Now, tell me quick, did Jimmy Rand give that cup to Nancy?"

"No!" Stephen answered with a crafty smile. "You see, it's a loving cup, and they are coming tomorrow to bring it to you."

Then and there the ice truly broke up. Mrs. Gleeson felt like crying. Instead she said briskly: "After I abused him like a pickpocket. Well, I reckon this is a new sort of firecoals to heap on my head. But I'll leave it to Nancy to pay him for it."

"Well you may," said Stephen, with a broad grin.

BEST TIME TO CUT COWPEAS

Most Desirable Quality of Hay Produced if Cut When Pods Are Full-Grown and Matured.

As a rule cowpeas should not be cut for hay before the pods begin to turn yellow. The best quality is produced and the hay cures most readily if the vines are cut when most of the pods are full grown and a considerable number of them are mature. At that stage of growth none of the best hay varieties will have dropped their leaves and the plants will have practically attained their full growth.

IMPORTANCE OF FARM DIARY

Among Other Things It Will Prevent Paying Same Bill Twice if Record Is Made.

A farm diary may save paying the same bill twice, since it may be used as a record of all credit business done by the farm. Specialists of the United States Department of Agriculture suggest that blank pages in the back of the diary be used for such accounts.

HARDING HITS AT A WORLD LEAGUE

Inaugural Address Declares for Absolute Independence of Action by America.

WANTS UNION FOR COUNSEL

Our Supreme Task, Says New President, Is Resumption of Our Onward, Normal Way, Recognizing the Changed Economic Order—Much Help to Be Expected From the Women.

SALIENT POINTS IN THE INAUGURAL

The recorded progress of our republic, materially and spiritually, in itself proves the wisdom of the inherited policy on non-involvement in old world affairs .... We do not mean to be entangled. We will accept no responsibility except as our own conscience and judgment, in each instance, may determine.

We want to do our part in making offensive warfare so hateful that governments and peoples who resort to it must prove the righteousness of their cause or stand as outlaws before the bar of civilization.

We are ready to associate ourselves with the nations of the world, great and small, for conference, for counsel.

If war is again forced upon us, I earnestly hope a way may be found which will unify our individual and collective strength and consecrate all America, materially and spiritually, body and soul, to national defense.

We can reduce the abnormal expenditures, and we will. We can strike at war taxation, and we must.

Washington, March 4.—President Harding's inaugural address was as follows:

My countrymen—When one surveys the world about him after the great storm, noting the marks of destruction and yet rejoicing in the ruggedness of the things which withstood it, if he is an American he breathes the clarified atmosphere with a strange mingling of regret and new hope. We have seen a world passion spend its fury, but we contemplate our republic unshaken, and hold our civilization secure. Liberty—liberty within the law—and civilization are inseparable, and though both were threatened, we find them now secure, and there comes to Americans the profound assurance that our representative government is the highest expression and surest guaranty of both.

Standing in this presence, mindful of the solemnity of this occasion, feeling the emotions which no one may know until he senses the great weight of responsibility for himself, I must utter my belief in the divine inspiration of the founding fathers. Surely there must have been God's intent in the making of this new world republic. Ours is an organic law which had but one ambiguity and we saw that effaced in a baptism of sacrifice and blood, with union maintained, the nation supreme and its concord inspiring. We have seen the world rivet its hopeful gaze on the great truths on which the founders wrought. We have seen civil, human and religious liberty verified and glorified. In the beginning, the world scoffed at our experiment, today our foundations of political and social belief stand unshaken, a precious inheritance to ourselves, an inspiring example of freedom and civilization to all mankind. Let us express renewed and strengthened devotion, in grateful reverence for the immortal beginning, and utter our confidence in the supreme fulfillment.

Progress Proves Wisdom.

The recorded progress of our republic, materially and spiritually, in itself proves the wisdom of the inherited policy of non-involvement in old world affairs. Confident of our ability to work out our own destiny, and jealously guarding our right to do so, we seek no part in directing the destinies of the old world. We do not mean to be entangled. We will accept no responsibility except as our own conscience and judgment, in each instance, may determine.

Our eyes never will be blind to a developing menace, our ears never deaf to the call of civilization. We recognize the new order in the world, with the closer contacts which progress has wrought. We sense the call of the human heart for fellowship, fraternity and co-operation. We crave fellowship, and harbor no hate. But America, our America, the America builded on the foundation laid by the inspired fathers, can be a party to no permanent military alliance. It can enter into no political commitments nor assume any economic obligations which will subject our decisions to any other than our own authority.

I am sure our own people will not misunderstand, nor the world misconstrue. We have no thought to impede the paths to closer relationship. We wish to promote understanding. We want to do our part in making offensive warfare so hateful that govern- [illegible] must prove the righteousness of their cause or stand as outlaws before the bar of civilization.

Association for Counsel.

We are ready to associate ourselves with the nations of the world, great and small, for conference, for counsel, to seek the expressed views of world opinion, to recommend a way to approximate a disarmament and relieve the crushing burdens of military and naval establishments. We elect to participate in suggesting plans for mediation, conciliation and arbitration, and would gladly join in that expressed conscience of progress which seeks to clarify and write the laws of international relationship, and establish a world court for the disposition of such justiciable questions as nations are agreed to submit thereto. In expressing aspirations, in seeking practical plans, in translating humanity's new concept of righteousness and justice and its hatred of war into recommended action, we are ready most heartily to unite, but every commitment must be made in the exercise of our national sovereignty. Since freedom impelled, and independence inspired, and nationality exalted, a world super-government is contrary to everything we cherish, and can have no sanction by our republic. This is not selfishness, it is sanctity. It is not aloofness, it is security. It is not suspicion of others. It is patriotic adherence to the things which made us what we are.

Today better than ever before we know the aspirations of human kind, and share them. We have come to a new realization of our place in the world and a new appraisal of our nation by the world. The unselfishness of these United States is a thing proven. Our devotion to peace for ourselves and for the world is well established. Our concern for preserved civilization has had its impassioned and heroic expression. There was no American failure to resist the attempted reversion of civilization. There will be no failure today or tomorrow.

Rests on Popular Will.

The success of our popular government rests wholly upon the correct interpretation of the deliberate, intelligent, dependable popular will of America. In a deliberate questioning of a suggested change of national policy, where internationality was to supercede nationality, we turned to a referendum of the American people. There was ample discussion, and there is a republic mandate in manifest understanding.

America is ready to encourage, eager to initiate, anxious to participate in any seemly program likely to lessen the probability of war and promote that brotherhood of mankind which must be God's highest conception of human relationship. Because we cherish ideals of justice and peace, because we appraise international comity and helpful relationship no less highly than any people of the world, we aspire to a high place in the moral leadership of civilization; and we hold a maintained America, the proven republic, the unshaken temple of representative democracy, to be not only an inspiration and example, but the highest agency of strengthening good will and promoting accord on both continents.

Trade Ties Bind Closely.

We must understand the ties of trade bind nations in closest intimacy, and none may receive except as he gives. We have not strengthened ours in accordance with our resources or our genius, notably on our own continent, where a galaxy of republics reflect the glory of new world democracy, but in the new order of finance and trade we mean to promote enlarged activities and seek expanded confidence.

Perhaps we can make no more helpful contribution by example than a republic's capacity to emerge from the wreckage of war. While the world's embittered travail did not leave us devastated lands nor desolated cities, left no gaping wounds, no breast filled with hate, it did involve us in the delirium of expenditures, in expanded currency and credits, in unbalanced industry, in unspeakable waste and disturbed relationships. While it uncovered our portion of hateful selfishness at home, it also revealed the heart of America as sound and fearless and beating in confidence unfailing.

Amid it all we have riveted the gaze of all civilization to the unselfishness and the righteousness of representative democracy where our freedom never has made offensive warfare, never has sought territorial aggrandizement through force, never has turned to the arbitrament of arms until reason has been exhausted. When the governments of the earth shall have established a freedom like our own and shall have sanctioned the pursuit of peace as we have practiced it, I believe the last sorrow and the final sacrifice of international warfare will have been written.

Our Supreme Task.

Our supreme task is the resumption of our onward, normal way. Reconstruction, readjustment, restoration—all these must follow. I would like to hasten them, to lighten the spirit and add to the resolution with which we take up the task. Let me repeat for our nation, we shall give no people just cause to make war upon us, we hold no national prejudices, we entertain no spirit of revenge, we do not hate, we do not covet, we dream of no conquest nor boast of armed prowess.

If, despite this attitude, war is again forced upon us, I earnestly hope a way may be found which will unify our individual and collective strength and consecrate all America, materially and spiritually, body and soul, to national defense. I can vision the ideal republic, where every man and woman is called under the flag, for assignment to duty, for whatever service, military or civic, the individual is best fitted; where we may call to universal service every plant, agency or facility; all in the sublime sacrifice for country, and not one penny of war profit shall inure to the benefit of private individual, corporation or combination, but all above the normal shall flow into the defense chest of the nation. There is something inherently wrong, something out of accord with the ideals of representative democracy, when one portion of our citizenship turns its activities to private gain amid defensive war while another is fighting, sacrificing or dying for national preservation.

Unity of Spirit and Purpose.

Out of such universal service will come a new unity of spirit and purpose, a new confidence and consecration, which would make our defense impregnable, our triumph assured. Then we should have little or no disorganization of our economic, industrial and commercial systems at home, no staggering war debts, no swollen fortunes to flout the sacrifices of our soldiers, no excuse for sedition, no pitiable slackerism, no outrage of treason. Envy and jealousy would have no soil for their menacing development, and revolution would be without the passion which engenders it.

A regret for the mistakes of yesterday must not, however, blind us to the tasks of today. War never left such an aftermath. There has been staggering loss of life and measureless wastage of materials. Nations are still groping for return to stable ways. Discouraging indebtedness confronts us like all the war-torn nations, and these obligations must be provided for. No civilization can survive repudiation. We can reduce the abnormal expenditures, and we will. We can strike at war taxation, and we must. We must face the grim necessity, with full knowledge that the task is to be solved, and we must proceed with a full realization that no statute enacted by man can repeal the inexorable laws of nature. Our most dangerous tendency is to expect too much of government, and at the same time do for it too little. We contemplate the immediate task of putting our public household in order. We need a rigid and yet sane economy, combined with fiscal justice, and it must be attended by individual prudence and thrift, which are so essential to this trying hour, and reassuring for the future.

Reflection of War's Reaction.

The business world reflects the disturbance of war's reaction. Herein flows the life blood of material existence. The economic mechanism is intricate and its parts interdependent, and it has suffered the shocks and jars incident to abnormal demands, credit inflations and price upheavals. The normal balances have been impaired, the channels of distribution have been clogged, the relations of labor and management have been strained. We must seek the readjustment with care and courage. Our people must give and take. Prices must reflect the receding fever of war activities. Perhaps we never shall know the old levels of wage again, because war invariably readjusts compensations and the necessaries of life will show their inseparable relationship, but we must strive for normalcy to reach stability. All the penalties will not be light, nor evenly distributed. There is no way of making them so. There is no instant step from disorder to order. We must face a condition of grim reality, charge off our losses and start afresh. It is the old-

Guernsey Breeders Meet

The Red River Valley Guernsey Breeders' association held a meeting in Thief River Falls Thursday night. At this meeting final arrangements were made for the big picnic and sale, to be held Tuesday, June 7, at Burr Oaks farm owned by Albert Johnson, one mile south of Thief River Falls.

At the annual meeting in Crookston in February a committee, consisting of Stuart McLeod, Perry Johnson and Paul Engelstad, was appointed to pick the cattle to be exhibited and sold from among the best herds in the Valley. The committee has selected 11 pure bred cows, 8 high grade cows and 6 pure bred young sires. They will also have a nice bunch of grade heifer calves suitable for boys' and girls' club work. All these animals are picked from some of the best herds in the Valley. Any one who wants to start a herd of the best stock at his own price here has his chance.

THE GOODRIDGE BANNER

VOLUME XV, No. 19. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, MAY 6, 1921. $1.50 PER YEAR.

Met The Marshall County Board

A large delegation of farmers of eastern Marshall county, accompanied by a goodly representation of the Goodridge Commercial club, met with the county board at Warren on Tuesday and presented a petition bearing 92 signatures for the establishment of a county and state road to run north and south between the Pennington and Marshall county lines, thus forming a connecting link in a proposed state road between the Jefferson highway at Oklee and Roseau, and of which a large portion is constructed and traveled. The petition was presented by Mr. A. C. Tvedt, who showed the urgent need for a north and south road across this territory.

The commissioners received the visitors very kindly, listened to Mr. Tvedt's remarks very courteously, and—took the matter under advisement without any discussion or any expression of opinion for or against the proposition.

Cattle Feeders Day.

Cattle Feeders Day, observed for the first time by the University of Minnesota on Friday, April 22, has come to stay. Nearly 100 thoroughly interested cattle men inspected the livestock under tests and attended the exercises at University Farm.

The special feature of steer-feeding experments which had been carried on at the farm for 112 days was a comparison of ground barley to shelled corn as a grain for fattening cattle, That barley is equal to corn, pound for pound, in producing gains of weight, was a positive conclusion announced by Prof. W. H. Peters, Prof. N. K. Carnes, and others of the animal husbandry division who had charge of the experiments. It was shown that cheaper gains were made by corn-fed steers than by barley-fed steers, but the fact remains that the feeding trials go to show that northern Minnesota with its abundant crops of barley, its clover and alfalfa and corn for silage, can expect to become a cattle feeding district, more closely approaching results obtained by farmers in the famous corn belt than has ever been thought possible.

The 48 steers used in the feeding experiments were mostly Herefords and Short-horns bought on the South St. Paul market, and were divided into six groups of eight each. Although creditable gains in weight, and ranging from 190 to 287 pounds, were made by each animal, a financial loss would have to be taken if the animals were sold at this time. The losses figured at the end of the trials corresponded closely to those reported on recent cattle feeders days at the Iowa and Nebraska college stations. Cattle feeders and the university men who spoke to them in the livestock pavilion generally took a favorable view, however, of the future of cattle feeding in this this country,

Who's Who?

Senator A. J. Rockne is nephew of B. L. Rockne of this place. The St. Paul Dispatch prints the following in its "Who's Who among State Lawmakers" column:

Senstor A. J. Rockne of Zumbrota, chairman of the senate finance committee, has had a long and varied experience in the Minnesota legislature, covering a period of eighteen years.

He was a member of the House in 1903, 1905, 1907 and 1909, being speaker during the latter session. He was elected to the senate for the 1211 term, and has been re-elected for every session since then

Senator Rockne was born in Fillmore county forty-eight years ago He is a graduate of the University of Minnesota college of law.

Legal Rates Advanced.

Taking a due note of the inconsistency of the present prices allowed publishers for publications of legal notices, the 42nd Minnesota legislature before going into history Friday passed a law advancing the rate from 75 cents to 90 cents per folio for the first insertion and from 35 cents to 45 cents per folio for subsequent insertions. The law also provides that all legal notices must be published in the English language.

MARRIED

Mr. Herman Bendiksen and Miss Helen Longevan were married Wednesday, April 28, at Warren. They are well known and popular young people of Moylan township. They will make their home for the present on the farm of the bride's father.

Appropriation for Red Lake Drainag

The Red Lake Drainage and Conservancy district was granted a state appropriation of $25,000 for completing the surveys of the Red Lake and Clearwater rivers. This will enable the engineers to complete plans and specifications for these two large outlet projects. The legislature amended the Cliff law materially, but objectionadle paragraphs were not adopted, due to the strong opposition against them by friends of the law. On February 21 congress passed a law providing federal authority for this project, All that remains now is the completion of the engineering plans, a hearing before the court and acceptance of the viewers' report. Many obstacles have been overcome during the year, according to the board members, one of them beirg the failure of the law to provide a fund large enough for making the necessary surveys. The 6 per cent warrants could not be cashed at banks excepting in a few cases where the banks cashed these warrants as a matter of co-operation with the board in order not to delay the work. The fact that the law under which the board operates was being amended by the legislature also complicated the situation. Remarkable progress has been made nevertheless according to persons who are in a position to know the facts. The burden of paying for the survey will not be assessed against the district. This in itself is a considerable item. The principal gain, however, is the fact that when the appropriation was made on April 19 last it opened the way clear for the board to rush the work to completion.

The Commissioners and The Farm Bureau

On Tuesday of this week the directors of the Farm Bureau association met the county board of commissioners in an effort to gain an understanding as to what action the commissioners shall take in the matter of continuing the county appropriation to the support of the Farm Bureau association. It was decided to learn the wishes of all the qualified voters in the county on the proposition. The result of such an inquiry will materially effect the decision of the board.

Organization meetings of the bureau will soon be held in each township and at these meetings every person will have the opportunity to express his desire by a vote.

Business Men Journey to Oklee

Last Friday afternoon eleven men from this village autoed over to Oklee, where they met with the Oklee Commercial club to discuss the advisability of extending the state road from Oklee to Roseau. Mr. A. C. Tvedt acted as chief spokesman, and presented the proposition in a very effective manner.

After the meeting the president of the Oklee Commercial club invited the visitors to adjourn over to one of the hotels, where a lunch was served. The spirit of neighborliness and hospitality was demonstrated in an effective manner and the visitors enjoyed meeting these men. It is hoped that getting acquainted with one another will result in united efforts to further progressive projects of mutual interest.

The Moylan News

The people are all busy working in the fields now-a-days.

Miss Pearl Lamporter visited with Mary Cullen Sunday.

Herman Rinter was a business caller at Thief River Falls Monday.

Henry Olson, Odmund and Ottar Fiskevold, Garfield, Arthur and Lillie Erickson visited with the Kiesow young folks Sunday evening.

Erick, Otto and Richard Kiesow were out fishing Sunday. The results unknown.

Arshur Sund was a business caller at the Herman Kiesow home Sunday afternoon.

Otto Kiesow and family were visitors at the Herman Kiesow home Sunday evening.

Aerman Solley was a business caller at Grygla Saturday.

Edmund Fiskevold and Garfield and Arthur Erickson were business callers in Goodridge Saturday evening.

Herman, Selma and Rosa Kiesow attended the church meeting at the Carl Ericksan place Sundaay afternoon.

Mr. and Mrs. Otto Kiesow and son August were business callers at Thief River Falls Monday.

Miss Mildred Jahr was a business caller at Kiesow's Sunday.

To Test County Herds.

Dr. W. J. Fretz, federal veterinarian in charge of tuberculin testing, has informed the Pennington county farm bureau that his men will be in the county during the month of June to test the herds of applicants who have filled out the proper blanks and filed them in the farm bureau office. Others living in the neighborhood of those who have applications in should make their request to have herds tested as soon as possible if they wish to have the work done this year.

Banks Close at 4

From and after this date the banks of Goodridge will be closed promptly at 4 o'clock p. m.

Dated April 26, 1921.

GOODRIDGE STATE BANK,
FARMERS STATE BANK.

Increase Wolf Bounty

A wolf bounty bill, providing for a state bounty of $10 and a compulsory county bounty of $5—the present law provides a state bounty of $7.50—was passed by the House as a further measure to protect big game in northern Minnesota. Representative Daniel De Lury, one of the authors of the wolf bounty bill, urged its passage as a game protection measure, asserting that wolves kill five deer for every one killed by hunters.—Red Lake Falls Gazette.

Talked with Surgeons During The Operation

Matt Urchetz, a farmer living 14 miles east of the city, suffered the amputation of the left leg just below the knee on Tuesday morning after having suffered for many weeks with gangrene of the toes. The operation was performed at the Physicians hospital here by surgeons of the city. What is commonly known as the "twilight sleep" method of anaesthesia was employed, the patient remaining conscious and able to talk with the surgeons throughout the operation.—T. R. F. Times.

Farm Bureau Meetings

Following are dates announced for Farm Bureau meetings in the townships named:

Cloverleaf May 9, Kratka May 10, Mayfield May 11, Reiner May 12, Star May 13, Hickory May 14, Deer Park May 16, Highlanding May 17.

Contract for State Road

A contract for the construction of eight and one-half miles of state road between Goodridge and Highlanding was let by the Pennington county commissioners on Wednesday to H. B. Lund of Thief River Falls. Mr. Lund's bid was at a price "one cent under the lowest bidder," giving him the contract at 28 cent's per cubic yard. The legality of Mr. Lund's bid is questioned, it not being a competitive bid. It is peculiar that the board would recognize such a bid, as it makes for delay and trouble.

INTRODUCING A "WISE GUY"

Husbands, Meet Mr. Perkins—He Has Thought Out a Wrinkle That May Save You Money.

Mr. and Mrs. Perkins had sat silent for half an hour, when he looked up from his paper and said:

"My dear, you are very silent tonight. Has the cook quit her job or do you feel sick?"

"No, neither," replied Mrs. Perkins. "It is that I have something terrible to tell you, and I don't exactly know how to begin. It is horrible—terrible—and I expect, after you hear it, you will not speak to me again for two weeks."

"You fill me with alarm!" said Mr. Perkins, "but go on and let's hear the worst of it."

"Well, you know that I had a birthday two weeks ago. As a gift, you bought me a $600 ring. It was beautiful, and I thought I would always treasure it, but something has happened. I went shopping today and I lost—lost—"

"You lost the stone out of the ring didn't you?"

"Yes, Mr. Perkins, and I have done nothing but weep for the last four hours."

"Well, my dear one, weep no more! Yes, you had a birthday and I gave you a gift, but it wasn't a $600 diamond ring. Knowing what a careless woman you are and knowing you would lose the diamond in less than a month, I paid $25 for a glass diamond. You have lost it, but we have saved $575. Instead of crying, let us rejoice and feel good. Yes, dear, we have saved $575, and tomorrow night we will go out to some [illegible] restaurant [illegible] dinner."

What Happened to Mary

By DORA MOLLAN

(©, 1921, by McClure Newspaper Syndicate.)

The girl occupying the stool nearest the window, fourth from the corner on the sixth floor of a huge skyscraper, wore on a certain day in January a bright pink blouse. It caught the eye of a man standing in the window on the corresponding floor of a hotel directly opposite.

Fascinated, he watched her deft fingers as, with the precision of a machine, she packed celluloid toilet articles into satin-lined cases which she took from a pile beside her. She did not make a lost motion.

When the girl came to the end of the pile of boxes she turned on her stool and looked out of the window. Her glance met that of the man in the window opposite, she smiled. He acknowledged it by waving his hand. She returned the salutation, then as a boy deposited a fresh pile of boxes beside her, returned to her work.

With a start Strong Lewis remembered the warning words of his wife spoken as he left their country home for a business trip to the city. With a guilty feeling he hustled into hat and overcoat and out of the hotel. The episode, however, had not escaped the attention of the other girl who sat at the same table. "I'll tell Johnny on you, Mary," she giggled.

"Guess if I always keep them at that distance, Sadie, Johnny'll not have any kick coming," the other replied. But Johnny did have a kick coming that very night, and this is why:

When Strong Lewis returned to his hotel room it was verging on five o'clock. With the instinctive movement of a man who is not used to being cooped up indoors, he walked directly to the window. The girl in the bright pink blouse sat in the same place. Her fingers flew back and forth at the same task.

"Been at it all day—and every day, I suppose," the man soliloquized. "How on earth can she stand it?" Then his wife's warning, which hadn't been far from his thoughts all day, came into the foreground again. Muttering something about "taking a chance" and "a man named Brodie," Strong Lewis watched the opposite window intently. The girls were making preparations to depart.

He hurried down into the street. Girls singly and in groups, were stringing out of the doorway just across from the hotel. But they wore coats! How could he tell, then, which one he wanted? Ah! There she was; an unbuttoned coat disclosed a pink blouse.

Mary Cummings and her cousin, Sadie, accompanied by the girl who lived next door, had started to walk home together, as was their custom, when Lewis approached them. He addressed Mary. "Could I speak to you—on a matter which may interest you?"

All the warnings which reach city girls from every side concerning the danger in accepting the advances of unknown men rushed through the minds of the three girls. Sadie shook her head, and that decided Mary. "She wasn't going to be bossed by Sadie just because she was two years older and many degrees plainer!"

So Mary answered the stranger with a polite "Sure." Whereupon the other girls walked ahead, turning around occasionally to be sure that Mary and the strange man were following. Then they hastened their pace to bear the shameful tidings to Sadie's mother, who was also Mary's aunt.

Strong Lewis did most of the talking until they reached the doorway of the flat building where the cousins lived. There Mary seemed to have something to say, the while they were watched by two curious pairs of eyes from an open window above. But when Mary entered the flat the window was closed and her aunt confronted her.

"You're of age, Mary, and it ain't for me to say, but I won't have any such goin's on by anybody what boards with me. Think of your mother what is dead—and think of Johnny."

"My board's paid till Saturday, and you can't tell—perhaps I'll leave before then." With a toss of her head Mary went to the room which she shared with Sadie and closed the door. Soon Sadie appeared with the excuse of wanting a handkerchief, and, returning, reported to her mother that "Mary was dolling up in best duds!"

Sadie and her mother listened until they heard Mary leave her room and start down the stairs. Hurriedly they opened the front window and looked cautiously down. A taxi drew up at the curb and a man jumped out to help Mary in. Sadie was sure it was the man who [illegible] evening call upon Mary. But the joy which they expected to derive from the telling of the news was spoiled by Johnny, who merely shrugged his shoulders and remarked "Jealous, because yer didn't get him yerself?" to Sadie, whom he disliked.

Nevertheless, it was a dejected Johnny who, hands thrust deep in his pockets, slouched away and made for the corner saloon. For he had brought the good news of a raise and had planned to broach the suggestion that maybe by June they might be getting married.

[illegible] by the stirring innuendoes of the women, for Johnny had always thought Mary just a little below the angels, he decided over a desperate [illegible] that at least he'd give the [illegible] chance to explain. But Johnny [illegible] imagine standing the suspense of not knowing for another day, so he [illegible] the saloon till closing [illegible]. Then he hid in the dark doorway of the flat building where Mary [illegible].

At half an hour after midnight a [illegible] stopped in front of the house and [illegible] helped Mary out. Johnny heard [illegible] parting words:

"Then I'll be at the Woodville station to meet you at 6:30 day after to-morrow," the man said.

"Sure," said Mary, "and I never can thank you enough for the grand time [illegible]"

[illegible] encouraging words these [illegible] wants to believe the [illegible] his own heart!

Running up the steps, Mary stopped suddenly as she spied a man hiding in the shadows. "Mary," said Johnny, in a hoarse voice, putting a hand on her shoulder. "Mary," but he could go no further. For Mary's face shone with relief and happiness at the sight of him. And Mary's voice was bubbling with eagerness to explain.

"Oh, Johnny," she said, "I've been to the Winter Garden! All my life I've wanted to go to one of them swell shows, and when Mr. Lewis says: 'What can I do to persuade you to come to the country?' I says: 'Take me there.' And Johnny, all the time he talked to me about the great big house he is going to bamboozle his grandmother into lending him the money to build when she comes to visit them, and his wife says she can't come if he don't bring some one home from the city to help her do the work, and he saw me in the window and likes the way I work; and he says there's a little house we can live in, and we'll go day after to-morrow—Johnny—" Mary paused for breath.

"But we can't live together in a little house, Mary, until—" Johnny's voice was trembling with the hope of supreme happiness.

"Of course not, Johnny," Mary answered his unspoken question.

FEASTS THAT WERE FEASTS!

State Dinners of Old Romans Surely Never Have Been Duplicated by Other Peoples.

Those who think the Thanksgiving table is the limit in plenty might consider a small part of the menu of a state dinner given in the time of Nero. It should be remembered that everyone ate everything that was served, and when the stomach was stuffed to its physical limit there were long feathers at hand to tickle the throat and relieve the feaster of what he had already gorged himself with. The meals were eaten with the diners at full length on cushions with their heads resting on the laps of slave girls, other guests, or supported by their elbows. One feast included:

Dormice stewed with honey and pepper, sausages served on individual stoves, plums with kernels of pomegranates, pea-hen eggs with wheat ears hidden in the center, peas, beef kidneys, African eggs, custard, lobster, fowl crammed with nuts, paps of a sow powdered with crystal sugar, rabbit larded with fish fins, relishes, wild boar, dates, almonds, little pigs stuffed with sweetmeats, blackbirds' tongues, grapes, locust fried in honey, honey flavored jelly blocks encasing broiled humming birds, breads, cheese cakes, whole thrushes with bones removed, sugar-loafs crusted with caviar, haunch of a bear, fried snails, cold tarts dipped in boiling honey, bacon dripping with goose liver gravy, chitterlings, eels stuffed with brandied peaches, drinkable perfumes, salad of chestnuts, pickles and hearts of roses, wine-flavored whipped cream floating on chilled turtle soup, and many, many other dishes, washed down with over one hundred varieties of wine.

Ideal.

Mrs. Nostrand—Mr. and Mrs. Jefferson seem to lead an ideal life.

Mrs. Macon—Yes, I often remarked about it.

Mrs. Nostrand—I wonder what their secret is?

Mrs. Macon—Well, Mrs. Jefferson [illegible]

HAVE THEIR FAVORITE FISH

People of Various Nationalities in America Differ Widely in Their Likes and Dislikes.

In this country the nobility of fish may be said to include pompano, shad, brook trout and imported English sole, while in the aristocratic class are kingfish, Spanish mackerel, striped bass, sea bass, bluefish, chicken halibut, whitebait, smelts, Lake Champlain icefish, red snapper and salmon. Then in the popular or middle class of fishdom come the old favorites which grace many a smart table despite the epicurean appeal of the higher-priced ones—the cod, carp, eels, sheepshead, white perch, pickerel, salmon trout, tomcod, flounders, haddock, pollock, muskalonge, pike, porgies, butterfish, blackfish, ciscoes, herring and mackerel. Shellfish comes under another head, but oyster crabs, soft-shelled crabs and scallops come in with the imperial lineage, lobsters, hard-shelled crabs, oysters and clams following and mussels bring up in the rear along with crayfish. Blackfish are sold almost exclusively to Bohemians, who have cultivated a taste for it in their native land, while on the East side of New York alone, among Germans and Hebrews, many pounds of carp that is indigenous to Germany as well as to America, are consumed weekly. Tomcod, red snappers, eels and devilfish are sold to Italians in great numbers, Italians being willing to travel many miles to procure live eels, in which taste their French cousins share.

Low Price Cotton.

"Well, Old Nigger, cotton has gone to the dogs."

"Yassuh, Boss, dat's what I heard."

"And you don't make a nickel this year."

"Nossuh, I 'spect not."

"And I've lost what money and grub I furnished you."

"I'm mighty 'fraid you is, White Folks."

"Well, confound your picture, it don't seem to worry you any."

"Lawd, Boss, don't you know there ain't a bit of use in the world in me and you both worrying about the same thing."—From Life.

When You Dare Not Think.

When attempting the prodigious feat of swimming the English channel, a swimmer should neither feel nor think. So said one famous swimmer, who, in an attempt, passed [illegible] hours in the water.

"You must," he declared, "be just a swimming machine, feeling no sensations and using your brains as little as possible. The strain becomes so fearful that if you began to re[illegible] what you had taken on you [illegible] have to give up the struggle at [illegible]

Wedding Day in Borneo.

On the wedding day, in Borneo, the bride and bridegroom are brought from opposite ends of the village to the spot where the ceremony is to be performed. They are made to sit on two bars of iron, that blessings as lasting and health as vigorous may attend the pair. A cigar and betel-leaf, prepared with areca-nut, are next put into the hands of the bride and bridegroom.

One of the priests then waves two fowls over the heads of the couple, and in a long address to the Supreme Being calls down blessings upon the pair, and implores that peace and happiness may attend them. After the heads of the affianced have been knocked against each other three or four times, the bridegroom puts the prepared betel-leaf and cigar into the mouth of the bride, while she does the same to him, whom she thus acknowledges as her husband.

Graphomania.

In the cow-path they call it vanity, and that is the name the preacher, who was king in Jerusalem, had for it when his own cows were lowing by the Jordan. But Prof. Bergson, in the most advanced manner, calls it graphomania, or the mania for writing. Juvenal hid yet another name for it. To him it was cacoethes scribendi or the itch for writing. On the whole, Solomon's name is the simplest and the most impressive. It is a case presumably of every one to their liking, as the old lady in the proverb said when she kissed her cow. But just where that cow's path lay no one seems to know.—T. U. in Christian Science Monitor.

As It Appears to Jud.

Jud Tunkins says some of the motion-picture stars begin to look as if they paid a whole lot more money to lawyers than to scenario writers.

DEFECTIVE PAGE

Goodridge Mercantile Co.,
of Goodridge, *say:*

The De Laval puts money in the bank

MONEY in the bank is the final test of any piece of farm equipment. It is especially true of a cream separator.

Butter-fat is the most valuable product of the farm. Twice a day, every day in the year, gravity skimming or a poorly constructed separator wastes this high-priced food.

A De Laval Cream Separator stops this loss of profit. It supplies the extra money that is needed for current expenses, improvements about the farm, or for the purchase of new stock.

More than 2,500,000 De Lavals are in daily use throughout the world. These De Laval owners represent the most progressive and most prosperous farmers in every country and locality.

A De Laval Cream Separator will make your farm more profitable, too, and put money in the bank for you.

You can buy a De Laval on such terms that it will actually pay for itself while you are using it. Come in and talk it over

Sooner or later you will buy a
De Laval

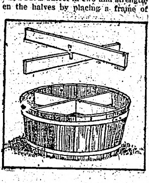
TEST—DON'T GUESS

1. Plant fewer acres of corn but raise more bushels per acre.
2. A dead ear planted means 900 missing stalks.
3. Missing stalks mean lost land and labor.
4. Testing is not expensive and its advantages are certain.
5. By testing there is everything to gain and nothing to lose.

HANDY FEED BOX FOR STOCK

Barrel Cut in Two and Strengthened by Boards Placed Inside Is Quite Convenient.

A handy feed box for use in open lots or where cattle are fed upon grass is shown in this sketch, writes Claude Dieckman of Nebraska in Farm Journal. Cut a barrel in two and strengthen the halves by placing a frame of two boards across the inside, as shown. This will prevent the tub from being smashed and will allow four animals to eat out of the box without bothering each other. A strong barrel must be selected, and the hoops must be nailed to each stave.



Handy Feed Box.

MANURE IS BEST FERTILIZER

Contains Plenty of Humus and All Other Necessary Plant Foods—Add Acid Phosphate.

The home gardener who can get a load of well-rotted stable manure need not worry about fertilizer, anyone who has ever done any gardening is well aware.

Manure contains humus in plenty and all the necessary plant materials, as well as bacteria which put these materials into the most usable shape for crops. To get the full benefit of stable manure, however, it should be balanced with acid phosphate, which is comparatively inexpensive, gardeners at the Iowa state college of agriculture say.

An application of one ton of stable manure, which is about an average two-horse load, is not too much for a garden 30 by 60 feet, and 50 pounds of acid phosphate may be used with it.

Fresh stable manure should not be applied in the spring. It contains too much readily available nitrogen and may cause in some plants a growth of stems and leaves at the expense of fruits. This is especially true of tomatoes.

UTILIZATION OF FARM LAND

Value of Place Depends Upon What Proportion of Total Area Can Be Made Productive.

Effective utilization of farm land means a high percentage of income-producing area, say specialists of the United States Department of Agriculture. The value of a farm depends upon what proportion of its total area is productive. Compare a farm of 100 acres at $200 an acre, 95 acres being in shape to yield available products, with another farm of the same acreage at $150 an acre, but with only 65 productive acres. If all the other features of the two farms are similar, the former should be the most profitable because its profit-producing land costs but $120 an acre against $230 an acre on the second farm.

NEW SEED CATALOGUE HELPS

Pamphlet Is of Much Assistance in Planting Garden—Prevents Overlooking Anything.

Have you received a new seed catalogue? Get one—from a reliable firm—for it will help you in planting your garden and prevent you from overlooking something you may otherwise forget, say specialists of the United States Department of Agriculture. From $3 to $5 worth of seed will plant a vacant lot or a small home garden. Several of the seed houses offer special collections of seed that are suitable for various sized gardens.

LESSEN LOSS IN PRODUCING PORK

University of Illinois Gives Expert Advice on Care of Sows and Litters.

TIMELY REMEDIES OUTLINED

Ten Times as Many Pigs Lost in First Two Months After Farrowing Than From Cholera—Good Management Essential.

(By J. B. RICE.)

While we usually figure the profits and losses in raising hogs from the time of weaning to marketing, there is a chance to make some difference in the cost of production up to the time the pigs are taken from the sow.

Cholera causes a greater financial loss than any other disease, but about ten times as many pigs are lost in the first two months after farrowing than are lost from cholera. Hog cholera gets into the herd when each pig represents a larger investment than is the case with the suckling pig.

It may be fair to ask the question—what is a fair-sized litter for a sow to wean? I have heard of men who weaned on the average eight or nine pigs per sow. We have all, no doubt, heard of such cases. These stories usually are not told in a "nonbragging" way. That is why we hear of such records. The man who raises three pigs per sow seldom remembers much about the record or very firmly establishes the fact in the minds of his neighbors. The normal farrow of a sow is seven to nine pigs. About 10 per cent of these either are dead when they come or die during the first 24 hours. Then, due to various causes during the first week or ten days, as many more die or are killed; and by the time the pigs are two months old, you may say that you have done as well as "common" if you have an average of five pigs to wean from the sow.

This leak in pork production as told by 102 farmers, in 1918, in questionnaires sent to them, is shown below. A few suggestions are given on how it may be stopped.

Sow and Pigs on Rape.

The Loss Before Weaning and How to Stop It.

Overlaid by Sows—29.13%.

1. Do not have the sows too fat.
2. Provide the pen with a good guard rail.
3. Remove pigs from nervous sow as farrowed. Return when sow has finished farrowing and quieted down.
4. Have as little noise and commotion about the pen as possible for the first few days.
5. Give the sow and litter a little care and attention during the first week.
6. Do not use large quantities of bedding.

Farrowed Weak or Dead—22.34%.

1. Have the sow gaining in flesh at breeding time.

During the gestation period;

2. Feed the sow a good ration.
3. Keep her in good physical condition.
4. Give her plenty of exercise; make her go some distance for her feed each day.

Chilled—15.88%.

1. Be present at farrowing time to warm the chilled pigs.
2. Keep the beds dry and free from drafts.

Eaten by Sows—4.59%.

1. Feed a balanced ration during the gestation period and while the sow is suckling the litter. Too much corn is often fed.
2. Sell those sows that have the habit of eating their pigs.

Aborted—4.55%.

1. Keep "piggy" sows from other classes of live stock.
2. Do not allow sows heavy in pig to go over obstructions or very rough ground.
3. If contagious abortion, sell the sows.

Scours—3.43%.

1. Feed the sow a light ration for the first week or ten days—increase it gradually.
2. Do not change the feed of the sow too suddenly.
3. Keep the pens and troughs clean.

Thumps—1.78%.

1. Reduce the amount of feed given to the sow.
2. Exercise the pigs.

Necrobacillosis (sore mouth, sniffles, bull nose, etc)—1.56%.

1. Disinfect pens before the sow farrows.
2. Treat abrasions in the skin about the pig's mouth with solutions of cresol dip, permanganate of potash or other good disinfectant.
3. Clip (not break off) pigs' teeth.

Cholera—1.01%.

1. Have immune sows.
2. Keep place cleaned up and free from the disease.
3. If in danger, vaccinate soon after weaning pigs.

Miscellaneous—5.64%.

1. Get pigs to eating well before time of weaning. Make a creep for them.
2. Take extra good care of the pigs during the first few weeks following their removal from the sow, for they will miss her if you do not.

KILL OUT DODDER SEED

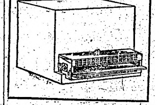
During the first season of infestation in clover or alfalfa dodder usually occurs in small scattered areas. Such infested areas should be either mowed and removed before the dodder matures seed or else burned in the field. If seed has formed, burning is the only remedy, since it kills not only the plants but also the seeds of dodder which may be lying on the soil surface.

AUTOMATIC TRAP ON BEEHIVE

Primary Object of Invention Is to Prevent Bees From Leaving in Large Numbers.

The Scientific American in describing an automatic beehive trap, the invention of D. S. Rowe of Marseilles, Ill., says:

"The invention relates more particularly to an automatic bee trap. The primary object is to provide means whereby the entrance and exit openings of a beehive may be automatically closed by the weight of the occupants to prevent the bees from leaving the hive in large numbers, which is commonly known as 'swarming.' It is a further object to provide a means by which the ordinary passage of the bees in their performance of gathering honey is unobstructed.



A Perspective View of a Hive, With Invention Attached.

WHITE ANTS INJURE TIMBERS

Insects Enter Wood Wherever It Comes in Contact With Damp Earth and Eat Into Beams.

Winged white ants are often observed flying about houses in spring, and are sometimes supposed to have come in from outside. The bureau of entomology of the United States Department of Agriculture explains that these winged insects really are hatched inside the buildings, and usually are to be taken as indicating nests of wingless white ants working destruction in the timbers.

These insects, which really are not properly ants, enter the wood wherever it comes in contact with damp earth, and often eat into the center of an upright beam without manifesting their presence on the outside until the wood is entirely ruined, and possibly a settling and cracking of the building has resulted.

The department urges that buildings be constructed with such foundations that no wood touches the ground, or if it is necessary to use wood, that it be impregnated with tar creosote. Concrete floors should be laid on a gravel base to prevent dampness and cracking, and where cracks occur they should be promptly filled.

UNIFORM PRODUCTS FAVORED

Find Better Market, Bring Higher Prices and Are Handled at Less Expense Than Others.

Without uniform standards for farm produce there is no recognized basis for the business of buying and selling, says the bureau of markets, United States Department of Agriculture. Standardization of products gives seller and purchaser a common language and a set quality upon which prices may be compared and fixed. Experience has shown that the products which are sold by grade find a better market, bring better prices, and can be handled at less expense than those sold without reference to standards. Standards have already been fixed for many farm commodities, such as American Upland cotton, shelled corn, wheat, oats, and for small fruit containers. These Federal standards apply only when the product is intended for interstate or foreign commerce. It is highly important to secure state co-operation so that the provisions that apply to a few products will apply to all that are offered for sale.

DIARY OF MUCH IMPORTANCE

Well Adapted to Cost-Accounting Records When Information Wanted on Few Enterprises.

A diary is well adapted to cost-accounting records when information is wanted on only a few farm enterprises, say specialists of the United States Department of Agriculture. If the diary is written up each day it takes but a moment to enter the hours and minutes spent in working the crop, and the necessary notes regarding the cost of seed, fertilizer, and equipment. The common form of diary is a book containing a blank page for each day's record and with space in the back for financial accounts. Another form has a page for each day divided to give space to the records of two years. A similar type furnishes space for a five-year period.

Circumstances Alter Cases

By LILLIAN H. CROWLEY

(© 1921, by McClure Newspaper Syndicate.)

James Wrightman was getting on famously with the firm. It made him feel pretty good for two reasons: One, because he was ambitious and meant to succeed, and the other, and more important one was that he was going to marry Esther Granger. They intended to be married just so soon as he should have another raise in salary. He had been most successful in his work lately and had reason to hope.

Of course, sticking as closely as he did to business curtailed his pleasure, for he had had to refuse invitations that came from his loved one. But he was working for her.

Esther had been so sweet about it. "I understand, dear," she had said more than once.

This very morning the president of the firm had slapped him on the shoulder and said:

"James, my boy, I want you to go to court this morning and take charge of our suit. Miss Boatwright will go with you as she made out the contract for the defendant and is a pretty level-headed girl. 'Phone me as soon as it is over. Go ahead and win!"

The president sent Miss Boatwright, his private secretary, to accompany James, and the two set off for court. James had the faculty of concentrating on his work of the immediate present and he hardly noticed his companion. She was simply something belonging to the work in hand like the books under his arm.

He never lost sight of an advantage for his case, and Miss Boatwright proved to be a clever witness. In fact, they won the case on her testimony as much as on any other one thing.

When James, about twelve o'clock, phoned the president triumphantly the big man was elated.

"Take Miss Boatwright to luncheon. Give her the best the Blackmar has to offer. I'm grateful to her, and I know it'll be a treat, because she has to support her mother on her salary and her fiance is in South America. So go as far as you like, and it's on the firm."

James by this time was pretty hungry himself, so he didn't mind doing as the "boss" ordered. He called a taxi and they were driven to the hotel, where the waiter escorted them to a little, rose-shaded table for two. He never slighted any work that was given him to do. Therefore he was most solicitous that his companion should have a luncheon that was worthy of the name. Miss Boatwright appreciated his thoughtfulness.

After he had given his order and the beaming waiter had gone to fill it, James let his eyes wander about the large and beautiful room. They did not wander far, for a short distance away sat Esther with two other girls. Her glance was turned away from him and he could not catch her eye. Then it dawned on him that she was purposely looking away. His heart sank when he realized the situation. He recalled the many times lately that he had been unable to join her—pleading business.

His companion spoke to him and for the first time he discovered that she was pretty—an extremely pretty girl, daintily dressed.

What a situation! Here he was doing the work the firm demanded; having luncheon with a girl he barely knew; he wasn't even treating her to the meal. Business pure and simple and Esther, with averted head, hadn't understood. Why couldn't Miss Boatwright have been old and ugly? There were plenty of ugly women connected with the business. He couldn't leave his guest and go over to explain to Esther before her friends, friends of hers he had never seen before. He felt like a trapped animal.

Miss Boatwright sensing his abstraction thought that she herself must be dull and so tried to be pleasant and entertaining. James replied to her efforts with disconnected words.

Esther and her friends soon left without a glance at James' table.

When he got back to the office he was closeted with the president and other members of the firm for several hours and did not get a chance to telephone.

He had received the raise in salary. He could explain to Esther about the luncheon and they could be married at once. Esther was not at home, the maid informed him. She was to be out for dinner and go to the theater later. He left a note asking her to call him up at his rooms as soon as she should get home, no matter how late it was.

Esther did not call. He telephoned in the morning as early as he dared. She had gone out of town to be gone indefinitely.

"No, there was no message and no letter."

Repeated calls over the telephone brought only the same answer. From bewilderment and grief James turned to anger for consolation. To be so completely innocent and then to be treated as though he were a criminal—for such a little thing anyway. It was well that he found out. He'd have an awful time with a wife who was so suspicious and saw harm in nothing at all. He was through and would concentrate entirely on business; then, sometime, he might become mayor of the city or governor of the state—who knows? Then she'd be sorry! Then he would look away from her as she had looked away from him.

And Esther? She had gone with her father and mother to Washington, but she was not enjoying herself. Nothing seemed right. She realized that she had been hasty. She had been silly! Suppose James had been with a pretty girl? She might have been a relative, a fourth or fifth cousin. Lots of persons have relatives turning up when they least expect them.

She wished she were home, but she couldn't leave until her father's business was finished. She couldn't write directly—that would be too humiliating—but she could write to Nora and tell her to give her address to whomever called. Happy thought!

But Nora had left and the housekeeper had installed a new maid in her place and the letter was forwarded across the continent to her.

Esther waited. "He won't write me, so there must be another girl, and he is glad I have given him this chance to conclude that all is over between us. If I only knew for certain," she lamented.

There was no joy in the return and she went to bed with a headache—heartache rather.

Jerry Sufferin, president of James' firm, was a particular friend of her father's and he and Mrs. Sufferin were giving a ball. Esther had to go. She could not let anyone else see her moping. Her parents had realized that there was something wrong between their daughter and James, but had refrained from interfering.

James was not at the ball. Esther found herself seated on a divan with Jerry Sufferin.

"I tell you, girlie, you're a lucky one to get James Wrightman, for he's bound to make his mark. I raised his salary that day after he won the lawsuit and I made him take our star witness, Miss Boatwright, to the Blackmar for luncheon. They did a big piece of work for the firm that day. He's doing well, Esther, and I hope you'll be married soon. Why isn't he here tonight?"

"I—I think I'll call him up and see, Mr. Sufferin."

"Go right in to my den and tell him to come."

Esther flew to the privacy of the retreat and called James. He was at home, where he had spent all of his evenings lately.

"Yes," she heard the strong tones of his beloved voice.

"James, dear, it's Esther. I am at the Sufferins' and I have something to say to you."

For a moment James hesitated—but only for a moment—for the sound of Esther's sweet voice had driven away all his stern resolutions to put her out of his life.

"I'll be over right away," he exclaimed.

"I'll be waiting for you in the den. Hurry, dear."

NICOTINE KILLS PLANT LICE

When Insects Are Discovered on Apples, Plums or Plants Spraying Is Recommended.

If plant lice are noticed on apples, plums or plants in early spring, spray with nicotine sulphate and soap (one-half pint of 40 per cent nicotine sulphate and two to three pounds of soap to 50 gallons of water), as soon as discovered. If the lice are numerous when applying regular sprays, the nicotine sulphate may be added to the regular mixture, but it is more effective when used alone.

THE GOODRIDGE BANNER

VOLUME XV, No. 20. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, MAY 13, 1921 $1.50 PER YEAR.

Local Ball Team Initiates Season

The local High School nine journeyed to Oklee Tuesday afternoon and played the initial game of this season against the Oklee High school.

Being the first game this year, the Goodridge team necessarily found themselves handicapped for lack of practice, but the total result is very promising, as far as future games are concerned. The Oklee team has already played four winning games this year.

Joseph Christianson chalked up the first score with a two bag start in the first inning. In the next five innings Oklee gradually secured the lead, which they maintained througheut the game. Capt. Christianson was the chief point-getter for Goodridge, running in three out of a total of four scores. Alvin Halvorson, though handicapped because of an injured hand, also made the circuit and tallied. The final score was 4 to 11, favor of Oklee.

Following is the line up:

Goodridge		Oklee
Bundhund	F. B.	Demonaz
Payne	S. B.	Melby
Christianson	S. S.	W. Torgerson
L. Urdahl	T. B.	Lindquist
Ferdinandsen	P.	H. Torgerson
Stein	C.	T. Torgerson
Halvorson	R. F.	Rolland
N. Urdahl	C. F.	Paquin
Olson	L. F.	Hinze

The Goodridge team was accompanied by a large aggregation of rooters, who did their part to make the game exciting.

A return game will be played at Goodridge Saturday afternoon, May 21.

Big Opportunity

Our warehouse at Goodridge is for sale. If interested, write or call at Tessum Seed, Grain & Supply Co., office, Thief River Falls, Minn. This is an exceptional opportunity for a good flour, feed, seed, and produce business, as well as for storage of goods shipped in for inland towns. Let us hear from you. m13 2t

Dairy Marketing Inquiry [illegible]

Minnesota farmers, who lead the nation in the value of their annual dairy output, undoubtedly will have a representative on a committee now being appointed by James R. Howard, president of the American Farm Bureau federation, to work out plans for strengthening and correlating co-operative dairy marketing enterprises, officials of the Minnesota Farm bureau federation said today.

Mr. Howard was directed to appoint a committee of 11 dairy marketing leaders, by delegates from 21 states and 31 co-operative marketing organizations, who met in a national conference in Chicago last week.

H. R. Leonard, of the Twin City Milk producers' association, and A. J. McGuire co-operative creamery expert for the University of Minnesota, addressed the conference. The delegates voted unanimously to authorize Mr. Howard to select an investigating committee of 11, with the advice and consent of the National Milk producers federation.

This committee is directed to draft plans for forming dairy marketing organizations in unorganized territory, to strengthen existing organizations, and recommend methods of putting co-operative marketing of dairy products on a national basis.

Boys And Girls Club Work At State Fair

Prize money totaling $10,436.00 will be awarded to the winners in the Boys, and Girls, Club Work competitions at the Minnesota State Fair, Sept. 3 to 10. A 24-page booklet on the Boys' and Girls' activities, illustrated with pictures of the champions, both team and individual, in all branches of competition during 1921, along with the complete list of boys who have won free trips to the 1921 State Fair and membership in the Farm Boys' Camp, is just off the press. It was edited by Mr. T. A. Erickson, state club leader, and contains a wealth of information on Boys' and Girls' club work.

The tenth annaal Farm Boys' Camp an the State Fair will again be under the supervision of R. C. Coffin. The sixth annual Girls' Camp will be under the supervision of Mrs. Margret B. Baker.

In Pennington county, Gorman Thompson and Noble Urdall and in Marshall county, Edward Lee of Grygla and Harry Sedlacek of Radium, are the winning boys and entitled to make the trip to the fair at the expense of the management.

Moylan News

Herman Kiesow and son Otto were business callers at Goodridge Saturday evening.

Mrs. Otto Kiesow and son August visited with Rosa Kiesow Thursday afternoon.

Otto Zinter visited with Melvin Wilkens Saturday.

The pie social given at the Albert Wilkens place Saturday evening was well attended.

Arthur Erickson visited with the Kiesow boys Friday evening.

Edmund and Attar Fiskevold and Henry Olson attended the ball game Sunday afternoon.

Richard, Erick and Rosa Kiesow, Otto Kiesow and family, and Mildred Jahr went out fishing to Red Lake Sunday. They caught quite a number of fish.

Selma and Herman Kiesow, Lillie Erickson and Herman Solley were business callers at Esplee Sunday afternoon.

Thomas and John Cullen and Herman Solley visited with the Kiesow young folks Sunday evening.

Misses Myrtle and Thelma Erickson were callers at their home Thursday evening.

Mrs. Albert Wilkens was a business caller at Goodridge Friday.

Warren Lewis was a caller at Erickson's Sunday morning.

It Costs Something

Every line in a newspaper costs the proprietor something. If it is for the benefit of the individual it should be paid for. If the grocer were asked to contribute groceries to one abundantly able to pay for them, he would refuse. The proprietor of a newspaper must pay for the free advertising if the beneficiary does not, and yet it is one of the hardest things to be learned by many, that a newspaper has space in its columns to rent, and must rent them to live. To give away rent for anything less than living rates is as fatal to a newspaper as for a landlord to furnish rent free.

Law Supplements.

A supplement containing all laws passed by 1921 session of the Minnesota legislature is mailed to all subscribers of this paper in this state with the issue this week. Many laws of special importance are given in detail in the supplement, and it should be preserved for future reference.

Need Warrant To Raid Home

Searching for liquor in a private establishment without a search warrant is in violation of the constitution of the United States and the constitution of Minnesota.

Liquor so seized must be returned to the owner, and cannot be used as evidence that the prohibition laws have been violated.

Officers of the law conducting a search without a warrant are guilty of a gross misdemeanor.

This is the gist of a decision handed down last week by Judge Hanft in district court in the case of Herman Falkenburg, who was arrested march 21 at his home, by a St. Paul police officer and five government operatives.

This is the first decision of its kind in district court.

In a memerandum attached to the decision, the court declares that it refuses to recognize the doctrine that the end justifies the means.

"A search that is unlawful when it begins, cannot be made lawful when it ends by the discovery and seizure of liquor," says the memorandum.

State Fair Not To Be Open On Sunday

The Minnesota State Fair will not be open to the public Sunday, September 4, as a result of the action taken by the fair board at its monthly meeting Friday.

The decision to close the State Fair was prompted by the passage of a resolution by the legislature the last day of the session requesting that the Fair be closed on the Sabbath.

It was decided by the board to put on a complete entertainment program at the State Fair Saturday, Sept. 3, opening day. All exhibits must be in place by 8 a. m., Saturday. The entertainment will include aviation, vaudeville, racing and fireworks. The program has notyet been worked out.

Band Concert At Erie Hall

The Goodridge band announces a musal entertainment to be given at Erie next Sunday afternoon at 3 o'clock. If conditions are favorable the concert may be given in the open air, otherwise in the hall.

Under the able tuition and leadership of Mr. Nystul the band has improved and is not excelled by bands in much more pretentious communities than Goodridge and we predict that our neighbors at Erie find them worth listenina to.

For Sale

Our warehouse at Goodridge is for sale. If interested, write or call at Tessum Seed, Grain & Supply Co., office, Thief River Falls, Minn. This is an exceptional opportunity for a good flour, feed, seed, and produce business, as well as for storage of goods shipped in for inland towns. Let us hear from you! m13 2t

Community Club Meeting

There will be a Community club meeting on Friday evening, May 20, at the school house. A good program is being arranged and preparations making for a good time.

School Notes

The Eighth grade class formed an organization this week, with the following as class officers: Emma Gilbertson, pres.; Harry McDonald, vice pres.; Vivian Thoreson, sec. and treas.

Marie and Ethel Speeler of Mavie entered school last Monday, the school in Mavie being closed.

Henry Hjelle of Highlanding entered school last week for preparatory work for the state examinations.

A return baseball game with Oklee will be played on the local diamond a week from Saturday 2:30 p. m. Remember the time and place, to be there.

The Haunted Orchard

By LUELLA STEWART

(©, 1921, by McClure Newspaper Syndicate.)

Clayton dropped his heavy bags on the dusty, unpainted floor of the Valley House lobby. He had been the only passenger on the rickety old bus, which he could already hear rattling away into the darkness. This was the first time in five years that he had "made" Green Valley—and he would not have chosen to return.

"Hi, Jeff!" called the ancient proprietor, uncoiling himself from his tilted back chair by the stove. "Take them valises!" He hobbled rheumatically to the desk, peering over his iron-rimmed spectacles at the lone guest, while Jeff, a gawky country boy of seventeen with arms and legs too long for the garments that sought to clothe them, shambled forward and gathered the baggage.

"H'm—stranger in these parts be ye?" queried the keeper of the Valley House, shifting his chew of tobacco expertly, and studying the bold signature on the register: "J. M. Clayton, Chicago."

"Not exactly," said Clayton, leaning idly against the desk. He was depressed, very tired—almost too tired to follow the tow-headed Jeff up the stairs. "I used to cover this territory—until about five years ago. Always put up at the Valley House then. Last few years, I've been routed through the South. I don't seem to remember you—?"

"No, guess not," said the other, rubbing his shirt-sleeved arm with a gnarled brown hand. "Bagsby's my name. Bill Townsend, him that used to run this place—he left nothin' but a passel o' debts when he died, couple o' years ago. Bein' principal creditor, I bought in the place on easy terms. What'd you say your line was?"

"Hardware," admitted Clayton. "Everything from plows to thumbtacks!"

"H'm," said Bagsby pessimistically, hobbling back to his chair by the stove. "Guess you won't sell much of either here! Green Valley's gone down terrible. All the young folks nowadays seem to be just bound and determined to get to the city; an' the old folks can't make ends meet here, nohow, what with hired hands askin' such wages. They ain't a farm around here that you couldn't pick up now for a song."

A moment later, with his foot actually on the ramshackle stairway, Clayton paused. After all, he must ask the question that had been foremost in his mind ever since the dusty, rattling old day coach had creaked to a standstill at Green Valley station.

"Do you happen to know—" He thought his voice sounded husky and strange, and flushing, he began again: "Can you tell me—anything about—er—a family named Deming—that used to live a couple of miles down the state road?"

"Deming? Deming?" Bagsby laid down his weekly farm paper. "Why, that's the Deming place, up where the big sign is—th-the one they call th-the haunted house."

"Haunted?"

"Yeh," said old Bagsby, "I've heard tell that the family—Deming, if that was their name—moved out West 'count o' their girl havin' lung trouble; then they say she an' the mother both died, an' the old man didn't want to come back. Place's been for sale ever since I come to Green Valley—an' that's four years ago."

Jack Clayton gripped the banisters until his knuckles whitened. Nedda was dead, then— He would never see her again—

With his clean-cut young face grim and set, he followed Jeff up to the room assigned him—and then, when the door was shut, fell face downward upon the springless old bed—and lay very still.

Perhaps an hour later Jack Clayton tiptoed down the creaking stairs, without waking his ancient host, who had fallen into noisy slumber beside the dying fire, with his farm journal falling from one lax hand. The November air cooled his hot cheeks and smarting eyes, as he hurried down the state road. Almost before he knew it, he was at the Deming farm. Yes, there it was—the white house with its spreading barns and outbuildings—the spacious home where he had so often been entertained! How dreary it looked now; dark, deserted and close-shuttered. No wonder it was called "the haunted house," he thought; it looked ghostly enough!

The front gate was swinging idly in the wind. He remembered how he had first met Nedda, at that very gate, when, driving from farm to farm in his hired trap, taking orders for rakes, hoes, harrows and what not, he had stopped one day to beg a drink of water from the pretty, brown-eyed girl in the blue gingham dress who was playing with a white kitten on the doorstep.

That was Nedda—the only child of the old farm couple—a spoiled child, perhaps.

He had often felt thirsty after that, he remembered, and somehow no other water tasted as good as that from the Deming well.

And Nedda was to have been his wife some day. Then—they had quarreled. What about he could hardly remember now, five years afterward.

He was walking slowly up the path [illegible]—past the clump of mournful cedars—down the slope to the orchard.

What a stubborn fool he had been—going away without patching up their little quarrel—and then waiting so long; trying to make her write first! And when he did write—well, it must have been too late. The letter, in his business envelope, had come back to the offices marked "Removed—no address."

He walked slowly down the orchard path. This was where they used to meet—down at the gnarled old tree by the spring. He wondered if she had kept the little turquoise ring he gave her—wishing it on, here by the spring.

"Yes—this is a haunted orchard," he said bitterly—and started back, for at the sound of his voice a slight figure rose from the shadows beside the spring.

Nedda's face in the moonlight—Nedda's voice as she cried out.

"Why, you are real!" he stammered, clutching at her slim, warm wrists.

"Jack!" she gasped. Then, drawing back, she raised puzzled brows. "Real!"

"They—they told me you—had died," he gulped. Surely, this was Nedda, the real Nedda. Was he to lose her, after all?

She shook her head wearily. "Mother died—and father," she sighed. "They took me away to get well, and it was they who died."

Her lip quivered. Then she flung up her head proudly.

"But the old Nedda did die!" she said haughtily. "That poor little foolish creature did die! Oh, I'm different now. I haven't wasted these years out on the coast. I've studied—forestry, arboriculture, all that. So now I'm not going to sell our old farm. I'm going to make it pay. I came East yesterday. I'm over at Hopewell, where my cousins live now. I just drove over tonight to—to look at the place. My horse is over there in the shed." She gestured with a slim, white hand.

"Now, these apple trees are in a very bad condition, you see," she rattled on. [illegible]

[illegible] month it will be too cold. Then this soil needs more marl, and there are [illegible]

She was talking rapidly, nervously. Talking against time, perhaps. But Jack Clayton was not listening, anyway. That one gesture in the moonlight had told him all that he wanted just to know.

"So you've never taken off my turquoise ring," he whispered. And then "Nedda," he cried indignantly through the guilty silence. "Marl, and [illegible] apples, and pruning [illegible] come up here for anything of the sort, but just to look at our haunted orchard—just as I did."

And his lips touched hers.

Murray, the Waffle Fiend

By BARBARA KERR

(©, 1921, by McClure Newspaper Syndicate.)

"Isn't it a pity," sighed Ruth Gentry to her brother Bob as she took [illegible] some new arrivals at the rooming house next door, "that [illegible] houses that have seen better days must inevitably, like their [illegible] owners, go into the discard? I know that the Gentry home [illegible] when it contemplates [illegible] you and I are the only [illegible] keep up its respectability and prevent it also becoming a rooming house with noisy rooming-[illegible] down its walnut [illegible] clacking, gossiping [illegible] women infesting its [illegible]."

[illegible] "'Pon my soul, Ruth, [illegible] a man—why clacking?"

"[illegible]; they have nothing to [illegible]; their prying eyes follow me from [illegible] till I want to ask them to come over and help to do something [illegible]," [illegible] Ruth, who had been [illegible] that day if hers was [illegible] and kept house so [illegible] Bob.

"[illegible] an early breakfast if [illegible] five-thirty train, Buddy [illegible] that [illegible] your last [illegible]," and she rumpled his hair lovingly as she passed his chair.

She [illegible] next morning, [illegible] bungalow apron and [illegible] cap [illegible] down to prepare the waffles, her usual treat for Bob when he was going away for the day. They were very devoted, trying to make up to each other for the loneliness of the big house since their parents died.

Ruth paused a moment, thinking it time to run up and call Bob, but, hearing a noise of a moving chair on the porch, she ran out and in the hazy dawn, noting his comfortable pose, his feet on the balustrade, she slipped up and, nibbling his ear, said: "Waffles and maple sirup now ready in the dining car."

She darted back, snatching open the waffle iron and filling a nice, hot plate, placed it for Bob before he came into the dining room.

She was filling the iron when Bob entered the kitchen, paused at her elbow and in a most peculiar tone asked: "May I inquire who is the waffle fiend?"

Ruth looked up, trying to fathom his expression; he gazed at her. "Yes, stows them away like a tramp." "The tinkle of a knife against a glass in the dining room startled her. She rushed in; a nice, mellow voice asked:

"Any more of those wonderful waffles, darling?" and a pair of fine brown eyes smiled at her as she leaned weakly against the door, while Bob, bristling like a terrier, strode forward.

"What do you mean by speaking to my sister in that way?"

"Yes, and what do you mean by coming into our house in this way?" demanded the angry Ruth.

The young man arose hurriedly to his feet, looking from one to the other, as if not sure that he was awake.

"My waffles are burning," moaned Ruth, dashing to the kitchen.

"Please hurry—oh, what a tragedy!" exclaimed the unexpected guest. "And the only real waffles I've tasted since my mother died!"

Of course, with the mutinous blue eyes of Ruth in the kitchen, the men soon adjusted everything. Bob saw how easy it was for a stranger next door to wander onto the wrong porch at such an hour, as he was to motor to a nearby village at daybreak. So when Ruth returned with another plate of hot waffles they were so engrossed with each other that Bob almost forgot to introduce her till an exasperated clearing of her throat warned him. Both rose promptly.

"Pardon, sis," begged Bob. "This is Murray McIlvain, brother of an old college mate; he's rooming next door. We've been brushing up mutual acquaintances."

Ruth, her face a study, looked as if she were not going to acknowledge the introduction, but Mr. McIlvain, with [illegible]

[illegible] held out [illegible] who [illegible] these will not [illegible] innocent [illegible] blush. Be[illegible] the [illegible] think of [illegible] ear.

[illegible] blushed. "The waffles," she [illegible] an excuse to take refuge [illegible] kitchen. When she returned she [illegible] the rallying of Bob and [illegible] about her biting his ear.

"You must have thought it a most playful waitress," teased Bob.

"Well, I was a bit stunned," admitted Murray, "but after seeing and tasting those waffles I was just going to ask her to bite the other ear, when you appeared."

"How about your train, Buddy?" warned motherly Ruth.

Bob sprang up. "You'll excuse me, Murray; we'll continue this evening. Maybe there's more batter, sis"—

Reluctantly Ruth admitted a little more. "Enough for you and just one little quarter for me?" pleaded Murray; he wasn't going to be hurried off before he had won a welcome from Ruth.

"Your taking our house for a rooming house was almost the unpardonable offense," declared Ruth, smiling as they leisurely finished their waffles in spite of the motor horn, "but I guess we'll have to overlook it on Bob's account."

"Reminding me," exclaimed Murray, "of what they are thinking of the stranger who wanted the five o'clock breakfast. I awoke early, walked around the block to get a mouthful of air and was just thinking of the old ham-and breakfast when——" and he felt of his ear.

"And I thought it was Bob looking for the morning paper," laughed Ruth.

"Do you often have waffles for breakfast?" asked Murray.

"Now and then," admitted Ruth, "but generally too early for the neighbors."

"I love to get up early for waffles—maybe I might be called over some time—our porch is so near," and his eyes were appealing.

"I'll ask Bob what he thinks about it," said Ruth.

But she didn't need to, for Murray asked Bob himself, and he asked him a lot of other things, asked him to look up the McIlvains and one Murray especially and find out if he was fit to be his brother-in-law, and wouldn't he use his influence with his pretty sister?

Bob was delighted, declaring that the only thing against Murray was that he was a waffle fiend, but if Ruth wanted to take the contract of baking the waffles and they would agree to set up housekeeping in the Gentry mansion, he'd have no objection to him as a brother-in-law.

Of course Ruth agreed after a reasonable amount of persuasion to take the waffle contract and the Gentry house by Murray's agreement was saved from becoming a rooming house.

OLD FRENCH BOTTLE BOOKS

Pronounced Favorites With the Bibulous—Volumes That Were Bound in Human Skin.

An article in the Bookman by Walter Hart Blumenthal tells of the most curious books in the world, and among them he classifies the French bottle books, which were used a century ago to carry more fortifying liquors than the literary. "Bottle books are as rare as fish that climb trees," says Mr. Blumenthal. "These curiosities were made in southern France about a century ago, and were held in high esteem by judges, advocates and the learned gentry generally. The legal profession was given to carrying its authorities back and forth under its austere arm. Hence these bottle books, which were made of lustrous decorated dark blue faience, in appearance not unlike tooled levant. The contents were wholly liquid, or partly literary with a fortifying compartment. Then the bibliophile took a nip for his constitution. Now the constitution nips the bibulous bibliophile."

Nor are the book curiosities all so redolent of the barroom. Mr. Blumenthal goes on: "More than once have books been bound in human skin. A Russian poet is said to have presented to the lady of his affections a collection of his sonnets bound in his own integument. The astronomer Flammarion having admired the exquisite skin of a beautiful lady of title whom he met at a reception, she bequeathed it to him. When she died he received a square of tissue and, in accordance with instructions accompanying the legacy, had a copy of his own work, 'Ciel et Terre' bound therein."

She Hurried Up.

"Ethel," he whispered, "will you marry me?"

"I don't know, Charlie," she replied coyly.

"Well, when you find out," he said, rising, "send me word, will you? I shall be at Mabel Hick's until 10 o'clock. If I don't hear from you by then, I am going to ask her."

A De Laval
Cream Separator
will last a lifetime

MANY DE LAVAL Cream Separators have been in continuous service for twenty, twenty-five, and even thirty years.

In fact, we never hear of De Lavals wearing out. At most they are outgrown and replaced by new De Lavals of larger capacity and later design.

De Laval durability is due to simplicity of construction, low bowl speed, high-grade materials, and careful workmanship. Every bearing surface of the machine is oiled from one oil cup. This insures correct lubrication, lessens wear on parts, and helps to make the De Laval easier to turn.

Because of its greater durability, the De Laval is the least expensive cream separator to own.

We'll gladly show you why
the De Laval lasts so long

Sooner or later you will buy a
De Laval

SUBSTANTIAL FLOOR FOR POULTRY HOUSE

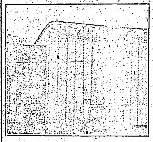
Specialists Say There Is No One Best Kind.

Everything Depends on Soil and Use of Structure as to Which Is to Be Preferred—Cement Is Most Sanitary.

(Prepared by the United States Department of Agriculture.)

Cement floors for poultry houses are championed by some poultry growers, while others declare a good dirt floor is the only kind to use. The fact is, poultry specialists in the United States Department of Agriculture say, that there is no one best kind of floor. It all depends on the soil, and the use of the house as to which type is to be preferred.

On light, sandy, well-drained soils a dirt floor is satisfactory, especially for small or colony hen houses. Such floors should be from 2 to 3 inches higher than the outside ground surface, and it is advisable to renew them every year by removing the contaminated surface down to clean soil, and to refill with fresh sand or fine gravel and earth.



A Plain and Suitable House for Poultry.

A board floor is generally used where the level of the floor in the house is from 1 to 3 feet above the ground surface, and in portable houses on land which is not well drained. Board floors harbor rats, and decay quickly, and should be raised some distance off the ground so that cats or dogs can get under them, and also to allow a free circulation of air to prevent the wood from rotting.

Cement floors are adapted to permanent laying houses, to brooder houses, incubator cellars, and to all permanent houses where an artificial floor is required, and can be built on the ground level. These floors are easy to clean, very sanitary, rat proof, and comparatively inexpensive if one has a cheap supply of gravel or sharp sand.

BROWN-TAIL MOTH IMPORTED

Inspection of French Nursery Stocks Results in Uncovering Many Nests of Insects.

Federal and state inspection of French fruit and rose stocks during recent months has resulted in the interception of 85 nests of the brown-tail moth in 32 shipments, in contrast with 63 infested French shipments which have arrived in this country during the last nine years. The finding of so many nests in such a brief period indicates that the French inspection service is much below the standard of previous years. To meet this situation, all French shipments of rose and fruit stocks are being fumigated at the port of entry under the direction of the Department of Agriculture, as well as inspected at destination by state inspectors. Furthermore, a warning has been sent to the French nurserymen and the French inspection service to the effect that if shipments continue to arrive infested with nests of this injurious insect, it may be necessary to cancel all existing permits to import French stocks.

Interceptions have been made by the state inspectors of Connecticut, New York, Indiana, Iowa, New Jersey, North Carolina, Pennsylvania, Maryland and federal inspectors in New York city, Philadelphia and Washington, D. C.

CONTROL OF BLISTER MITE

Very Thorough Spraying, Covering Every Part of Tree, Is Recommended as Satisfactory.

Early spraying will control the blister mite on apple trees. The trees should be sprayed when the trees are dormant or when the leaf buds are swelling with lime sulphur spray in about the proportion of one gallon of the concentrated lime sulphur to nine gallons of water. The spraying must be very thoroughly done, covering every part of the tree. Unless the spraying is done early the result will not be satisfactory.

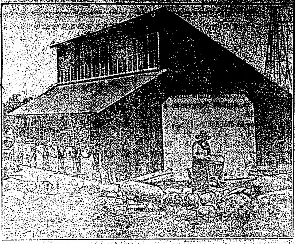
NOVEL AND [illegible] BETWEEN LANDLORD AND [illegible]



Fixed Wages Plus a Share in Profits Give Zest to Farm Work.

(Prepared by the United States Department of Agriculture.)

"I took the same interest in my work as a tenant as I take in my own farm. I began work without a dollar and with very little knowledge of farming, but while I was on the farm I learned a good deal. I had ample opportunity to study the principles controlling crop growth, soil improvement, stock management, etc. The inspiration I received was valuable indeed, and during my period of service I earned enough money to buy the small farm on which I now live."

This extract from a statement made by a former farm tenant employee, now a farm owner, reviews a relationship between owner and tenant that a great many persons on both sides of the farm-landlord situation may well envy. There is possibly no subject connected with the business of farming which leads to as many misunderstandings, dissatisfactions and mutual losses as the management of a farm by a nonowner. Somebody has said that nothing short of application of the golden rule would ever bring about satisfactory arrangements between the owner and occupant of a farm, and yet, in this case, there was nothing eleemosynary in the arrangement.

Tested by Fifteen Years' Trial.

The man who made the statement quoted above was for a number of years the manager of one of two ordinary-sized hog farms owned by a man in Illinois, and the plan under which he was engaged as farm manager has been followed by the owner with almost unfailing success for more than fifteen years. Briefly, the plan was nothing more or less than a straight annual salary which included tenant house and the usual garden and poultry perquisites, and, as a bonus, a share of the net profits.

The profit-sharing plan has served to stimulate the efforts of the employed and has greatly lessened the supervision necessary on the part of the owner. By the use of the telephone and occasional visits he is able to keep in touch with the farm problems and to co-operate effectively with the manager. Since the owner was farming himself it was important that the management of his other two farms take as little of his time as possible. Thus far the managers have been selected from the men employed on the home farm, which serves as a training school.

How Net Income Is Determined.

The managers are given a regular monthly wage and a bonus consisting of one-third of the net farm income. In determining the net income 5 per cent interest on the valuation of the property is first taken out, as due return for capital, after which all expenses are deducted, such as for thrashing, the manager's wage, extra labor, machinery repairs, depreciation, and the cost of fertilizers and seeds.

Each of the two managed farms has a house for the manager, who also can use the work horses to drive for personal use, has a garden, and a cow or two for supplying the family with milk and butter. Fifty chickens are furnished, and the family is permitted to raise as many as possible to supply the needs of the farm table, but on December 1 all the chickens above the original number must be sold, and the landlord gets one-half the receipts. The purpose of this limit on chickens is to enable the manager to have his own poultry supply without taking undue advantage of his opportunity.

In order to calculate the amount of money which the manager is to receive on this plan it is necessary to do a certain amount of bookkeeping. This is left to the owner, who keeps a set of farm accounts, and on March 1 a complete inventory is taken and a yearly summary of the farm business is completed. In cases of disease, poor crops, or a partial failure which is unavoidable, thus cutting down the income of the manager, the owner makes some allowance and gives the manager, in addition to the wages he has received, what he thinks is due him for the work he has done, and the responsibility he has assumed.

In the period before war inflation the managers made from $41 to $49 per month the year found, in addition to having their rent, garden, milk, butter and eggs. The manager of the smaller farm, comprising 96 acres, received $35 a month straight wages for four years up to 1918, and his bonus averaged $168 a year. The manager of the other farm, comprising 160 acres, formerly received $30 per month and was increased to $35.

Manager Well Paid.

When the fact is taken into consideration that the managers employed under this system are provided with houses in which to live and are given the privilege of raising their home supplies of vegetables, milk, poultry and eggs, it will be seen that their necessary expenses are inconsiderable, and it must be conceded that they are well paid for their services in view of the fact that they have no investment risk. The length of time which the men remain on the farms shows that this method of employment must have been satisfactory both to employee and landlord in these cases. It should be pointed out, however, that the tenant should have absolute confidence in his landlord before he would be justified in working under this system.

TOMATOES ARE BEST IF RIGHTLY PRUNED

Fruit Is Larger, Cleaner and Superior in Flavor.

Grown in Home Garden Staking and Pruning Require Little Trouble and Will Fully Repay Trouble, Say Specialists.

(Prepared by the United States Department of Agriculture.)

A thrifty tomato plant left to itself will spread over a space from 4 to 6 feet in diameter and will produce a peck or more of tomatoes. If staked and pruned it will yield about the same quantity of fruit, the tomatoes will be larger, cleaner, better flavored, and superior in every respect, and enough space can be conserved to accommodate five other plants cared for in a similar manner, say garden specialists of the United States Department of Agriculture. The staked and pruned plants are easily sprayed, and will continue to produce fruit later in the fall than plants which are allowed to spread naturally. As a rule, also, the pruned tomatoes will mature earlier. On the scale on which tomatoes are grown in the home garden, staking and pruning require little trouble, and will fully repay the effort.

When the plants begin making a vigorous growth, shoots will appear in the little pockets where each leaf joins the stem. Later the blossoms appear on the opposite side of the stem. In pruning the plant, remove all these side shoots and those around the base of the plant, being careful not to disturb the blossom clusters. The shoots, sometimes called suckers, should be pinched off shortly after they appear. The main stem can be carried to the full height of the stake, then allowed to hang over. By this time six or seven blossom clusters, on which the fruit is developing, should be set on the stem.

WOODLOT LIKE BANK

A woodlot should be treated as the principal in a savings bank. The annual growth of wood corresponds to compound interest. When you cut out more than the equivalent of the growth, you are drawing upon your principal.

SILO OF GREAT IMPORTANCE

Never Discarded When Properly Built and Filled With Corn at the Right Stage.

No silo which was properly built and filled with corn at the right stage of maturity has ever been discarded. Neither is there any farmer who has had a silo on his farm and used its succulent, nutritious feed that is willing to do without one.

CHEAP SEEDS ARE EXPENSIVE

Success of Garden May Be Jeopardized by Unwisely Trying to Save on This Item.

Cheap garden seeds are likely to prove expensive at any price. The cost of good seeds is relatively small and the success of the garden may be jeopardized by unwisely trying to save a few cents on this item.

Young Fowls When Old Enough to Shift for Themselves Must Be Given Care.

NEGLECT IS CAUSE OF LOSS

Bulletin Given Out by Department of Agriculture Especially for Beginners Gives Essentials for Proper Growth.

(Prepared by the United States Department of Agriculture.)

The enthusiasm with which many poultry raisers, particularly beginners, start in the spring with young chicks sometimes lags as the season advances and the chicks get old enough to shift for themselves. If care is neglected at this period, however, success is improbable. The baby chicks may be smart little fellows from strong, vigorous parent stock, and they may have been brooded carefully for the first two or three weeks, but unless they receive proper care and management during their later growing period they will not develop properly, and many of them will be lost by sickness and disease. This is the timely warning made by poultrymen of the United States Department of Agriculture in Farmers' Bulletin 1111, "Management of Growing Young Chicks," published by the department, in which is given the essentials to proper growth and development of chicks. The bulletin is written briefly and in simple terms for beginners, especially members of boys and girls' poultry clubs.

Suitable Food and Care.

The chief essentials to the proper growth of chicks, according to the bulletin, are good coops, or houses, cleanliness, proper feed and water, shade and free range. Growing chicks should be provided with large, roomy coops or houses, which will give them a comfortable place to stay at night and during stormy weather. The bulletin suggests no particular kind of house, but states it should be so built that it will provide the chicks with plenty of light, pure air and sunshine, and protect them from dampness and storms of all kinds.

Member of Boys' Poultry Club and His Flock.

Chicks should never be crowded in brood coops, for crowding will cause them to become overheated, resulting in improper growth and sometimes in dead chicks.

Sickness or disease usually starts in unclean quarters, and in such places lice and mites are always more plentiful, the bulletin says. The coops should be cleaned and sprayed once a week, and clean shavings, chaff, or sand put on the floor. Examine the chicks and houses often for lice and mites, and if found they should be gotten rid of at once. Farmers' Bulletin 1110 gives directions for fighting lice and mites.

Feed Right for Rapid Growth.

The three kinds of feeds most necessary for rapid growth are grain feed, green feed and dry mash. A grain mixture should be fed night and morning, giving as large a quantity as the chicks will eat clean, but no more. A good mixture for growing chicks consists of three parts cracked corn, two parts wheat and two parts hulled oats. Kafir corn or rolled or hulled barley may be substituted for hulled oats. A supply of fresh green feed is almost as necessary as grain for growing chicks. They obtain plenty of it if they have free range, but if kept in confinement, lawn grass, beet tops, cabbage, lettuce or other such green feed should be supplied regularly.

Grit and oyster shells should be provided so the chicks may help themselves whenever they wish. When sour milk can be obtained it should also be kept before the chicks, as no feed is regarded better for them. When this is given the amount of beef scrap in the dry mash may be reduced one-half. Plenty of fresh, clean water is absolutely necessary, and in hot weather it should be provided twice daily in dishes that have been thoroughly cleaned.

The bulletin emphasizes the importance of free range and shade for growing chicks. They are necessary if chicks are to grow rapidly and develop into vigorous fowls. When growing chicks have free range they obtain quantities of green feed, bugs, worms and other things, therefore they require less grain and are less liable to sickness and disease.

"Paper Never Refused Ink."

Not long ago, at the most famous hotel in the United States, the cashier, an Irishman, hesitated about cashing a check for a newcomer. The guest indignantly showed his handsomely engraved business card which indicated that he was president of a big-sounding corporation—the North and South American Development company, or some such name. Still the Irish cashier hesitated. Smilingly he tapped the engraved card with his index finger and sagely remarked:

"Paper never refused ink."

There's a deal of philosophy in that. The remark should be remembered by all business men who are too easily impressed by a pretentious letterhead, or by a beautifully printed stock certificate. You can say anything you wish to on paper and the paper can't help itself.—Fred Kelly in the Nation's Business.

COWPEA HARVESTER.

The bean harvester, of which several types are commonly employed in harvesting field beans, will work well with cowpeas planted in rows, according to specialists of the United States Department of Agriculture. The most successful of these harvesters are constructed so that the long knives run under the vines, cutting off the stems beneath the surface of the ground.

Beginning of Electrical Study.

The scientific study of electricity began in the sixteenth century, when certain experiments were shown to Queen Elizabeth.

Mrs. B. Habedank is recovering from her illness.

Miss Agnes Johnson has been on the sick list for the past week.

Mr. and Mrs. R. H. McDonald were in Thief River Falls Wednesday.

Selmer and Rudolph Dahl purchased a new Ford car last Wednesday.

Iver Westby autoed to Thief River Falls Wednesday on a business trip.

Mrs. Albert Halvorson and Mrs Melvin Stephenson will entertain the Ladies' Aid at the church May 19.

Lewis Nitzsche died suddenly yesterday at his near Neptune. He leaves a wife and nine children.

Miss Millard, who has been visiting Mrs. R. A. McDouald, left Wednesday to visit friends at Dugdale.

Allan Turnbull is rejoicing over the receipt of news frow Missouri, where Mrs. Turnbull is visiting, of the safe arrival of a baby girl

Ole Mabist, assistant state boiler inspector from Marshall county, wrs in town last Friday and inspected the boiler at the school house.

Tallak Brattland, who is engaged in dredging work in Texas, arrived here Tuesday, one day late to be present at the funeral of his brother, Ole Brattland.

Mrs. T. O. Berg and Mrs. Emil Sigerud of Reiner visited at the Martin Anderson home Sunday. They also spent part of the afternoon with Mrs. John Sund.

L. P. Poppenhagen's son Phinnie had a finger amputated Monday. Blood poisoning had developed from a mere scratch and it was thought necessary to take off the finger to save the hand.

For sheep shearing and docking lambs write to or call on Wm. F. Baldwin, Neptune, Minn. I am an experienced sheep shearer and lamb docker. Average shearing 100 sheep per day; average docking 900 lambs per day. m13 2t

Mr. and Mrs. Elev Aakre of Reiner were pleasantly surprised last Saturday evening by a number of friends from Holt, the occasion being the 25th anniversary of their marriage. They were presented with a handsome silver cup containing a goodly number of silver dollars.

DIED

On Saturday, May 7, at the hospital at Thief River Falls, Matt Urchetz, whose home was six miles southwect of Goodridge. His death was the result of blood poisoning, from gangrene of the toes. On Tuesday of last week his leg was amputated just below the knee, but that did not save him. Mr. Urchetz has been a resident of this county since 1915, having purchased the Iverson farm. He leaves a wife, one daughter and two sons. He was 62 years of age.

Funeral services were held Tuesday at the Brunkeberg church, by Rev. E. O. Sabo and interment made in the cemetery there.

Ole Brattland died Friday, May 6, of pleurisy and pneumonia, after an illness of about ten days. He was 40 years of age. He is survived by his wife and four children, besides two brothers.

Funeral services were conducted from the home Monday afternoon by Rev. G. A. Hanson and the remains were interred in the Torgerson cemetery.

Walter Seaman, Grygla hotel man, died suddenly Tuesday morning while sitting in his chair. He had been suffering from enlargement of the heart and had been warned to expect death at any moment. The body was taken to his former home in Ohio for burial.

THE GOODRIDGE [illegible]

VOLUME XV, No. 21. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, MAY 20, 1921 $1.50 PER YEAR

Suicide

Ed Torgerson killed himself Tuesday afternoon by first taking poison and that not acting promptly enough by cutting his throat. He had been making his home with Gunder Nesland, a few miles southeast of Grygla. The Nesland family were all away from home and he was left alone. The body was discovered on their return, lying out behind an old thresher. He had been married, but the married life was not pleasant and there had been a separation about seven years ago. It is supposed that brooding over his troubles led the deceased to the rash act.

The Beltrami county coroner was notified and arrived here yesterday and went out rnd viewed the body.

Big Opportunity

Our warehouse at Goodridge is for sale. If interested, write or call at Tessum Seed, Grain & Supply Co., office, Thief River Falls, Minn. This is an exceptional opportunity for a good flour, feed, seed, and produce business, as well as for storoge of goods shipped in for inland towns. Let us hear from you. m12 2t

Make 'Em Use Oxen, Julius

Julius Kruttschnitt, chairman of the Southern Pacific railroad, was a famous railroad engineer before he became an operating man.

It therefore comes with the greater jolt to read that Mr. Kruttschnitt, in his special plea to the senate committee for consideration for the railroads, urged that congress stop the use of publicly built highways for common carrier purposes except on payment of tolls and adequate regulations.

Is it possible that a railroad engineer of standing means to suggest seriously that the public shall forego the benefits of the gasoline engine and the modern pavement?

Is this to be the nation of the tallow dip?

What Mr. Kruttschnitt means, of course, is that those who operate common carriers on public highways shall have their rates adjusted so that they will not take from the railroads the freight that the railroads want to handle.

But that is not tha way to get at it. The way to keep the motor truck from taking freight from the railways is to put the rails in a position to compete. If it is necessary to dehydrate and gasolinize the railroads they will have to come to it.

The United States is not going back to the tollgate, the ox-cart and the mud-scow.—Daily News.

New Livestock Agency Prepares For Drive

Every co-operative livestock shipping association in Minnesota is to be offered an opportunity to join in the movement to centrolize co-operative livestock marketing, under plans drafted by the board of directors of the Central Co-operative Commission company. This firm was launched at a convention of shipping association delegates in St. Paul. The board of directors has empowered W. A. McKerrow, secretary of the Minnesota Livestock Shipping association, to conduct statewide organization work. The directors also voted to increase the capital stock from $10,000 to $25,000. The enthusiastic response of local co-operatives, Mr. McKerrow said, made it advisable to provide more shares of stock to be available for issue.

Farmers Buy Carload Lot

The farmers of Clearwater county annually use large quantities of dynamite in their land clearing operations. This year, according to the Gonvick Banner, the users of the explosive pooled their orders with the Farm bureau and purchased a carload of dynamite at a saving of $1500. It is thus evident that the Clearwater county farmers are making practical use of their farm bureau and receiving direct financial gain from its operation.

Wool Pool Meeting

Wm. L. Cavert, farm management demonstrator, will hold a wool pool meeting in Thief River Falls at 2 p. m. next Tuesday, and at Grygla on Wednesday.

Moylan News

Garfield and Arthur Erickson, Herman Solley and Ottar Fiskevold visited visited with the Kiesow young folks Saturdad evening.

Mr. and Mrs. Otto Kiesow and family were visitors at the Herman Kiesow home Sunday evening.

Miss Lena Kiesow returned home from her work at Thief River Falls Saturday afternoon.

Miss Mildred Johr was a visitor at Esplee Sunday.

Lena, Rosa and Erick Kiesow were business callers at the Carl Erickson home Monday noon.

Arthur Sund was a visitor at Erickson's Sunday evening.

Edmund Fiskevold, Henry Olson and Garfield and Arthur Erickson practiced playing ball at Albert Wilkens' Sunday afternoon. How the game turned out we have not heard.

Herman Kiesow and son Herman were business callers at Goodridge Monday.

Mrs. Hans Fiskevold was a visitor with Mrs Carl Ericksan Monday afternoon.

Mr. and Mrs. Bert Gerrlings were callers at Lamporter's Sunday.

Carl Zinter visited with Melvin Wilkens Monpay afternoon.

Mr. Opsata was a business caller at Erickson's Monday afternoon.

Lillie and Oscar Erickson are visiting with Selmer Solly while Mrs. Solly makes a trip to Goodridge.

Mrs. Chas. Sheridan and family were callers at Lamporter's Monday afternoon.

Edmund and Ottar Fiskevold, Henry Olson, Herman Solly and Arthur Sund visited with the Erickson young folks Sunday evening.

EYES EXAMINED AND GLASSES FITTED

One of the members of Drs. Larson & Larson, Optometrists, will be at the Goodridge Hotel, Goodridge, on Thursday, June 9.

If troubled with headaches, nervousness or eye disorders of any kind needing glasses, or glasses repaired, consult him.

Artificial eyes fitted.

The Newberry Case

The Spooner News says: "The Supreme Court says Senator Newberry of Michigan wasn't guilty. It has the last say."

Let us rather say "the last guess." But at that the court didn't say the Senator wasn't guilty. It simpy said the law was nnconstitutional and did not pass on the guilt or innocence of the defendants. They will ever remain guilty in the minds of tha American people. Senator Newberry thu excessive expenditure of money practically purchased the nominauion and the pity of i' is that he escapes punishment.—Red Lake Falls Gazette.

Dairymen Install Own Manager

The Minnesota Dairy council has employed Fred Warber, a former Minnesotan, as field manager in an effort to improve marketing conditions and save money for producers by working out economical shipping routes and arranging for shipping in large quantities. Lack of means to command the best prices through uniform grades, quantity shipment and advertising, ffeet freight rate savings, cost Minnesota farmers 10,000,000 last year, members of the dairy council estimate.

2,388 More Farmers

Every township in 55 Minnesota counties has a farm bureau organization, the state farm bureau federation announced today. Two counties which have just compleed their organization work had recorded a total of 2,388 farm bureau members, with many townships reporting every farmer on the membership list, Freeborn country enrolled 1,506 farmers and Itasca county 882.

Notice

Our warehouse at Goodridge is for sale. If interested, write or call at Tessum Seed, Grain & Supply Co., office, Thief River Falls, Minn. Community Club Meeting

The Community club will meet this evening at the school house

A good social time is anticipated and a good program has been prepared.

There will be an old-fashioned spelling match, with Morgan Vaughan and O. N. Urdahl as leaders.

There will be a peanut hunt with Miss Wildes and Prof. Norby as leaders.

There will be community singing, and the band will furnish instrumental music.

Last, but not least, there will be a lunch after the meeting adjourns

Acts of A Non-Gentleman

One day as I was walking on the sidewalk, I saw a man walking about one block ahead of me. I walked very fast to catch him, as I wanted to see what kind of a man he was.

He looked very ragged and dirty, and acted very queerly. I was almost afraid of him, but I thought I would stay as near behind him as I dared to. He carried one hand in his pocket, and in the other hand held a suit-case, very badly torn. His clothes were almost falling out of it, and they were as ragged and dirty as those he wore. He was a very tall and slim man with a rather large head.

He looked as if he had never changed clothes for years and years. His face was black as coal; I knew he was not a negro, as there were a few white spots on his face, but I am sure that he had never taken a bath for several years.

He had a red face and nose, which was prominent and pointed. There must have been so much dirt on it, that it was pointed on that account.

The Non-Gentleman had a big corn cob pipe in his mouth. I should say it must have been about nine inches long. The smoke was rolling out of it as if it were a chimney, covering him with fanciful frills. Besides this he had tobacco in his mouth which he was spitting all over the sidewalk his face and clothes.

He had dark brown eyes, and his hair black as coal, and so long that it hung way down over his shoulders.

The Non-Gentleman had very few teeth, and what he had were so brown with tobacco that they did not look like teeth, but they surely must have teeth all the same. I walked behind until he came to a hotel, which he entered. I pretended that I had never seen him. He went in first, and I went in about five minutes after him. He was still standing by the door, but very soon he went to the table and asked for something to eat. He talked very roughly and coarsely, and when I heard him talk I became very much frightened and was about to run out. However I thought I would stay there and find out some more about him.

When he asked rhe waitress for something to eat, she went out to the kitchen to get it, remaining there about two minutes. He became impatient and begin calling her names when she came. He swore almost every word he said. He never talked without swearing, as much as I heard him talk.

He had very bad manners while eating. He would stand up and reach way across the table, putting his dirty, ragged clothes in the food. He had peculiar habits; he would eat the desert, then the other food such as potatoes, meat, beans, etc.

If you ever saw him you would surely think he was a hobo, His coat was so ragged that it was harn to keep on his back

There were no buttons on it, as it was hanging open. He spilt molasses and syrup on it. If you would ever touch him, I'm sure you would stay there as it is very sticky

The Non-Gentleman had very large feet. I'm sure his shoes were size thirteen and a half in mens size. Yet the shoes were not big enough for him, so he cut the toes of them, leaving his toes sticking out about two inches or more. He stayed at the hotel over night, then the next morning he was going to another station and tramp around. I have never heard or have never seen anything of him since that time at the hotel.

The story was written for a composition in Grammer class by Florence Johnson, Miss Ruth Anderson being her teacher.

Band Concert at Erie

The band went to Erie Sunday and gave a concert in the hall. Although there was a light attendance the band was in good form and did themselves and their instructor, Mr. Nystul, credit. A good band is a live advertising asset for a small town.

A number of Goodridge people accompanied the party.

DIED

Lewis Nitzschke died at his home near Neptune Thursday, May 12, of heart failure, the result of an attack of influenza about a year ago. He is survived by his wife, ten children, two brothers and two sisters.

Funeral was conducted Monday by Rev. H. Lutz at the school house near Neptune and the remains were interred in the Neptune cemetery.

Word has been received here of the death on May 5 at Havre, Mont., of Mrs. Tonseth, wife of Rev. G. A. Tonseth. Mr. Tonseth was formerly pastor of the Norwegian Lutheran church here, and left in June, 1919. They resided for a short time in Thief River Falls, then removed to Alberta, Can. She was a young woamn, being only 25 years old. During her stay here she was very popular, not only with the ladies of her own congregation, but with the whole community.

Give Us The News

Never find fault because a newspaper fails to give every scrap of news so long as you take no pains to give the editor information. The average editory isn't a medium or a mind reader, but he gets the news the same way that a milkman gets his milk by pumping. This is true especially of that class of items as personals. Rightly they are not "puffery", but simply personal mention for the information of local readers and those having friends visting them should always let the local editor know it, and he will always be glad to give it the proper notice. So if you have a bit of news worth printing put it in the way of our pencil pusher.

SEA SHELLS AS CURRENCY

Were Once Extensively Used as Medium of Exchange Among Indian Tribes Along Seashore.

"Butter tasters" is the name children give to the violet-tinted, worn fragments of clam shells that are to be found on most beaches. These "butter tasters" were an important medium of exchange among the Indian tribes living along the shore in their trading with other natives farther inland.

It can readily be understood that Indians sufficiently adept in the art of chipping arrowheads and other implements of hard flint could easily manufacture rude "money" out of the more attractively colored pieces of these water-worn shells; and this they did, giving to this medium of exchange the name luckahauk, somewhat after the style of wampum.

It may be surprising to many, especially to craft workers, to know what really beautiful "stones" these same so-called luckahauks will produce when cut and polished into symmetrical form from pieces of sufficient thickness and showing the rich and beautiful violent coloring that many of them possess.

Such as are found on the beach are necessarily dull, with no polish, due, of course, to the wear of the sea and sand, but by proper treatment on the laps are brought to a very high polish and look very rich, indeed, being entirely unlike any other "gem."

Having considerable hardness, they will wear almost indefinitely when once polished. The colors blend beautifully with silver, either in bright or antique finish, while their beauty is heightened by treatment or embellishment with small baroque or seed pearls, small amethysts or other harmonizing stones.

Clever Smuggling Scheme.

Two customs officials were on duty the other day on the road from Elsenhen when their flagging attention was attracted to a good-looking young woman approaching their post, according to a dispatch from Brussels to a Paris paper. She appeared to be physically ill at ease. The men drew near to question her and one of them quite inadvertently touched her decidedly opulent—er—corsage. It was as hard and unyielding as steel. Surely—but no—further investigation disclosed a breastplate so fashioned as to form a receptacle. This receptacle was full of alcohol.

Another container, fashioned with equal skill and artistry, was worn on the back. The young woman was taken to the Arlon jail.

"Perfectly Scandalous"

By H. LOUIS RAYBOLD

(©, 1921, by McClure Newspaper Syndicate.)

That was the unanimous verdict of the rocking chair brigade as it rocked and knit and gossiped away the summer afternoons on the broad veranda of the Willard Mountain house. "Perfectly scandalous, my dear!" And, no doubt, the sentence was a just one.

At any rate, the facts apparently spoke for themselves. Marion Belmont had arrived only two weeks ago. Two days later had come John Anderson Gray. That much information the hotel register vouched for. Yet in the ridiculous short time since, the two had scraped up an acquaintance, developed it into a flirtation and were now spending hours together, unchaperoned, climbing the mountains, paddling on the lake or occupying the back seat of the hotel bus, with Pete hired to drive them about the country-side.

"They didn't come in until twenty-five minutes past eleven last night," whispered Miss Lapham with pursed lips and hinting eyes. "He left her outside her door, which is opposite mine, and I heard them giggling and laughing for quite ten minutes!"

"Yes," went on Mrs. Otis, who, except by the grace of applied chemistry, would have been decidedly white-haired, "and every morning before breakfast she is down waiting for him on the veranda!" The old ladies knitted faster than ever.

Even little Miss Scobie could not refrain from adding her contribution to the rest, and she was the least gossipy of the whole crew. "I was up in my room getting ready for my nap," she breathed, "when I happened to look out of the window. They were coming up the path by the spruces. And just before they reached the turn they stopped and I think—I am sure he kissed her!"

Meanwhile the shocking pair were idly drifting in and out of pine-scented, beauty-haunted bays of the little mountain lake. Marion Belmont, according to the register, sat lazily back against the cushioned thwart of the canoe, her slim hands folded on the soft sport hat in her lap, her eyes resting dreamily on the tanned face of the man in the stern, John Anderson Gray, according to the register.

"Alan," she said suddenly, "does it seem possible that you have been here nearly two weeks? How the time has flown!"

"It has, indeed, Betty," he replied. "And, hang it all, I have simply got to get back the first of next week."

"I know," she said. "And of course I must, too."

"We might as well go together, I suppose," he said.

"Wouldn't it look—rather odd?" she asked, hesitatingly. "I am afraid we have come in for considerable discussion as it is from the row of Mrs. Grundies on the veranda!"

"I've an idea," suggested the man. "Let's give them something really worth worrying over. Let's elope!"

The person addressed dropped her eyes. "Oh, Mr. Anderson, I mean John, I really, really do!"

And if Mrs. Otis could have overheard the conversation she would not have needed the little episode in the post office to supply her with the information she gave out later to her friends. Chancing to be in the little office immediately in the rear of Miss Belmont's white-lawned figure, she could not help overhearing the latter's inquiry for the mail. "Any letters, please," lifted the low contralto voice, "for Mrs. Brad—er, I mean, Miss Belmont?"

"She isn't using her own name," was the message Mrs. Otis brought her confederates in disseminating scandal. "And she's married!"

"I wonder if he knows," ventured Miss Scobie, who concealed a lurking admiration for the tall, well-knit figure of John Anderson Gray. "If he doesn't, it might be a kindness to let him know before she—er—spoiled his life, or anything like that!"

The idea held an appeal to them all, for, womanlike, they found it easier to blame the woman than the man. And, heads together, they plotted how to drop the news with seeming carelessness to the victim of the lady's charms.

They managed it that very afternoon with what might be called considerable finesse. Miss Scobie was the appointed spokesman. "Oh, Mr. Gray," she said invitingly as that gentleman came out from the office for the moment unaccompanied. "Isn't it a beautiful day? By the way, Miss—Miss Belmont seems so young, you would never think she was married!"

"Indeed not," agreed the gentleman addressed, most heartily. Then, in surprise, "Married? Married? Oh, no, not married!" And he disappeared suddenly within.

[illegible] they murmured. [illegible] nine o'clock train. A few minutes later the bus drove up to the veranda steps. And the waiting row of ladies gasped to see Pete piling in Miss Belmont's trunks. Was she following Mr. Gray? Probably [illegible] likely she could not bear [illegible] knowing her deception had [illegible]

[illegible] very trim in a [illegible] tailored suit, small, well-bound [illegible] and gloves, Mrs. Otis could not refrain from saying, "It would be so lonesome for you here without Mr. Gray."

The other woman started to reply, thought better of it, smiled whimsically, and bent down to the other's ear. "Don't tell a soul," she murmured. "Mr. Gray and I are—eloping!"

Mrs. Otis opened both eyes and mouth. "Eloping!" she cried. "But you are married!"

Miss Belmont nodded.

"And you're not a widow?"

Miss Belmont shook her head.

"And you're not divorced?"

Again she shook her head. "But we belong to each other," she whispered fatuously, "and that is all that counts!" and, seeing Pete stoop to crank up the bus, she walked airily down the steps and climbed in.

Some minutes later, as the White Mountain Express hummed over the rails, two of its passengers exchanged confidences.

"I always maintained, Alan," said one of them, "that the one person to really appreciate youth would be an old, old man, and the one person to enjoy a trousseau and honeymoon would be a wornout mother, tired of the responsibilities of housekeeping and making one gown do the work of three. Well, running away up here and pretending we didn't know each other was somewhat like that. Anyway, it was great! I hope we find mother and children all right."

"My conscience bothers me a little about the other guests—especially those old ladies," admitted her husband. "Perhaps we ought to have told them at the end."

"I don't think so," said Betty thoughtfully. "We will surely never see any of them again. And I really think they almost enjoy being shocked!"

And she was right. It had been the most wonderful summer of their lives for the Rocking Chair Brigade.

NEW ATOMS EVERY MINUTE

Old Idea That They Were Immutable and Unchanging Has Been Proved to Be Wrong.

The birth of an atom is just as important an event as the birth of a world. If not more so, for everything in the universe is composed of atoms, even the worlds themselves. Not long ago atoms were thought to be immutable and unchanging, but the amazing truth has just been disclosed that new atoms are born every minute, just as among the faraway stars new worlds are being born, says a writer in the Edinburgh Review.

Already certain kinds of atoms can be produced in the laboratory, and such a busines would become immensely popular if gold and silver could be created in the same way. This is not an idle dream, as might be thought, for already it has been discovered that all atoms are composed of the same kind of material—positively electrified particles and minute negative electric charges. All that remains is to learn how to put these quantities together in the proper amounts, just as chemists now put the proper atoms together and produce—though ofttimes under uncommercial conditions — synthetic rubber, silk, steel, artificial dyes and the many other miracles of the laboratory.

To understand how certain atoms have already been produced in the laboratory it is necessary to remember that there are about ninety different kinds of atoms, corresponding to the elements of which all other substances are made, and that all atoms contain equal amounts of positive and negative electricity. Just as solar systems consist of planets revolving about a central sun and are held together by the force of gravitation, so do atoms consist of negative electrical charges, revolving around a central, positively charged nucleus, held together by the forces of electrical attraction.

A Crimson Gulch Critic.

"What did you think of our performance of 'Hamlet' last night?" inquired Mr. Stormington Barnes.

"To tell the truth," answered Cactus Joe, "the boys were disappointed. Hamlet showed a lot of sense in the early part of the evening, but he behaved plum foolish in foolin' with a sword instead o' getting hisself a six-shooter."

NICOTINE SULPHATE IS LESS EXPENSIVE

Dusting Found Effective in Controlling Pests

Insects Hard to Reach With Ordinary Sprays Caught by Floating Dust Settling on Under Side of the Leaves.

(Prepared by the United States Department of Agriculture.)

To the sorrow of some of the insect pests which feed on the under side of plant leaves and so escape the effect of poison sprays, the bureau of entomology, United States Department of Agriculture, has been conducting experiments with nicotine sulphate applied in dust form. Mixed with kaolin to give the poison bulk, 40 per cent strength nicotine sulphate did remarkable work in controlling melon, cabbage and pea aphis, onion thrips and western cucumber beetles. All these insect pests are hard to reach with ordinary sprays, but the floating dust settles upon the under side of the leaves as well as on the surface. The experiments show that much larger areas can be treated in less time than is required by spraying. Moreover, the equipment necessary to apply the dust is much less expensive than a spray outfit and its cost of application is less than by the older method. It weighs less than spray and is more conveniently handled. It can be mixed with arsenate of lead or sulphur for use against insects and fungous diseases.

Hand Dust-Guns Are Effective on Small Areas.

FRUIT FOR AVERAGE FAMILY

Everbearing Strawberries Should Find Place in Every Garden Where There Is Space.

Plenty of vegetables for the table should be the first consideration of every home gardener, but fruit trees and some bush fruit should be planted, say specialists of the United States Department of Agriculture. It does not take a very large space for growing enough fruit and berries of the different kinds to supply the average family.

Everbearing strawberries, which were a novelty a few years ago, are now being planted by thousands of gardeners, and they should find a place in every garden of the temperate region where space will permit. Strawberries, however, can be grown under a very wide range of climatic and soil conditions. The same is true of the blackberry and the dewberry.

Raspberries are more limited as to distribution, and will not withstand the heat of summer in the South or the extreme cold of the North. Their planting is confined almost entirely to the temperate regions, the Central and Eastern states and the Pacific Northwest. Certain varieties of the red raspberry that are practically everbearing, or that at least produce both a summer and fall crop of fruit, are now being developed. Raspberries, blackberries, and dewberries do well when planted along a fence.

GROWING MUSCADINE GRAPES

Best Results Obtained by Training to Trellis, Using Three Wires Instead of Two.

The muscadine grape will produce the best results when trained to a trellis, using three wires instead of two as in training the "bunch" varieties. Posts should be at least eight to nine feet in length, and set two to three feet in the ground. The wire should be two feet apart on the posts, which should be sixteen feet apart. The vines should be set at least twenty-five feet apart in the row.

Excellent Sow Ration.

A ration which is excellent for sows with pigs is corn, grain and alfalfa. The hay can either be self-fed in a rack or ground at a small cost and mixed with grain feed.

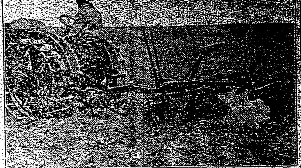
Millions of Dollars Worth of Perishable Products Destroyed Annually in Transit.

Perishable products worth millions of dollars are destroyed annually on account of breakage in transit of the containers in which they are packed. More than one railroad has appealed to the United States Bureau of Markets to help to remedy this situation, a high official of a southern railroad stating recently that, in his opinion, shippers should be compelled to use containers of adequate strength, and that proper car-loading methods should be exercised.

It is vastly to the interests of the shipper to use containers of a strength that will carry perishable products safely to market, and the bureau of markets has made many investigations and experiments to determine just what strength retainers should be to accomplish that result. These investigations are still in progress, but the information already collected is sufficiently complete to enable the bureau to advise shoppers with regard to the best containers to use in shipping specified fruits and vegetables.



Preparing Seed Bed With Tractor Power.

(Prepared by the United States Department of Agriculture.)

During October and November, 1920, representatives of the United States Department of Agriculture visited 283 tractor-owners in Ohio, Indiana, and Illinois. A complete record of all the work done during the year both with tractors and horses was obtained from each farmer. Information from which the cost of using the tractor and the cost of maintaining the workstock could be determined was also obtained.

The investigation was made through the co-operative efforts of the bureau of animal industry, office of farm management and farm economics and the bureau of public roads, in accordance with plans outlined at the farm power conference at Chicago, Ill., in October, 1919. The object was to obtain information, in addition to that already available in the Department of Agriculture, which would aid in determining advantageous forms of power for different farms and different conditions.

Farms Above Average in Size.

The average size of the farms visited was 278 acres. This is considerably above the average size of all farms in these states.

Two-plow tractors were owned on 174 of the 286 farms, three-plow tractors on 104, and four-plow tractors on six farms. One farmer owned a one-plow machine, and one farmer owned a five-plow machine. Two-plow machines were found on 75 per cent of the farms with less than 160 crop acres, and on 53 per cent of those with 160 or more crop acres.

One hundred and six of the tractors had been in use one year, 100 had been in use one and one-half or two years, 49 had been in use two and one-half or three years, and 31 had been in use more than three years.

On the average the tractors were used for 30.8 full days during the year covered by the investigation. Twenty-three and five-tenths days of this was drawbar work on the home farm, 2.7 days was belt work, and 4.6 days was custom work. Seventy-three of the 286 tractors did less than 20 days' work during the year and 26 did 50 or more days' work.

The number of workstock still owned varied from two head on 11 of the farms to more than 15 on five of the large farms. On the average there were 6.8 head per farm at the time of the survey, and their value was $145 per head. In all there were 1,878 head of workstock on the 286 farms and 111 colts less than one year of age.

The average number of full days work per year per horse, for all farms was 68.6. On 20 of the farms the workstock did less than 40 full days work and on 27 they did 100 or more days work per year.

The tractors did 85 per cent of the plowing on these farms, 73 per cent of the disking, 43 per cent of the harrowing, planting, rolling, and packing, 41 per cent of the grain cutting, and about 15 per cent of the loading and hauling of hay.

Of 267 men who did spring plowing, 142 did it all with tractors, 121 used both tractors and horses; and four used horses only.

Of 225 who did fall plowing, 190 did it all with tractors, 27 used both tractors and horses, and eight used horses only.

In all, the power for 30 per cent of the drawbar work on these farms, as measured by days of horse labor required for it, was furnished by tractors and the remainder by horses.

The average cost per head of keeping workstock on these farms for the year ending November 1, 1920, was $159, and the average cost per farm was $1.76.

Costs 45 Cents Daily to Feed Horse.

Exclusive of grass and stalk pasture, the average ration per horse consisted of 1.3 tons of hay, 1.2 tons of straw, 0.2 acre of stover, 37.8 bushels of corn, and 22.3 bushels of oats. The total cost of feed per head was $134. Based on present prices (March, 1921), the cost of feed per head would be about $80.

The average cost per day of horse labor for the year of the survey was $2.43. Based on present prices the cost on these farms would be not far from $1.50 per day.

The average first cost of the two-plow tractors was $972, of the three-plow tractors $1,354, and of all tractors $1,140. The average amount spent for equipment, mostly plows and disks, for use with tractors was about $340. The average value of the horse-drawn implements disposed of after the purchase of the tractors was $12.

The average life of these tractors as estimated by their owners is 6.7 years. The annual depreciation of the two-plow tractors amounted to $164, and of the three-plow $217. The annual cost of repairs, including the value of the owner's time spent in repairing the tractors, was $89 for both the two-plow and three-plow sizes.

The fuel consumption per day for the two-plow tractors varied from about 18 gallons for fall plowing to about 11 gallons for drawing the hay loader. For the three-plow tractors it varied from 23 gallons for plowing to 15 gallons for drawing the hay loader. The two-plow tractors covered 6.6 acres per day in plowing and three-plow machines 8.6 acres. The amount of fuel required per acre by the two sizes was practically the same, 2.8 gallons for the two-plow and 2.7 gallons for the three-plow tractors.

Difference in Plowing Costs.

The average cost per acre of power for the plowing done with two-plow tractors was about $2 and with the three-plow about $2.20. The cost of power for the plowing done with horses on these farms was about $2.90 per acre. Based on the present costs of keeping workstock, the cost of power for plowing with horses would be about $1.90 per acre. For most of the other operations the cost of power when furnished by horses was slightly less than when furnished by tractors. The cost per acre of power for disking with tractors was $0.67, with horses, $0.64; for cutting grain, with tractors, $0.67; with horses, $0.59. These figures represent the cost of power only, and do not include either the cost of man labor, or that of the implements used.

The average cost per day of two-plow tractors for drawbar work on the home farm was about $12.65, and of three-plow tractors about $17.75.

The total cost of power furnished by the tractors for drawbar work at home during the year averaged $341. This drawbar work on the home farm constituted 76 per cent of the total work done by the tractors, and only 76 per cent of the total annual charge for depreciation, repairs, and interest on investment, is included in it.

Tractor Reduces Number of Workstock Needed.

On the 172 farms where there had been no change in acreage the number of workstock had been reduced by 2.2 head, an average reduction of 26 per cent. Forty-four of these 172 men had not reduced the number of workstock, 62 had disposed of one or two head, 43 had disposed of three or four head, and 23 of more than four head. On these 172 farms one horse had been kept for each 28 acres (total acres, not crop acres) before purchase of tractors, and at the time of the survey there was one horse for each 37.7 acres. For all the farms there had been an average of one horse for each 27.6 acres before purchase of tractors, and there was one for each 37.9 acres at the time of the investigation. On the farms where there had been no change in acreage there had been one horse for each 21.5 crop acres before the purchase of tractors, and there was one for each 29 crop acres at the time of the investigation.

Operating Costs May Be Reduced.

There were great variations on individual farms in the cost of power furnished by both horses and tractors; and by more careful management many farmers could doubtless reduce this cost. Repair costs and fuel consumption of the tractors could in many cases have been reduced by more careful operation. The cost of keeping workstock could have been reduced on many farms by more careful feeding practices.

The average annual cost of power for the drawbar work on the home farm which was done with tractors was equal to the cost of keeping 2.1 head of workstock and this is practically the average number displaced per farm. On the basis of present prices, however, the cost of keeping workstock has declined considerably more than the cost of operating tractors.

Since, during the year covered by the investigation, the cost of power on the average farm was no greater than if it had all been furnished by horses, any saving in man labor costs, any gain due to getting a larger amount of work done in a given time, and any other advantages connected with the use of tractors which cannot be measured directly in dollars and cents, might be considered clear profit. It is doubtful, however, if such gains were great enough to balance the cost of operating the tractors on many of the farms where there was no change in acreage and where no workstock was displaced.

FRESH THINGS ALL SUMMER

Kinds of Vegetables.

(Prepared by the United States Department of Agriculture.)

Where garden space is limited plant root and salad crops. No garden, large or small, is complete without them, but they are particularly adapted to small back yard gardens. Among the root crops are radishes, beets, carrots, parsnips, salsify, or vegetable oyster, and turnips. Salad crops include lettuce, common or wild cress, dandelion, Cos lettuce or romaine, Chinese cabbage, and others. They require little space, because they can be planted in rows from 10 to 18 inches apart, and cultivated with hand tools. Many gardeners make only one planting of these crops, but the garden specialists of the United States Department of Agriculture suggest that several plantings of them be made a week or so apart, in order to have a succession of those vegetables.

Radishes are one of the first and best vegetables that come from the garden in spring. They should be planted as early as possible, whether for market or home use. For the home supply small amounts should be planted, and at least two or three plantings made with varieties that mature at different times.

Food Value of Beets.

Beets are one of the most important crops for the home garden. Seed can be planted just as soon as the soil is in condition to work. When the plants crowd one another in the row, thin them out when they are young, and cook them as greens. Later, when they are about an inch in diameter, both leaf stems and young beets can be cooked together. When the beets are larger the leaf-stems become tough and woody. As a rule two plantings should be made, one extremely early and another in about four weeks.

Salad Plants Can Often Be Grown in a Small Space Where Some Other Crop Has Been Gathered.

Carrots should be planted just a little later than beets, and as soon as the plants are up they should be thinned. A second thinning will leave the plants one and one-half to two inches apart in the row and give a supply of small carrots, known as baby carrots, for use on the table. The tops of the carrots cannot be used for greens.

Parsnips and salsify are more in the nature of winter crops; that is, they are grown during the summer and kept for winter use. A section of row 20 to 30 feet long generally will produce all the parsnips or salsify that the average family will want.

While it is true that too much lettuce often is planted at one time, not enough attention is given to keeping a continuous supply. Lettuce plants grown in the hotbed or cold frame, or in a box in the house, can be planted in the open ground just as soon as the danger of the last frost is past.

Fresh Things All Year.

By making a study of the different kinds of salad crops offered in seed catalogues one can easily have a continuous supply from the earliest springtime until the late autumn, and even into the winter. Water cress, for instance, is grown commercially in ponds or spring-fed streams in sections where the water naturally contains large amounts of lime. By starting water cress from seeds sown in a box in the house or by getting a bunch of cress in the market and using the stems for plants, it is easy to grow a bed of water cress without the aid of a stream or pond.

Chickory, or endive, is one of the finest of the winter salads. The roots are grown during the summer, and then dug in the fall and packed in the cellar in boxes of moist sand, the roots being placed rather close together in the box with the crowns or tops near the surface. A covering of straw is placed over the box, and the soil around the roots kept moderately watered. Fresh, young leaves will be formed beneath the straw, and as they are grown in comparative darkness these are white, crisp and tender.

Winton-Nichols Lumber Company

LATE CROP AFTER POTATOES

Corn Can Be Planted Between Rows About Two Weeks Before Tubers Are Harvested.

In most sections the early potatoes can be followed by a late crop of sweet corn planted between the rows of potatoes about two weeks before the potatoes are dug. Late cabbage plants can be set between the rows of potatoes, then the soil worked about the cabbage plants when the potatoes are dug. Turnips can be grown broadcast on the land after early potatoes. Late potatoes, planted about June 1 to 20 in the north and late in July in the south, occupy the ground until frost and produce the main supply for winter use.

Much Work for Little Result.

One of the legends of antiquity credits a man known to Cicero with having put the Iliad of Homer into a nutshell. When the legend was 1,700 years old Huet, the great French scholar, tested it to amuse his pupil, the French heir.

He took a piece of firm but pliant paper, ten inches long and eight inches wide. By writing tiny characters with a fine pen he found that he could get thirty verses of the Iliad into a line and 250 lines to the page, 7,500 verses in all. Thus, by using both sides of the paper, he could write 15,000 verses on it, the number composing the Iliad. The paper when folded up fitted into a walnut shell, and so the possibility of the feat of Cicero's friend was proved.

THE GOODRIDGE [illegible]

VOLUME XV, No. 22. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, MAY 27, 1921 [illegible]

The Flag of Our Country

The American flag, the emblem of our country, is the third oldest national flag in the world. It is known as "Old Glory", "The Stars and Stripes", "The Star Spangled Banner", and "The Red, White and Blue". By whatever name we describe it, it represents liberty and liberty means obedience to the laws.

The flag contains thirteen stripes, alternate red and white, representing the 13 original states; and a star for each state of the Union. The field of the flag is the stripes, and the union is the blue and the stars. The colors of the flag are red, representing valor; white representing purity, truth and home; blue representing loyalty, sincerity and justice; and its stars repersenting the federal union.

The arrangement of the stars on the flag is regulated by law and executive order. An executive order, issued October 26, 1912, provided for 48 stars arranged in six horizontal rows of eight stars each. Starting in the upper left hand corner and reading each row from left to right, gives the star of each state in the order of the state's ratification of the constitution and admission to the Union. The star representing Minnesota—is the eighth star of the fourth row, the 32nd state to ratify the constitution and become part of the United States.

The dimensions of the flag are fixed by an executive order issued May 26, 1916. The length should be just 1 9 times its height. The union, or part of the flag on which the stars appear, should be seven stripes high and its length .76 of the height of the flag. The stars are five-pointed, with one point directly upward. When a new state is admitted the star is not added to the flag until the Fourth of July next succeeding the date of admission. The constitution is the basis of all law, and the flag is its symbol, Always respect it.

How to Respect The Flag

The flag should be raised at sunrise and lowered at sunset. It may be raised at other times but should never be left out overnight, except when it is under the fire of an enemy. On Memorial day the flag should be displayed at half-staff from sunrise until noon, and at the peak from noon until sunset.

In raising the flag to half-staff or half-mast, it should always be run to the peak and then lowered one breadth of the flag. In retiring it, it should first be run back to the peak, then retired. It should never be allowed to touch the ground.

When the "Star Spangled Banner" is played or sung, stand and remain standing at attention in silence until it is finished. When the flag is passing on parade or in review, if you are walking, halt; if sitting, rise, stand at attention, and uncover.

The flag should never be worn as tel whole or part of a costume. As a badge it should be worn over the left breast. In decorating, the flag should never be festooned or draped. Always hung flat. If hung so stripes are horizontal, the union should be in the left upper corner. If hung perpendicularly, the union should be in she right upper corner.

When the national flag and another flag fly from the same pole there should be double halyards, one for each flag. The flag should never be placed below a person sitting. It should never be used in such a way that it might become soiled. When carried in parade or when crossed with other flags, the Stars and Stripes should always be at the right, the place of honor.

When the flag is used in unveiling a statue or monument, it should never be allowed to fall to the ground, but should be carried aloft to wave out, forming a distinctive feature during the remainder of the ceremony. When the flag is placed over a bier or casket the blue field should be at the head. If used as an altar covering the union should be at the right as you face the altar, and nothing should be placed on the flag except the Holy Bible. The flag should never be reversed except in case of distress at sea.

Hering on Proposed Road

Next Tuesday, June 7, the commissioners of Marshall county will have a session at Warren and are expected to take action on the petition for a north and south road across Marshall county to form a connecting link in a state road from Oklee to Roseau. Mr. Tvedt expects to attend, with as many others as are interested. A number of Marshall county farmers have signified their intention to be present.

Moylan News

Garfield and Arthur Erickson were callers at Goodridge Friday evening.

Misses Lillie and Viola Erickson visited with the Kiesow girls Sunday afternoon.

Edmund Fiskevold, Henry Olson and Garfield and Arthur Erickson took in the dance at Rhoda Saturday evening. They report a good time.

Ottar Fiskevold and Herman Solley were callers at Kiesow's Saturday evening.

Misses Lena and Rosa Kiesow visited with the Erickson young folks Sunday evening.

Reuben Lewis visited with Herman Solley Tuesday evening.

Melvin Siedig was a caller at Erickson's Sunday evening.

Miss Mildred Johr left for her home at Holt for a few days' visit with her folks. She returned Sunday evening.

Mr. and Mrs. Herman Kiesow, Lena and Erick Kiesow were business callers in Goodridge Saturday evening.

Garfield and Arthur Erickson visited Herman Solley Tuesday evening

Mayflower News

Mr. and Mrs. Henry Limesand and niece, Edna Paulson, were callers at the Martinius Johnson home Sunday.

Elmer Johnson was a business caller in Goodridge Saturday.

Mrs Oscar Rambeck made a brief call at the Wm. Jones home Sunday.

Mrs Blakkestad and children made a business trip to Goodridge Monday.

Mrs Wm. Jones, children and Jenny Sparby were callers at Martinus Johnson's Saturday afternoon.

Albert Johnson and family near Golden Valley moved in on Brown's place a mile north of Wm. Jones one day last week.

John Graff and daughter Lillian were business callers in Goodridge Monday.

Palmer Lund of Gatzke made a brief call at John Graff home and also purchased Robert Rambeck's steam engine one day last week.

Albert Johnssn called on Wm. Jones Monday evening,

Mr. and Mrs. Limesand made a business trip to Goodridge Monday.

Robert Rambeck is busy breaking on his brother Oscar's farm north of ditch 20 now-a-days.

Elmer Johnson was a brief business caller at the Henry Limesand home Monday evening.

The congregation of the Lutheran church at Germantown will have a picnic at the Wm. Jones home June 19. Service is to be held at 11 o'clock a. m. Everybody welcome.

Mrs. Albert Johnson, son, and Joseph Bolanger were callers in Goodridge Tuesday.

—Received last week too late for publication.—

Miss Emma Graff left for Thief River Falls Thursday of last week, from where she would continue her journey to Erie Monday to commence her new term of school.

Mr. and Mrs. Gilbertsyn, their two daughters, Thelma and Emma, Mrs. Viseth and son Ellert, the Jones family and Jenny Sparby were pleasantly entertained at the John Ellingson home Sunday.

Mr. and Mrs. Henry Limesand and Elmer Johnson autoed to Thief River Falls Saturday and returned.

Mr. and Mrs. Hegtvedt were rejoiced by the arrival of a baby boy at their home about a week ago.

Mrs. Wm. Jones and Jenny Sparby made a brief visit at the Robert Rambeck home Sunday evening.

Mrs. Bernhard Bendickson was a business caller in Goodridge Friday.

Mrs. Martin Olson and two sons were callers at the Robert Rambeck home Sunday.

Mr. and Mrs. Henrd Limesand, their niece Edna Paulson, Albert Johnson and Mat Skogstad were callers at the Wm. Jones home Thursday evening.

Joe Bolonger called at Graff's Sunday afternoon.

Commencement

The third annual Eighth grade commencement exercises will be held on the evening of June 2. Following is a detailed program which will be rendered on the occasion:

Invocation............Rev. G. A. Hanson
Piano Duet............Vivian Thoreson and Clenora Urdahl
Salutatory............Emma Gilbertson, Class President
Demonstrations in Home Nursing............Six Girls
Piano Solo............Miss Gladys Wilson
Dairy Calf Demonstration............Londolph and Luella Urdahl, Harry McDonald, Glenn Erickson and Norton Gunderson
Selection............High School Glee Club
Address............Mr. Geo. A. Selke, State Commissioner of Consolidated Schools
Selection, Quartette, Miss Giefer, Miss Argall; Mr. Nystul, Mr. Hanson
Presentation of Diplomas, N. Bundhund
Benediction............Rev. G. A. Hanson

Class Motto: "Be Square."

Class Colors: Lavender and White.

Class Flower: Lilac.

Class Officers: Emma Gilbertson, president; Harry McDonald, vice president; Vivian Thoreson, secretary and treasurer.

Class Roll: Gertrude Anderson, Emma Gilbertson, Norton Gunderson, Glen Erickson, Myrtle Iverson, Stephen Jacobson, Henry Hjelle, Harry McDonald, Clifford Overum, Luella Urdahl, Loudolph Urdahl, Jennie Krbeehek, Vivian Thoreson, Florence Joenson, Herbert Felson, Lawrence Seavey.

What About It?

The growing tendency toward increased expenditures in a public way and the necessity of an early halt will, no doubt, figure to a considerable extent in the next campaign. It is coming and the only fear is that the reaction be as bad as the present tendency to spend. Following the pendulum to its extreme limit is an American characteristic and much harm is the general result. To say that the late legislature was not above the average in respect to its legal output would be to tell the untruth, but it must be said that it was not at all careful with the people's dollars. To say also that the 1920 legislature was criminally extravagant would be to tell a further untruth. Its members simply followed the tendency of the times and this particular tendency spelled S-P-E-N-D. There were no J. F. Jacobsons, C. F. Staples or W. H. Putnams, watch dogs of a decade ago, to object and so each vote of approval as registered was given as a matter of fact. Members like Theodore Christensen of Lac qui Parle county and Senator A. J. Rockne of Goodhue county counselled caution, bnt they availed lintle. Nearly every unit of public endeavor was insistent in the matter of more money and eoch generally prevailed. Added to these demands were the ever present jokers, and under cover of the rush which always features the close of the session they got by with little trouble. The late legislature authoraized an ctual expenditure of over $36,000,000, which is the largest in the history of the state. At the session two years ago the authorized expenditure was a little over $32,000,000.

A Farmer Referenpum

Every farmer in this county is to have a chance to vote in the first nationwide referendum ever arranged to give producers a chance to tell congress what laws they want.

The Minnesota Farm bureau federation today sent out a call to every county and township farm bureau organization in the state to caucus its members and ascertain their sentiment on 15 questions now under consideration by congress. A similar call went out to the farm bureaus of 45 other states, from headquarters of the American Farm bureau federation.

In Minnesota the farmers are asked to debate the various questions at townships and county meetings, and then vote yes or no. The results of the referendum will be presented to congress to prove that the farmers are united in their request for legislation to put agriculture on a paying basis.

Following are questions on which farmers in this county are to vote:

Do you favor legislation to prohibit short selling of farm products? Do you want congress to submit to the states a constitutional amendment prohibiting issuance of tax exempt securities? Do you favor the excess profits tax or enactment of a sales tax? Other propositions include increasing federal land bank loans from $10,000 to $25,000; legalizing national co-operative marketing and establishing means of financing it; and completion of the Great Lakes-St. Lawrence waterway.

Every farmer is also asked whether he could market more produce if the farm bureau obtains a cut in railroad rates.

Community Club Meeting

The Community club met Friday evening at the school house.

A short business session was held. It was decided that meetings should take the form of picnics at the farms of different members of the club, the next meeting to be held June 19 at Morgan Vaughan's.

A committee of nine was appointed to have charge of the exhibit booth at of the exhibit booth at the county fair.

The old fashioned spelling bee was won by Morgan Vaughan's forces, several standing out to the last.

The peanut hunt was won by Miss Wilder's side.

A number of games were played, after which the members adjourned to the Domestic Science kitchen, where refreshments were served.

Minnesota Butter and Cheese Scoring Contest

There were 312 entries of butter and 15 enries of cheese in the first educational butter and cheese scoring contest conducted by Chris Heen as dairy and food commissioner of Minnesota, The butter and cheese was entered April 20 and scored April 29 and 30 and May 1. The first prize in the state was won by Glencoe creamery, with a score of 96½. The Goodridge creamery took first in the Sixth district, with thirty competitors, making a score of 93½.

AVOID DODDER INFESTATION

Farmer Should Use Plants Known to Be Immune to Attacks of Pestiferous Weed.

The necessity of selecting plants immune to dodder infestation when cultivating newly cleared land was emphasized by a report which recently reached the United States Department of Agriculture concerning the destruction of an entire field of eggplant on a newly cleared field in Pennsylvania. So bad was the infestation that not a single fruit was formed on the parasitized plants and the entire field was destroyed. The dodder was determined as hazel dodder, a species not uncommon on hazel and other wild shrubs and on tick trefoil and other wild herbs, but never previously reported on cultivated plants. The department recommends that on land known to contain the seeds of dodder, farmers should use plants which are immune to attacks of the pest. The following plants are not susceptible to injury by dodder; corn, soy beans, velvet beans, cowpeas, and small grains such as oats, wheat, and rye. Potatoes and buckwheat, crops commonly used on newly cleared land, are not very likely to be injured by dodder, but truck crops should not be planted on land known to contain dodder seeds.

GOOD COLLAR IS ESSENTIAL

Every Farmer Should Plan to Prevent Sore Necks and Shoulders of Work Horses.

Now that the busy season is here, every farmer should make a careful examination of the supply of horse collars on hand and see to it that he has a good fitting collar for every horse he purposes to put to work. Sore shoulders and sore necks on farm horses are generally caused either by collars that do not fit or by hames that are not properly adjusted.

CAREFULLY SAVE DROPPINGS

Either Use for Fertilizer or Dispose of to Persons Who Can Make Good Use of Them.

No matter how small the flock the droppings should be carefully saved, stored, and either used as fertilizer for plants or disposed of to persons who can so use them to increase the fertility of the soil.

PASTURE LAND ON HILLSIDES

If Properly Taken Care Of Steep Inclines Can Be Made to Return Good Grass Yields.

Many of our pasture lands are so hilly that they cannot be used for cropping purposes, but if properly taken care of they can be made to return substantially profitable grass yields.

Locals Defeat Oklee 12 To 7

In a hard fought game on the local diamond Saturday afternoon, the Goodridge High school baseball team defeated the Oklee nine with a score of 12 to 7. A large crowd witnessed the game, including a large aggregation from Oklee.

Goodridge scored the first count in the opening inning when Dan Payne, who had walked to first, came home on a three-bagger by Christianson. In the next six innings Oklee gradually secured the lead, leaving the score 7 to 3 at the end of the sixth. The lucky seventh turned the tide for the locals. In a series of quick successions the Goodridge boys ran in nine scores, giving them a comfortable lead. Neither side tallied in the eighth and ninth.

This is the second game played by the Goodridge High school this season. Attempts are being made to secure two more games with neighboring schools before the year is over. The line up:

Goodridge		Oklee
Halvorson	fb	Deymonaz

The Little Stenographer of Brockton

By WILL T. AMES

(© by McClure Newspaper Syndicate.)

"But, mother, I love her." Philip Gunter looked imploringly at his mother, an expression of suffering in his fine gray eyes.

"You don't really. No son of mine could possibly love a motorman's daughter. And think of the opportunities you have and are throwing them away for a little, middle-class, Brockton stenographer."

"Mother, I can't let you talk like that about Edith, and I'll ask you to avoid mentioning her in the future."

"Hoity toity! How pompons we are, and as surely as you do marry her I'll disinherit you and you can have love in a cot—the real thing."

"I don't care a snap of my finger whether you disinherit me or not."

With finality he rose to go, and frantically Mrs. Gunter cast about for another line of tactics.

"Ah, but Phil," she exclaimed, dropping her haughty manner and holding out her arms pleadingly, "you know how I love you, my only boy, and this thing will kill me. It will grieve me to death—you know my heart is bad—and my whole life is wrapped up in you. I lie awake at night dreaming about you and planning your future."

Philip winced and a cloud passed over his clean open face as he rose and put his arm about his mother.

"There, there, Momsy, don't get so worked up."

A maid tapped at the door and presented a card.

"Heavens! Mrs. Mangston's downstairs. Go and talk to her, Phil. I'll come in a minute."

Grateful, for the escape, the young man greeted the caller warmly.

"How's it going?" the lady asked with motherly concern.

"Worse than ever. She's just made a dreadful scene and I feel like a murderer."

"Sh-h-h-h, here she comes."

"My dear Mrs. Mangston, what a pleasure this is!" said the hostess cordially.

With a bow Philip excused himself and soon the two were deep in conversation.

"Yes," said Mrs. Gunter bitterly, "the boy's determined to marry this little stenographer in Brockton and as surely as he does it I'll cut him off without a farthing."

Her voice shook as she spoke and the heavy diamond brooch sparkled and glittered with the rise and fall of her breast.

"Even if you do cut him off that won't prevent his marrying her. What you seem to want to do is to prevent the match," said Mrs. Mangston thoughtfully.

"But how?" asked the other desperately.

"Another girl is usually the best cure," remarked the caller.

"But he says he's sick of girls in his set. He calls them artificial and empty-headed and won't look at them any more."

"Of course not; I'll take some new girl that'll sweep him off his feet."

[illegible] not think," Mrs. Mangston [illegible] her brow as she stared at [illegible] of the floor. "Now I have [illegible] just moved here," she [illegible] a moment, and it seem[illegible] she said that she was go[illegible] have a little girl visiting her [illegible] I might get up a dinner [illegible] invite you and Phil."

"That would be wonderful if you [illegible]," said Mrs. Gunter, enthusiasti[illegible]

[illegible] this girl's coming Monday [illegible] the dinner Wednesday."

[illegible] really too kind," smiled Mrs. [illegible] parted.

[illegible] the least. I'm simply so [illegible] Phil that I would do any[illegible] world to help him out."

[illegible] Mrs. Gunter waited for [illegible] time, and after much [illegible] persuaded her son to accom[illegible]

"Dinners are always a bore, and [illegible] more [illegible] than I want to," he grumbled as he jerked on [illegible]

[illegible] punctually and with [illegible] eagerness Mrs. Gunter [illegible] the meeting between her son [illegible] girl and was gratified to note [illegible] admiration in Phil's eyes as [illegible] Randolph Parker's hand. [illegible] decided that she had never [illegible] so brilliant and entertaining [illegible] at dinner that night.

"[illegible] working beautifully," she whis[illegible] her hostess.

"[illegible] she's such a lovely girl, who [illegible] being gone over her?" re[illegible] Mangston.

"[illegible] pleased? Now, why couldn't [illegible] fallen for a girl like that in [illegible] first place? How long's she go[illegible] stay?"

"Two weeks."

"Better than nothing."

As they took their leave the mother [illegible] to hear her son say:

"Have you any engagement for to[illegible] afternoon, or may I take you out in the car and show you some of our points of interest?"

"I shall be glad to go," said Randolph, as she extended her hand.

"Isn't she the most fascinating thing you ever saw? And what beautiful hair and eyes she has!" raved Mrs. Gunter on the way home.

"She's all right," answered the man carelessly.

"I'm going to give a reception and dance for her Friday night," his mother babbled on. "We must show her a good time—let her see how hospitable our city is to strangers."

As the days passed Mrs. Gunter went into ecstasies to learn that practically every day her son took Randolph out, although he never mentioned it to his mother.

"I think they're simply crazy about each other," Mrs. Mangston told Mrs. Gunter toward the end of the visit.

"If we could only make a match of it before he gets his mind on his old flame again."

"It isn't wise to show eagerness," admonished the other woman.

"I know it, but how can you help it when your heart's set on a thing? I don't know a girl I'd rather Phil would marry."

Randolph was persuaded to extend her visit another week, but at last the day arrived when she had to leave. Mrs. Gunter upbraided herself for having foolishly hoped to hear of their engagement.

"Three weeks," she scoffed to herself. "I'm an idiot to expect them to do it in so short a time."

She was interrupted by the sound of suppressed laughter followed by a knock outside her door,

"Come in," she called, and in walked Philip and Randolph holding hands like two school children.

"Mother, I want to introduce my wife!" said Phil happily.

"What! Why, it can't be possible! My dear children," she laughed and wept as she took them both in her arms. "I loved you the second I saw you, Randolph, and how I wanted you to marry Phil!"

"Mother, this makes me so happy," said her son, "because she's really Edith, you know."

Mrs. Gunter opened her mouth to speak, but no sound came forth as she stared at the girl incredulously. At last she spoke:

"I understand now why Phil was willing to give up his inheritance and defy his mother. Under the circumstances I should have done so, too."

"Mother, you're a regular trump!" exclaimed her son as he gave her a bear hug and waltzed her across the floor.

A Suspicious Nature.

"I don't like Mr. Dubwaite's new stenographer," said Mrs. Dubwaite.

"Why not, my dear?" asked Mrs. Gadspur.

"She has a dreamy look in her eyes."

"Oh, well, she may not be meditating mischief."

"Perhaps not; but when a girl is young and pretty and indulges in day-dreams, with a susceptible old fool like Mr. Dubwaite around, some of those dreams may start to coming true."—Birmingham Age-Herald.

Users are proud of their De Lavals

THERE are more than 2,500,000 users of De Laval Cream Separators, and practically all display the sign of separator satisfaction. These little signs reading "We use the De Laval Cream Separator" are nailed on fences and barns and other prominent places all over the world.

Each sign is a personal recommendation of the owner. Each sign indicates the pride with which the owner regards his De Laval.

The most progressive and most prosperous farmers in nearly every dairying section own De Lavals. They know the De Laval skims closer, runs easier and lasts longer than any other separator; and that it may be depended upon to put more money in the bank.

The De Laval is particularly well liked by women. It turns easier than other separators; is more easily cleaned, and does its work in less time.

Come in and let us demonstrate
the superiority of the De Laval.

Sooner or later you will buy a
De Laval

COWPEA USEFUL TO HELP SOILS

Crop Increases Productiveness and Also Improves General Physical Condition.

GREATLY BENEFITS ORCHARDS

About 85 Per Cent of Fertilizing Value of Crop Is Contained in Hay and 15 Per Cent in the Roots and Stubble.

(Prepared by the United States Department of Agriculture.)

The ease with which cowpeas are grown and their marked effect on succeeding crops have made them one of the most popular crops grown for soil improvement. Besides increasing the productiveness of the soil, the bulletin says, the cowpea also improves its general physical condition, making heavy clay soils more open and sandy soils more compact. The cowpea has the distinct advantage of making a good growth on soils which will not produce profitable yields of other legumes or cereals. It is an excellent green-manure crop for vineyards and orchards.

Plow Under Stubble.

Except on the poorer soils, results indicate that it is decidedly more profitable to utilize the cowpea as hay or pasture and then plow under the stubble than it is to plow under the entire crop. About 85 per cent of the fertilizing and soil-improving value of the cowpea is contained in the hay and about 15 per cent in the roots and stubble. Feeding experiments indicate that much of the fertilizing value of feeds is recovered in the manure. It is possible, therefore, to obtain the feeding value of the cowpea as hay or pasture, and, in returning the manure to the soil, to save a large part of the fertilizing value, provided the manure is well handled. When the entire crop is plowed under a more beneficial and lasting effect is obtained, but this advantage is not sufficiently great to equal the feeding value of the cowpea.

Cowpeas and Johnson Grass Seeded Together.

Plow Under Entire Crop.

Light or sandy soils that have been cropped for a long time and need humus receive greater benefit from plowing under the whole crop. When, therefore, the improvement of the land is the sole object, the entire crop should be plowed under to obtain the greatest value. In utilizing the entire crop for soil improvement, it is best to plow it under when green, before being killed by frost. The green plants decay more readily and are superior to dry plants in their fertilizing effect.

The results of analyses made by the North Carolina agricultural experiment station show that one ton of cowpea hay contains 47 pounds of nitrogen, 10 pounds of phosphoric acid and 29 pounds of potash.

Force of Habit.

"Look here, young man," ejaculated the judge to the prisoner at the bar. "How is it that a former soldier is charged with shoplifting? How did you learn such a mean business?"

"It's this way, your honor," replied the offender. "In the army I spent most of the time policing the company streets, and I sort of got into the habit of picking up things as I went along."—American Legion Weekly.

A Vocalist Provoked.

"I knew there was going to be trouble as soon as the mule heard the honk of our new flivver," remarked Farmer Corntossel, ruefully.

"How did it affect the mule?"

"Threw him into a fit of professional jealousy so violent that he backed up and kicked the rear transmission clear through the radiator."

BIG VIRTUE OF SANDY SOILS

Roots of Plants Pass Through It Readily, But It Dries Out Quickly—Clay Holds Water.

The chief virtue of sandy soil is that the roots of plants can pass through it readily; its chief fault is that it dries out too quickly. Clay soil holds water well, but it tends to pack and harden. Both types of soil need stable manure—it loosens up clay and helps sand to hold moisture.

SETTING OUT NUT TREES

Nut trees such as walnut, hickory and oak, develop a deep taproot and few lateral feeding roots during their first year. They cannot ordinarily be transplanted to the field so successfully as other trees, so that planting the nuts or acorns on the permanent site usually is considered preferable.

The Girl of the Wilderness

By R. RAY BAKER

(©, 1921, by McClure Newspaper Syndicate.)

The old man leaned forward and rested a hand on a knee of his son. They sat before a fireplace in which a snapping blaze was struggling against a fall chill. They were smoking pipes and apparently enjoying each other's company, as cronies do; and they were cronies.

The old man? He was not that when one came to a closer inspection. He looked old, seated as he had been in the shadows, for his silver hair was all that was really distinct in the dusk. There were wrinkles, but not deep. One would take it he had led a free and easy life, until gradually the impression formed that there was something about him denoting a sorrow. Possibly it was his eyes.

"It's up to you, Paul," he said in a voice that was singularly soft and pleasing. "I would not try to argue you out of this marriage, but I want to warn you and be sure you are not making a mistake—as I did once." The last four words preceded a deep sigh, and the father leaned back again in the shadow, to watch the glow from the fireplace play about the handsome, clean-cut face of his son.

"I am sure, father," the son said, with a note of finality. "I love this girl of the wilderness. You should see her romp through the woods, her cheeks aglow with health. You should see her paddle a canoe, and dive and swim. And yet she is as retiring and reserved as the most demure society belle, when the occasion requires it."

"But your station in life," his father hesitated. "This girl cannot be your social equal. You say she and her mother live in a shanty in the woods near Cedar Creek, where you spent your vacation. They must be crude people, it seems to me."

The son was on the point of making an angry retort, but he checked it.

"She's as good, and a lot better than most of the girls in my station of life," he said. "Her English is perfect, and she has a conversing knowledge on a wide range of topics. I did not see her mother, for I never could get Anne to invite me to their home. In fact, it is not her mother, Anne told me. Rather, it is her adopted aunt. Anne is really the daughter of the sister of the husband of the sister of the woman she calls mother—if you can grasp that. Anyhow, she's no blood relation, but they love each other like mother and daughter. It seems that each is all the other has.

"They live in the woods from choice. Anne's father was wealthy and left a large amount of money to his daughter; and Anne insists on sharing it with the woman she now calls mother. Because they love the woods and choose to live in them—that does not indicate a low station, does it? And what if it does? I love Anne."

"It all sounds very rosy, this love talk," observed his father, and there was a touch of bitterness in his voice, "but it doesn't always work out that way. Look at my own case. I don't care to talk of it as a rule, but it's a sample of what one gets for marrying beneath his level. Your mother was a lovable, good girl, but she had not been educated in my ways of thinking. In many ways the case parallels yours. Your mother would not get along in the society to which I was accustomed. Like this girl you think you love, she was fond of the woods and she wanted me to spend my life in them. I could not reconcile myself to it, because I love the noise and bustle of the city. The silence of the woods drives me frantic. But I consented to try it, and built a habitation in the woods; not a modern structure, as I desired, but a rustic log house to suit your mother's fancy. I could not endure the solitude and finally one night we quarreled; and a terrible quarrel it was! It was raining, and thunder and lightning punctuated every sentence that was uttered. In fairness to your mother, whom I loved in spite of our incompatibility, I must say that I did most of the quarreling. She simply sat and looked into my face with those gentle blue eyes and let me rave. I never told you this before, because—because it was pretty hard for me; but now, when you are considering a step that is almost identical, I cannot refrain from bringing it up as an example. But it is hard."

The silver hair was buried in the man's arms.

"The next morning I left the house with you," he went on, more composed. "You cannot remember it, for you were only a year and a half old and I had to carry you in my arms. I sneaked out of the cabin with you bundled in a blanket before Ethel, your mother, was awake. I did not return for three months, and when I did, repentant, I found nothing but ashes to mark the spot where we had tried to live. And never was I able to get a trace of your mother, though I believe she perished in the Frisco earthquake.

"So you see, my son, what marrying beneath my station did to me. You see what may be the consequences for you—of marrying one of those nature-loving spirits. It sounds well, but it works out differently."

The son was silent several minutes.

"I know you mean well, father," he finally said, and this time it was his [illegible] I love this girl [illegible] I love nature [illegible] we ought to get along. Now I must be going, for I have an engagement with Carl. We want to discuss [illegible]."

He left, and for a time the man with silver hair smoked and silently watched the fireplace flames, and two or three tears crept into his eyes.

It was Paul's wedding day, and he was on his way to claim his bride from the forest. His father was with him.

"I said my say, and you've made your choice, son," he said. "It is for you to decide. And of course I'm going to be present when my son is married, even if it should be in the center of the African jungles."

So they packed traveling bags and took a train for the wilderness. At Cedar Creek they disembarked and set out on foot through a path in the woods.

"Does smell rather good," admitted the elder man as they trudged along inhaling ozone from the pine trees. "It's the first time I've been in the woods since—since that night."

Two hours' walking brought them to a clearing, where a log house sent a thin wreath of smoke heavenward. It was a small hut, but it looked inviting, an island in a sea of flowers and vines.

"This is the place," Paul announced. "I had never seen it, but I received good directions in my last letter." His face was lighted up expectantly.

From the door of the hut romped a laughing girl, clad in a blue blouse, short khaki skirt and leggings. In the doorway behind her appeared a tall, handsome brunette of middle age.

Paul clasped his sweetheart in his arms and they remained embraced for several minutes. Suddenly the girl broke away.

"I must introduce you to mother, and I must meet your father," she said and turned toward the hut, to stop dead still, amazement shining from her big bright eyes.

"Well, would you look at mother!" she cried, and Paul turned to stare in astonishment that equaled or surpassed hers.

For Paul's father and Anne's mother had followed the example of the young people and were hugging each other tightly, while she repeated over and over the one word, "George," and he was saying "Ethel."

VEGETABLES ENTIRE YEAR FROM GARDENS

Accomplishment of Women in One New Mexico County.

Everything Tried in Dry-Land Section and Given Proper Attention Brought Good Results—Much Fruit Was Canned.

(Prepared by the United States Department of Agriculture.)

Women in Union county, New Mexico, are working to have on every farm a garden large enough to supply the family with vegetables the entire year, with a sufficient surplus for each housewife to can or dry enough vegetables for winter use.

The United States Department of Agriculture reports that the following is a part of what was accomplished last year in this county under the supervision of the home demonstration agent: A great many vegetables, new to the community were tried out, such as Swiss chard, Chinese cabbage, asparagus and celery, and fruits like ever-bearing strawberries, rhubarb, garden lemons, and other varieties not previously raised. These were grown successfully. Grapes, peaches, plums, apples and apricots have been planted by many people who had not thought these fruits would grow in their county. This is a dry-land section where practically no attention has been given to the home garden.

Products of Garden in New Mexico.

Everything tried, and given proper attention, brought good results. Some failures were reported, due to lack of moisture and lack of care. Reports also showed that, besides all that was used fresh on the table, from 25,000 to 50,000 quarts of vegetables and fruits were canned in this county last year.

[illegible] Survey Has Recently Been Conducted by Experts.

Some of Worst Plants Have Been Given Special Attention and Bulletins on Best Methods of Eradication Have Been Issued.

(Prepared by the United States Department of Agriculture.)

Fighting weeds occupies about 30 per cent of all the time a farmer spends in cultivation of crops, according to experts in the United States Department of Agriculture, who recently have been conducting a weed survey. Special attention has been given to the best methods of conquering some of the worst weeds, and the following publications on their eradication or control may be obtained by writing to the department.

Farmers' bulletins: 610, Wild Onion; 660, Weeds in General; 828, Wild Oats in Hard Spring Wheat Area; 945, Bermuda Grass; 1161, Dodder; 1166, Poison Ivy and Poison Sumac; 1002, Canadian Thistle.

Department circulars: 108, Chicory; 130 (five cents a copy), Hawkweeds or Paint Brushes.

Department bulletins: 511 (ten cents), Farm Practice in the Cultivation of Cotton.

In addition to these the following multigraphed leaflets on special weeds may be obtained by writing direct to Forage Crop Investigations, Bureau of Plant Industry, United States Department of Agriculture, Washington, D. C.: Chemical Weed Killers; Eradication of Nut Grass; Wild Carrot; Crab Grass; Killing Dandelions in Lawns; Sheep Sorrel; Chickweed in Lawns; Eradication of Quack Grass; Wild Morning Glory, or Bind-Weed; Honeysuckle as a Weed; Perennial Sow Thistle.

Well-Cultivated Corn Field Free of Weeds—Food, Not Waste, Produced on This Land.

SEED MIXTURES ARE COSTLY

Much Advertised Clover-Timothy Contain Very Little of Former—Of Little Value.

So-called clover-timothy seed mixtures, which are widely advertised by certain seed firms at what may appear to be attractive prices, often contain so little alsike or red clover that they are of little, if any, more value than timothy seed, but actually cost nearly double the market price of that seed, say specialists of the United States Department of Agriculture. These mixtures are usually offered by the bushel, followed by the qualifying statement that a bushel weighs only 45 pounds.

In other words, this seed is offered as clover and timothy with the claim that the different seeds occur in the proper proportions for seeding, while frequently there is not more than 5 or 6 per cent of clover present—not enough to be of any value in the crop.

Persons who buy mixed seed cannot be too careful to learn the exact proportion of the mixtures they get and the quality of the seed composing them. Otherwise, they are likely to pay an exorbitant price for seed that will not give the crop wanted.

COAL ASHES ON HEAVY SOIL

Particularly Valuable to Loosen Soil and Make It Workable—No Good as Fertilizer.

Coal ashes have little value as fertilizer, their use being mainly to loosen the soil and make it workable. They are most valuable on heavy clay soil but should be screened to take out coarse material before they are applied, and should be spread evenly over the surface and thoroughly mixed with the soil. Wood ashes have fertilizing value, but should be applied before they become leached.

LIME BENEFICIAL TO SOILS

Particularly Advantageous to Garden Plot and Will Also Correct Sourness of Land.

An application of about 50 pounds of hydrated or air-slaked lime to a garden plot 30 by 30 feet in size will often prove beneficial. Lime has the effect of loosening and pulverizing any heavy clay soil and in binding loose sandy soil. Lime also corrects sourness in the soil, which is often due to lack of drainage, but in a case of this kind drainage should be secured.

HICKORY FLOOR PAINT

Ready for Use

Better than experience in buying is the knowledge that the Hickory Trade Mark is on good Paints, Varnishes and Brushes.

POISON BAIT FOR CUTWORMS

Paris Green or Arsenate Mixed With Wheat Bran and Molasses Is Specific Remedy.

Poisoned bran bait is the specific remedy for cutworms. The accepted formula for large acreages is wheat bran, 50 pounds; paris green or crude arsenic, two pounds; black strap molasses, two quarts; water, two to four quarts or more as needed. Mix the bran and poison thoroughly in a dry state, then add the diluted molasses, and stir vigorously until thoroughly mixed. Distribute the bran over the infested field broadcast, taking care to sprinkle it sparingly around each hill. Middlings or alfalfa meal may be substituted for bran.

USES OF BORDEAUX MIXTURE

Best Fungicide to Apply on Vegetables, Grapes, Ornamental Plants and Potatoes.

Bordeaux mixture is our best fungicide for use on vegetables, potatoes, grapes, and ornamental plants. For apples and stone fruits, lime-sulphur replaces bordeaux. On potatoes bordeaux mixture not only protects the potato plant against fungous diseases, but also prevents the burning of the leaves which comes in hot, dry seasons. Sprayed plants outyield the unsprayed plants. For use on potatoes to control the potato beetle, one-half pound of paris green, or two pounds of arsenate of lead may be added to the bordeaux mixture.

Artificial eyes fitted.

PLAN TO SMOTHER BINDWEED

Alfalfa Is One of Best Means of Controlling Wild Morning Glory—Other Crops Useful.

Alfalfa, because of its excellent smothering effect and frequent cutting it receives, is one of the best all-around means of controlling bindweed (wild morning glory) in sections where alfalfa grows well, United States Department of Agriculture experts find. Cowpeas, sorghum, millet, soy beans and buckwheat are also useful as smothering crops, but are rarely as successful as alfalfa. It is well to follow alfalfa with a clean cultivated crop, such as corn.

Hogs are fond of both the underground and above ground growth of bindweed. If the land is plowed it will greatly assist the hogs in removing the underground parts. Sheep pasturing has been found helpful, but it is not as useful a method as hog pasturing. Grazing helps to hold bindweed in check, but can not be depended upon to secure eradication.

The use of chemicals other than salt has not been successful except under special conditions and is not recommended. Care should be exercised to prevent the introduction of the pest by means of (1) impure seed, especially impure wheat seed; (2) manure—bindweed seed may be contained in the droppings or may enter manure by the addition of bedding containing bindweed seeds, and (3) thrashing outfits, thrashing machines, unless thoroughly cleaned, may carry the seeds of bindweed from farm to farm.

POTATO SCAB LOWERS GRADE

Presence of Few Scabby Specimens May Cause Severe Depreciation in Value of Crop.

Scab is an example of a field disease that causes severe depreciation in the value of a crop of potatoes, says the United States Department of Agriculture. The presence of a few scabby potatoes may lower the grade of an otherwise fancy lot. In some sections scab can be controlled by seed treatment, but in many instances careful grading will prevent scabby potatoes as well as those affected with wire-worm, white-grub, nematode and flea-beetle injury from reaching the market.

CONFINE DUCKS IN MORNING

During Laying Season Fowls Should Be Kept in House Until 9:30 or 10 o'Clock.

Ducks lay their eggs early in the morning, and should be confined to the house or pen until 9:30 or 10 o'clock. If allowed to roam earlier, they may lay in a pond or stream and the eggs be lost.

The silver striper was an honest man, but he was in love with a girl who demanded deeds of daring.

"Tell me," she breathed, "what was the greatest battle you were in?"

"Ah, g'wan," he replied with embarrassment.

"My hero," she cried, falling on his neck, and they were married next month.—American Legion Weekly.

Physiological Reading.

Two pupils in a primary school in Ohio were encountering difficulties with their "First Reader."

"Tommy," asked one of the other, "how can you tell which is a 'd' and which is a 'b'?"

"Don't you know?" returned Tommy. "Why the 'd' is the letter with its stomach on its back."

Japan's God of Wealth.

More than 70,000 Japanese residents of Tokio, called at the shrine of Ebisu, God of Wealth, on the outskirts of Osaka, before noon on the Japanese New Year's day. They knocked on the walls of the shrine with wooden mallets and called upon the God to bring them riches during the coming year. All the gods of Japan probably receive more homage January 10 than any other day of the year, that being the first special god's day of the calendar. Ebisu is very popular in the Osaka district, the rich industrial section of the empire. In Tokyo, although he has several shrines, the Japanese place more faith in the power of Otorijinsha to bring them fortune.

VOLUME XV, No. 23. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JUNE 3, 1921 [illegible] PER YEAR

Commnncement Program a Success

On Thursday evening the spacious school auditorium was filled to capacity; even standing room was at a premium. The program rendered appealed to the large audience and was a credit to all participants. The demonstrations in Home Nursing by girls in the graduating class were carried out in a very effective mannar. Emma Gilbertson, the class president, delivered the salutatory with poise and calmness. The musical selections, which included a piano duet by Vivian Thoreson and Clenora Urdahl, a selection by the High school girls' Glee club, an instrumental selection by Miss Wilson, and the singing of Bobolink by the quartette, composed of Miss Giefer, Miss Argall, Mr. Nystul and Mr. Hanson, drew strong and hearty applause from the audience.

The Commencement address was given by Rev. R. L. Barackman of Thief River Falls. The essence of his theme wes that of service and the value of a good rouned preparation for life's work. The address was instructive throughout and thoughts emphasized were driven home in such a manner that they will long be remembered.

Prof. B. O. Norby presented the class to Mr. Nick Bundhund, secretary of the board of education, in a few well chosen remarks. In presenting the class Mr. Norby called attention to the fact that this was the largest graduating class in the history of the school, the total number being 16—8 boys and 8 girls.

Mr. Bundhund, in presenting the diplomas to the graduating class, expressed his feeling of satisfaction over the rapid strides made in the improvement and advancement of the local school. The following received their diplomas; Gertrude E. Anderson, Glenn C. Erickson, Emma B. Gilbertson, Norton A. Gunderson, Henry Hjelle, Florence A. Johnson, Myrtle G. Iverson, Stephen H. Jacobson, Jennie Mabel Krbechek, Harry Robert McDonald, Herbert Nelson, Clifford Ernest Overum, Lawrence Seavey, Vivian Clarissa Marcella Thoreson, Luella Urdahl, Loudolph Urdahl.

Another unique feature of this program was the awarding of certificates to pupils who held a perfect record in attendance in school. The following pupils were thus honored: Eugene Besancon, Emma Harms, Harry McDonald, Christine Bundhund, Vivian Thoreson and Harry McDonald.

Drive To Combine Crop Sales Begun

Centralized marketing, with the sale of a large part of all staple farm crops in the hand of farms own co-operative agencies on the termenal markets is the best and probably the only means of obtaining fair pricos based consistently on the cost of production, the Minnesota Farm Bureau federation said today in a message to all county farm bureans.

The statement marks the beginning of an intensive drive to centralize co-operative livestock marketing through the new farmers agency at South St. Paul. The state federation is directing the drive.

The Minnesota Farm Bureau federation believes it can do no greater service for the farmers and for the consumers than by devoting its strength to the centralization of co-operative marketing, the directors said. It offers all its facilities to promote the organization of central sellers' agencies; it will encourage and assist its county and township units to carry on this work throughout the state, in connection with the livestock, grain and dairy marketing projects nnder way. It stands ready to lead tne way in federating local co-operative agencies to sell other crops as well, whenever the demand comes from the farmers. The county farm bureau, reaching into every community, controlled absolutely by the farmers themselves and responsive to their wishes, constitutes a machine perfectly equippped to lauuch and direct those enterprises.

For the last 25 years, Minnesota farmers have been developing co-opertive marketing in their own communities; they have put Minnesota in the lead in this work. Now they have discovered that local marketing associations have their limitations, and that in order to affect the large markets, fermers must unite to handle their crops in quantity, and go into the terminal markets themselves.

For Sale.—Cheap, or in trade, five young mules, broke and gentle.—A. O. Sandland, Grygla, Minn. m27 4t

Open Air Concert

The Goodridge band gave an open air concert Saturday evening. They have made rapid progress in the past year and they are playing, and carrying successfully, too, music heavier than many bands of their experience and standing would care to undertake.

Mr. Nystul is deserving of credit for the ability he has displayed in handling and training them. That they will miss him goes without saying, but it is to be hoped that they do not let slip from them all that they have gained.

Auto Trip to Red Lake

One hundred and fifty cars have signed up at Thief River Falls for the tour that is to be made Sunday next from Thief River Falls to the Red lakes. The party will leave Thief River in the morning at 6 o'clock sharp. On the arrival at Goodridge, which will perhaps be about 6:30, their band will play several selections as a call to the local contingent. A number of cars have signified their intention to join the drive here, and cars from Grygla will meet the tourists near Thorhult.

The route will be over the state road from Thief River Falls to Goodridge, thence north to Ditch 20, thence east to Thorhult, thence south on the ridge to the lake.

School Picnic

The annual school picnic was held on the school grounds Tuesday afternoon. A varied program of sports and amusements had been arranged, and the pupils and parents spent a most enjoyable afternoon.

The prize offered to the winner in the potato race was won by Howard Seavey. The honors in the suitcase race between Alvin Halvorson and Herbert Nelson were easily carried off by the latter. Hazel Hakes was first among a large number of girls who took part in the pie eating contest. The pickle contest proved a source of much amusement to the spectators and resulted in an easy victory for "Buddy" Ferdinandsen.

Refreshments, consisting of sandwiches, cake, coffee and ice cream, were served on the grounds to all the pupils. The parents and visitors were invited to a picnic lunch in the Domestic Science room.

After the eats, a number of the older pupils and visitors flocked to the school diamond, where an improvised baseball game was played. The schoal tednis court was also in use during the entire afternoon.

Guernsey Breeders Meeting and Sale

The Red River Valley Guernsey Breeders association will hold thier second annual picnic and consignment sale at the Burr Oaks Farm, two miles south of Thief River Falls, Minn. June 7. Good speakers have been secured and a splendid program assured.

Six pure bred sires, nine pure bred females, and twelve high grade cows and heifers have been selected by a committee of three breeders and are pledged to absolute sale to the highest responsible bidder. This is a splendid opportunity to secure foundation animals at the purchasers own prize. All admirers of the Guernsey Breed should arrange to attend this picnic and sale.

To Be Made To Extend Electric

News was received in town this week that tne Soo Railroad Company has entered proceeding to compel E. W. Backus to complete his railroad from Loman to Thief River Falls, running on a line about 20 miles south of Baudette. The Soo, we are told, asks that the present road be condemned if Mr. Backus does not extend it, and his faiure to do so would mean that the Soo would take it over. The proceeding are the same as were taken when the Soo compelled the Great Northern to complete its road from Greenbush to Warroad a number of years ago. We undeastand that the present case is to be heard before the railroad and warehouse commisions in July.

School officers Meet

A school officers meeting will be held in the auditorium of the Lincoln high school building at Thief River Falls on Saturday, June 4th. The session will open at 9 o'clock in the morning and continue during the day.

A member of the state department of educatian will be present to explain all the new school laws passed by the last legislature and will also be in a position to answer any questions in regard to school matters.

High School Team Meets St. Hilaire

St. Hilaire was the battle ground Saturday, May 28, for the third baseball game played by the local High school team this season. The crowd was comparatively small, though a number of local faus accompanied the Goodridge team.

Ferdinandsen started the twirling for Goodridge. The heavy batting of the St. Hilaire first team gave them the lead in the first few innings. This lead was checked when Dan Payne stepped into the pitcher's box in the fifth. The first half of the game was marked by loose playing and numerous errors on both sides. After the fifth inning the locals put up a consistent game, but rallied too late to overcome their opponents' lead. Goodridge tork the count on a 15 to 3 score.

Roy Olson was the chief point getter for Goodridge, bringing in two scores. Another score was brought in by Ferdinandsen. The feature of the game was the work of Dan Payne in the pitcher's box. This was Payne's debut as a pitcher, but his good judgment at numerous critical points in the game would place him among the seasoned veterans. Loudolph Urdahl in left field and Joseph Christianson on short stop both put up an excellent game.

Country Weekly Galuing

Only five country publishers when questioned recently by the department of journalism of South Dakota State college said that the country newspaper is not becoming a better business propostion. More than 100 editors reported rell progress and gave assurance that the country newspaper is geting on solid ground.

GARDEN VALUE AIDED BY PERENNIAL CROPS

Bush Fruits Should Be Grown Where Space Permits.

Asparagus Will Thrive Almost Everywhere in Good Soil—Rhubarb Can Be Planted Along Fence—Utilize All Space.

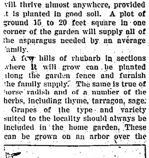
(Prepared by the United States Department of Agriculture.)

Plantings of perennial fruit and vegetables add to the interest and value of every home garden. In localities where they may be grown, some fruit trees and bush fruits should be planted wherever space permits. In addition to the small fruits there are a few permanent vegetables which should not be overlooked.

One of these is asparagus, which will thrive almost anywhere, provided it is planted in good soil. A plot of ground 15 to 20 feet square in one corner of the garden will supply all of the asparagus needed by an average family.

A few hills of rhubarb in sections where it will grow can be planted along the garden fence and furnish the family supply. The same is true of horse radish and of a number of the herbs, including thyme, tarragon, sage.

Grapes of the type and variety suited to the locality should always be included in the home garden. These can be grown on an arbor over the walk where they require no extra space. Four to six vines of the standard varieties, and one or two of the southern type in their proper locality, will be sufficient.



Crops Like These Can Be Raised in Almost Any Garden.

In planning the garden, plant the perennial things where they will not interfere with the preparation of the ground and the cultivation of the regular vegetable garden. Place them around the outbuildings, along the fences and in the corners where they will not be in the way. Bulletins telling how to cultivate the various small fruits can be obtained from the United States Department of Agriculture.

Anna's Merciless Critic

By CORONE REMINGTON

(© by McClure Newspaper Syndicate.)

It was not surprising that Anna Terhune should try writing for the movies. Everybody but the entirely illiterate and the abjectly lazy has tried it, is trying it or is going to try it tomorrow. Most folks [illegible] in film fiction because they fancy themselves a bit clever.

Anna, however, was prompted to that endeavor only because she was sure she was a little less stupid and a good deal less badly educated than Hazel Hazelhurst; and Hazel, so all Hillsburg was one morning informed by the Herald, had written and sold to the Imperial Films company a scenario called "Flaming Swords and Bleeding Hearts." Afterward Anna had seen the film [illegible] with the subtitle, "Scenario by Hazel Hazelhurst," [illegible] big as life.

It was an amazing thing to Anna because Hazel, a spinner girl in the silk mill where Anna was a stenographer, had left school of her own volition at [illegible] and was the kind of girl who talks slang exclusively, chews gum on the streets and goes to 10-cent dances.

If it were really true that inarticulate people like that could get hundreds and hundreds of dollars for just tacking together a few ideas and sending them to a film company, then Anna felt she was doing herself an absolute injustice by not trying her hand at this easy game of chance. She would do it.

Wherefore, within the next six weeks, Anna, by dint of much mental toil evolved three stories. Each was neatly typed and dispatched to the Colossal Photoplays company, at New York. And each, about a week after its departure, came back as unerringly as a homing pigeon. With each was enclosed the same printed form, stating that the Colossal company "regrets that the material submitted is not exactly suited to its present needs."

It was just at this time that the National Fabrics company decided to close down its Hillsburg plant for two weeks for "readjustment purposes." Anna, receiving assurance from the manager that she would not be affected by the readjustment proceedings, found herself with a fortnight's vacation on her hands.

She determined that the way to discover something about this scenario game, meantime, was to go to the place where it is played. So she made the first trip of her life to the metropolis, procured as comfortable a furnished room as New York's fantastic prices made possible to her limited purse, and set out next day to "learn the game."

Anna expected to get speech with a couple of scenario editors, at least, and to obtain from them some words of advice and suggestion; also, probably, to secure permission to visit a studio or two and witness screen drama in the making. She went to the Colossal's establishment first.

From a red-headed typist at the portal of the scenario department Anna received disillusionment. The scenario editor wasn't to be seen. Nobody was to be seen, except by appointment. A million people a day wanted to see somebody about scenarios. Anyhow, Mr. Highland was out. The associate editor was out, too.

Anna was on the point of beating a discomfited retreat when Ted Maltby, under inspiration to have an early lunch, emerged from an inner room. Ted, one of the Colossal's keenest scenario readers, nevertheless was a departmental joke for his softness of heart toward the genus "writing nut." He stopped, looking inquiringly at the red-headed girl and toward Anna.

"'S lady wantsta see somebody 'bout script writin'," volunteered Red Head, vastly bored.

"Perhaps I can be of service," offered Tom. The proffer was made in sacrificial kindness, but as Anna Terhune's face lighted in acknowledgment Ted whistled, mentally, in delighted surprise. "A regular girl!" he inwardly congratulated himself—"after, oh, Lord, these many hundreds!" Then, to Anna, "I am one of the readers—Maltby."

Anna told him her name. "Of Hillsburg?" Ted asked. "I have read several of your scripts lately."

"Oh, I'm so glad!" exclaimed the girl. "Then you will be the very person to advise me. That's what I have come for, you know."

Maltby experienced the sudden sense of depression that comes to him who is unexpectedly called on to break the news to the family of the victim. "I shall be delighted," he managed to say, however. "I was just going over to Forty-fourth street for much coffee and little food. Would you care to come? It's a wonderful place to talk."

New York is not Hillsburg, even on one's first day. Anna, quite to her astonishment, accepted the invitation with no more ceremony than had accompanied its extension. Ten minutes later they were sitting in the comraderie of old acquaintanceship, at a little undraped table in the presence of a negligible luncheon and miraculous Brazilian brew.

"Now," said Ted, "I'm going to play the heavy—just mere plain brute. You've come to New York to get set right in this stunt of screen writing. You've had your scripts sent back and you've made up your mind to find the reason why and how to correct your faults. That's it, isn't it?"

"Why, yes. And I'm glad you—"

"Wait," interrupted Ted. "You're not going to thank me! In a minute you're going to throw that coffee cup at my head, Miss Terhune." Maltby's expression showed that he hated the task ahead of him—"I ask you to believe that I am animated by the sincerest—if quite sudden, friendship. There is only one thing for you to do about this work."

"I think I know what you are going to say," Anna interjected. "You're going to tell me I must start all over—begin at a beginning, somewhere—and learn the craft, just as any other must be learned."

"Wrong. Quite wrong. The only thing for you to do is to drop it. Quit it. Forget it. You'd never make a screen writer in a thousand years. There! I've said it—and mighty hard it was to say. I've read all the stories you've sent in. There's nothing the matter with them—except that they are hopeless. You're not a writer—I think you're a doer. You're not an imaginer of make-believe romances. If you'll pardon me, I think you're a million times more surely intended to live a real one. I don't believe you ever had any actual conviction that you could write—I can tell that, from your stuff. I wish you would tell me just how you came to undertake it."

So kindly, so admiring, so ardently friendly and concerned were the big brown eyes of her merciless critic that Anna could feel no resentment. The only surprise she experienced was in not being surprised at all. And she told him, plump, about the Hazel Hazelhurst episode.

"My better judgment tells me you are wholly right, Mr. Maltby," she went on. "And yet how do you explain the success of that illiterate girl? If it were not for that one thing I could laugh at the whole idea—and devote the rest of my vacation to 'seeing New York' and having a good, wholesome time."

At the mention of the name Hazelhurst, Maltby had started imperceptibly. Now he looked at his companion for half a dozen long seconds before he answered. "I hate to spoil your Hillsburg celebrity's small glory," he said at length, "but in the person before you see the original and only Hazelhurst, author of 'Flaming Swords.' I alone am guilty of that atrocity—and my only excuse is that I needed the money. And you, Miss Terhune, aside from the lunatic who bought and produced it, alone know the shameful truth."

"Good gracious!" exclaimed Anna. "do you mean that that girl at home merely lied—claimed the picture when she saw the name in a movie magazine or somewhere?"

"Your imagination improves, Miss Terhune," grinned Ted.

"Do you know how I feel?" demanded Anna suddenly. "Well, I feel as though some one had lifted a ton weight off my shoulders. I'm going straight home and tear up those foolish manuscripts and give three cheers and go to a perfectly good show!"

"Why not make it the shops this afternoon and the show tonight?" supplemented Ted eagerly. "I—I'd mighty well like to take you."

As they parted at the Broadway corner it wasn't disappointment that went along with Anna — disappointment doesn't sing in your heart. And Ted Maltby, looking after her, said to himself: "Two weeks. Well, many a pippin of a story has been built in less than that."

WATER MUST BE GIVEN TO CROPS

Too Much Sprinkling, However, Often Proves Injurious to Many of Plants.

WAYS OF IRRIGATING GARDEN

Suggestions Given Showing How the Work Should Be Done for Best Results—Thorough Cultivation Should Be Given.

(Prepared by the United States Department of Agriculture.)

Garden crops drink lots of water. It is just as essential to their growth as is plantfood or sunlight. Practically every home gardener who has looked upon his thriving garden with pride in the spring has experienced various degrees of lost hope during midsummer droughts when the plants he has worked with so carefully stand with drooped heads for lack of moisture. Experienced gardeners always provide some means of supplying moisture to keep their gardens growing vigorously through dry spells. Various ways of irrigating gardens are outlined by garden specialists of the United States Department of Agriculture.

The essentials for the successful irrigating of garden crops, they say, are, first, an adequate supply of water, and second, suitable means of distributing it to the plants. Whenever the garden is within reach of a city water supply a hose can be used to advantage, drawing water from the regular piping system. Where a supply of this kind is not available, often it is possible to pump water with a small gas engine and a pump. The source of water will vary with local conditions, and each gardener must work out his own problem, but there are well-defined principles regarding its application.

Too Much Sprinkling Injurious.

Frequent sprinkling of garden plants and the surface soil with the hose usually does more harm than good. The best results can be realized where water is applied only after the soil has become reasonably dry, and the plants are almost at the point of showing the need of water. The soil should then be well soaked, and no more water applied until it is again fairly dry. In the meantime thorough cultivation should be given, beginning as soon as the surface soil is dry enough to work.

There are three distinct methods of applying the water. The overhead-sprinkler system, used by many market gardeners, consists of pipe ¾ inch or 1 inch in diameter with a line of holes of about 1.32 inch in diameter drilled at intervals of every 2 feet along one side. The pipe is supported on lines of stakes driven in the ground across the garden. One end is capped or plugged, and to the other connection is made with the water pump by means of a hose. The water is discharged at any desired angle or direction through the small holes on the side of the pipe. Water should be applied by the sprinkler system only during the latter part of the day or in the evening so that it will have plenty of time to soak into the soil overnight. An abundance of water should be put on at one time, and then no more applied until the plants really need it.

Vegetables Need Lots of Water—This Gardener Is Using It in Transplanting Tomatoes.

Expensive but Effective.

Subirrigation or underground watering is practiced in many localities, especially where the subsoil is rather close, and does not allow the water to flow away freely. Lines of ordinary open-joint drain tile, such as are used on farms for draining land, are employed. The tiles are laid in lines 4 to 8 feet apart, at a depth of 15 to 18 inches, so they will not be disturbed in plowing. In laying the tile the lines should be level and the joints placed close together. The water will flow through the tiles and escape at the joints into the soil. This is perhaps the best method of applying water to garden crops wherever the conditions are suitable for its use, as the water goes direct to the roots of the plants and the surface remains dry, making it possible to keep up continuous cultivation. The objection to the system is that it is rather expensive to install, but when once in place it will serve for many years.

Still Worse.

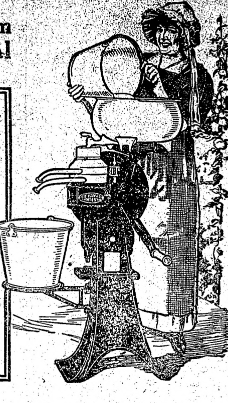
"I have an announcement," Mary Higginson said to her employer, Judge Graves, the other day; "I'm going to marry Cecil Stone, the Poet."

"Then I suppose I shall have to look up another stenographer to take your place," said the judge.

"Not so as you can notice it," she answered. "But I shall have to ask for a substantial increase in wages."—Los Angeles Times.

Goodridge Mercantile Co.,
of Goodridge, *say:*

You get all the cream with a De Laval



GETTING all the cream means getting all the profit. It means that more money can be saved, or that more is available for use in building up the farm or for paying expenses.

Not every separator is designed so that it will get all the cream; some may do so for a short time.

But there is one machine that can always be depended upon to skim clean—the De Laval. You don't have to take our word for it; ask any De Laval user.

A De Laval user gets more cream from the milk of each cow, gets longer service from his machine, and spends less time turning and washing it. Even if you have only one good cow it will pay you to own a De Laval.

Wouldn't you like to know more about the De Laval? Stop in the next time you are in town

Sooner or later you will buy a

GREAT ENEMY OF HUMANITY

Spirit of Fear Holds Many Back From Heights Which They Might Easily Attain.

The greatest enemy of the human race is fear.

If we could banish fear in all its forms, it would mean more to civilization than any previous step in evolution. Health would be immeasurably improved; much unhappiness would be wiped out; efficiency would be greatly increased, and success would be the rule. With the removal of fear, would come real human brotherhood. True democracy would begin.

If you are not as well, as happy, as efficient or as successful as you would like to be, you may find the why in your fears.

"As a man thinketh in his heart, so is he"—physically, in disposition and in circumstances. Fear-thought is toxic, destructive and harmful. Some forms of fear-thought are worry, hatred, jealousy, despair, anger, melancholy, discouragement, depression, confusion, negativeness, nervousness, fretfulness, self-consciousness, lack of self-confidence and foreboding.

Fear of failure is also caused by not thinking well enough of one's self. To banish this and all other forms of fear, one needs another kind of thinking. Replace fear-thoughts with faith-thoughts and systematically cultivate the new line of thinking until it gets to be a habit.

Take a mental inventory today! Seek out your hidden mental weaknesses and expose them to the light of fearless analysis. Get to work upon your fears and run them out. Flood your whole mental region with faith. Repeat daily and the results will amaze you.—C. Franklin Leavitt, M. D., in Forbes Magazine, New York.

SUGGESTIONS ON RAISING CABBAGE

Plant Contains Large Quantities of Mineral Salts So Essential in Diet.

GIVE ATTENTION TO VARIETY

Select Richest Portion of Garden and Work Into Soil as Much Rotted Manure as Can Be Spared—Prevent Work of Cutworms.

(Prepared by the United States Department of Agriculture.)

Most people have a fondness of cabbage, served in one way or another, as it contains large quantities of the mineral salts so essential in the diet. Early cabbage is especially desirable, as it furnishes green food at a time when it is needed.

In giving suggestions on growing cabbage, garden specialists of the United States Department of Agriculture say the proper variety must be planted. Some kinds require a longer period for their growth than others. Jersey Wakefield and Charleston Wakefield are most universally planted for the early crop, Jersey Wakefield being considered earliest of all. The variety known as All Seasons has a round, flattened head and is a good intermediate sort. Copenhagen Market is a large, round-headed early cabbage that is very much in favor among market gardeners. Late Flat Dutch and Danish Ballhead are considered the leading late varieties.

Start Plants Indoors.

Plants must be started indoors, in a hotbed, or be shipped from some point farther South where the season is advanced, if extra early cabbage is to be grown. One or two cigar boxes filled with fine soil and placed in a south window will form a seedbed for starting 100 to 200 cabbage plants. The little seedlings must be transplanted to larger boxes or to a cold frame when they begin to crowd each other in the seed boxes. Cabbage plants are quite hardy, and along the South Atlantic coast are grown in the open by the acre.

Plant early cabbage in the richest part of the garden, having previously worked into the soil all the rotted manure that can be spared and then added high-grade commercial fertilizer at the rate of ten pounds to every 100 feet of row. The fertilizer should be well mixed with the top 4 inches of soil over a space the full width of the row, which is generally 3 feet.

Good Solid Head of Cabbage.

Do not plant cabbage on land where it was grown last year, especially if any of the heads were diseased or showed any kind of trouble. It is always a good plan to rotate crops, even in the small home garden. Cabbage is subject to several diseases, but fortunately these do not do much harm in small gardens. Insects, however, play havoc with the crop from the time it is planted. Cutworms are generally waiting in the soil during early spring to cut off the stems of the cabbage plants just at the surface of the ground.

Protect Plants From Cutworms.

The best remedy, or rather preventive, is to place bands or tubes of stiff paper around the stems of the plants as they are being set in the garden. Thin cardboard makes ideal plant protectors. By cutting the cardboard into strips about 8 inches wide, sections can be cut off and rolled around a lead pencil to form a tube. The protectors should extend an inch below the surface and at least 2 inches above. After the stems of the cabbage plants have become toughened and begin to grow rapidly the protectors can be taken off.

Cabbage worms, the eggs for which are laid by the light-yellow butterflies that are often seen flying about the cabbage plants, do a great amount of damage. Dusting the foliage and the heads with air-slaked lime, to which a little paris green has been added, or spraying them with arsenate of lead, one ounce to a gallon of water, are both effective. There is no danger as the heads grow from the inside and the outer leaves, to which the poison is applied, are all removed.

Lithuania Awarded Seaport.

Lithuania now has direct access to the sea for the first time in her history, according to an official cable dispatch to the Lithuanian headquarters at Chicago. This was brought about by the Lithuanian-Latvian boundary commission's award of the seaport of Palanga, along with 20 kilometers of seacoast on the Baltic, to Lithuania, the dispatch explains. The accession of the Palanga district was celebrated by the population, which is of Lithuanian blood, on April 2.

Swiss Glaciers Running Thin.

The drought in Switzerland is very unusual and is disturbing the economic balance, for navigation on the lakes is almost suspended and the cattle have to be driven long distances to obtain water. Many glaciers have broken and the moraines or "glacier terminals" are far up the mountains. There is less snow now on the peaks than in the normal August when mountain climbing is at its apogee.—Scientific American.

EARLY POTATOES VERY IMPORTANT

Some Essential Points in Growing That Average Gardener Is Apt to Overlook.

FOOD SUPPLY MUST BE READY

Good, Plump, Disease-Free Seed and Plenty of Fertilizer Are Essential —Keep Bugs Off by Dusting or Spraying.

(Prepared by the United States Department of Agriculture.)

Irish potatoes are grown in most home gardens, but there are just a few points in the potato-growing game that the home gardener is likely to overlook which are very important. First of all, potatoes grow quickly, and their food supply must be all ready and waiting for them in the soil. Second, they are heavy feeders and want plenty to draw upon. In other words, the soil for Irish potatoes must not only be rich but it must be rich in plant food of certain kinds. Land that was well manured the previous season, and which contains plenty of organic matter is best. The first step in preparing the soil will be to spade or plow it in to a depth of eight or nine inches, then break up the clods, if there be any, and pulverize the soil practically as deep as it is spaded or plowed.

How to Use Fertilizer.

Common fertilizers give good results for growing potatoes, especially if the fertilizer contains potash, as potatoes require more potash than is usually present in the soil. Fertilizer manufacturers mix special brands for potatoes, and these are generally rather rich in potash. How much fertilizer to use will depend upon the fertility of the soil, but as a rule eight pounds to each 100 feet of row will be about right. A good way to apply the fertilizer is to make the holes or furrows and drop the pieces of seed potato, cover them with an inch or two of soil, then scatter the fertilizer along the row so that it will become well mixed with the soil in completing the covering of the seed. Another method is to scatter the fertilizer in the furrow and mix it with the soil before dropping the pieces of seed potato.

Best Kind of Seed.

Small, shriveled potatoes, left in the bottom of the barrel at the end of winter, are not fit for seed. Only plump, disease-free potatoes, on which the sprouts are beginning to start, should be used for seed. Seed grown in Maine, New York, Michigan, Wisconsin, or some other special seed-producing section will as a rule give best results. Seedsmen get the seed potatoes shipped in by the carload and then sell them to gardeners in small quantities. It takes about ten bushels (600 pounds) of seed potatoes to plant an acre. One bushel of seed will plant one-tenth of an acre, which is a space 43 feet wide by 100 feet long. A peck of seed potatoes (10 pounds) should plant 200 feet of row, each potato being cut into chunky pieces having at least one good eye to a piece.

Potatoes Should Be Cut Into Chunky Pieces With at Least One Eye to a Piece.

Seed potatoes should not be cut until all ready to plant. Whenever seed potatoes are cut and allowed to stand, the cut surfaces dry out, turn black and the seed loses vitality very rapidly. Scabby or diseased seed potatoes should not be used for planting. The variety of potatoes to plant will depend largely upon locality. Irish Cobbler is one of the leading early varieties while Rural New Yorker, Early Ohio, Triumph, Green Mountain, and others are grown extensively. Plant the variety most commonly grown in the locality, but be sure that the seed is free from disease and is in good, sound condition.

Do not plant potatoes too deep. Four inches is about the proper depth. Leave the surface almost level and see that there are no clods, stones, or pieces of sod directly over the hills. Potatoes are one of the first garden crops to plant in the springtime, and it is safe to put the seed in the ground two or three weeks before the date of the last heavy frost. In case there is likely to be a freeze after the plants come up, cover them with an inch or two of loose earth to protect them. They may be uncovered as soon as the weather warms up or they come up through the soil themselves.

[illegible] make no progress in [illegible] the [illegible] of her new indifference. [illegible] the satisfaction of his instinctive social qualities, Utard turned more often to Susan Belden for companionship and the oftener he did the more persistently his thoughts were occupied with Anne.

It was a cold, sullen February Sunday afternoon when it came to Philip that he could stand this state of affairs no longer, and he set out for the Tyson home, determined to corner Anne and get the truth from her if possible.

From her window Anne caught sight of Philip as he toiled up the hill against the bitter north wind. In an instant she was into her fur coat and tam and running down the back stairs. In the kitchen she successfully dodged the vast bulk of Lucinda, who couldn't see "no sense nohow" in going out on such a day—and was on her way down the back road, which led straight out into the open country, at the moment when Philip rang the bell.

Lucinda, with a wave of her pudgy black hand, pointed out the direction of Anne's flight, disclaiming with a shake of her wooly head any responsibility for "sech foolishness." There was a grim, do-or-die look about Philip as he snugged his coat collar about his neck and set out in pursuit.

Anne looked back from the first rise in the road and saw Philip striding across the back yard. As she reconnoitered again from the summit of the second rise he was just topping the first. The wind whipped her short walking skirt tight against her legs. It was hard going. It began to snow, fine light flakes, forerunner of a real storm. But to Anne the pursuit had become a symbol. She had not the slightest thought of turning back. If Philip really wanted to see her—to be with her—badly enough not to give up in spite of anything—well, she would test him to the utmost of her strength.

And Philip—it seemed to him that his very life depended on overtaking that light figure flying before him into the teeth of the storm, even as his happiness must depend on what was to transpire at the end of the chase. He was gaining fast. The snow blinded Anne's eyes, and the bite of the wind sent tears coursing down her cheeks; but still she managed, somehow, to keep putting one foot ahead of the other. He was almost up to her. Her strength was gone. But surely she could take one more step. And then—she vanished from the sight of the man behind her as though the earth had swallowed her.

There was an excavation—some road work going on and the light timber barrier had been blown away by the wind. Unhurt, but exhausted, Anne lay where she fell. But a strong arm lifted her and held her tight, and Phil's voice said: "I was prepared to follow you to the ends of the earth, but not to the center of it. But we're here. And before we get out you've got to tell me why you have frozen me; why you have avoided me; why you ran away from me just now."

Anne was too tired to lift her head from that broad shoulder. "It was because," she said—"because I didn't have an absolute hump."

Phil let it go at that, then. But a hundred times since, over coffee or crib, he has tried to find out what she meant. But Anne only laughs.

SWISS CHARD GROWN MAINLY FOR GREENS

Soil Should Be Rich and Thoroughly Prepared.

When Young Plants Are Nicely Started They Should Be Thinned Out —Lucullus Is Considered the Best Variety.

(Prepared by the United States Department of Agriculture.)

Chard, usually spoken of as Swiss chard, is a form of beet with fleshy leaf-stems grown mainly for use as greens during early summer and fall. The seeds resemble those of the common garden beet and are planted in exactly the same manner. The soil on which chard is planted should be well enriched and thoroughly prepared, say garden specialists of the United States Department of Agriculture. Plant the seeds in rows 18 inches to 2 feet apart and 10 to 12 seeds to the foot to insure a full stand. The seeds should be covered about 1 inch deep, and the surface slightly packed with the back of the hoe after the seeds are covered.

Swiss Chard, a Beet Which Has Been Bred for Salad Foliage Instead of Root.

When the young plants are nicely started they should be thinned to stand about 4 or 5 inches apart in the row. The plants thinned out are commonly used as greens. Cultivate the same as beets, and in cutting for greens remove the leaf stems, leaving the roots and hearts of the plants to produce more leaf stems. The thick leaf stems are cooked the same as other greens. The variety of chard known as Lucullus is considered best. Chards are of an ornamental nature and can be planted as a border along the garden.

[illegible]

Plant [illegible] Stand [illegible]

Seed Bed Should Be [illegible] and Quantity of Well-Rotted Manure Worked In—[illegible] While Young [illegible]

(Prepared by the United States Department of Agriculture.)

Well-grown spinach is one of the best early spring and late fall greens that can be raised in the garden. Spinach is adapted for growing in practically every locality, requires a rich soil, stands cold as well or better than does lettuce, but does not do well during the hot part of the summer. United States Department of Agriculture garden specialists suggest one or two plantings in the early spring, just as soon as the danger of severe frost is past, and a planting late in the summer for fall use. Throughout the South spinach can be planted in October and remain in the open ground all winter.

Splendid Patch of Spinach.

For growing spinach in the home garden a bed about 5 feet in width and 25 or 30 feet in length should be spaded and a quantity of well-rotted manure worked into the top 3 inches of soil. Three pounds of commercial fertilizer should also be scattered over the surface and well worked into the soil. Six or eight ounces of seed will be sufficient for this space. Sow in little drills or furrows running lengthwise of the bed, the rows to be about 6 or 7 inches apart. The seed should be covered ½ inch deep and the soil slightly firmed over it. Watering may be necessary if the weather should be extremely dry following the planting of the spinach seed.

Spinach grows quickly and requires very little cultivation, except to loosen the soil a trifle between the rows and keep weeds from getting a start. If the plants are too thick—that is, crowd each other—they can be thinned out and those removed in thinning cooked for greens. The plants left will then have room to grow larger. Spinach is very desirable as an early spring green, as it contains plenty of iron and other mineral matter. It should always be used while young and tender.

QUALITIES OF FARM FENCES

To Give Satisfaction Barrier Must Be Made to Turn All Stock Without Injuring Them.

Farm fences should combine two qualities—service and economy—says the United States Department of Agriculture. To give satisfactory service the fence must be constructed so as to turn all kinds of stock without injuring them. To be economical it must be built as cheaply as is consistent with durability. The fence that is erected at a low initial cost is not necessarily economical, for it may be so short that it will be very expensive in the end.

The cost of maintaining a farm fence is determined by such factors as interest, repairs, and depreciation on the fence itself, interest on the value of land rendered unusable, and the expense of keeping down weeds. The cost of repairs and the annual depreciation depend largely on the construction. If a fence is made of a cheap grade of material and is cheaply constructed it will need frequent repair and will be short lived. Such a fence will have a high repair and depreciation charge, which in most cases will more than counterbalance the increased investment cost that the erection of a more substantial fence would require. If a fence is made of good materials and is properly built, its repair and depreciation charges should be very low.

The efficiency of a fence depends upon the quality of wire and posts used and upon the manner of construction.

LIME CORRECTS SOUR SOILS

Application Will Prove Beneficial to Small Garden Plot—Binds Loose, Sandy Loams.

An application of about 50 pounds of hydrated or air-slaked lime to a garden plot 30 by 60 feet in size will often prove beneficial. Lime has the effect of loosening and pulverizing any heavy clay soil and of binding loose, sandy soil. Lime also corrects sourness in the soil, which is often due to lack of drainage, but in a case of this kind drainage should be secured.

Winton-Nichols Lumber Company

Irish Had "Mayflower" Adventure.

Students of Anglo-American history have just directed attention to the fact that Ireland also had her "Mayflower." This was the Eaglewing, which, no later than 1636, set sail with a full passenger list of Ulstermen for the American colonies. There were 40 passengers, among whom were four ministers. Ill-luck began at once, for unconquerable winds drove the vessel to the Scottish coast. A leak then held the ship in the "Kyles of Bute." Starting again, she achieved mid-Atlantic, but there a hurricane did such damage and caused such general discouragement that finally the Irish pilgrims made up their minds that Providence was frowning on their emigration, and turned their vessel back to Ireland.

BUSH VELVET BEAN FAVORED

Particularly Useful With Corn as It Does Not Make Harvesting a Difficult Problem.

Reports from 400 cooperators of the United States Department of Agriculture who tested bush velvet bean in 1920 for the first time are highly commendatory. Three-fourths of those reporting consider the bean a market success, and over half of them believe it to be superior to any other variety, everything taken into consideration. Two uses of the bean meet with particularly enthusiastic praise. First, is its use in corn, where its nontwining habit is very desirable, as it does not pull the corn down and make harvesting difficult as do the twining varieties. Second it is found ideal as a cover and green manure crop in citrus orchards, being far superior for this purpose to any other legume yet found. Its use should considerably reduce the fertilizer bill for citrus orchards.

South American Monopoly.

According to the bureau of foreign and domestic commerce, quebracho wood, which is extensively used in tanning, is one of the natural monopolies of South America, as potash was a natural monopoly of Germany and jute is of India. The trade at first was established in quebracho logs, but in the last 25 years the industry of preparing the extract has been built up in South America and is now in a flourishing condition. Quebracho is not indispensable to the tanning industry, but it is a useful reagent, since it produces in a few days results that other tanning materials take weeks or months to accomplish. The importance of quebracho in the war was largely owing to its rapid action, and now that the demand for leather is not so urgent other materials will be used to a greater extent.—Youth's Companion.

A Close Race.

In Texas they tell how, years ago, an Englishman there imported a famous wolfhound from Europe, in order that he might attain wealth catching wolves, by reason of the scalp money offered by one of the state authorities—$10 each.

Some dyed-in-the-wool Texans were invited to witness the first chase. They followed many miles through the prairie grass, but without getting sight of either wolf or hound. Finally they came to a wooded spot, where a native was chopping.

"Did you see a wolf and a hound pass just now?" cried the Britisher.

"Yes, sir; they just passed."

"How was the race?"

"Pretty hot—nip an' tuck. But the dog was a little ahead."

Imitates George Washington

Having in mind the illustrious Washington and the cherry tree, or possibly the "apple tree and the Appomatax," our genial neighbor, brother, J. M. Bishop, some days ago made a bid for fame that has not yet re-echoed around the world, though noises in the immediate vicinity, loud enough, have been more continuous and euphoneous. In the grand rush of trimming up and beautifying the home grounds, the genial judge was commissioned to cut a small bush, but he overplayed his assignment to the extent of cutting down by mistake a fine one hundred dollar tree. Condolences may be communicated in writing or by phone to J. M. Bishop personally.—Tribune.

ONIONS REQUIRE VERY RICH SOIL

Work Into Seed Bed 3 or 4 Inches of Well-Rotted Manure, Say Specialists.

USE HIGH-GRADE FERTILIZER

Plants Grow Rapidly and Should Have Frequent Shallow Stirring of Surface Soil—Plant "Sets" in Rows 15 Inches Apart.

(Prepared by the United States Department of Agriculture.)

Onions require a mellow, rich soil; in fact, very few gardens are rich enough to grow good onions without some fertilizing. In preparing the soil break it up with a spading fork, working into the top 3 or 4 inches of well-rotted manure, suggest garden specialists of the United States Department of Agriculture. Ten pounds of high-grade commercial fertilizer should also be spread over each square rod of ground and well raked into the soil a few days before planting the onion "sets." Poultry and sheep manure are both good fertilizers for onions, but must be used sparingly and well mixed with the soil to prevent burning the onion roots.

Require Frequent Stirring.

Onions grow very quickly and require frequent shallow stirring of the surface soil. The usual method is to plant the "sets" in rows about 15 inches apart and 3 to 5 inches apart in the rows, covering them just so the tops will be below the surface. A narrow steel rake is a good tool for working between the rows at first, but later as the onions attain some size a wheel hoe can be used. For the very first working and for getting between the individual plants in the rows there is nothing better than a short piece of lath with three wire brads driven through it at one end, making what is known as a "scratcher." By and by the onion tops will get so large that they almost fill the spaces between the rows and hand weeding may have to be resorted to in order to keep the crop free from weeds.

Scatter Nitrate of Soda.

About the time the onions begin to enlarge at the base, or to "bottom," as the growers say, it is a good plan to scatter a very little nitrate of soda, not more than two pounds to the square rod, over the soil between the rows and work it in with a hoe or rake. This will stimulate the growth just at the time that the plants most need a little extra food and will usually increase the yield.

A quart of onion "sets" properly planted and given a fair chance will produce about one-half bushel of mature onions.

Onions Are Easily Grown on Good Soil and Require Little Attention Besides Weeding.

Grygla Girl Killed at Fargo

Gagged and bound to her bed, Miss Marie Wick, of Grygla, Minn., was beaten to death in her room at a hotel in Fargo Monday night. She was 20 years old. Police were seaching for a young man who accompanied Miss Wick to the hotel when she registered and then went to lunch with her. When the girl retired later, she left a call for 7 a. m. when she failed to respond is repeated calls, an investigation revealed the crime.

A pillow slip had been used to gag her, ans her wrists were bound to a bedpost with a towel. Severe head wounds showed the cause of her death.

In one of her clinched hands the young woman grasped a wisp of gray hair and this has been added to the meager clues on which the police are working.

The girl's nose was broken. Blood spots on the walls indicated, authorities believed, that she had fought her assailant, who, they thought, probably attacked her after she had retired for the night. There are finger prints and marks of hammer blows on the walls, police said.

The fact that she was gripping a wisp of gray hair, led to belief that the assailant was a middle aged man who accompanied her to the hotel.

The Cass county board of commissioners has offered a $500 reward for apprehension of the murderer.

The city commission of Fargo offered a $500 reword for the apprehension of the murderer in addition to the $500 offered by the country. The city body also recommended that Governor Frazier of North Dakota offer a reward of the same nature.

The remains were brought here Thursday and taken at once to Grygla. They were accompanied as far as Goodridge by John Nystul, who hoppened to be coming this way.

The authorities are doing everything in thier power to solve the mystey of the deed. They are hunting every one who was in her company on her trip from this place. Mr. Nystul was able to give them a tip on one man who was known to have been in her company from Thief River Falls.

State Grain Grades Restoration Likely

Restoration of Minnesota grain grades is considered probable by state officials as a result of the refusel of H. C. Wallace, secretary of agriculture, to grant the request of northwest farmers for modification of federal grades. Secretary Wallace, in spite of urgent appeals by the Minnesota legislature and delegation from Minnesota and the Dakotas, refuused to change federal grades except by eliminating the word "bright" in wheat requirements. Officials of the Minnesota Farm Bureau feddration characterize the action of the department of agriculture as a victory for "theorists over practical farmers who have suffered under actual operation of federal grades". Under a joint resolution of the legislature, the state board of grain appeals probably will restore substantially the old Minnesota grades on wheat moving in intrastate traffic, in the opinion of O. B. P. Jacobson, member of the state railroad and warehouse commission, who attended the Washington hearing. Secretary Wallace promiaed an intensive investigation of the situation during the next marketing season. Farmers are hopeful that this inquiry will result in the desired changes.

Crookrton Live Stock Sale

Over 80 head of pure bred stock will be sold at the live stock donation sale, Crookston, June 14, including 26 Holstein, 18 Duroc Jersey, 13 Chester White, 8 Poland China, 9 Shropshire, 5 Shorthorn, 4 Angus and 1 Yorkshire, both males and females.

Send to C. G. Selvig, Crookston, for sales catalog.

This event promises to be well attenped. A picnic is planned for the same day. Addresses, water sports and a 6 o'clock baseball game are some of the features planned.

It is expected that a large number from this vicinity will atteud.

Stockholders Meeting

The stockholders of the Eastern Development Telephone company held their annual meeting Monday.

Three directors were elected, as follows:— Severt Anvinson, of Jelle; Ole Wiseth of Fourtown; Gust Foudauet of Esplee.

M. J. Stephenson was re-elected secretary-treasurer.

Farmers Launch $100,000,000 Firm

Minnesota farmers have played an important part in the formation of a $100,000,000 farmer's finance corporation, just organized as a subsidiary of the United States Grain Growers, Inc.

The new corporation, which will be the second largest finance company in the United States when it is fully organized, was incorporated last week in Delaware. It is designed to furnish the money to conduct the marketing of grain on co-operative basis and in an orderly manner, through the new national grain sales agency, Minnesota farm bureau leaders said today.

The $100,000,000 finance corporation is an outgrowth of the investigations of the Committee of Seventeen, which the farm bureau federation financed. W. F. Schilling of Northfield, representing the Minnesota Farm Bureau federation on the board of directors of the U. S. Grain Growers, Inc., and J. M. Anderson of St. Paul, vicepresident of the Grain Growers, took part in launching the finance corporation.

According to present plans, farm bureau officers said, the finance corporation is to loan funds to the U. S. Grain Growers to finance the markting of each grain crop. It will take bonded warehouse receipts as security, and raise money by issuing debentures. These debentures, securd by the bonded warehouse receipts, will be sold in the open market.

Farm To Market Roads In Danger

Minnesota farmers are voting solidly against construction of transcontinental "pleasure highways" before the country is provided with good farm-to-market roads.

The first returns from balloting in the nationwide farm bureau referendum show a unanimous demand for developing market roads rather than a few interstate boulevards, the Minnesota Farm Bureau federation announced to-day.

The vote is upholding the farm bureau federation in its defence of the Dowell bill, now before congress. And its opposition to the Townsend bill, federation officers said. The Dowell bill corresponds, on a national scale, to the road policy adopted in Minnesota, according to C. M. Babcock, highway commissioner. The Townsend bill, on the other hand, provides for the creation of another federal commission, and would give this commission dictatorial powers over state road construction, farm bureau officials believe.

The Trip To Red Lake

Sixteen autos left early Sunday morning and joined the Thief River Falls delegation at Oklee for the trip to the Red Lake Agency. There were 62 cars checked out from Thief River, making a total of 88 cars. The route taken was by way of Oklee, Gully and Trail instead of by way of Goodridge and Gully as announed last week.

The party arrived at their destination about 11:30 and immediately proceeded to do justic to the eatables, which had been prepared.

The government boat stationed at the agency was steamed up and about 1:30 nealy a hundred availed themselves of the opportunity to enjoy a boat ride on Red lake, a trip being made to Redby and return. It was nearly 4-30 when the return trip was begin by most of the autos, alteough several had left earlier in the day when rain threatened to spoil the day's outing by making the road hard to travel over.

The light rains had made the road somewhat slippery on the return and a few slight mishaps were reported. Mr. Thoreson's car slipped from the track, near Rhoda and he had some difficulty getting it back, He telephhoned to D. A. Danietson, who weut out and brougeth in the family. Mr. Thoreson stayed with his car, and brouht it in early in the morning. As a result of the exposure he has been quite ill.

Guernsey Breeders Picnic

The Guernsey breeders held their stock show at Thief River Falls Tuesday. There was a fair attendance and sales were good.

McLeod and Norby sold all their exhidits, as follow: Sweet Alice, cow for $275. Bruce of Gleuelg, male calf $125. Two grade heifers, $46 each.

The fine weather today makes the farmers look better natured.

Roland's Idea of a Perfect Woman

By DOROTHY DOUGLAS

(© by McClure Newspaper Syndicate.)

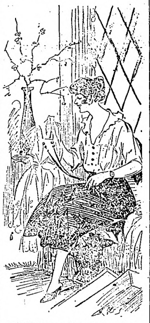
Elsie was more or less accustomed to her brother Roland's impulsive actions, but his latest idea rather took her breath away.

"Sis," he had said in his cheery voice that morning at breakfast, "I have ordered the most exquisite set of gowns, evening, day and anything else in the way of fine dress that you ever looked at. Also hats, shoes, slippers, stockings. In fact, I have bought almost anything that a lovely woman could possibly want. Now," as he saw his sister arriving at a state bordering on apoplexy from curiosity, he continued, "the idea is for you to find a girl who will fit them. She must be reasonably good looking, but that is not of great importance."

"Roland, have you quite lost your mind? Where do I find a girl, and what girl is going to wear a lot of clothes purchased by a young bachelor, and if she did, what are you going to do with her?"

Roland burst out laughing.

"My idea is not so absurd as it sounds," he informed her. "The fact is, I am a bit fed up with all the artificial, stupidly gowned women we know. I have bought what I consider some extremely artistic and distinguished clothes, and I want some one to wear them, and that some one must chum about with me at different theaters, dances and all kinds of nice entertainments. Now don't get the idea that I am looking for a wife. I simply want a natural looking girl whose face is not entirely made up at the beauty parlors. I am sick to death



"It Will Take a Girl of More Than a Little Noise to Wear These."

of pulled eyebrows, crimson mouths and hair that looks like a waxed head. It is only a kind of lark, sis, but I want to experiment. You come in contact with so many girls down in the settlement who never get a chance to wear wonderful gowns—now—" he paused a moment, "can you find me one?"

"I would like breathing space," laughed Elsie, "the idea is not so bad when one has details. I think no one but my prize brother could conceive it, however."

"You're a peach!" Roland grinned and treated Elsie to one of his not infrequent bursts of affection. "Use your own judgment—I rely on your taste and don't want to see any applicants. You must have her gowned and ready to go out with me some evening soon—when I return tired and droopy from business."

"You're so often droopy," laughed Elsie, now all excitement to see the fortunate girl who was to wear all the lovely clothes, She was responding readily to Roland's idea of a unique adventure. She was doubtful as to what her husband would think of it, but Elsie had a way of putting things in just the right way and at just the right moment.

The gowns, furs, evening cloaks and hats which arrived in relays were so exquisite as to make even the beautifully gowned Elsie gasp in admiration. The garments were one and all distinguished as to color, cut and individuality.

"It will take a girl of more than a little poise to wear these with elegance," thought Elsie, "she will almost have to be extremely well born and show it."

It was like a flash that inspiration came to Elsie.

The girl whom she had always wanted Roland to meet with a view to matrimony was just the right girl in the right place. With the cunning of the matchmaker, hitherto thwarted by a wary brother, she wrote the entire plot to Audrey Lancing and in return had a delightful answer.

"I jump at the chance," wrote Audrey. "Am just catty enough to want to meet Roland since he has shied away so often and the incognito will serve beautifully. I will arrive in my most demure, well-worn suit tomorrow and begin the first act."

Audrey was slim and dark. Her brow was broad and milk white and her black hair rolled back from it into a classic knot. Her eyes were dark and heavily lashed and her lips were scarlet. Otherwise Audrey was colorless in repose. The animated Audrey was suggestive of an animated Greek statue come suddenly to life.

Roland was guilty of a swift intake of breath when, upon entering the library that evening, Elsie introduced her selection to him. The fictitious name of Miss Granger had been assumed.

He quickly regained composure and sent a glance of complete approval to Elsie.

"This is very kind of you, Miss Granger," he said, "and I hope you will find a lot of fun in this adventure. I [illegible] to; so where will we go to-night?"

"Why not the opera?" suggested Elsie. "I'm sure Miss Granger loves music."

They whirled off to the opera.

Audrey was very silent, considering the most likely way of ensnaring Roland's real interest. In many subtle ways, however, she kept him well aware of her presence. She was rewarded early in that first evening by realizing that her escort's attention did not waver from her.

There was no denying the fact that the girl Roland suddenly sprung on the public was a social find. Her clothes were always exquisite, her manner dignified and yet Roland had discovered that the heart within those beautiful garments was of equal fineness—a combination he had not hitherto found.

A scant few weeks of gayety had passed before Roland entered his sister's boudoir with a look of defeat.

"I have failed," he said wrathfully. "I have failed to keep from loving this girl. What do you think about it, sis? Where did she come from and what can you tell me about her? She has been so reticent that I am fearful she has a husband tucked away or—"

"Rolly, dear," said Elsie soothingly, "why have you not told her you love her? She might give you all these details herself."

"Sis, you're a peach. I never thought of it," he flung back as he dashed off to find the girl who had so successfully worn clothes.

And Elsie smiled. She already knew where Audrey's heart was, and it was just exactly where every one wanted it to be.

Ah Sing's Chicken Dinners

By CLARISSA MACKIE

(© by McClure Newspaper Syndicate.)

Nick Rogers, mining engineer, came riding in from the mountains to his lonely shack in Peter Valley. Ah Sing, his Chinese cook, was grinning in the doorway, with a pail of hot water in one hand and clean towels dangling from the other.

Nick sniffed the air hungrily. "What have we got for dinner tonight?" he wanted to know.

"Schicken—chop suey—um—velly glood—rlice pudding, velly fine," grinned the cook as he went away with the horse, for he was hostler sometimes and cook most of the time.

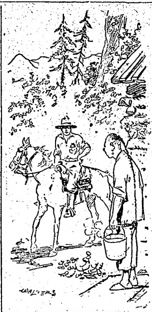
"Chicken again?" groaned Nick, scrubbing vigorously away in the tent he had dedicated for use as a bathroom. "Miles from civilization, and while we keep no fowls, that heathen Chinese produces chicken five times a week. It's worth investigating."

Ah Sing came to toss pails of cold water over him in lieu of a shower bath, and so Nick curiously found vent in words. "Where do you get chickens?" he asked.

The cook flicked his talented fingers vaguely to the south and stopped further inquiry with a cold douche.

"Velly hot day," he smiled pleasantly.

"Get out of here!" commanded Nick, crossly, and he completed his toilet and went into dinner resolving to ferret out the chicken farm whence Ah Sing drew his supply of poultry. There was deer over in the blue hills district, but he had been too busy to go over there, and his companion, Billy Ware, had been called to a distant



"What Have We Got for Dinner To-night?"

ply of tinned meats had given out, and lately it had been chicken four or five times a week and bacon on other days.

"Yelly glood dinner?" grinned the cook as Nick pushed back his chair.

"Fine. How much did you pay for chickens, Ah Sing? I [illegible] owe you some money."

"Ah—fliend mine—haye velly much chickens."

"Sly old beggar that," muttered Nick as he lighted his pipe. "Wonder how any friends of his happen to be here in the wilds among the hoot owls and wild turkeys." He sauntered away from the camp, stopping at the spring for a drink of cold water. As he turned away he noticed a very narrow trail leading away through the long grass to the left. It was a faintly defined path, as if few people passed that way, for the ragweed and wild wheat were disturbed but not trodden. Another path led to the road trail which crossed the base of the mountain and a third one led to Ah Sing's cabin hidden among the umpers.

Nick swung about and went knee high in the wild growth that fringed the new trail. Back in the cabin Ah Sing was on his trembling knees praying to the "white man's joss," for he had seen Nick walking through the forbidden path, and he knew that a day of reckoning was close at hand.

The path led around a spur of the hills and dipped in and out of Peter Valley and finally ended in a great heap of broken bowlders, but two of the bowlders formed a gateway to a tiny valley, green and fertile, washed by the waters of Little Peter creek and shaded by giant oaks and chestnuts. At the end of the path between the bowlders, was a roughly-constructed gate and sitting on the gate was a girl with a shotgun across her knees.

"Hands up!" she said crisply.

Nick obeyed promptly. "Nothing doing here—poor as a church mouse," he bantered.

She was a pretty girl, a mighty pretty girl, he decided, as he gave her look for hostile look. Her dark hair was pinned close to her shapely head and the color in her olive cheeks palpitated with her swift breathing. Her firm lips were vivid coral and her large, melting hazel eyes gave him a dizzy feeling. He had never found time to bother with girls, but it would never be a bother to gaze at this girl, she was so lovely. She wore khaki riding breeches and shirt and a red silk tie made a splash of color.

"Well?" she asked insolently.

"'Howdy, stranger,' is what we say around here," answered Nick mildly.

"I thought perhaps you were looking for chickens," she threw at him.

"Chickens?"

"Chickens!"

Nick looked at his pipe, rapped it on the rock and smiled oddly.

"Do you keep chickens here?" he asked.

"Keep them? You ought to know that we can't do that!" she blazed.

"What do I know about it?" he was beginning when he remembered.

Chicken four days a week and between times bacon!

"Do you mean to insinuate that I—steal your chickens?" he inquired.

"Your Chinaman does. We have missed them for weeks. I caught him red-handed yesterday."

"I am more sorry than I can say. I have been terribly busy for a couple of months and never questioned about his supplies—merely paid the bills. I honestly didn't know there was a chicken house within fifty miles, but suddenly tonight I questioned my cook and he said they were a present from a friend, and I was so suspicious that I started out to find Ah Sing's friend, and here I am!"

"He has no friends here," she said

's here for his health, and he values the chickens—they are his hobby. I was really gunning for Ah Sing to-night!"

"Please don't harm him—he's a mighty good cook and we could never get another one, but I'll scare him—leave him to me! My partner and I are trying to locate the old Wizard Mine for John Ferriss & Co.——"

"John Ferriss is my father," she interrupted. "He told me about the mine yesterday; won't you come in and see him now? We had no idea that our chicken-loving neighbors were our own engineers!" She blushed deeply as she lowered the weapon. "It's safe now," she smiled.

"Safe?" Nick lowered his hands, but as he followed her down the valley to the Ferriss camp he told himself that never was a simple, hard-working bachelor in greater danger than when confronting those eyes, that smile—he was glad that Barry was a married man. "Hurray!" he chuckled insanely.

"Why are you so happy?" she wanted to know.

"No more chicken dinners!"

"You can come and fish here at the creek," she suggested.

"I'll do that," he said emphatically.

Late that night Ah Sing heard a strange rushing through the underbrush near the new trail. Then his employer broke into the cabin, his face radiant with some inner joy.

The terrified cook dodged behind the table and broke into shrill protestations. "No more schicken—never no more—heap solly, boss"—— His voice died away in a feeble shriek as his boss grasped his precious queue.

"No more chicken is right—we'll have fish!"

"Flish—him glood—you clatchee fish little cleek—sabe!" trembled Ah Sing.

Then, to his amazement, his boss caught his arms and danced him wildly about the cabin. "You shall dance at our wedding, Ah Sing," panted Nick, "so I'll begin to teach you now."

"Me sabe—no more schicken," droned Ah Sing as they whirled around.

Ceased to Be a Joke.

The Novice—I wonder what killed the good old mother-in-law joke?

The Old Timer—The mother-in-law joke went out when the business got so good that jokesmiths could afford to marry.

DEAD MAN AT THE THROTTLE.

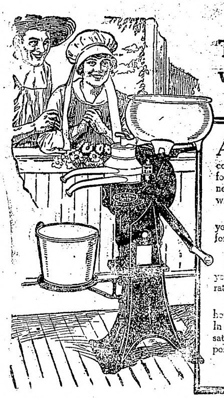
Too Many Men Are in Principle Like the Lifeless Engineer in Charge of Train.

Not long ago, bumping over a network of frogs and switches, the limited express on a great transcontinental railway sped into the terminal station at a large city with the engineer dead at his post. He sat in his accustomed place; his sightless eyes were riveted on the track ahead of him; his nerveless fingers still gripped the throttle. So lifelike was his position that the fireman, who had become alarmed at the undiminished speed as they neared the station, shook him roughly before he realized that the man was dead. He shut off the steam and applied the brakes just in time to avert a terrible catastrophe.

A dead man at the throttle! How many calamities in life can be traced to men in a like condition! God has given each of us the charge of a wonderful machine—the human body with its complex mechanism through which act our physical, mental and moral forces. We are each an engineer, and each of us must drive his machine along the destined path between the eternities.

Many meet with catastrophes. We cannot always explain them, but how many times the cause is—a dead man at the throttle! He sits in his accustomed place with his eyes fixed on the track ahead, but he is dead nevertheless to all thought of moral or spiritual responsibility. There are helpless people on the track before him; there is a long train of unborn generations coming after him; but he does not see or think or feel.

It is one of the mystifying truths of life that a man can be outwardly alive although inwardly dead. His mind may be keen and his senses alert, though he is dead in heart and soul. It would be better for the world if he were physically dead; for while he remains physically alive he is still an engineer in control of dangerous forces—forces that he cannot use with consideration for others or as He who intrusted him with them expected them to be used. The powers it was his duty to control are great; uncontrolled, they are a curse rather than a blessing. Ungoverned by principle and love of others, they are sure to bring tragedy and suffering to every one in their path.—Youth's Companion.



Goodridge Mercantile Co.,
of Goodridge, *say:*

They're starting right with a De Laval

A DE LAVAL Separator starts you right because it provides a steady income the year around. There is no waiting for crops to mature before money is received; no long winter months with nothing to sell, when you have a few cows and a De Laval.

When you start right with a De Laval you have an assurance of a steady income, for every year as long as you want to use it.

And separator trouble is rare indeed among De Laval users. More than forty years of experience in building cream separators are back of the De Laval.

It skims closer, turns easier, has a greater hourly capacity and is easier to keep clean. In short, it is the most economical and most satisfactory separator that it has ever been possible to buy.

We'll start you right with a De Laval that will pay for itself every year you use it

Sooner or later you will buy a
De Laval

A Case of Platonic Friendship

By JESSIE DOUGLAS

(© by McClure Newspaper Syndicate.)

"Have you ever been in love?"

Virginia Fellows looked at the young man who occupied the other end of the divan. He was leaning back against the orange pillows and he did not look at her as he put the question.

She studied his straight nose and the turn of his cheek, his crisp light hair, the way his collar set and peculiar ease of his tweed suit before she answered.

"Yes——"

He scrutinized her face sharply for a moment.

"Why I never thought you——"

"You didn't expect me to wear it like a placard," Virginia said scornfully. "Of course I've been in love. With a man—a real man."

Jimmy Masters was watching her with a new interest.

Her hair that was always so smoothly coiled, her blue eyes that were always so frankly clear, her fresh skin with just a trace of color made Virginia attractive if not pretty.

But now her eyes were vivid and gleaming, and she pushed back her hair with a little excited gesture.

"What was he like?" Jimmy asked with nothing but curiosity in his voice.

"Like? He was dark and tall and not handsome, perhaps, but unforgettable. He had a scar across one eyebrow, and when he smiled you never could forget him! He had a voice——"

"And what became of this wonderful [illegible]

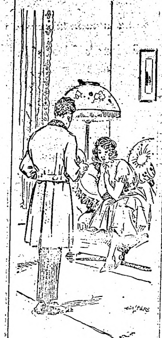
The Goodridge Banner

Entered as second class matter July 19, 1919, at the postoffice at Goodridge, Minnesota, under the act of March 3, 1919.

Published every Friday at Goodridge, Minn.

"Laugh at me!" Virginia said fiercely. "It's just like you to laugh at me!"

"I'm not laughing," he said apologetically, "you ought to know that. We've been friends long enough——"



"I Forgot My Gloves."

"Oh yes—friends. Have you ever been in love?" she put the question with the same nonchalance that he had used.

Jimmy Masters shoved his hands into his pockets and stretched on his feet. He studied the toes of his cordovan leather with interest.

"Rather."

"What became of her?" Virginia asked in turn and her voice was not quite so nonchalant.

"Didn't care anything for me. Never will. Don't suppose I ever will forget her."

"Oh!"

The clock on the mantel chimed 11 and Jimmy rose to his feet.

"Good-night. It's been a jolly evening. Suppose you'll take the 8.30 to the city?"

She nodded as she gave him her hand and smiled that frank genuine smile of comradeship that had attracted Jimmy some six months back.

Still smiling she stood there with quiet composure until the door had closed after him.

Then with a little sob she flung herself down among the pillows and lay there choking with her tears. She dug her hands into the orange cushions and her smooth hair that was always coiled so exactly fell over one cheek. She knew she was rumpling her dress, she knew she would be a wreck in the morning—but she didn't care.

Her eyelids would be swollen and she would have a headache, but now she gave way to the fury of her grief.

When she had cried until her head spun, she twisted her wet handkerchief into a little ball and tried to dry her cheeks with it.

"You're a poor old idiot!" she told herself, sitting up straight; "of course Jimmy Masters was never in love with you! That you could have thought he was for one instant"——she choked back a sob.

Then she laughed a funny choky little laugh at the queerness of life.

Here was she, Virginia Fellows, the secretary of Prof. Blackwell, the envied of all the other office workers. She had her holidays and her summer

Turning Sewage Into Power.

From Australia comes a plan to generate a septic gas from the sewage of towns. The British ministry is investigating the claims of the inventor as to the yield from this source.

Analysis of the gas shows that on an average it consists of 60 per cent methane, 17 per cent nitrogen, 8 per cent hydrogen, 14 per cent carbon monoxide, and 1 per cent oxygen. Experts declare that there is no reason why, properly controlled, advantage should not be taken of the bacteriological action of sewage in septic tanks.

Tests made to determine the horsepower developed in engines resulted very successfully.—Popular Science Monthly.

Did She Give It to Him?

The young man's face was flushed, and his manner was strangely agitated.

"Miss Blanche," said he, "I hesitated about coming to you, but my feelings have overpowered me at last. Is it too much for me to ask——?"

"Go on," whispered the maiden, with heart beating wildly.

"I came to ask you, Miss Blanche——"

"Yes," she smiled, encouragingly.

"If you would give me that recipe which you said you had for indigestion?"

Canned Tennis-Balls.

Dead tennis-balls are worse than useless. What makes a ball go dead? Atmospheric conditions very often. However, if tennis-balls are canned—hermetically sealed—when manufactured, they will be as good as new when opened.

This has been done recently in shipping tennis-balls to China. Heretofore the balls have lost much of their resiliency because of the long ocean voyage. But now, they are not affected by the journey.—Popular Science Monthly.

Not So Bad.

"I fear you are a confirmed pessimist, Mr. Gloom."

"Oh, no, Mrs. Clatter!" replied J. Fuller Gloom. "While I do not see anything but ruination for the next 60 years or so, after that I expect things to perk up quite a bit."—Kansas City Star.

No Wonder.

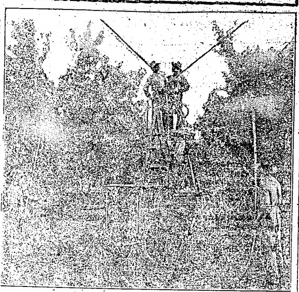
SPRAYING IS PROFITABLE WORK



Gasoline Power Sprayer in Operation for Control of Codling Moth.

(Prepared by the United States Department of Agriculture)

Spraying, compared with its cost, is one of the most profitable forms of orchard work, and one of the most likely to be neglected or misdirected, according to specialists of the United States Department of Agriculture. There is need that fruit growers have a more intimate knowledge of spraying materials, spraying machinery, and especially the whys and wherefores of spraying. The up-to-date orchardist must know just what each spray application will do and the proper time and method for applying it.

Necessary to Know How Insects Feed.

A better knowledge of the life and habits of the more common insect pests and of the nature of insecticides will add much to the efficiency of control measures. The general character of sprays to be used depends on the character of the mouth parts of the insects.

Broadly speaking, all insects secure their food in one of two ways: (1) By actually biting out and swallowing portions of the food material; (2) by sucking out the juices. The first type includes caterpillars or the larvae of moths and butterflies, adult beetles and their grubs, grasshoppers, crickets, sawflies and their larvae, bees, etc.

All biting insects are subject to destruction by arsenicals or other stomach poisons. Some biting insects, however, such as borers and certain root-infesting forms, do not feed in situations where poisons may be applied, and for these a different treatment is necessary.

Among sucking insects may be listed plant lice, scale insects, leafhoppers, the pearpsylla, and the true bugs, all very important enemies of the fruit grower. For their control the so-called contact sprays are used, sprays that corrode the body or permeate the breathing spores of the pests or otherwise effect their destruction.

Biting and sucking insects often occur in a way to permit their destruction by poisoning the air which they breathe, as with hydrocyanic-acid gas or carbon disulphide, but in many cases the expense and danger make this method impracticable.

Summer spraying is directed against bud, leaf, and fruit-eating insects, and for these arsenicals chiefly are used. Dilute contact insecticides are also employed in the control of certain insects, such as aphids, red bugs leafhoppers, etc.

The arsenicals in most common use are arsenate of lead, paris green, and arsenate of lime, used as strong as the foliage will stand. The foliage of stone fruits, as cherry, plum, and peach, is on the whole quite tender, and on these arsenicals must be employed with caution.

The important insecticides may be grouped principally into these three series:

Stomach poisons for biting insects—arsenate of lead, paris green, arsenite of lime, arsenate of soda, arsenite of lead, arsenite of lime, arsenite of soda, Scheele's green, London purple, white arsenic, hellebore, etc.

Contact sprays for sucking insects—lime-sulphur solution, self-boiled lime-sulphur mixtures, fish-oil soap wash, kerosene emulsion, crude-petroleum emulsion, distillate emulsion, nicotine solution, pyrethrum, caustic soda, caustic potash, carbolic-acid emulsion, sulphur spray, resin, resin wash.

For fumigating, the specialists recommend hydrocyanic-acid gas, carbon disulphide, or sulphur dioxide. These are effective against all classes of insects when it is desirable to use them.

Arsenate of Lead Most Widely Used.

Arsenate of lead is the best known and most extensively used stomach poison for insects. It has a wider range of usefulness than any other internal poison now available. It is safe for use on the foliage of most plants, has good adhesive qualities, and owing to its fineness, remains in suspension well in water. Moreover, it can be safely combined with certain contact sprays, as nicotine, kerosene emulsion, soaps, etc., and with a number of fungicides such as lime-sulphur mixture, and bordeaux mixture. It should not be combined with sodium or potassium sulphides.

Commercial arsenate of lead may be obtained as paste or powder. Powder is coming into extended use by reason of the convenience with which it may be handled and stored, and the saving in freight by the absence of water. Paste arsenate of lead, however, may be stored from year to year if properly covered with water to prevent drying, and protected from freezing temperatures.

This method for home-made preparation of arsenate of lead will give a good product without any material waste of chemicals, and will require a minimum amount of time. For every pound of lead arsenate it is desired to make, use either of these:

	Ounces
Sodium arsenate (65 per cent)	8
Lead acetate (sugar of lead)	22

Or this formula:

	Ounces
Sodium arsenate (65 per cent)	8
Lead nitrate	18

Information touching methods of spraying, and directions for using the various preparations are contained in Farmers' Bulletin 908 which may be obtained free upon application to the Division of Publications, United States Department of Agriculture.

DIVERSIFICATION IS HELP TO ENTERPRISE

Lessens Risk of Loss From Crop Failures.

Promotes Better Utilization of Various Equipment and Permits Rotation of Crops, Say Agricultural Specialists.

(Prepared by the United States Department of Agriculture.)

Diversification of the farm business by the production of several salable products, lessens the risk of loss from crop failure and low prices, promotes better utilization of teams and machinery, permits rotation of crops, and on the whole is conducive to the safety and stability of the enterprise, say specialists of the United States Department of Agriculture.

If the farm selected is so situated that it is desirable to grow only one product, the reliability of that product, both as to production and as to sale, should be assured. If the climate is such that only a limited class of crops will thrive or mature, the growing season may be so short that certain crops essential to a good rotation can not be grown. It should be made doubly sure that climatic conditions, such as rainfall, period of drought, late spring or early fall frosts, hailstorms, strong winds, hot winds, fogs and humidity do not seriously limit the development of a well-balanced farm organization. Many farmers have failed through failure to give proper attention to this problem.

Equally important in this regard with market and climatic limitations are soil and topography. A soil may grow beans, corn, oats and timothy, but not clover, an essential crop for many rotations, or the soil may be too sandy for some crops. It may blow badly or wash when intertilled crops are used in the rotation. It may be too poor, or subject to leaching, or alkali, or drought. These conditions may not necessarily limit all the crops, yet be so unfavorable as to limit certain crops on which proper diversification of the business must be built.

WEEDS ARE GREAT NUISANCE

Constant Source of Troubles to Farmer in Raising Crops—Steal Nourishment From Plants.

The farmer does not have to be told that weeds are a constant source of trouble to him in the raising of his crops. They not only cause him a great deal of extra work from early spring until late fall, but they are an eyesore and seriously interfere with the best crop yields. On every farm they are a nuisance and when we stop to think of how common they are throughout the country, how rapidly they spread, and how much nourishment they take from the growing crops we are really surprised to know that farm crop yields have been brought up to their present high average.

CULTIVATE CORN TO HELP YIELD

Thorough, Early Plowing Encourages Plant Growth and Prevents Soil Crusting.

DESTROYS ALL YOUNG WEEDS

Successful Growers Favor Shallow Cultivation, Except Where Excessive Rains Have Packed Soil —Maintain Dust Mulch.

(Prepared by the United States Department of Agriculture.)

From the time of germination to maturity corn should be given every opportunity to make a steady, sound growth. If the development of the plants is checked from any cause it may reduce the yield no matter how favorable the later treatment. The most successful corn growers realize the importance of thorough, early cultivation in order to prevent any check in the growth of the plants because of weeds or crusted soil. As a consequence of heavy rainfall, the stalks may increase rapidly in height and at the same time, for lack of cultivation or of soil fertility, or for other reason, they may be slender, too tender, or of poor color. Thrifty corn plants are thick, strong, and of dark-green color.

Use Weeder Soon After Planting.

Horse weeders and harrows should be used when needed to break a surface crust, check insect depredations or kill young weeds that start before the corn is up. While the plant is very small, narrow shovels that throw the soil but very little should be used, and fenders are usually desirable to prevent covering the plants.

Experience favors shallow cultivation, except if excessive rains have packed the soil, when deep cultivation will help to dry and aerate the ground. In cultivating it is important to avoid breaking the roots of the plants. If the plants have reached a height of 2 or 3 feet the soil in the middle of the rows should not be cultivated deeper than 4 inches, and sometimes less. For retaining soil moisture a loose soil mulch 2 or 3 inches in depth should be maintained.

The question is frequently asked how often corn should be cultivated.

A Two-Row Wheeled Cultivator Does Effective Work.

The answer is that it should be cultivated often enough to keep down weeds and to maintain constantly a loose soil mulch until the corn has attained its growth. A greater number of cultivations will be necessary when rains at intervals of about a week cause the surface soil to run together and crust. This crust must be broken and the soil mulch restored, or evaporation will soon rob the soil of much of its moisture. An essential object of cultivation is to restore the soil mulch as soon after a rain as the condition of the ground will permit. If the ground becomes hard and baked dry the crop will suffer greatly and when cultivated the dirt will break up into clods.

Many crops are cut short by stopping the cultivation because the corn is too tall for use of a two-horse cultivator. If the condition of the soil demands it, shallow cultivation should continue, even though the corn is tasseling. Blocks nailed to the handles will protect the hands from the corn blades. Iron mowing-machine wheels dragged between the rows will sometimes greatly benefit the crop.

Saving of Labor.

With a good riding or walking double cultivator one man can cultivate as many acres as two men with one-horse cultivators. This saving of labor is worth consideration. With a properly constructed wheeled cultivator, covering two rows at a time, one man has often cultivated 15 acres per day.

The shovels with which it is best to equip either single or double cultivators must be determined by the kind of soil, the size of the corn, and size and nature of growth of weeds to be destroyed. For sandy land sweeps are in great favor, and vary from 6 to 30 inches in width. The sweep scrapes along through the soil at a depth of 2 to 3 inches, cutting off weeds and allowing surface soil to pass over them, falling level and flat

GREATEST OF ALL TEACHERS

Civilization Looks Always to the Bible in the Hours of Prayer and of Peril.

The Bible is the Great Spirit of the white man's civilization. Our infidel or latitudinarian may reject it, but it is distilled in his blood. It is more than literature, more than the Book of the church, than history or theology. It is power. It is the essence in the character of our intuitions, of the gentlemen and ladies we meet on the highway of progress. It endows low understandings with higher ideas than those of the uplift writers. It imparts a literary taste surpassing that of the authors of the best sellers. It brings more tremendous news than all the special editions of all the newspapers ever issued. The inquirer sees in it the character of free thought. The forward mind sees in it the compass for the course. The imaginative mind, resting on the far reaches of time, sees it flowering out in the tender and the beautiful, the strong and the great. It is the Great Progenitor.

The tongue of Moses gives voice to innumerable tongues. The sword of Joshua summons innumerable swords. The altar of Aaron splits into many altars. Its Psalms are the battle hymns of freedom. The magic of its wondrous words is in all our literature, were every Bible burnt. From this lamp the lamp of art was filled; from this fire the fire of science was kindled with a pagan fuel.

Looking back sixty centuries, we today are civilized; looking forward sixty centuries, we are savage. The Bible goes with us. If it is the Word of God, we shall not cast it down, if it is the work of man, we must not. We will look upon it in the hour of prayer [illegible]

get [illegible] the solicitude of his [illegible] teachers cannot call back [illegible] ence—that audience filling [illegible] tombs of its fathers, childre[illegible] after so many ages; ignorant [illegible] ter so much wisdom.—Leslie's.

Seventy Pounds of Meteor a Minute.

Our planet is getting heavier and heavier! How does that happen? Because of the meteors that are constantly falling on it. You may not have seen any of them fall, but the earth is a large place. In a year eleven thousand four hundred and thirty-five tons of meteors fall! This gives an average of seventy pounds per minute.

Much of this tonnage comes in the form of fine meteoric dust that settles all over the earth. However, a large meteor—too big to burn on entering our atmosphere—falls occasionally. Several years ago one of them fell in Iowa and exploded on hitting the earth. Over five thousand pieces were picked up and some weighed over four hundred pounds.—Popular Science Monthly.

Limited Time.

Don't ever get the idea that Catalina Island is a slow place. Had you been close to the rock where Big Ben hangs out, on a certain recent Sunday evening you would have overheard the following:

"Mary, if I were to speak to you of marriage in spite of the fact that I only met you on the way over from San Pedro, what would you say to it?"

"Well, I might say never put off till the return trip what you might have said on the way over," answered Mary.—Los Angeles [illegible]

Nick Bundhund, M. O. Seavey and G. C. Gulrud attended the school officers' meeting at Thief River Falls last Saturday.

A. Hemestvedt, formerly assistant at the Faamers elevator, but now farming southwest of town, was in the city Thursday.

Mrs. M. O. Seavey, Mrs. George Josephson, Mrs. Christine Vake and George Larson were in Thief River Falls Saturday.

Miss May Wildes left Monday for Oklee, where she will attend the wedding of a friend before going to her home at Hibbing.

The Torgerson Ladies Aid will hold a sale June 24 at the E.K.Rimme farm. All those holding number on the quilt are invdted to be paesent.

N. Bundhund, on his way to Golden Valley, lost some combination of his steering apparatus, which necessitated his making a very slow trip home.

Mr. and Mrs. P. O. Tvedt and son were in Thief River Falls Saturday, where Mr. Tvedt attended a meeting of school district officers of the county.

C. A. Johoson has leased the restaurant from Henry Tollefson and will operate the same. Mr. Tollefson will still manage the confectionery store,

Colbjorn Lovstad returned Wednesday from a few weeks stay in Nooth Dakota. He was attacked with appendicitis and underwent an operation at Grand Forks.

The United Ladies' Aid will hold their auction sale at E. K Rime's place on Friday, June 24. There will also be a raffle on a quilt. Everybody invited to attend.

Mr. and Mrs. J. M. Bishop and George Sterns were over from Theif River Falls Wednesday in attendance at the directors meeting of the Farmers State Bank.

Frank Kusm ic returned this morning fromthe a rmy service, from which he hasjust been discharged. He re-enlisted after the war was over and has since been located at Camp Grant.

John Nystnl left Saturday evening for Minneapolis. There is to be a meeting of life insurance men there this week and he expected to make the acquaintance of some of his superiors.

Mr. and Mrs. Clarence Overstad of Minneapolis, accompanied by Mrs. L. A. Babcock and father inlaw Henry Smith of Thief River Falls, have been guests at the Bundhund home this week. Mrs Overstad was formerly Elsie Bundhund.

On account of rain the meeting of the Young People's society, which was to have been held May 29 at the Sigurd Anderson home, was postponed to Sunday, June 12, at the same place. Mrs. S. Anderson and Mrs. O. Wiseth will entertain.

Lutheran Church, o. Synod
Sunday, June 12. German services 11 a. m., English services at 2:30 p. m. in Goodridge. Both services will be held in the Norwegian Lutheran church.
H. LUTZ Pastor.

Lutheran Church
English services at Torgerson at 11 a. m. of June 12.
Services at Erie 3 p. m. of June 12 and at Goodridge at 8 p. m. of the same date.
The Y. P. S. will also meet in the afternoon of the same day, at the home of Mr. and Mrs. Sigurd Anderson.
G. A. HANSON, Pastor.

Goodridge Lutheran Free Church
Services Sunday, June 12: at 2 p. m. Stnd. Quambeck will preach in English.
GEORGE LARSON, Pastor.

Throat and Chest Clinic

A throat and chest clinic will be held in the school building in the village of Goodridge on Wednesday, June 15, from 10 a. m. to 4 p. m. The clinic will be conducted by Dr. M. G. Milan, medical director of Oakland Park sanitarium, essisted by the county nurse. No charges are made for examinations and it is an unrivaled opportunity for any one in a run down condition or in poor health to obtain the services of a specialist without any expense to them.

Obituary

Carl George Vake, who gave his life for his country, was born in Yellow Medicine county in 1895 and was 23 years old at the time of his death, March 23, 1918. He was married to Miss Min Christina Kulseth and on July 26, 1918, he was called to serve for his country. On October 11 he was taken ill with influenza and died in a hospital in France October 24. He is survived by his wife and little daughter Clara his parents, Mr. and Mrs. Andrew Vake one sister and seven brothers, Esther, Isaac, Hans, Knut, Elling' Amandrias, Tommy, and Gunder.

The remains were returned from France and arrived here Saturday. Funeral services were held Monday by Rev. G. A. Hanson and burial was made in the Erie cemetery.

The Proposed State Road

Mr. A. C. Tvedt, accompanied by M. O. Seavey, made a trip to Warren Tuesday and met with the Marshall county commissioner. No action has been later on the petition for the road across Marshall county. Another petition has been presented to the board asking for a road on the range line east of Gatzke, and it is probable that the commissioners will mrege the two routes in one. The road from Gatzke would run straight north ot Roseau.

Mr. Tvedt was advised that it would be necessary topresent another petition to have this route constituted a state road, which petition he will undertake to procure in time to present at the July meeting of the board.

Miss Bauer left Friday for her home at Onamia, Minn.

Miss Harriet Millard of Lancaster was a guest of Mrs. McDonald the first of the week.

Miss Teresa Giefer went Friday to Thief River Falls, where she will spend the summer.

Sttart McLeod exhibited four head of cattle at the Guensey stock show at Thief River Falls Tuesday.

Arther Sund is driving the mail in place of his brother John, who is working on the dredge north of Thief River Falls.

Wm. O. Gaylord, M. J. Lysbakken and Bernt Tanum left yesterday on business mission to an inland town named Syre, west of Mahnomen.

Stockholders Meeting

The stoldkholders of Farmers State bank held their annual meeting Wednesday. The directors were all re-elected, as follow: J. M. Bishop, Jay Payne, M. G. Thoreson, Mrs. J. M. Bishop N. Bundhund.

Officers were elected as follows: J. M. Bishop, president; N. Bundhund, vice president; H. B. Rockne, cashier.

Community Picnic

Following is the program of the community picnic to be held at Squaw Point, Thief River Falls Friday, June 17.

Music by Thief River Falls band.
Address of Welcome, Mayor Bratrud.
Address, Farm Bureau Development, M. L. Warner, of Warren, Minnesota.
Music, Woman's club.
Address, C. G. Selvig.
Song, Quartette.

There will be foot races, cano, swimming and sack races. Nail driving and pie eating contests for men and women, old and young.

Bring your lunch basket and friends. Stands will be located on the grounds.

Go to the

Creameries Unite In Statewide Body

Delegates representing 320 co-operative Minnesota creameries, meeting in convention at the state capitol, have launched a statewide association designed to improve the market for Minnesota dairy products and save money for the producers. A board of 15 directors elected by the convention, is drafting articles of incorporation for the Minnesota Co-operative Creameries association, Inc. Every co-operative creamery in the state will be given a chance to join.

Governor J. A. O. Preus, addressing the convention, declared the creamery association will be the greatest step forward ever taken by the dairy industry of the state.

The new agency aims to benefit every co-operative creamery which joins it, by standardization and improvement in quality, through cream grading and proper manufacturing methods: by shipping and bargaining on the basis of carload lots of butter and other dairy products; by service of experts to assist in marketing on the principal terminal markets: and by co-operative purchasing, at wholesale price, of necessary supplies such as salt, tubs and coal.

The plan adopted by the delegates calls for placing experts on the Chicago, Philadelphia and New York markets, to assist Minnesota shippers in getting the best prices, accurate market information and fair freight rates. It also calls for employing district field men to assist the creameries throughout the state in arranging carlot shipments, standardizing their products and solving all problems of co-operative marketing on a large scale. Direct selling through the state agency will not be undertaken for some time.

The directors have requested the Minneaota Farm Bureau federation to assist in uniting the co-operative creameries as members of the association. They will receive the full co operation of the farm bureau organization from the state federation down to township units, farm bureau officials said. Centralization of dairy, grain and livestock marketing is the goal of the state federation.

Means Business

Evidence is accumulating that Uncle Sam meant it when he said it.

What he said was that J. Barleycorn is to be on outlaw, hunted and harried till he gives up the fight.

Major Roy Haynes, the new national enforcement officer is reputed to be the sort of man who has more than a perfunctory official interest in battling the d [illegible], him

It would have been possible for President Harding to have paid a political debt by handing this job to some man more interested in politics than in prohibition. In that case a leaky lid would reasonably have been expected. By choosing a man of known convictions, the president has served notice on the country that the dry law is not going to be administered on the theory of a joke.—Daily News.

Sow Thistle War

Instruction of farmers of Minnesota to aid them to combat Canadian and sow thistles, quackgrass and dodder has been begun by the University of Minnesota department of agriculture. A. H. Larson, feed and plant analyst at the farm school, is mounting specimens of these plant pests to send to county agents throughout the state. From these specimens, Mr. Larson explained, farmers will be able to identify and destroy these weeds when they are discovered in their fields.

Road Grading

Mr. Lund, the contractor who has the grading of the road north and south across Pennington county, moved in here with tractors, graders, and men Wednesday and begun work on the road running ½ mile west of Goodridge, beginning on the town line between Goodridge and Highlanding, then north 4½ miles to the marshall county line.

He has just finished a section running north from Oklee.

School Board

At the meeting of the board of education last week it was decided to add a Fourth year of High School work.

The advisability of adding a commercial department to the school was discussed and received favorable consideration.

It was decided to advertise for bids for janitor of the school building and also for bus drivers. There is already one application for the janitorship.

DUCKLINGS NEED GOOD ATTENTION

Remove to Brooder After 24 to 36 Hours Old and Give Them First Feed.

COMFORT IS BIG ESSENTIAL

Hot-Water Pipe Systems Have Been Used Successfully for Brooding—Style of Brooder House Depends on System Used.

(Prepared by the United States Department of Agriculture.)

After the ducklings have been confined to the incubator for 24 to 36 hours after hatching, remove them to the brooder and give them their first feed. The brooder should be operated at a temperature of about 95 degrees Fahrenheit at first and gradually reduced to 90 or 85 degrees within a week or 10 days, say poultry specialists of the United States Department of Agriculture. The temperature may be reduced quite rapidly, depending on the season of the year. Keep the ducklings comfortable. When uncomfortable they will crowd together and try to get nearer the heat, but if comfortable they will spread out under the hover.

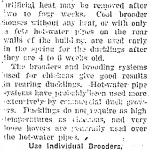
Confine Ducklings at First.

The ducklings should be confined around the hover at first until they have learned to return to the source of the heat. In the winter green ducklings usually require heat until they are marketed, but later in the season artificial heat may be removed after two to four weeks. Cool brooder houses without any heat, or with only a few hot-water pipes on the rear walls of the building, are used early in the spring for the ducklings after they are 4 to 6 weeks old.

The brooders and brooding systems used for chickens give good results in rearing ducklings. Hot-water pipe systems have probably been used more extensively by commercial duck growers. Ducklings do not require as high temperatures as chickens, and very loose hovers are generally used over the hot-water pipes.

Use Individual Brooders.

Individual brooders or hovers, holding from 25 to 100 ducklings, and coal, gasoline or distillate oil-stove brooders with a capacity varying from 200 to 500 may also be used successfully in brooding ducklings. Both single and double brooder houses are used extensively on duck farms. In single-brooder houses 15 to 16 feet wide the aisle is usually in the rear of the house, with hovers arranged next to the aisle. Double-brooder houses are generally 25 to 30 feet wide and have a center aisle, with hovers either under or on both sides of the aisles. The aisles are usually 3 feet wide and the brooder pens 6 to 8 feet in width. From 75 to 100 ducklings are kept in each pen in the brooder house.



An Overcrowded Pen of Ducklings Induces Feather Pulling.

The style and construction of the brooder house depend on the brooding system used. If ducks are raised in warm weather, feeding sheds, the sides of which are open a foot or more above the ground, are commonly used. Brooderhouse yards are from 30 to 100 feet deep, with divisions corresponding in width to the pens in the house.

For Sale—Cheap, or in trade, five young mules, broke and gentle.—A. O. Sandland, Grygla, Minn. m27 4t

Threshermen To Meet

There will be a meeting of threshermen and farmers of Pennington county at Thief River Falls on June 21, in the county house, at 2 o'clock p. m. Compensation insurance will be discussed. This meeting is called for the purpose of discussing the laws that were passed by the last legislature.

Another Young Girl Attacked

A gruesome tragedy was discovered last Saturday afternoon by Mr. and Mrs. Albert Dobias, farmers living five miles east of Angus, Polk county, when upon their return from Warren they found their 17-year-old daughter, Katie Dobias, tied to a chair, her clothes nearly torn from her body, and still unconscious from blows delivered by an unknown assailant. Telephone reports from Angus said a doctor was on his way to the Dobias home and, it was still doutful whether the young girl would live.

Later reports said that the girl had recovered consciousness long enough to tell that she had been attacked by a masked man. It was believed the girl had been assaulted. Mr. and Mrs. Dobias had made the trip to Warren in an automobile early in the morning, leaving their daughter alone on the farm. They had no intination of the attack on their daughter until they returned from their trip. Then when they stepped through the kitchen door they were confronted by the startling sight of their daughter, still unconscious, firmly tied to a kitchen chair with blood covering her face from the blows struck by the masked assailant. They at first believed that their daughter had been killed.

Swat Him

Because the fly is small and does not roar like a lion or devour its prey at a mouthful, mankind pays little attention to it. But the fly is as deadly a foe to civilization as any of the pests of more fearsome aspect, which man makes it his busidess to exterminate. The fly's attack is insidious and therefore the more to be guarded against. He buzzes into the houses, drops his deadly disease germs where they will fertilize and buzzes out again to pick up a fresh cargo. Swat him, he is your enemy.

A Thirsty Fish

The Lake of the Woods pickerel appears to have fell off the water wagon—if there is such a thing in the fish language, says the Warroad Pioneer.

Last Friday evening Deputy Collector Townsend was inspecting a shipment of fish from across the lake when he noticed a hard lump on a pickerel, and further inuestigation revealed an 8 ounce bottle of whiskey in its inside. Searching further he soon found another one.

Knocked Out

A large number of farmers from eastern Marshall county were at Warren yesterday to protest against the proposed new ditches. It is claimed, the expense will be from $1,000 to $1,200 per quarter seation. Particulars of the meeting are not available at this writing, but we understand Judge Grindeland rendered his decision against the establishment of the ditches.

J. W. Manahan of St. Paul was the attorney for the protestants.

Suspect Arrested

The night clerk at the hotel at Fargo where Miss Marie Wick was murdered, has been arrested, accused of the crime.

Base Ball At Highlanding

The Highlanbing base ball teams, representing Highlanding and Star towns, opened their season with a donble header at the Young People's Society picnic at the I. Hanson place west of Kratka, which resulted in double-win over Bronkeberg an Hazel, The first game chut out Bronkeberg by a score of 13 to 0, and the second defeated Hazel by the score of 15 to 13. The games were well played. Heavy slugging being the feature. A return game with Hazel will be played next Sunday at Highlanding.

The balteries in the game with Bronkeberg were — Highlanding, J. Nelson and Kjas; Bronkeberg Welch and Rarness.

Following is the line up in the Hazel game:

Highlanding		Hazel
J. Nelson	p-ss	L. Hansen
Baird	p ss	P. Engelstad

To Win the Love of Philip Utard

By DORA MOLLAN

(© [illegible] McClure Newspaper Syndicate.)

Time: "A woman with fair opportunity and without an absolute hump may marry whom she likes." And "Vanity Fair" being the book chosen as the week's English lesson for the senior class at the Pitman high, it came naturally about that this fragment of the philosophy of a wise man should be the subject of discussion by a group of girl students gathered in a corner of the big assembly room.

"Why, it's no more to be doubted than Professor Bane's toupe!" This calm statement by Susan Belden ought to have settled the question forever—for hadn't Susan littered the steps of Pitman's school system with heartbreaks? Nor was she the prettiest girl in the class, by several.

Some budding iconoclast in the group murmured, [illegible] "Her mother feeds 'em!" This drew smothered giggles. But it was Anne Tyson, the acknowledged brains of the senior class, who had the temerity [illegible] ly qualify the dictum of [illegible] class belle.

[illegible] "You can win a man, girls, [illegible] ery. But you can't keep him by the same method—not if he's worth it."

Came a day when this shaft, sped at a fair mark, was to turn, boomerang-like, and fly back at the archer.

Fate seems to have her own inscrutible reasons for requiring certain pairs of individuals to "fall in" side by side and march in step, even when there is no particular sympathy, or even liking. It was that way at school—and afterward—with Sue Belden, daughter of the proprietor of the town's one little department store, and Anne Tyson, whose father was the town's leading physician.

They lived on the same street, played in the same group as children, were members of the same class in "high," both graduated from the commercial course—and then obtained positions in the same office—that of a big chair factory, which was Pitman's leading industry. And to top it off fate carried her fantasy so far as to plunge them both in love with the same man at the same time.

Philip Utard, son of the senior member of the firm, had been transferred from the Boston headquarters to the Pitman plant to learn the details of production. And gossip speculated as to whether he would not follow the example of his father and of an elder brother—and acquire also a life partner from among the establishment's female personnel. That was getting to be quite the Utard way.

If Philip did meditate any such step it was soon apparent enough—to the watchful gossips—that his choice lay between Anne Tyson and Susan Belden, for Philip divided his leisure very evenly between the Tyson and Belden homes, or escorting the girls alternately to such entertainments as the town afforded. Perhaps he enjoyed the company of Anne's father, for Doctor Tyson was a man of broad and genial culture. And it was still said of Sue's mother that she "fed 'em."

Anyway, on a certain day in January it would have been necessary for Phil Utard himself to toss up a penny had he been pinned down to a decision there and then.

It was on this day that Susan took close note of Anne's heightened color as Utard passed close to their desks. She leaned slightly toward Anne, and with a laugh that was just a little machine made, inquired whether she remembered the schoolroom discussion on the Thackerayism. "What cocksure little idiots we were!" she exclaimed. "Wise men change their minds, don't they, Anne—and wise women?"

There was a challenge in the girl's voice. But from the well-poised Anne it got no response beyond a non-committal "sometimes."

Yet the thoughts of Anne were "long, long thoughts" in the hour intervening between her arrival home and the serving of dinner by the rotund Lucinda, boss of the Tyson menage. This hour Anne habitually spent before the fire in the living room awaiting the doctor's return from his afternoon round of calls.

It was here that Anne confessed to herself what she had never confessed before—that for weeks she had been trying with all her might and main—like the nursery rhyme man of the bramble bush—to win the love of Philip Utard. And had she, like the bramble bush man, scratched out both her eyes in the proceeding?

Just because she considered herself more fit wife than Sue Belden for a man of Philip's mentality, did it follow that she would be able to make him happier? Suppose that, with deliberate effort, she won him—wouldn't he be very likely to discover later that he had been the man of her choice, instead of her being the woman of his? And would that make for happiness for either? There was nothing for her to do but jump right back into that bush!

That evening Philip came to call—and [illegible] trying to recall what he could possibly have done to so change Anne toward him. Not once had she responded [illegible] look of his in her usual [illegible] pathetically interested [illegible] And when her father appeared [illegible] his office hours she excused [illegible] [illegible] and was the [illegible] erratic old man and noted [illegible] ficiency.

Efficiency; A disgusting word! It meant that she was never late and that she could smile even when it hurt. It meant she could write perfectly typed letters and keep the files and wear blue serge dresses with fresh white cuffs and never have a hair out of place. It meant that her hands were cool and white and that she was never hurried.

"Efficiency! I hate the very sound of it," and Virginia flung herself back among the pillows.

That was the way Jimmie thought of her when he saw her coming back on the train—always cheerful and friendly and calm.

"I say, I'm awfully sorry—" Jimmy Masters stood there stammering. "I forgot my gloves. I didn't think you were here. I wouldn't have—"

Virginia's face was tear-stained and her hair was frankly mussed, her voice had a queer, uncertain sound that struck at his heart.

"Yes—just sorry—"

"Ginny, [illegible] that fellow—you're not thinking of him?"

"No! no! no!" she said in a stifled voice, and he saw her blouse was crushed and one cheek was scarlet where it showed beneath her fingers.

"I never knew you were like this. I always thought you were superior; didn't have feelings like the rest of us fellows——"

Virginia gave a queer uncertain laugh and looked up at him.

"I know you'll only laugh at me, but that girl I told you about. It's you. I never would have dared to tell you if I hadn't seen you like this—you couldn't like me, could you, Ginny?"

"But I do; that's the trouble," she said, "and that [illegible]——"

He caught her hand and heard her whispered words, "I just made him up; but I thought we were just—friends——"

After he kissed her he said wickedly, 'Old Plato knew what he was doing when he made up that friendship gag!"

SIDE LINES INSURE AGAINST BAD CROPS

Many Stories of Achievements Reported From South.

Case Cited of Arkansas Woman, With Co-operation of Husband, Sold $1,200 Worth of Milk, Butter and Eggs in Year.

(Prepared by the United States Department of Agriculture.)

Numerous little stories of big achievement are encountered in going through the reports to the United States Department of Agriculture from home demonstration agents in the South. In estimating the money value of the returns reported in the various activities of the clubs it is necessary, of course, to remember that account seldom is taken of the land value, interest on investment, board and lodging, and such things, although credit for labor at the current rate of pay is set down in most cases.

However, the value of the achievements rests upon something more important than money—the fine community [illegible] the leadership developed, the general all-around rise in agricultural morale. It is impossible not to be deeply impressed by the work reports of some of these southern women and girls, results accomplished very often, under conditions of unusual difficulty and discouragement.

An example of what may be accomplished under the stimulus of the home demonstration work and with encouragement and co-operation in the home is afforded by the case of [illegible] of [illegible], who [illegible] of her [illegible] in the work [illegible] is doing. [illegible] this couple sold from January [illegible] December last year, [illegible] and [illegible] of butter and [illegible] hens [illegible] worth of eggs. [illegible] $1,200 from side lines [illegible] in the [illegible] years is important on any farm [illegible] in many cases is a form of [illegible] against crop failures.

Farm Woman Feeding Her Flock.

INCREASED AVERAGE OF PUREBRED SIRES

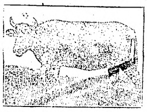
Progress in "Better Sires—Better Stock" Campaign.

Altogether 431,139 Head of Domestic Animals and Fowls Have Been Enrolled by Owners—Greatest Activity in Ohio.

(Prepared by the United States Department of Agriculture.)

A noticeable increase in the number of purebred animals listed in the "Better Sires—Better Stock" campaign is the principal development during the first three months of 1921. The result has been to raise the general average of purebreds for the whole campaign 1½ per cent. Altogether 431,139 head of domestic animals and fowls have been enrolled by their owners.

Of that number 22,605 are purebred sires and the remainder are females of various breeding, but all were bred to purebred males, according to the owners' pledges. Although the number of purebreds, as noted, increased noticeably, more scrubs also were listed than in any previous quarterly period, thus helping to accomplish one of the main objects of the campaign, which is to grade up inferior animals by the use of good purebred sires.



The Use of Scrub Animals on Any Farm Is an Expensive Practice.

The greatest activity during the current year, so far as enrollments are concerned, has occurred in Ohio, with Nebraska second. In justice to other states it may be added that several, from which only a few pledges to use only purebred sires were received, have been active in other branches of the work, particularly the procurement and distribution of purebred sires of good quality. Kentucky and numerous other states, including West Virginia, Minnesota, Wisconsin and Virginia, are launching aggressive drives against inferior sires, particularly scrub bulls.

A feature of interest during the first quarterly period of 1921 was the dispatch of five emblems of recognition to far-off Guam, our island outpost in the Pacific, thousands of miles beyond Hawaii.

PRESERVING SOIL MOISTURE

Pernicious Practice of Permitting Water to Escape From Soil Should Be Discouraged.

The practice that prevails in some irrigation localities of letting the natural moisture escape from the soil, with the idea that more water can be applied when it is needed, is most pernicious and should be discouraged, say specialists of the United States Department of Agriculture. If the moisture that gets into the ground in the form of precipitation or as irrigation water is retained by the soil it will enable the soil organisms to act upon the plant foods, rendering them available for plant growth. There is a feeling of safety in having an unlimited supply of water for irrigation purposes, but it should be remembered that irrigation costs money and labor; precipitation is nature's gift.

WINDBREAKS SAVE MOISTURE

Farming and Living Conditions More Favorable in Regions Where Trees Are Planted.

When the prairie regions of the Middle West were first developed the lack of trees was severely felt. The clear sweep of the winds across the plains was a great hindrance to agriculture, for the soil was dried out quickly by evaporation, grain was lodged, and orchards injured by the force of the wind. Windbreaks were the only remedy and thousands of miles of them were planted along roads and farm division lines. The effect of this planting, although felt only gradually, was very distinct; farming and living conditions became more favorable throughout the whole region.

CUT LETTUCE FOR SHIPMENT

Far Less Decay Developed in Transit When Two or Three Lower Leaves Are Removed.

Carefully cut lettuce, with the two or three lower leaves and all diseased leaves removed, develops far less decay in transit than the commercially cut lettuce in experimental shipments from Florida to northern markets, says the United States Department of Agriculture.

POTATOES IN ROTATION PLAN

Specialists Advise Interval of Two or More Years Between Crops for Best Results.

Specialists state that it is best to grow field potatoes in a regular rotation, keeping an interval of two or more years between the potato crops because of the liability of disease carrying over from one crop to the other.

CO-OPERATIVE MARKET SAVES FOR FARMERS

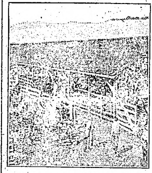
High Proficiency Shown in North Carolina.

Activities Last Season Confined to Purchasing Branded Barrel Covers and Selling Potatoes—Cotton Farmers Gain.

(Prepared by the United States Department of Agriculture.)

During the last year a farmers' exchange in Beauford county, North Carolina, saved its members and the farmers in the community between $75,000 and $100,000, according to a report to the United States Department of Agriculture.

The organization, formed to aid potato growers, has shown high proficiency in co-operation. Last season its activities were confined to the purchasing of branded barrel covers and the selling of potatoes. Thirty-five thousand barrel covers were bought at a saving of $700, and 126 carload lots of potatoes were sold with a saving of $50,000.



Yards for Live Stock in Southern Community.

A great growth in co-operative marketing and purchasing has been one of the outstanding results of extension work in the South. County agents, assisted by marketing specialists, through marketing demonstrations and by instruction and advice, have aided local and county associations of farmers in the co-operative selling of many kinds of farm produce and live stock, and in the co-operative purchasing of a great variety of farm necessities.

Farmers have gained knowledge of methods and acquired confidence in their ability to do business on a co-operative basis. They are beginning to undertake definite business organizations on a county-wide and even state-wide scale for the marketing of their main cash crops, such as cotton, tobacco and peanuts.

Owing to the co-operative work in cotton grading, classing, and stapling and information given as to the market value of the various grades and staples by extension workers, it is estimated that between $1,000,000 and $2,000,000 were saved to the cotton farmers of Texas during the year in increased returns.

PRESERVE EGGS IN SOLUTION

Where Sodium Silicate Is Not Handy Lime Water Is Satisfactory and Very Cheap.

Sodium silicate, or water-glass, is the most convenient preservative in which to store eggs for winter use, but where lime is easily procurable, lime water is very satisfactory and much cheaper than water-glass. Lime water is apt to roughen the shells of the eggs slightly, making the eggs somewhat less attractive in appearance than water-glass. Directions for using this lime water are given by the United States Department of Agriculture.

To preserve with lime, dissolve two pounds of unslaked lime in a small quantity of water, and dilute with five gallons of water that has previously been boiled and cooled. Allow the mixture to stand until the lime settles, then skim off, and use the clear liquid. Put clean, fresh, unwashed eggs in a clean earthenware crock or jar and pour the clear lime water into the vessel until the eggs are covered. At least two inches of the solution should cover the top layer of eggs. Keep the receptacle tightly covered to prevent evaporation and also to keep all foreign material out of the solution.

INFORMATION ON SHIPMENTS

Dealers Unable to Give Fair Quotations Because of Lack of Explicit Details.

Many shippers when writing to distributors fail to give sufficient information concerning their respective shipments, says the United States Department of Agriculture. The dealers, therefore, can not give fair quotations on the offered goods. Information, it is pointed out, can not be too explicit or detailed.

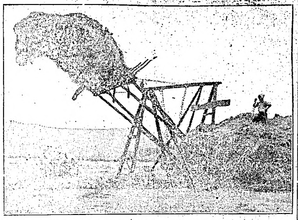
IDING GRADE OF POTATOES

Much Dependence Should Not Be Placed on Size Alone—Knobs Detract From Value.

grading potatoes too much de-
lence should not be put on sizing
e, say specialists of the bureau of
kets, United States Department of
culture: A potato, for example,
be so covered with second growth
s that it will not pass through
meshes of the grader, but it does
rightly belong in the first grade.
knobs mean much waste and re-
extra time in preparing the
rs for the table. Or, a potato may
ure up satisfactorily to the stand-
of size and yet be so diseased as
e worthless.

potato may even present a fine
-winning appearance on the sur-
and be far below grade because
juries or disease of which there
o evidence without cutting it.
zing injury, or hollow heart, illus-
cases of this kind. The grower
not be blamed for losses which
t from these causes, but to a great
t field conditions are the primary
of the troubles which appear
the potatoes are marketed.

USE LABOR TO BEST ADVANTAGE



The Stacker Is a Modern Implement Utilizing Horse Labor for Putting the Hay on the Stack.

(Prepared by the United States Department of Agriculture.)

The hay crop, even when the labor supply is normal, causes more worry, anxiety, and disappointment than any other crop. The time for harvesting is comparatively short. Other crops require attention at the same time. And the weather is to be reckoned with.

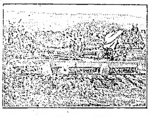
A great deal of labor is wasted every year during hay harvest, say specialists of the United States Department of Agriculture, not because of actual idleness on the part of the workers, but because labor is expended unnecessarily on operations that do not utilize it to the best advantage. If an old method can be superseded by a new one that will enable the same number of men to accomplish more work in the same length of time, or fewer men to accomplish the same work in the same length of time, it will mean more hay saved, more profit to the farmer, and a better condition for the country.

Shift Burden from Man to Horse.

Although there is a scarcity of man labor, there are still plenty of horses on most farms, and herein largely lies the solution of the problem. On farms where considerable hay is grown methods must be adopted by which the greater part of the heavy labor is done by horses. This will necessitate the general use of certain types of labor-saving machinery, some of them not so common in the East, which have been thoroughly tested and proved satisfactory in the western part of the United States. The small hay grower, however, need not make a very heavy investment in new haying apparatus, for by rearranging the working of his crew and using a little more horse labor for the hard work he can add considerably to the efficiency of his crew.

Here are some suggestions made by the specialists for avoiding of labor in haymaking.

Do not run two or more mowers close together. If the front mower has any trouble that causes it to stop, all of the mowers usually wait while repairs are made on one. There is a tendency, also, for drivers to waste too much time talking when they stop occasionally to let the teams rest. A good practice when two or more machines are used is for each driver to lay off a "land" for himself and work independently, so there will be no interference from other machines.



A Four-Wheeled Push Rake.

Side Delivery Rake Is Best.

Do not turn hay by hand. It is too costly. The cheapest and most efficient way of stirring hay in the windrow is with a two-horse tedder. One man with a tedder will do more work than 12 men stirring with hand forks. It is not even necessary to have a man to run the tedder. A boy big enough to drive a team will do just as much work.

A one-horse rake operated by a man makes raking very costly. A two-horse sulky rake is better, but the side-delivery rake is best. When curing is done in the swath and a hay loader is used, the crew can start taking the hay from the windrow as soon as the side delivery has made one double windrow across the field. If the sulky rake is used, the crew will have to wait until the rake has gone several times across the field. In this matter the extent of the haying operations has to be considered, of course. On very small farms the use of the side delivery rake might not be economy.

If the weather is clear and the hay is in proper condition, there will be no necessity for hay caps or for further labor till the hay is hauled. But hay caps will pay for themselves in one year when the weather is bad. They are more especially needed with clover, alfalfa, and pea vines, all of which cure slowly.

If hay is to be bunched, the hand method is too expensive. A two-horse sulky rake can bunch 30 acres or more a day and a boy can drive it just as well as a man. Even more labor can be saved, however, by using the push rake to bunch hay after it has been raked into the windrow. It is a good plan to have two men working together to round up the bunches, since more can be accomplished than when each works alone.

It is a waste of time to pitch hay onto a small hayrack on a high-wheeled wagon. Use a large hayrack on a low-wheeled wagon.

Loading hay with pitchforks is the hardest, slowest, and most expensive way. The men are working constantly, but the horses are doing nothing most of the time. If a loader is used, the hardest part of the work is done by the horses and the men can handle about 30 per cent more hay.

Save Labor on the Stack.

The push rake furnishes the most economical method of hauling hay to the stack, barn, or hay press if the distance is not much more than one-fourth of a mile. One man, or a boy, with a good push rake and a team used to the work will handle three times as much hay as two men with a small rack on a high-wheeled wagon.

Stacking hay with a push rake and an overshot stacker mounted on wheels eliminates nearly all of the back breaking work of the old pitchfork method. With a yield of one to one and a half tons to the acre, two men on the stack can easily handle all the hay brought in by three push rakes, accomplishing a vast saving in labor and hay over the pitchfork method. Another method not so good but still vastly better than the pitchfork method is a stacker equipment with a double harpoon fork. The outfit can be made at home and will cost very little compared with the labor it saves, but harder work is necessary to get the hay on the stack than with the overshot stacker.

When hay is to be baled from the field, one man by working in the afternoon, can round up enough hay which has been bunched by push rakes to keep the press going next morning until the dew is gone from the hay in the windrow. When the hay is not thus rounded up the crew will lose two hours or more on mornings when there is a heavy dew.

Carelessness in setting the press may result in loss of labor. When the press is properly set two men can get plenty of hay to it from the stack.

REDUCE LOSSES IN SHIPPING

More Careful Handling in Harvesting and Packing Spinach Is Urged by Specialists.

Losses in long-distance shipments of spinach can be greatly reduced by careful handling in harvesting and packing together with effective refrigeration in transit, according to specialists of the bureau of markets of the United States Department of Agriculture. Decay and deterioration in transit caused by the development of slimy soft rot cause serious losses to shippers in some sections.

"This decay develops rapidly in transit when temperature conditions are favorable," say investigators of the bureau. "It starts at places where the leaves have been bruised or wounded, and it very frequently follows attacks of blight or other field diseases. Other causes of deterioration in transit are yellowing and wilting of the leaves. Prompt handling and shipment at a low temperature largely reduce losses from these causes."

When barrels are used, it is advisable to scatter crushed ice in several layers through the container, a large layer being placed on top of the spinach next to the barrel head. Holes bored in the bottom of the barrel provide drainage. Shipments in baskets or crates carry best with a layer of crushed ice in the center of the container and another layer on top of the spinach just under the cover.

CHIEF CAUSE OF SWARMING

Lack of Ventilation and Space for Queen Bee to Lay Eggs Encourage Restlessness.

The main causes leading to swarming are lack of ventilation, lack of space for the queen bee to lay eggs, insufficient room for storing honey, and over-abundance of drones or a queen bee that has become too old. To prevent swarming therefore, these conditions must be avoided, suggests the Extension Service beekeeping specialist. The queen alone is normally capable of laying eggs, and for this reason swarming is necessary to make new colonies and perpetuate the race. The old queen always comes out with the first swarm.

BAD FEEDING IS CAUSE OF RUNTS

NEGLECTED AT WEANING TIME

Many Undersized Pigs Often Grow and Develop Into Useful Porkers.

After Growth of Animals Has Been Retarded It Takes Considerable More Feed to Overcome Condition and Grow Out.

(Prepared by the United States Department of Agriculture.)

"My nine years' experience in stock raising has been almost entirely with purebred cattle and hogs, and while some runts appear at birth they are not nearly so numerous as the runts caused by neglect and improper feeding and housing." This is the opinion of a Tennessee farmer in a letter to the United States Department of Agriculture.

Many Small Animals Develop.

Specialists of the department emphasize the fact that many animals that are undersized or small at birth often grow and develop into useful, profitable animals if a little special attention is given them soon after birth. This is especially true with pigs. Unless the small pig of the litter is thus provided for when quite young, very often it is not worth feeding to maturity. If the proper kind or amounts of feed are not given when very young, if required to compete with stronger or older animals for what they do get, born runts or those that are undersized will become more pronounced runts as they grow older. In this respect they resemble closely animals that are normal when young but later become runty from a lack of such proper feed and care which usually occurs about weaning time. After animals become runty or their growth retarded, undoubtedly it will take more feed to overcome this condition and grow them out.

A Cheap and Convenient Weaning Trough.

Cause of Runts.

"When pigs become runty," the Tennessee farmer adds, "they never become normal. I have estimated it requires at least 25 per cent more feed to put them in marketable condition than it does normal hogs. My experience with purebred dairy cattle is that fully 90 per cent of runts among cattle are caused by improper feeding and care. If the stock raisers of this country were educated in the proper feeding and care of live stock until they reached normal growth, the runts in live stock in the United States would be almost eliminated."

This statement not only further emphasizes the fact that it does not, broadly speaking, take more feed to prevent runt animals but does require considerably more feed to develop them once they become runty. Also that it rarely is advisable to feed out a pronounced runt. The only practical thing to do, therefore, is to prevent running by providing the necessary feed, care, and management at the most critical periods of their growth and development. These periods with most animals are when very young and at weaning time.

FAILURE OF ORGANIZATIONS

Unless Farmers Remain Steadfastly Loyal Downfall Can Be Brought About Quickly.

An association of men opposed to a farmers' co-operative enterprise can bring about its downfall very quickly unless the farmers remain steadfastly loyal. Many co-operative organizations have failed through the weakness of members who could not resist the temptation offered of a fraction of a cent. When the opposition organization puts out a bait to catch you, try to remember it is only a lure to draw you from your own friends. Once you have deserted, the bait is withdrawn. Stick to your friends, if you expect them to stick to you.

RAPID LOSS OF PHOSPHORUS

Due to the Fact That Grain Is Sold—Stock Use Product in Making Bones and Tissues.

The fact that phosphorus is found largely in the grain of crops results in a relatively rapid loss of available phosphorus from the farm, for the grain usually is removed and sold. Even where all crops are fed on the farm the loss is large because growing animals use it in bones and other tissues.

FOOD MATERIAL FOR PLANTS

Nitrogen, Phosphorus, Potassium and, Less Frequently, Calcium and Sulphur Are Lacking.

Plants, like animals, must have certain definite food materials. Two of these, iron and magnesium, are present in amounts sufficient for all plants in nearly all soils. Three others, carbon, hydrogen and oxygen are taken from the air and water. They are therefore abundant. The other five may be so lacking in any given soil as to limit plant growth. These are nitrogen, phosphorus, potassium and, less frequently, calcium and sulphur.

FOLIAGE CROPS REQUIRE SUN

Lettuce, Kale and Spinach Do Fairly Well in Partial Shade—Tomatoes Need Light.

As a rule, foliage crops such as lettuce, kale and spinach, do fairly well in partial shade, but must have a minimum of three hours of sunshine a day. Plants that ripen fruits, such as tomatoes and eggplant, should have a minimum of five hours of sunshine each day.

MAIN VIRTUE OF SANDY SOIL

Roots of Plants Pass Through It Readily, but It Dries Out Too Quickly.

The chief virtue of sandy soil is that the roots of plants can pass through it readily; its chief fault is that it dries out too quickly. Clay soil holds water well, but it tends to pack and harden. Both types of soil need stable manure—it loosens up clay and helps sand to hold moisture.

PERSONAL VISIT TO MARKET

Grower Enabled to Acquaint Himself With Distributors and Improve Marketing Practices.

Many times a personal visit to the market will more than repay the shipper for the cost of the trip, says the United States Department of Agriculture. Points that seem trivial to the producer often are very important to the dealer. Such a visit enables the grower to acquaint himself personally with the distributors, to select trustworthy representatives, to learn the difficulties of the "man at the other end," and to improve his marketing practices.

POTATO STORAGE A SUCCESS

Much Depends on Quality of Tubers, Temperature, Moisture and Size of Piles.

Successful storage of potatoes, says the bureau of markets, United States Department of Agriculture, is dependent on such factors as the quality of the tubers stored, the temperature at which they are held, the moisture content of the air, the size of the storage piles, and the exclusion of light. The proper temperature ranges from about 35 to 40 degrees Fahrenheit.

MUST BE PRACTICAL FARMER

Not Worth While to Send Carpenter to Tell Tailor How to Put a Coat Together.

Men who act as field agents must be practical farmers. There is no use in sending a carpenter to tell a tailor how to make a coat, even if the carpenter happens to be pretty well read up on coats.—Dr. Seaman A. Knapp.

Hank Meets Bill

Hank—Heilo, Bill; how are the crops looking?

Bill. Fine. Getting better every day.

Hank Are you going to ship any cattle soon?

Bill Yes, I am going to ship the 25th of June.

Hank Aren't cattle cheap now?

Bill What do you mean, poor cattle or good fat cattle? Fat cattle are a good price, but poor cattle are cheap, always have been and always will be.

Hank Will it pay to ship good fat cattle the latter part of this month.

Bill Yes; in my opinion it will pay well. I have had years of experience and have always found that it is best to get my cattle on the market early, before the market is glutted, then you see I don't have so many seilers to compete against.

Hank I believe you are right, Bill. Never looked at it in that light before. Much obliged for the tip.

A word to the wise is sufficient.

Raise nothing but the b9st. It pays.

MINNESOTA HISTORICAL SOCIETY

THE GOODRIDGE BANNER

VOLUME XV, No. 26. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JUNE 24, 1921. $1.50 PER YEAR.

Three For Dairy Market Board

The Minnesota Farm Bureau federation has nominated three Minnesota dairymen for places on the Committee of Eleven, which is to conduct a nation wide dairy marketing investigation. The three suggested are H. B. Nickerson, Elk River, president of the Minnesota Co-operative Creameries association, Inc.; John Brandt, Litchfield, secretary of the association, and H. R. Leonard, manager of the Twin City Milk Producers association. James R. Howard, president of the American Farm Bureau federation, was authorized by a national convention of dairymen in Chicago last month to appoint the investigating body.

This committee will work out plans for centralization of co-operative marketing of dairy products, recommend ways to improve prices and market and transportation conditions, and help form co-operative associations where none now exist.

Minnesota, as the foremost butter producing state, is expected to play a leading part in the inquiry. Its new association, now being organized with the co-operation of the farm bureau federation, probably will furnish a model for recommendations of the investigating committee, farm bureau officials said today. The association was organized by delegates from farmers' shipping units, who met in St. Paul and voted unanimously to combine co-operative livestock marketing under the direction of a single company, owned and controlled by farmers and operated on a co-operative basis.

"The success of the centralized livestock marketing enterprise, the first of three great co-operative marketing projects to be launched in Minnesota this year, is assure by the early results of the campaign", Mr. McKerrow said today. "The rapidity with which local shipping associations are joining the new central sales agency is breaking all records. The centralized marketing movement is sweeping Minnesota: the federation of 250 independent shipping units in two weeks in support of an entirely new venture in livestock marketing in the northwest demonstrates that farmers are determined to take the process of marketing into their own hands in an effort to eliminate waste and get a squarer deal for themselves and for the consumers as well.

"Six counties have made a perfect record in their support of centralized marketing. Every local shipping association in Lincoln, Dakota, Scott, Hubbard and Lac qui Parle counties has joined the Central Co-operative Commission association. In Lyon county, all associations with the exception of one which is tributary to the Sioux City market, have joined. Ninety per cent of the associations we have reached have voted without hesitation to concentrate the sale of all their livestock through the farmers' agency".

Mr. McKerrow asserted today that within the next two years the co-operative sales agency at South St. Paul will be "the greatest institution of its kind in the world". It will become the sales agency for farmers' associations in Minnesota, the Dakotas, Montana and Wisconsin, he said.

Raduce The Rates

If freight rates are reduced because of the coming reduction in railway men's wages no class will benefit more than the farmers of the northwest. The present high rates have cut grain prices to a large extent and have cost farmers many millions of dollars. In some products, such as hay and straw there has been no market at all lately as the freight charges were almost as much as could be realized in the cities. Lower rates should slso result in lower prices for lumber. At present lumber freight rates from the Pacific coast are more than the cost of lumber at the mills. So a reduction of rates will stimulate railway busiress and give many idle railway employers employment. There will be more building and more work for builders. All lines of business would soon feel the good effects of removing the high freight rates barrier to trade.—Norman Counns Index.

Live Sfock Sale a Success

The donation live stock sale held at Crookston proved to be a success in spite of rain which greatly reduced the attendance as it prevented the use of autos. The picnic was not held. The total of the sale is $4,454.50. The pavilion building fund will receive this amount less the expenses of the sale which were kept down to a minimum thru donations of aervices, publicity, etc.

SHANGHAIED!

By Sub Urban, en route

As it happened, we started on a Thursday afternoon, about the middle part of May, "cross rivera," in order to board the Soo train at Gully station the following morning. Hr. Christian Amundson, who had been an impromptu visitor at Camp Sub Urban for about a week's time, had important business matters to attend to at Dnluth, Norway. By the way, Hr. Amundson is in the puplishing brainess there anc is also an occasional writer of Norwegian poetry.

It pnt us a day ahead in catching the east bound, but it is rather rough going on those roads, especially after a heavy heavy rain shower. However, we fully appreciated "Bro. Gust's" taking us by team as far as Red Lake river, from where we were obliged to use "abostles' horses," there being no bridge as yet and no ferry. We were also lucky to get a three mile lift at the other end of the road, when our old time friend pnd pioneer, Edward Wanke, kindly admitted us into his new commodious car.

Scribbs bid farewell to Amundson at "Big Bemibji," whence the latter proceeded via the Soo to the Zenith city; but I soon had acquired a new pal at at the I. B. O. employment agency. We were soon aboard the G. N. bound for Cass Lake.

"Gee, I hope that saw mill camp is near the bank of the river so we can go in swimming." "Same here," joined in Mike Kirby, who had hired out to pile lumber. Mike, the same as Hr. Amundson and Scribbs, is a descendant of good old Norse stock, only for convenience of expression the name had been changed from Mickel Kirkeby, the original Norwegian form. Permit me further to mention that this "rcunder" is no novice at telling true to-life tales of exciting experiences—not only from the west coast, but all the way from the Orient and far away Australia.

But, coming back to our story, we had not more than stepped off the train at Cass Lake before Russell Richards, the hustling anto driver and and boatman, halted us inquiring as to where we thought we were bound for. Into a Buick and off we sped for the lake shore about a mile distant. Here are boat houses, skiffs and launches galore. We just had time to get our cigars lighted by the time Ressell's 35 horsepower gasoline boat shoved off away from the wharf. Faster and faster it cuts through the water. Mike and I surmised that to get well away from the beach was Russell's reason for steering in a line apparently lengthwise across the lake. We had been told at the employment office that the place was "some four miles up the lake" or miles up river" or something like Surely "we were on our way did not care very much where we going," but we did not expect to

nghaied!" cries out Scribbs,

hanghaied is right!" agrees Mike.

ssell, at the wheel forward, twists head clear 'round to take a look at us fellows in the stern the beat making so much noise. d to that brand of cigars," he thought. The weather was cold for that time of the a cold northwest wind was making it all the more uncom. The launch rolled to the dan times. When again it was waves more straightly, the haird lumberjacks resumed ts at jigging and boxing deck, trying to keep warm. ves splashed all over the through the small openings jug parts. So everything make the trip a "frisky" d we guessed right? Well, was still the same, toward end of the lake!

ready passed by Star island, summer resort. Now and within clear sight of points ch and where one could see ses, ponies, bucks, squaws s. "Are we to be deported n reservation?" some one emarked. At last we pnt it captain."

d our nerves by diplomati us that we were nearing of Turtle river, and were go miles up that river," after ad only left to [cross lake ronounced "Kitchy" — to stination. What could "the do but acquiesce and cool vas "four miles up" some e congradulated onrselves re having, gratis, a fifteen mile trip, though cold.

Emerging from Kitichi lake outlet, "our boat" points across the lake— "There's the saw-mill—what we see

The Farmers Referendum

Sixteen questions were submitted to the farmers as part of a national referendum. Launched by the American Farm Bureau federation.

Tabulations of early returns at state farm bureau federation headquarters showed:

That the farmers of the state are voting 10 to 1 against the enactment of a general salestax.

They are voting 20 to 1 in favor of continuing the excess profits tax.

They are voting 50 to 1 in favor of construction of farm to market roads prior to the building of transcontinental highwhys under federal control.

Card Of Thanks

The undersigned desire to express their heart-felt thanks for sympathy shown at the death and buraal of their daughter Fern, and also for the beautiful floral offerings.

Mr. and Mrs. Carl Christianson.

Lutheran. Picnic

There will be a picnic at Wm. Jones' place north of town next Sunday. A fine program has been arranged. We are planning on music by the Goodridge band and a good ball game. John Nystul and H. O. Berve will be the speakers of the day. Dinner will be served at noon and lunches the balance of the day. Proceeds for the benefit of the Lutheran church. Everybody welcome. By the committie.

Farm Bureau Meeting

The annual meeting of the Pennington County Produce Association will be held in the Farm Bureau office on Saturday afternoon at one p. m. Officers will be elected for the ensuing year aud plans outlined ror carrying on the business for this year's potato crop. The acreage this year in Pennington county is almost double that of last year and all growers are very much interested in the marketing plan as carried on by the produce association last year.

Township unit meetings will be held at the following places this week: Star, District 50 on Thursday at 3 a'clock p. m. to discuss the eradication of grasshoppers in that section which threaten to be a serious pest if not taken care of very soon. The farmers in that locality will be shown how to make and mix the mixture anc how to apply it on the fields so ad to give the best results. This work is very important as the hoppers have seriously damaged a field in few days imte if not poisonek.

A meeting will be held in Smiley Saturday evening at 8 o'clock p. m. in the Lewis Nelson school house. It is expected that a large crowd will be present.

The Rocksburg township unit will hold their regular monthly meeting in Valhall Hall July 2nd, at 6 o'clock p. m.

ENTRY INTO WAR

First Gun in Late Great Conflict Said to Have Been Fired From Steamer Mongolia.

Captain Rice of the American steamship Mongolia of the Atlantic Transport line, which arrived at Liverpool on April 25, 1917, reported that the first gun of the war was fired from his vessel off the coast of Ireland, on April 19. The gun was trained on the periscope of a submarine which was dead ahead on the last afternoon of the voyage.

The captain gave the order for full speed ahead with the intention of ramming the submarine which, however, disappeared, but a few minutes later appeared on the vessel's broadside. The gunners fired at 1,000 yards and immediately the submarine disappeared and oil was seen on the water when it submerged. Later it was reported that the periscope was smashed and the commander was killed, but that the submarine was not sunk. Whether or not this is the case is not known.

This account of the "adventure" is written after having spent a month "saw-milling" with the Henderson Land Co. They are conscientious employers and lake Kitichi has an abundance of fine swimming beach. Of nice woods and beautiful foliage there is plenty. Evenings and Sundays can be spent with much pleasure there. Boating and fishing are also exceedingly fine. Verily our "prayer was answered" even tho we were skeptical and unruly at first.

A missive from Amundson is eagerly awaited as to how he fared across the "big pond"; but we ventnre a guess that he had an enjoyable trip, too.

TURKEYS SPREAD GAPEWORM PEST

Demonstrated by Experiments Carried on at Washington and on Nearby Farms.

OLD CHICKENS NOT INFECTED

Losses Can Be Greatly Reduced by Keeping Young Chickens on Ground That Has Not Been Exposed to Contamination.

(Prepared by the United States Department of Agriculture.)

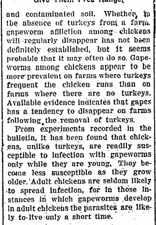
Turkeys are probably the natural hosts of the gapeworm—a serious pest among young chickens—and are an important factor in their spread. This has been demonstrated by a zoologist of the United States Department of Agriculture as the result of experiments and other investigations carried on at Washington, D. C., and on farms in several localities in Maryland.

Many Turkeys Harbor Gapeworms.

During three winter seasons beginning in December, 1916, a total of 685 chickens and 679 turkeys were examined in the Washington city market. No gapeworms were found in the chickens, but 22.5 per cent of the turkeys were found to be infested. From 1 to 8 worms were found in each of the infested turkeys. A report of these investigations has been published by the department in Department Bulletin 939, "The Turkey as an Important Factor in the Spread of Gapeworms."

In view of the complete absence of gapeworms from a large series of adult chickens and their common occurrence in a similar series of adult turkeys, it would appear, the bulletin says, that adult chickens are poorly adapted as hosts of gapeworms. That turkeys above 3 years of age may harbor gapeworms is established by the fact that a turkey which was kept at the department's experiment station at Bethesda, Md., for three years after it was brought there was found after its death to be infested with a pair of worms.

In the perpetuation of gapeworms from year to year on infested poultry farms the two chief factors, according to the bulletin, appear to be turkeys and contaminated soil. Whether, in the absence of turkeys from a farm, gapeworm affliction among chickens will regularly disappear has not been definitely established, but it seems probable that it may often do so. Gapeworms among chickens appear to be more prevalent on farms where turkeys frequent the chicken runs than on farms where there are no turkeys. Available evidence indicates that gapes has a tendency to disappear on farms following the removal of turkeys.



For Best Results With Turkey Flock Give Them Free Range.

From experiments recorded in the bulletin, it has been found that chickens, unlike turkeys, are readily susceptible to infection with gapeworms only while they are young. They become less susceptible as they grow older. Adult chickens are seldom likely to spread infection, for in those instances in which gapeworms develop in adult chickens the parasites are likely to live only a short time.

Methods of Avoiding Loss.

Losses from gapeworms can be greatly reduced, if not altogether avoided, according to the bulletin, by keeping young chickens on ground that has not been exposed to contamination within at least a year by chickens with gapes or by turkeys, and by excluding turkeys from it during its occupancy by chickens. As gapeworms appear rarely to occur in adult chickens, brood hens may be associated with young chickens with little risk of infection. The simplest means of preventing or reducing losses from gapes appears to be the exclusion of turkeys from farms where chickens are raised.

Window Shopping as an Occupation

By E. RAY BAKER

(©, 1921, by McClure Newspaper Syndicate.)

"Let's go home now," suggested Ruth Paige, "and pop corn, or make fudge, or something. I've had enough walk, haven't you?"

"Some walk," growled John Gregory, as they turned a corner which took them off Main street into a residential thoroughfare. "We've been at it more than an hour and a half, but how far have we gone, I ask you? By the time we get to your home it will be exactly six blocks—one to get downtown, four to cover both sides of the street in the retail section and one to return. And it wasn't really a walk; it was just a poke, with you dragging me to every window to stare in at the finery displayed."

Ruth's mouth became firm and her dimples disappeared, and fire flashed from her eyes.

"That's too bad," she said sarcastically. "Strange you wouldn't want me to enjoy myself a little. I can't have all those handsome gowns and things, but you shouldn't want to deprive me the pleasure of looking at them. Just because I'm going to be your wife—maybe—is no reason you can start in right now trying to take all the joy out of my life. I've enjoyed myself this afternoon, only now you had to go and spoil everything. I dearly love to look in the windows, especially when the spring styles are on display. The trouble with you is you don't appreciate art, and those displays are art, and the men that trim the windows are artists. You're too prosaic, with your dirty old job in a musty printing shop, and you haven't the finer sensibilities to be affected by the more refined efforts of men who dress well and keep their hands and face free from printer's ink."

"Window shopping is a great occupation," John returned just as sarcastically. "I'm shut up all day in a print shop, and when I suggest a little fresh air and some exercise on a Sunday afternoon you drag me down to the stores and make me gape into the windows like a country Rube. Well, you got fooled at one place—Hecksteeth's—because they had the window covered with a curtain."

"Just the same I'd get a look into that window if I could," Ruth declared, somewhat savagely, "and you and all the printers in town couldn't stop me. If you're so fond of exercise and fresh air, you can keep on walking right past my home, and you needn't ever walk back this way."

"Of course," John returned, his own eyes spitting fire, "if that's the way you feel about it, I'll do just that."

From which it might seem that Ruth Paige and her fiance were mated about as well as two positive poles of a magnet. On the contrary, this was their first quarrel during the year they had been acquainted. They were both possessed of stubborn dispositions, with fiery tempers, but they were genuinely in love with each other and had co-operated to prevent clashes. It just happened, however, that John was peevish this Sunday afternoon, and his peevishness happened to strike Ruth when she was in an exceptionally irritable mood.

After each had expressed himself and herself, they walked in silence the remainder of the distance to her home. At the entrance to the house they paused.

"Surely you aren't coming in when there is so much fresh air outdoors," she said cuttingly, unable to resist the temptation for a final fling.

"Of course not," he responded, and lifted his hat, as he moved off down the street. "Good-by," he called, and did not once look back.

Ruth stood looking after her departed fiance for a moment, then walked briskly into the house. Instead of popping corn or making fudge she flounced to her room and held a private session with herself, in which a few teardrops flowed.

It looked like an irreparable break, for with their obstinate dispositions neither Ruth nor John would take the first step to effect a reconciliation. Ruth's makeup was such that she would permit her heart to be wrung dry by misery before she would yield one jot, and John's temperament was constructed of the same kind of material. They were both wrong, but they couldn't help it. What was needed was a clever mediator who could bring them together apparently by chance. However, there was little likelihood of this, because Ruth kept her own counsel and John was taciturn about his affairs. As an example of this he had been calling on Ruth for about two months before she even had an inkling as to his means of making a living.

With John out of her life, Ruth took up with Susie Atterson, who worked in the stenographic department with her at Miller Brothers' wholesale paper house. Every evening at the close of the day's work they walked together, for their homes were not far apart, and they window-shopped to their heart's content. Susie suspected something was wrong with Ruth and John, because the latter no longer called for the former and escorted her home, but rather adroit questioning failed to bring enlightenment.

Hecksteeth's department store proved a mystery to both the girls. The big display window continued screened from view with curtains, and their love for finery and natural sense of curiosity kept them busy speculating as to what new product of the trimmer's skillful hands was to be revealed to the public. The mystery grew on them till it obsessed them, and it helped to assuage the pain Ruth was suffering because of John's exit from her life.

For two weeks Ruth saw nothing of John, and it was a long two weeks. By this time she had abandoned all hope of a reconciliation ever being reached, and on Saturday afternoon she wrapped his diamond ring and set out for the post office to mail it. Every Saturday afternoon was a half-holiday for Miller Brothers' employees.

The route to the post office took her past Hecksteeth's store, and with inquisitive eyes she surveyed the big curtain-covered window.

"Oh, for just a peek!" she said softly, and then paused, almost startled by what she saw. It was a crack in the screen where two of the shielding curtains met.

"Here's my chance for a big victory over Susie," she said gleefully, and sidled up to the crack, keeping her face turned toward the street as though she was in wait for some one. When she was in the right position she stooped somewhat and craned her neck so she could glance into the aperture which so opportunely offered itself.

To her surprise, a pair of eyes looked out at her. At first she was inclined to think it was a reflection of her own, but gradually a face took form before her, and it was not hers. She was astounded almost to the point of being in a panic. It was actually weird.

"That's John's face," she thought. "Surely it must be a hallucination. I've been thinking so much about him that I've started having visions of him."

But no, there could be no vision about this face. It was human, flesh and blood, even to a tiny mole that belonged to John. The situation was so ludicrous that she could not help smiling, when once her astonishment wore off, and the face on the other side of the glass smiled in response.

Of a sudden the face vanished, there was a noise at the door of the store, and John came out.

"Window shopping?" he asked pleasantly.

"Yes," she replied, very meekly, and quickly tucked the small package into a pocket. "Wha—what are you doing here?"

"I work here," he returned quietly. "I'm the window trimmer. I neglected to tell you that I changed jobs a month ago. You see, window trimming is my regular profession, but I get tired of it now and then and try printing. I was offered special inducements to take this job and fix up this surprise window, and I've been working so hard at it I can't bear to think of window trimming when off duty. I feel like taking a walk right now; what do you say?"

And Ruth did not demur.

COSTUME THAT DEFIES COLD

Laplanders Mastered the Subject Centuries Ago and Have Never Improved Upon It.

The most novel dress in the world is that of the Laplander.

He wears two or three of the same garments, one over the other, including two pairs of shoes filled with dried grass, and two pairs of gloves stuffed with hay.

In addition, his cap is filled with an elderdown pillow, and a long woolen scarf is wound several times round the neck and over the head.

The most difficult part of his toilet is the preparation of his shoes. The dried grass is made ready by warming it before a fire, and pulling it out and rubbing it well together in order to render it soft and pliable. A quantity is then made into a ball and placed within the shoe, leaving a cavity for the foot, which reposes safely and warmly in the middle. Laplanders never wear stockings or socks.

Talking of his visit to Lapland, Mr. Frank Hedges Butler, one of the pioneers of aviation and motoring, says: "All told, I put on no fewer than 25 separate articles of clothing! The style of the costume is hundreds of years old, and it is eminently practical, because one never feels cold once this novel and curious outfit has been adopted."

WANTS A DIRECT ANSWER

When the Carver Inquires What Part of the Roast You Like, Tell Him Frankly.

The host has his hard time when he carves and helps the turkey to a tableful of guests, old, middle-aged and young. When, standing with knife poised over the bird of freedom, he demands, "Which part do you like?" he expects an explicit answer. Educated people are not afraid to give one, but the vast majority reply, "Any part'll do me."

A good-humored host lectured a youthful guest in this fashion when the latter persisted in taking "any part:" "I shall give you the neck, then, my boy. There are thirteen at the table, and we have just exactly one small part of this turkey for each. As you are not particular, and will accept the neck, that will leave a desirable part for everyone. Hereafter, however, take my advice; If you really want the neck, say so, because some one else might want it. It will save a lot of time and annoyance." That boy was cured.

The same folk who will take "any part" of the turkey are equally indifferent about the roast. They "don't care" whether they have the outside slice, an inner cut, medium, well done or underdone. Such folk ought to get the gristle. Though Dryden used "rare" for underdone, the British subject who does so today is regarded as a clod-hopper. We common-sense folk in America continue its usage, but the finical, the pettily particular, eschew it and profess to be shocked at it.

There was frank sense in the old military commander's way of replying to the inquiry, "General, how do you like your roast " "Medium, colonel: about the third or fourth cut, when you get to it, and a small portion of the outside fat." There can be no mistaking that order.

The Goodridge Banner

PLANTING HARDWOOD SEEDLINGS ON FARM

Simple and Successful Method of Indiana Farmer.

Walnuts Buried in Shallow Pit and Subjected Throughout Winter to Action of Moisture and Frost —Transplant in Spring.

(Prepared by the United States Department of Agriculture.)

A simple and successful method of planting black walnut, discovered by a farmer in Indiana, is related in Farmers' Bulletin 1123, Growing and Planting Hardwood Seedlings on the Farm, just published by the United States Department of Agriculture. The specialists say that this method should be equally successful with oaks, hickories, butternut, or any other hardwood species which develop pronounced taproots and in consequence cannot be transplanted with any large measure of success from the nursery to the field. This farmer buried the walnuts in a shallow pit where they were subjected throughout the winter to the action of moisture and frost. With the advent of spring the nuts began to sprout. He planted the sprouted nuts on well-tilled land by scooping out a little soil with his hands, placing the nuts in the holes thus formed, and covering them lightly.

Well-Cared-For Farm Woodlot.

In following this plan there are several precautions which should be taken: (1) The pit in which the nuts are stored should be located in a well-drained, shaded spot; (2) The nuts should be protected against destruction by rodents. (3) They should be examined frequently in the spring so that there will be no delay in setting them out soon after sprouting commences.

ODD VIEWS ON AGRICULTURE

Dr. Knapp Instructed Field Agents Not to [illegible] Who Were Guided by Moon.

Dr. Seaman A. Knapp, who established the first farm demonstration work in the South, used to give these instructions to field agents: "Some farmers have peculiar views about agriculture. They farm by the moon. Never try to change this. Let them believe in farming by the moon or the stars if only they will try our methods. It doesn't pay to waste breath on such matters."

SHEEP INJURE YOUNG TREES

Animals Are Apt to Cause Trouble by Eating Leaves—Are Beneficial in Old Orchard.

Sheep and large lambs are very apt to trouble young trees and grape vines by eating the leaves. In an old orchard they are beneficial in helping to keep down the grass and weeds. Both orchards and vineyards do better when the ground is kept cultivated clean.

CULTIVATION WORTH WHILE

First Work May Be Deep Without Pruning Roots of Crop—Destroy Weeds When Small.

The first cultivation of interdrilled crops may be deep without pruning roots of the crop cultivated, but later cultivations should be more shallow. Weeds are best destroyed when small and when soil is dry. Cultivation saves soil moisture.

WINDBREAK OF BIG BENEFIT

Blowing of Top Soil May Be Checked and Dust Storms Prevented by Planting Trees.

Movement of the top soil may be checked and dust storms prevented by breaking the force of the wind. For this reason windbreaks are of immense benefit in sandy regions or in regions where the soil is very fine.

WORK DONE BY SPECULATORS

Shippers Overlook Fact That Middlemen Are Doing Things Producers Fail to Do.

Many persons opposing the operations of speculative shippers overlook the fact that this type of middlemen is doing—however inefficiently and extravagantly—the things that producers have failed to do for themselves. Carefully organized, efficiently managed, loyally supported, co-operative organizations can perform the services rendered by these men in a more satisfactory manner, and in so doing shorten the distance between the farm and the consumer.

Entitled to That.

"I know what you would do if I were to die, Henry," said Mrs. Glipping, plaintively.

"What, my dear?" asked Mr. Glipping.

"You would go right straight and get married again."

"I would not. I'd insist on a vacation of at least six months and defy any woman to deprive me of it."—Birmingham Age-Herald.

Ethelwyn's "Yellow Dog"

By DORA MOLLAN

(©, 1921, by McClure Newspaper Syndicate.)

There is a tradition in the five-dollar trimming room of the Kareful-Fit Corset company that Mrs. Ludden has been the forewoman of that department since some time in the dark ages, and that she is the sole support of an invalid husband of whom she never speaks. Anyway Sadie Carson, who has worked in the trimming room for five years, had it from a girl whose employment antedated Sarah's by three years, and that girl had it from someone else.

Mrs. Ludden is a small woman with gray hair and gold-rimmed eyeglasses, which she always removes when she has something to say. She held them in her hand for fully two minutes on the day Ethelwyn Smith announced her engagement to Michael Daly, prevented from making herself heard by the surprised ejaculations occasioned by the size of the solitaire which blazed in its platinum setting on Ethelwyn's left hand.

When Mrs. Ludden at last did succeed her thin, gentle voice spoke the words which have also become a tradition in the five-dollar trimming room. Sadie Carson had it from the girl before her time, and she ditto, from someone else, that upon a like occasion Mrs. Ludden always put the same question, "I hope you are marrying for love, Miss Smith?"

Ethelwyn Smith was a dark-haired, dark-eyed beauty who believed in emphasizing her own good points. To this end she penciled her black eyebrows, rouged her pink cheeks and powdered liberally the white skin of her throat. Ethelwyn's reply to Mrs. Ludden's query brought forth louder and more startled "Oh's" and "Ah's" from the group of girls clustered around her, and caused that lady to replace her eyeglasses with a jerk.

"No," replied Ethelwyn, "I don't love Michael Daly, and what's more, I don't believe in this love stuff at all! Most women get married like they were walking in their sleep, and when they wake up and find out the truth about what they got, they stick to him like the man that owns a yellow dog—and folks call that love! He may be a mut and not good for much, and his owner knows it, but he won't let anyone else say so!" Ethelwyn paused for breath, then continued:

"I'm marrying with my eyes open. Mike Daly's a structural iron worker, and he earns the most money of any man I know, and he's the best spender and the best looker, and I won't ever have to make any apologies for him—no yellow dog stuff for me!"

The girls listened wide-eyed and open-mouthed. Mrs. Ludden's lips were drawn into a straight line as though she were in pain, but when she opened them and removed her eyeglasses it was only to call her force to work.

It was piece work in the trimming department, and Mrs. Ludden did not encourage conversation. Ethelwyn only came in afternoons, for she boasted, "Pa won't take any board from me and I only work to earn my clothes." Ethelwyn's clothes testified to the fact that she was a rapid worker, and the sparkle of her engagement diamond that afternoon seemed to fill the room with its brilliancy and the heart of every girl with envy.

Michael Daly was all his fiancee had claimed for him—a tall, powerfully built young man, with wiry brown hair, which was in a continual state of standing on end as though protesting with horror at the dangerous altitudes into which it was daily borne. He was waiting outside that night for Ethelwyn, and shook the hand of each girl heartily as she offered her congratulations.

It is to be feared that the sight of him did not lessen the envy which the diamond had occasioned. Only Mrs. Ludden was free from it, for strangely enough she envied no one in this whole world as she hurried home to a shrunken figure watching from his chair by the window for the big event of his day.

It was a week later that Sadie Carson burst into the trimming room one morning all out of breath, bringing some gruesome news: "I saw it myself as I was coming by that new building down to the corner of Jasper street. There was a crash, and I looked and seen him lying there, all twisted up with a great piece of iron across his legs, and it was Mike Daly. I knew right off because his hair stood up so straight—and a doctor came, and an ambulance came and took him away!"

"Well, pity him—if he lives. That's all I got to say. Ethelwyn Smith'll chuck him now like—like a yellow dog!" Jennie Sims' harsh voice broke the silence which followed Sadie's spasmodic tale.

Jennie Sims, with her scrawny figure and sour disposition, was never a favorite. Now she was given the cold shoulder while words of pity for Mike Daly and Ethelwyn were exchanged. Mrs. Ludden said nothing, but her lips contracted in a straight line.

And that night she hastened home, even faster than usual, to the helpless figure waiting in the armchair by the window, as though by an excess of devotion in her own case she could somehow make up for the lack of it elsewhere.

Mike's fall and its consequences became the chief topic of conversation in the five-dollar trimming room of the Kareful-Fit Corset Company. The newspaper accounts were eagerly followed, and when it was stated that one of Mike's feet had been amputated, a consultation was held among the girls as to whether they should extend their sympathy to Ethelwyn. But doubtful as to how she had taken the news, they chipped in out of their earnings—all of them but Jennie—and sent flowers to Mike instead.

As the trimming room was settling down to work one morning a couple of days later, still discussing whether Ethelwyn would or would not stick to her engagement, Ethelwyn herself walked in. There was not rouge on her pale cheeks and no powder on her white throat. There was no ring on her left hand to arouse envy in the heart of any one. Quietly she removed her hat and coat while the girls seemed each one to be waiting for another to speak first.

"Girls—" Ethelwyn's voice trembled, "I want to thank you all for the flowers you sent Mike. He says it seems as though he never knew how many friends he had before." Then turning to Mrs. Ludden, "I'll be in all day now if there's work enough. We're going to need the money, Mike and I."

"I thought when I seed you didn't have that million-dollar sparkler on that you'd lived up to your words and warn't going to own no yellow dogs!" Jennie Sims' harsh voice broke in.

For a moment the flash in Ethelwyn's black eyes boded ill for Jennie's scraggly throat. But when she spoke there was a note in her voice the girls never heard before. "That ring's gone back to the jeweler to pay Mike's hospital bills, Jennie, and just as soon as he's out we're going to get married. The doctors will fix him up so he can get around just as good as any one and he'll learn to do something else. He's smart as they make them, Mike is, I'll never have to make apologies for him!"

That night, sitting by his bed at the hospital and holding one of his big hands in both of hers, Ethelwyn repeated to Michael what she had told the girls. Mike's big voice, grown weak, answered that he wasn't going to allow her to make the sacrifice—he wasn't so yellow!

"You let me hear any one call you that," replied Ethelwyn indignantly. "You are going to do as I say, Mike—because I love you!"

The Girl in the Thin Coat

By WILL T. AMES

(©, 1921, by McClure Newspaper Syndicate.)

Broadway, where it traverses the upper West side, is divided into two parts. Between a brace of ample thoroughfares lies a long, slender parkway, a string of narrow parallelograms of fenced greensward, scored across at regular intervals by the transverse streets.

Down the westerly side of this double street flits, each morning an amazing horde of motor vehicles—privately owned cars of all degrees save that of shabbiness, and squadron upon squadron of taxicabs; while up the easterly side hurries a somewhat smaller stream, largely consisting of taxis whose drivers are hustling for their share of the "going down" business.

For here are passing on their way to the day's affairs, tens of thousands of those who scorn to battle their way downtown by subway or L, and whose time is worth far too much in dollars and cents to be spent on dawdling surface cars.

To the humble citizen who cools his heels beside the parkway railing at one of the cross streets, awaiting perhaps one of the very occasional trolley cars which, lower down, sheer off to penetrate the squalid Tenth avenue region, there is a flaunting arrogance about that rushing river of automobiles that arouses envy, vicarious pride, cynicism or the blues, according to his temperament.

Patrolmen Dan Travers, trim, slim and clean-eyed, loved, better than any other duty that fell to his lot, the occasional detail from eight to nine o'clock, at the Eighty-second street crossing. For it filled with joy the breast of the amiable Dan to raise his gloved hand against the progress of a dozen grandiose limousines or breathless taxis and bring them to an impatient halt while some skinny-legged little girl of nine led her six-year-old brother over the crossing to the west sidewalk, on their way to school.

As there are many hundreds of these children who must daily cross the Broadway vehicular torrent to reach the big public school over toward "The Drive," Dan had plenty of opportunity to interpose that inexorable limb of the law, his own good right arm, between the wheeled Moloch and its potential sacrificants. And, as he privately confessed to his mother, it "tickled him blue."

Yet no traffic officer in New York, regular or detailed, better knew the drivers' rights nor more minutely respected them than this serenely dignified young copper.

Eighteen months on the force was Dan, and his record was perfect. To his work he brought all the sense of responsibility, the understanding of discipline, the doubtless will to service, that had developed "over there" in the A. E. F. And he loved it and was proud of his uniform.

Came a time when a shift in the system brought Dan to the Eighty-second street traffic post every morning instead of now and then. It was at the beginning of this period that he first noticed the girl in the thin coat. The morning was keenly cold and the coat was very thin, indeed; the girl shivered a bit as she waited for a surface car. It struck Dan as odd that in that neighborhood one so good-looking should be unfitly clad, for luxurious coats and furs are as common as the very taxis themselves. Dan saw the girl every morning for a week, and noticed that she always took a car of the same line. Once when she glanced at him he caught himself on the very point of nodding to her, out of the friendliness he had felt toward her from the first, and he turned quite red and stopped the next squad of cars with an even more austere gesture than usual when he realized it.

But when he saw the girl next day absent-mindedly preparing to board a Broadway-Forty-second-street car, he ventured to suggest: "That one doesn't go down Tenth, lady." And when the girl bestowed on him a fairly bewildering smile and said: "Oh, thank you!" in a voice of vocal velvet, Dan's heart gave a jump such as no German shell had gotten out of it in the Argonne.

After that the girl's thin coat became a positive personal worry to Dan. He wasn't sure, but he had a shrewd notion that a policeman's wife could dress better than that, even though he did keep his fingers clean from all the graft. And when the girl, each day for three, greeted him with a cordial "Good morning, officer," Dan almost, but not quite, lost his head, between the kiddies and the automobiles.

It was on the fourth morning that things broke badly for Officer Travers. He had held the traffic at the moment when the girl's car stopped just above the crossing. The girl was making for the rear platform; a bevy of children were being herded across the street by Dan. From behind the ruck of halted cars came charging an arrogant blue automobile, whose fat, red-faced driver was recklessly and defiantly seeking to gain time through the narrow space next to the car track. Boring and crowding truculently, it came on—and from the impact of its mudguard the girl was flung against the standing car.

Casting half an eye, so to speak, toward the girl—whom he would see no more till tomorrow—Dan was just in time to glimpse the thing in its happening. In the twinkling of an eye all his policemanhood fell from him. He was no longer an exponent of discipline, a figure of the law. He was mere man—and wild with anger. In six jumps he was beside the blue roadster. In three seconds more he had hauled the driver out upon the pavement and smashed him twice in the face with his fist.

The man in the blue car was Big Bill Burtis, district leader of "the party." Three-quarters of an hour later Patrolman Travers was out of his uniform, under suspension, and quite sure of being dismissed from the force. And the girl, unhurt after all, had boarded the car and gone about her business.

* * * * * * *

"Officer," said the commissioner to Dan, "I have sent for you to substitute a reprimand for dismissal. You conducted yourself in that affair with Assemblyman Burtis in an extraordinary and violent manner; do you realize it?"

"Yes, sir," replied Dan, as he stood at attention.

"And you are hereby reprimanded—do you realize that?"

"Yes, sir."

"Very well; that's done with. And now, by jove, I want to thank you from the bottom of my heart for what you did in behalf of my daughter!"

"Your daugh—!" The dismay in Dan's face was as comic to the commissioner as the cause of it was tragic to the young policeman. It meant that his dream had gone to smash. He even quite forgot to thank the commissioner for his coat of whitewash.

"Exactly. It was Miss Higginson that Burtis ran into. Edna goes down to her settlement house as regularly as a stenographer to her job—and always on a street car. She's a terrible little nut—her mother can't get her to dress right even. Edna says she has no business to wear better clothes than the girls she's working among—full of all sorts of notions about equality and that kind of thing. But she's the best little sport in the world—and, privately, I am damned glad you smashed Burtis. Shake hands—and report back in the morning."

"Yes, sir," said Dan, mechanically. But he was listening to the fall of the ruins of his castle. He buy coats for the daughter of Commissioner Higginson, indeed! Why, the girl was rich—a swell!

"By the way, Travers"—the commissioner seemed to have almost forgotten it—"Miss Higginson told me to ask you to call on her this evening. She wants to thank you—and I think maybe she'll tell you, like she did me, what a perfectly splendid sock in the eye that second one was—the one that gave Burtis the shiner."

"Yes, sir," was all Dan Travers could articulate. But all the way uptown his head was ringing with one wonderful, hopeful word, "Equality."

Professional Temptation.

Patient—Great scott, doctor! That's an awful bill for one week's treatment.

Doctor—My dear fellow, if you knew what an interesting case yours was and how strongly I was tempted to let it go to a post-mortem, you wouldn't grumble at a bill three times as big as this.

EARTH'S SHOCKS IN AMERICA

The Two Most Disastrous Were Those of Charleston, S. C., and of San Francisco.

Since the earthquake which occurred in Charleston, S. C., in 1886 the San Francisco earthquake of April 18, 1906, was the most severe seismic disturbance in this country.

The first quake was recorded at 5:13 a. m., and immediately fire broke out in the ruins. Owing to the derangement of the water mains this could not be controlled. The total loss of life was estimated at 4,000, although the exact loss in this respect will never be known. The total property loss was about $300,000,000, of which a little over one-half was covered by insurance. The buildings on an area of 10,000 acres were almost entirely destroyed. As a result of this and other seismic disturbances seismological research was greatly stimulated, arousing the geologists in this country as well as those abroad.

The modern type of seismographs makes it possible to detect the large earthquakes on the other side of the globe from a particular station within a few minutes of their beginning, and from the records obtained a close approximation can be made usually of the distance and direction.

The cause of the San Francisco earthquake is traceable to the slipping of the rocks along a rift that runs northwest and southeast parallel to the coast. The amount of dislocation varied from 5 or 6 feet to 20 feet, with a probable mean of 10 feet.

Planning a Comeback.

Percival—Gosh! Isn't it raining!

Pansy—Never mind, boysie. Take father's umbrella, then perhaps he won't so much mind your coming back

AND THEN SHE BLAMED LILY

Possibly, However, Some Will Think Girl Had Reason to Be Somewhat Discouraged.

Now that the washing was hung on the line, Mrs. Botts was leaning over the back fence and discussing with sympathetic Mrs. Johnson the problem of bringing up a daughter. Privately Mrs. Johnson considered that Lily Botts was born lazy, but Lily's mother held that Lily's case was not so simple.

"It ain't dat Lily ain't willin'," said Mrs. Botts. "Willin' she is, an' active an' all dat. She is always ready to run on errands fo' yo'. But she ain't one dat heahs work callin' or see it a-lookin at her."

"Heap mo' easy to do a thing yo'se'f dan be tellin' other folkses," said Mrs. Johnson understandingly.

"An' dat's de truth," agreed Mrs. Botts. "But Lily ain't to blame; but maybe she gits discouraged a little too easy. I's seen her tryin'. Last winter I says to her: 'Lily,' I says, 'every time yo' find somethin' to do to help yo mother round de house I'll gib yo' a cent.' Dat started her hard at it, Mrs. Johnson, it was two weeks befo' she done git discouraged an' give it up."

"And how much did she make?" asked Mrs. Johnson.

"Nine cents," said Mrs. Botts, "but I called it a dime."

Farmer Can't Make No. 1 Hog Out of No. 2 Animal by Selling It Through Cooperative Market.

You can't make a No. 1 hog out of a No. 2 merely by selling it through co-operative marketing. Quality and all-round honesty will continue to be the most compelling virtue of all right-thinking men and women.

FARMERS STATE BANK
OF GOODRIDGE

Hank Meets John

Hank Hello, John, where are you going?

John I am going to make a deposit in the bank,

Hank Do you find it more convenient depositing your money in the bank and checking it out?

John Very much so. I can issue a check to anyone I owe and it will not be necessary for me to have a receipt as the check will be returned to me with the proper endorsement, and I in turn can file my checks away and at the end of the year will have a complete statement of the amount of my expenditures.

Hank I agree with you, as it certainly is the best method of keeping account of moneys paid out and taken in.

The Farmers State Bank of Goodridge is a good place to do your banking.

VOLUME XV, No. 26. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JULY 1, 1921. $1.50 PER YEA

Miss Pearl Willman First of June Brides

A pretty home wedding took place Thursday of last week when Miss Pearl L. O. Willman, only daughter of Mr. S. E. Willman, became the bride of Edwin Christianson of Goodridge, Minn. The ceremony was performed at high noon at the home of the bride's parents, Rev. Eldred Cleave, pastor of the Metamora Christion Union church, officiating.

The bride's dress was of dark blue pebblette and the groom wore the conventional blue serge. The bride's parents and family and Alvin Willman, the bride's brother, and wife, and Miss Maggie Knoblaugh were present at the service.

At the conclusion of the service a four-course dinner was served. In the afternoon the newly married couple, accompanied by Mr. and Mrs. Willman, drove to Peoria, from which city the couple started on their wedding trip, which will be quite extensive. Their itinerary covers much of the west and such points of interest as Salt Lake City, Yellowstone and Glacier National parks, returning by way of the groom's parental home at Goodridge, Minn.

The best wishes of many friends accompany Mrs. Christiansen and her husband. She was born and grew to womanhood in this locality and enjoys the esteem of all who know her. Mr. Christianson is the superintendent of installation of the Minneapolis burglar proof system for banks and because of the nature of his work the couple have not yet decided upon their permanent home. Mr. Christianson was with the A. E. F. forces in France and while there became acquainted with Alvin Willman. About two years ago Mr. Christianson came to Metamora to install the burglar alarm system in the Metamora State bank and the two young men were quite surprised in meeting each other in this way. Since that time Mr. Christianson has spent his vacation periods in Metamora and the result has been the winning of one of Metamora's fairest daughters.—Metamora, Ill., Herald.

Mr. and Mrs. Christianson arrived here Tuesday morning and have been guests of Mr. Chrsitianson's parents and brother Carl and family. Wednesday they drove to Strathcona and visited Morgan Christianson, who is clerk in the bank there. Yesterday the happy couple left for Minneapolis, whence they will go to Columbus, O., where they plan to make their home.

Warning

"Heed the first warnings of tuberculosis," is the advice of the Minnesota Public Health association to Minnesota citizens, in the campaign against tuberculosis. The first signs of the tuberculosis danger are less in weight, fatigue upon slight exertion, and a cough lasting for more than three weeks. They always call for immediate medical attention.

At once is none too soon to begin treatment for tuberculosis if it is present. With this disease it's the old story of "a stitch in time," If consumption can be prevented from progressing into the "advanced" stage, the treatment will require much less time, money and suffering. Statistics from the fourteen county tuberculosis sanatoria show that eight out of every ten of the tuberculous who sought treatment while the disease was in the early or "incipient" stage were cured or improved upon leaving, while only two out of every ten of those who neglected treatment until the advanced stage achieved like results.

The greatest argument for immediate care, explains the public health association, is that tuberculosis is contagious usually only in the advanced stage. If cared stage. If cared for early and properly the patient seldom reaches the stage when he is a source of danger to others. Every person who has tuberculosis caught it from some one who had it in this contagious stage. There are at present nearly twenty thousand cases in the state. Authorities on the subject are agreed that early detection, prompt care, and isolation of all cases, particularly of the infectious, will result in the complete eradication of the disease.

In Minnesota a decrease of two per cent in the death rate has been effected in the past four years. This meant a saving of four hundred twenty-six lives in 1920, and figuring on the accepted basis of ten cases for every death, a reduction of four thousand two hundred twenty-six cases of the disease.

The Minnesota Public Health association believes this reduction in the death rate and the incidence of the disease to be due to the educational work, the tuberculous clinics, and the tuberculo-

Annual Visiting Day

The annual visiting day at the Northwest experiment station will be held on Wednesday, July 13, this year. The crops will then be in the proper stage of growth to see results. A program is being arranged for the day which will be both instructive and entertaining. Every one is invited to bring their picnic dinners and partake in the big campus picnic during the noon hour. The crops grown at the station will tell their own story on July 13. Plan to go and see them. The day will be one of real profit as well as of pleasure to you and your family.

Camp For Disabled Men

All disabled men in Minnesota, North and South Dakota and Montana, are not going to lack an opportunity for a vacation this summer. Plans are rapidly being formulated for a summer camp for these men to be held at Big Island, Lake Minnetonka, Minnesota. All disabled men, whether or not they are taking training under the Federal Board, are eligible to attend. Mr. Horace Lowry, president of the Minneapolis Street Railway Company is donating this island, free of charge, to be used as a recreational center.

The plan for this camp was inaugurated by the Federal Board for Vocational education and the money has been appropriated from the Minneapolis War Chest Fund. The money is to provide for the construction of the building, which is now in progress, and for all overhead expense. The fee to be demanded from each man will be but fifteen dollars covering a period of two weeks.

This camp will be under the supervision of a camp director and two recreational supervisors. There will be no "K. P." duty for the buddies as there will be sufficient help provided to take care of the up-keep. Equipment has been furnished by Colonel Bjornstad commanding officer at Fort Snelling, Minn. Two dormitories and a main recreational hall are now under construction. The Western Passenger association of Chicago have provided for reduced rates—fare and a quarter for round trip—effective August 1, on all railroads entering Minneaplls, for every disabled man who lives in this district and wishes to attend this summer camp.

Every effort has been made to provide facilities to give every disabled soldier the time of his life at Big Island. There will be sports of all kinds, including swimming, fishing, boating, etc. An athletic instructor will be there to supervise all sports and games. The accommodations will be ample and up-to-date. There is every opportunity in the world for a real vacation at Big Island. Transpotation facilities from the island to the mainland are the best to be had. These are to be the "days of real sports" for evers disadled ex-service man.

County Board Refuse Farm Bureau Money

The unusual appropriation made by the county commissioners to help carry along the work of the Pennington county Farm bureau was turned down this year after much consideration and discussion among the members of the county board.

A special meeting was held Friday afternoon of last week to consider the matter and all members of the board were present. The motion to refuse the appropriation was made by Commissioner Hanson and seconded by Commissioner Naplin. Hanson, Naplin and Peterson voted for the motion, Commissioner McGinn against, Roy not voting.

The majority of the members of the board find justification for their course because of a referendum conducted some time ago which resulted in the very large farmer majority vote of 527 against the appropriation to 217 for, as previously noted in these columns.

Getting the Children to School

The bids for carrying the children to and from school were acted upon Tuesday evening. For route 1, E. H. Besancon was awarded the contract. For route 2, Gunder Ericksen. For route 3, O. N. Urdahl. Bids for route 4 were rejected and the board is advertising for more bids. with more explicit statements by bidders as to the kind of transportation to be furnished. The janitorship was awarded to George

New Headlight Law July 1

Motorists should note the law in relation to headlights, which prescribes that they be of the no-glare type. The law reads as follows: "No person shall use or cause to be used after July 1, 1921, on any motor vehicle operated on any public street or highway, any headlights equipped with a reflector unless the reflector glass in front of such light be so etched, ground, molded or constructed that the light filament shall be free from brilliant luster."

Mayflower News

The picnic at Wm. Jones' place was well attended, Some $120 was gotten in. We wish to thank the Goodridge band for the many nice pieces they played. Also Mr. Berve and Mr. Nystul, who spoke to the crowd that day. We thank you all.

Wm Jones and Oscar Hovelsos attended to business matters in Goodidge Monday.

E. Limesand has been busy hauling lumber from Thorholt the past week. A big new barn will [illegible] his place.

Nearly every one is busy fighting thistles in the corn fields now-a-days.

Robert [illegible], Mrs. P. A. Johnsen and son [illegible] made a trip to Thief River Falls last Friday for medical aid.

Mr. and Mrs. Oscar Tyeten and little son of Reynolds, N. D., visited at the homes of E. Limesand and John E[illegible] on Monday.

August Liedberg is having his well cleaned out. Thorsten Tveten has moved his well rig over to Liedberg's place.

Minnesota Leading In Farmer Ballots

Minnesota farmers have again demonstrated that they lead the country in organization. In the nationwide farm bureau referendum, they cast more votes than the first nine other states to send in returns. The first report sent to national headquarters by the Minnesota Farm Bureau federation, giving only incomplete returns from 64 counties, showed 21,000 votes. The first ten states reporting, including Minnesota with its 24,000 votes, showed 48,000 ballots cast.

Celebrate July Fourth At Thief River Falls

July Fourth will be celebrated at Thief River Falls this year and the people of this section are especially invited to attend the celebration and take part in the good times that will prevail. The program is replete with high grade attractions and a celebration second to none is assured by the American Legion, under whose auspices the event is being staged. There will be street attractions galore, ball games, fireworks and everything that goes to make a celebration worth while. Take the day off and spend it at Thief River Falls July 4th.

A Scene Not in the Picture

By KATE EDMONDS

(©, 1921, by McClure Newspaper Syndicate.)

"No," said the landlady stonily, "I'm sure I don't know where Miss Ford went to—some one said she had given up her position and gone out West to act in the movies, but I'm always busy and can't keep track of folks after they leave my house. Are you the young soldier she was engaged to?"

Dick Reynolds nodded.

"Yes—you look like the picture she had on her bureau. She read that you had been killed in action and so she just got pale and sick and went away. Sorry."

"Thank you," said Dick as he turned away. He wrote a letter to Marcia, addressed it in care of her old employers, marked it to be forwarded and waited. At last after months of fruitless waiting and searching he found a position in Chicago. Night after night he went to the movies, hoping for some clew, and then there came a time when he saw a well-acted screen-drama—and his own Marcia being kidnaped by a dark villain in a black evening cloak.

"Ain't it awful!" shivered a girl sitting next to Dick.

Her companion giggled. "It looks real, but 'tain't."

Dick [illegible] Marcia's face so clear, so agonized. He saw the villain carry her away in a black motor car to a greasy looking tenement, where several well dressed people seemed to threaten her life. One man caught her slender wrist and pulled her toward the door.

"Hi!" yelled Dick, and everybody laughed. He looked fiercely around and sank back in his seat, grim and alert. He watched the picture until the doors closed and the next day he saw it again. By this time he was sure that his own sweetheart was acting in the movies. Then he saw the manager of the theater.

"Dashed Away."

With the name of the producers he found the location of the company—Hollywood, California,—and, packing his grip he set out in the search for Marcia. By this time he knew the picture by heart, learned that the name of the actress was Elizabeth Jayne, but strong in his own belief he declared the girl to be none other than Marcia.

At Hollywood the studios were all so busy that he barely escaped becoming famous because he had refused so many chances to act as a substitute or an extra in one of the many companies. Once he had an adventure that he never forgot.

"Say, young feller," yelled a hot-looking man, as Dick approached a studio. "Want a job?"

"Looking for a girl," returned Dick.

"Plenty of girls here—can you ride?"

"Yes."

"Stunts?"

"Cavalry."

"Good. Come in. Man gone sick—scene waiting; you got to shoot a man and carry off a girl."

Dick grinned and followed the excited director. He was led into a dressing room, given a cowpuncher's outfit of clothes and come rolling out with a swagger that made the director stare.

"Say, you've been a puncher?"

"Yes."

"Steady job, maybe—now you hop into my car. The rest of the bunch waiting out on location ten miles away—just sent in word that Ames has broken his leg; listen now." He drove the car recklessly while he poured into Dick's ear the instructions he was to follow. "When you're called you ride up to the door of the cabin, shoot Arnold—he's the leading man—and grab the girl up and ride off with her."

"Anywhere—out of the picture—until you're called again, and then you——" and so on—until Dick felt qualified to do his part perfectly; yet when he saw the expectant company his wits almost deserted him. He watched the progress of the play with feverish interest because there was a girl——.

She had appeared at intervals in the play, and while there was a vague familiarity about her face and even her graceful walk, he could not make up his mind whether it was his Marcia or not. Her face was made up a little, as was his own, and both were part of a grotesque looking company. Some one told him her name—Elizabeth Jayne—and because he was afraid to have his dream shattered, he did not pursue the subject further. Then it dawned upon him that this was the girl he was to rescue—surely, he would know then!

He played his part extremely well and found a strange fascination in the work; the girl looked at him once or twice with a faint show of interest, but the grease paint disguised him well. Then came the moment when Dick, the bad man, was to kidnap the hero's sweetheart. Dick mounted his horse, dashed up to the cabin door, shot the hero with a blank cartridge and swooping down, gathered the [illegible] had been told to await the blare of the director's megaphone. "That was fine," said the girl, cordially, as they stopped under the tree. "Set me down, please."

"Finding's keeps," grinned Dick, looking her straight in the eyes. "Oh!" she cried, then "Dick!" and she was hugging him tightly.

"Hi!" the megaphone blared at them angrily. "Quit that—it's not in the picture!"

"It's in our picture," grinned Dick as he rode up to the director, "I just found my girl after five years, and—

"Excused!" bellowed the director: "stay out for awhile and come back when you get over it—meanwhile we'll do something else: Shoot!"

Lost—A Private Secretary

By FREDERICK HART

(©, 1921, by McClure Newspaper Syndicate.)

"Mr. Collins!" The name was a command—a roar from the inner office, where Hezekiah Hawkins, senior partner of the firm of Hawkins & Doolittle, engineers, held solitary sway.

"Yes, sir—right here!" The young man who spoke these words was pleasing to look upon. He was tall and slender, with light hair and a mouth that seemed forever to be about to twist itself into a grin. But there was no grin on his face as he hurried toward the sanctum of his chief. "Old Man Hawkins," as the outer office called him, was in one of his tantrums, and woe betide the employee who would keep him waiting! Collins, the private secretary, betook himself to the office with all haste.

Hawkins glared at him as he entered, but could find no immediate reason to rage, so he merely rasped out, "Sit down!" and jerked a letter from a pile that lay before him.

"These fresh railroad people are raising the dickens with us on rates, Collins," he growled. "This is the second letter I've had from them. Now we want the bridge job and we're going to get it—but it'll be on our own terms, and not on—ouch! Holy ginger!"

"What's the matter, Mr. Hawkins?" Collins was jolted out of his usual attitude of patient listening. Mr. Hawkins pounded on the desk and raved aloud.

"Gout's the matter! Don't stand there grinning like an idiot! Do something!"

But Edward Collins could think of nothing to do, and as a result he became the recipient of a storm of rage that made all the other storms he had weathered pale into insignificance. At last Hawkins, breathless, ordered him out of the room, called for his car, and went home.

The next day Collins received a memo from his employer that caused him to pull a very long face. The stenographer asked him what was the trouble.

"Trouble! Plenty of it! The old man's laid up with that gout of his and I've got to go out to his country place and help him with his work. Holy smoke! That's a pleasant prospect!"

The stenographer sympathized with him. "You'll have your head bitten off about thirty times a day," she said. "I don't see why you stay with him—why any of us stay with him, for that matter."

Collins let his grin spread. "We stay because he's the best and squarest boss in New York, and we know it. Let him howl and tear and cuss [illegible] all he wants to—we know we'll get a square deal."

"You're right," agreed the stenographer, nodding a blonde head. "But just the same, I don't envy you!"

Edward Collins arrived at the Pines, his employer's country place, that same evening in time for dinner. He dressed—they specified dinner coats at table—and reflected that it might be worse. He had a nice room and was not treated as a servant. As he descended the stairs he looked for Mr. Hawkins, but did not see him. Instead there swam into the field of his vision the loveliest thing he had ever laid eyes on—a girl about his own age, in a shimmering evening gown that made her look like a fairy in a misty cloud. He could only stare as she came toward him.

"I'm Miss Hawkins—Evangeline Hawkins," she explained amused at his look of surprise. "Dad won't be down to dinner—and he won't want you till tomorrow morning. Poor dad!" she added. "His foot hurts him so, and I'm afraid he'll make it awfully uncomfortable for you."

Collins grinned. (Did I say that he had a most attractive grin?) "Oh, I'm rather used to it, Miss Hawkins. And I'm genuinely sorry he's ill. You see things at the office——" and he

only, he remembered. "I'm afraid I've bothered you awfully!" he exclaimed contritely.

"No, indeed—I'm awfully interested. Do tell me some more." And Collins did.

Three weeks later the situation was unchanged. That is, it was unchanged as far as Mr. Hawkins' gout was concerned, but there was a decided change in the affairs of Edward Collins. Formerly he had spent his evenings reading or wandering over the grounds alone; but now he seemed to haunt certain spots. It was a peculiar fact that Miss Evangeline Hawkins was nearly always near these spots. He was also given to mooning about, and Mr. Hawkins found some cause for complaint in inattention. It might have been noticed, in addition, that he cherished a withered rose in a drawer of his dresser. This rose had been worn by Miss Evangeline Hawkins at a small dance given at the house one week-end. She had dropped it and he had picked it up. All these signs, of course, mean nothing in particular.

And then one day he lost his notebook and Miss Evangeline [illegible]

An hour after he had discovered his loss he came upon her in a little summer house in the garden. She was reading something—his notebook! With a sign of relief he approached. She rose, and smiled at him—a little uncertainly. "Here's your book," she said.

"Thank you!" He was relieved that she had found it.

"What neat shorthand you make!" she said.

He blushed crimson. "I—I've had a good deal of practice."

"Did you know," she said idly, "I went to a school once and learned stenography? I thought I'd be useful. I can still read it."

The red in his face deepened.

"Let me read some of yours. I've been looking it over and I can read it very well." She was turning the pages as she spoke. He became conscious of a wild desire to grab the book from her hands and flee; but he remained rooted to the spot.

"Here," she said. "'Dear Sir: Your letter of the 15th received—I love her. In reply would say that—she is the sweetest girl in the world. We are unable to make any other terms than those stated in our last communication—Of course, I have no chance, but maybe——' "

He found his voice. "Please, Miss Hawkins, don't torment me. I shouldn't have done it, I know. I haven't any right—but I couldn't help it—won't you give me the book?"

She handed him the book, and he left her without a word.

That night as he prepared for bed he glanced once more over the pages where, in neat curves and angles, were the damning words that had made him hopeless for all time. He stared at them dully as he read sentence after sentence. Hawkins's terse business English interspersed with the thought of his own—as he thought—secret heart. And then his heart gave a bound and began beating madly: for at the bottom of a page, in characters quite unlike his own, a new line had been scrawled. He translated it breathlessly.

"Why say you have no chance? You never asked me!"

"So you've been making love to my daughter behind my back, eh?" Old Man Hawkins glared at his blushing secretary.

"Well, sir—she—didn't seem to mind."

"Oh, she didn't! Well, how do you know I won't?"

The baited Collins could only gulp and stammer. But into the room burst Miss Evangeline Hawkins, all radiant and happy and overwhelming.

"Daddy, you're not to pretend that you're angry when you're not. You know you told me——"

"Hush up!" roared Old Man Hawkinds. But the mischief was done. Collins turned on him. "Do you mean to tell me that you've been scaring me to death all this time for nothing? I'll never be afraid of you again!"

"There it is! Run along, children, run along. You've found me out, and I've lost the best private secretary I ever had, but—I seem to have gained an excellent son-in-law."

GROWING SOY BEANS FOR HAY

Meeting With Much Favor by Those Who Are Farming on Light or Sandy Soils.

Soy beans for emergency hay purposes have grown rapidly in favor during the last ten years, especially among those who are farming the sandier soils where clover and alfalfa are not likely to do so well. Unlike millets and Sudan grass, both relatively low in protein, soy bean hay is very high in digestible protein, being about equal to alfalfa hay. Although it is a little difficult to cure, the palatability and high feeding value of this hay make it a very des

GET GOOD HATCH FROM INCUBATOR

Moisture and Ventilation Are Most Important Factors in Securing Normal Chick.

SEVERAL METHODS ARE USED

Less Danger of Getting Too Much Moisture Into Machine by Sprinkiing or Soaking Floor of the Incubator Room.

(Prepared by the United States Department of Agriculture.)

Moisture and ventilation are closely related factors in incubation, the amount of each depending upon the other. The former is one of the uncertain factors, for as yet no very satisfactory rules have been evolved which cover all conditions. Good hatches are secured both with and without using moisture, under apparently similar conditions, while each operator generally works out by experience the best amount of moisture to use under his conditions. The moisture and ventilation should, with correct heat, produce a normal chick at the end of the incubation period. Too much moisture may prevent the normal evaporation necessary to allow enough space for the chick to turn in the egg and break the shell, while too little moisture may cause the chick to become dried and stick to the shell. Moisture is used extensively in hatching in the South, in high altitudes and in places where the incubator is run in a dry room, say poultry specialists of United States Department of Agriculture.

CONTAINERS FOR FARM PRODUCTS

Public Sometimes Defrauded Because of Many Types and Sizes Now in Use.

STANDARD WILL REDUCE COST

Relatively Few Styles and Sizes Would Satisfy All Demands of Trade—Hamper Is Especially Popular in the East.

(Prepared by the United States Department of Agriculture.)

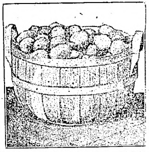
To eliminate fraud in the marketing of fruits and vegetables by the substitution of short measure packages at full-measure prices is one of the principal objects of specialists of the United States Department of Agriculture now making a study of the hundreds of different types of containers in use. For example, baskets which contain seven-eighths of a bushel are frequently used as bushel baskets, it being difficult to detect the short measure. In Farmers' Bulletin 1196, from the bureau of markets, just published by the department, the specialists discuss the need for standard containers for fruits and vegetables and describe how the public is sometimes defrauded because of the many types and sizes of containers now in use.

Multitude of Sizes Increases Cost.

The serious lack of uniformity of containers increases the cost of marketing, say the specialists, because of the greater expense of manufacturing a large number of unnecessary styles and sizes and by breakage in transit, which is sometimes directly attributable to the difficulty of loading odd-sized containers. There are in common use at present about 40 sizes of cabbage crates, 20 styles of celery crates, 30 lettuce crates or boxes, 50 styles and sizes of hampers, 15 styles and sizes of round-stave baskets and marketing [illegible] from 1 to 24 [illegible] few standard sizes would satisfy all demands of the trade. In many cases the 6-quart market basket, the 14-quart peach basket, the ⅞-bushel bean hamper, and the 5-peck lettuce hamper are confused with peck, half-bushel and 1½-bushel baskets.

No Standard Hamper.

The federal standard barrel law and the United States container act, which establish standard containers, have done away with a large number of unnecessary sizes of barrels, berry boxes and grape baskets, and have awakened a widespread demand for the application of the same principle to other containers, says the bulletin. At present there is no standard hamper, which is one of the most widely used types of containers, especially popular in the eastern and central states. Almost 30,000,000 of these baskets are used annually. The sizes of hampers which are recommended by the bureau of markets of the Department of Agriculture as being sufficient in number to satisfy all legitimate requirements of the trade are as follows: 8-quart, or 1 peck; 16-quart, or one-half bushel; 32-quart, or 1 bushel; 48-quart, or 1½ bushels. It is suggested that the latter be made in two styles to meet the preference in various parts of the country.



Baskets Which Contain Seven-Eighths of a Bushel Are Frequently Used.

The round-stave basket, for which there is no standard, is popular in all regions except the southern and Middle Atlantic states and on the Pacific coast. About 20,000,000 such baskets are manufactured annually. The sizes which are recommended as standards by the bureau of markets are the same as those recommended for the hamper, except for the elimination of the 8-quart size. The splint, or veneer, baskets, for which there are also no standards, are well known to the public as market baskets. The sizes which are proposed by the bureau of markets are five in number—4, 8, 12, 16 and 24 quart.

More Than Likely.

"It wouldn't be too bad."

"What wouldn't?"

"If rug beating could be done with a golf swing. A fellow might be willing to practice his stroke that way."—Detroit Free Press.

GOOD ROADS ARE NEARER--FORCES COMMENCE WORK

HIGHWAY DEPARTMENT WORKS FAST TO GIVE EARLY BENEFITS IN NEW PROGRAM.

In the big task of transferring Minnesota's good roads program from paper to the ground, Charles M. Babcock, state highway commissioner, and members of his staff are making rapid progress under a showing on official records made public this week.

Accomplishments during the past 30 day period are summarized as follows:

More than 85 per cent of the 7,000 mile system of trunk highways taken over by the state to be "improved and forever maintained."

Maintnance organization of more than 1,000 patrolmen and crews with 40 tractors and 125 trucks put on the job of making and keeping smooth the entire system under the $3,000,000 annual maintenance fund set aside to to spread benefits at once to every section.

Contracts made for more than $2,000,000 of new construction—mainly grading and gravel surfacing—on surfacing—on trunk-highways; calls to go out soon for bids on another $1,000,000 lot of projects and still others to follow.

Approximately $4,500,000 of county bond projects for trunk highway improvements approved under the state reimbursement plan and assistance given local road authorities charged with spending $12,500,000 this year on feeder roads.

"Minnesota road fund estimates this year are $26,333,000 from all sources," said Comissioner Babcock, "and the people are entitled to corresponding benefits on the highway sytem without unnecessary delay. It is to that end the highway department is working with all possible speed."

Less than 60 days have elapsed since Amendment No. 1 was made effective by the legislature and until that time there was neither authority nor money available to make even preliminary plans and surveys necessary in the development program. In spite of this big handicap, however, the department announced an organization of 1,500 members, including patrolmen in every section of the state and much new construction work begun by contractors as the summary shows.

Fund Division Explained.

The total of present season road funds is made up of $13,850,000 in round numbers of motor vehicle taxes federal aid and county bond money for trunk highway improvements and $12,500,000 of local taxes and state aid to be spent by county authorities exclusively on roads other than those in the trunk system. Without county bond funds in the future the trunk highway total is estimated at from $9,000,000 to $10,000,000 a year, federal aid continued, while funds for the local or farmers' roads will exceed $12,500,000 annually, bearing out the statement that the Babcock plan is first to provide a good road to every farm gate.

TRIP AROUND WORLD TIRES

Thirteen Americans Leave Ship at American Samoan Port.

Pago Pago, American Samoa.—Homesickness and the hard rule of the quarterdeck caused 13 Americans, who wanted to tour the world seeking adventures, to leave the yacht Wisdom II by the time she reached here recently from Los Angeles on a trip of scientific research around the globe.

"All Amerca wanted to go," Frederick O'Brien, author, one of the ship's company, said in telling of the requests made before sailing for berths on the boat. There were 20 officers, sailors and moving picture men aboard when the vessel left California. Six left at Tahiti and seven here, leaving what Mr. O'Brien called a workable crew of seven Americans. Six Tahitians were taken aboard as sailors.

The Wisdom, commanded by Capt. Edward S. Salisbury of New York and California, arrived here April 11. She left Los Angeles Jan. 19. On arriving here Capt. Salisbury entered the naval hospital for a few days.

The Marquesas Islands and points in Tahiti,, Bora Bora and Raiatea were visited before the boat arrived here.

O'Brien and Dr. Malcolm Douglas, New York, another of the ship's company, plan to leave the boat for a time, they said here, and visit the unique valley of Maloata in American Samoa. This place is known by the natives as the "haunted valley."

Seldom visited places like the New Hebrides, New Guinea and New Caledonia are to be visited by the Wisdom before she heads for the far east and India.

"Going Up."

"What's the matter, little girl?" asked a strager of a child he found weeping bitterly.

"I can't find my mamma."

"When you're out with your mother you should hang on to her skirts, then you wouldn't get lost."

"I'm too little, I can't reach them."

Encouraging Example.

"Will I find this a good place for my nerves?" asked the new guest at Holdup-by-the-Sea.

"Finest in the world," the manager assured him enthusiastically. "Why, look at me. When I opened up here three years ago I charged only $15 a week and now I have the nerve to shake you down for sixty."

REPORT SUBMITTED BY E. S. WILCOX CONCERNING CROPS IN THIS SECTION

Up to the minute crop report by E. S. Wilcox.

I arrived at Eckman, Bottineau county, N. Dak., afternoon of June 21, hired a car and drove over a good portion of the middle section of Bottineau county. On the morning of June 22 I drove thru the western part of Bottineau county. I found that fifty per cent of the cultivated land is in crops at this time. Wheat, oats, rye, corn and potatoes. I have been examining land in Bottineau county since July, 1904, and I never saw the crops look any better than they do at this time.

From Cardina in the southeastern part of Bottineau county, north and a little east to Bottineau, there are many grasshoppers, but the farmers seem to think there is so much green vegetation that they wouldn't harm the crop to any great extent. This is the only place where there seems to be any grasshoppers in Bottineau county. From Oemem east to Bisbee, across Rolette county, there are from 60 to 65 per cent of the cultivated ground in crops. The crops look very good. They are doing considerable summer fallowing in Rolette county. From Bisbee in Towner county to Conway in Walsh county, about 70 to 75 per cent of the cultivated ground is in crops. The grain stands from eight to ten inches high and from Conway to Ordock in Walsh county the wheat stands from 14 to 16 inches high and is just ready to shoot. From Ordock to Warren, Minnesota, it is 10 to 12 inches high. From Bisbee to Warren there was 70 to 75 per cent of the cultivated land in crops and the other 25 to 30 per cent is summer fallowed. Teams and tractors in the field all along the line doing summer fallowing.

In all my traveling thru Dakota these 16 years I have never seen the crops more uniform all th eway across the state for 260 miles as they are at this time. Dark green, very wide leaf on all grains. There is considerable winter rye and it looks very good. It looked to me as though the heads of the rye in Bottineau county were a little longer than they were farther east. There is plenty of moisture in the ground all the way across this 260 miles and I dug down in the ground several places in Bottineau county and I found the moisture had gone down from 14 to 18 inches deep.

I was in Roseau county,, Minnesota, at Roseau and Badger on the 16th and drove over a good portion of the county and the crops in this part looked the best they ever had since Roseau county was settled. Marshall county has a very good crop and the crops in Pennington county look very good.

Very truly yours,
E. S. Wilcox.

No man in the northwest has a better knowledge of the country and conditions than Mr. Wilcox. A crop report by him is highly reliable and valuable. This is a great year for the northwest. Business will be booming.

BREWERS FORM BIG BOOTLEGERS TRUST CHARGED

ANTI-SALOON LEAGUE ATTORNEY SAYS BIG CITY FINANCIERS ARE INVOLVED.

Washington.—Charges that certain brewers and men prominent in big city financial affairs have organized a bootleggers' trust and had made law enforcement extremely difficult have been made before the house rules committee by Wayne B. Wheeler, general counsel for the Anti-Saloon League of America.

Mr. Wheeler appeared in support of the requet of Chairman Volstead, of the judiciary committee, for a special rule to give his beer and prohibition tightening-up bill right of way in the house.

The leagues' attorney was not questioned about the alleged liquor trust and did not go into details.

Asked if it would not be possible to take out the beer section and pass it as a special bill, Mr. Wheeler insisted that it was just as important to include other sections designed to break up the indiscriminate traffic in intoxicants masquerading as medicine. cine.

Concerning his bill to prevent the sale of beer to the sick, Chairman Volstead declared immediate action was necessary to prevent the free flow of beer. He insisted that the anti-beer provision and other tightening-up features should be put thru.

Committeemen said they saw no need of emergency legislation because it related to the beer section. Mr. Volstead asked for a rule to prevent amendment to the bill in the house unless offered by himself on the ground that it would open the whole prohibition question and lead to weeks of wrangling.

Tom Holbrook's "Bride"

By JESSIE DOUGLAS

(©, 1921, by McClure Newspaper Syndicate.)

Nancy, stooping over the purple asters, did not hear the steps of the small boy along the grassy path.

"How plentiful the asters were this year," she thought, "and how nice that the house would look so pretty just when Tom was coming home." She wondered if he would think she was grown up at last with her hair tucked and in that new evening dress—black—to make her look older.

"Telegram, Miss Nancy, sign here." said the freckled urchin who had lately taken the responsibility of being a "messenger."

Nancy scrawled her name. Then she looked at the oblong of yellow with surprise. Who on earth? She tore it open. The words danced before her eyes for a moment in the sunlight.

"Florence and I arrive tonight on the 6:10.

"Tom Holbrook."

She read it over again trying to understand. Florence—what could it mean? The knowledge swept over her in a white, blinding flash. Tom was bringing home his wife!

Her knees felt like water, but she moved away, away from the sunlight that glared down at her, always from the old garden with its tangle of fallen leaves and autumn flowers.

Like a wounded animal she crept into the house, and she was glad that she was alone, that Aunt Myra had gone to the village and Lucy was too busy in the kitchen baking to notice.

She went through the dining room and looked at the silver that she had polished this morning—for Tom. How lovely everything looked—the waxed mahogany, the pewter on the old cupboard that had the sheen of silver, the sun streaming in through the bay window and falling on the shelf that held all the gay blossoming things!

How they had worked, so that when Tom came home everything should please him, from the new puppy whose tail would grow too long, to the cinnamon rolls that he liked so much!

"I Hate Her! Hate Her."

And Tom was coming with his bride—he had never told them, never let them know that there was a girl in the city. He had always pretended that they were the ones that he loved best, and Nancy knew now that in her heart, her very secret heart, she had believed that Tom liked her. That some day——

In her room she sat very still with her hands in her lap. On her table lay the asters, purple and white and rose-pink, beginning to droop on their sturdy stems—but Nancy, who loved flowers and could never bear to neglect them, did not even see that they were without water.

She looked at the clock and saw that it was only half an hour ago, and yet she had sat there, with no knowledge of time, with no feeling only a terrible numbness that dulled her emotions, that made her realize when she did think it would hurt her.

But suddenly she stood up. She couldn't go on like this. Aunt Myra would know when she came home.

She must never know. Nancy's pride could not endure pity. She went over and straightened out with shaking fingers the crumpled ball that had been the telegram. She could not cry. This was too deep for tears.

She went to her mirror and looked in, thinking that her face must have changed, that she must show all this that she had gone through. But her eyes looked back at her steadily, a little wider, perhaps, maybe a little darker, but her cheeks were still round and smooth and the golden powdering of freckles that the sun had brought out were still there.

It didn't show! At least she could bear her pain in solitude.

Standing beside her window, she saw Aunt Myra coming up the path. Now for it! She must get it over.

"A wire from Tom!" she cried, wondering if that was her own voice.

She ran down the path. Aunt Myra did not look at her, but grasped the crumpled sheet and read it.

"What!" she cried, "You don't mean to say——" She was so startled herself that she did not see the stain of color that crept to Nancy's auburn hair.

"And he never let us know a thing about it. Sprung it on us this way——"

A little breeze touched the soft gray curls that showed about Aunt Myra's temples, but her face with its pleasant wrinkles looked older and grayer and more tired.

"I think," said Nancy, stooping to pick up a pink smartweed that was encroaching to the very steps of the porch, "that we'll have a lot to do, to make it pleasant for her, so that she won't feel strange."

Aunt Myra tightened her pressure on the girl's arm but she said nothing. It was not going to be so easy to accept Tom's wife when she had always hoped that things would turn out another way.

But Nancy did not give herself another moment to think. There were so many things to do. Tom would not want his own shabby, comfortable room up under the eaves now, but they must have the guest room.

Nancy put on the best spread and covered the top of the high-boy with the old lace cover that was laid away in lavender. Still it looked bare somehow, and she was not satisfied until she had brought the madonna from her own room and stood it on the white mantel and laid logs for a fire in the brick fireplace. Then she put the asters—the bridal pink—on the table and the low-boy in two jars over the mantel, and stood back to view her work. It did look pretty and comfortable and sweet, she thought.

And suddenly the gray walls heard a strange sound, for Nancy had slipped down and was burying her head in her arms while the tears she had held back all day strangled her, choked her as though they were fiery drops.

"I hate her! Hate her! Hate her!" Nancy cried passionately.

But some one else had heard those strangling sobs besides the cold gray walls. It was Tom Holbrook who kneeled down beside her and touched the red hair softly.

"Why, Nancy, girl, what is it?" he asked.

She turned her face to him, tear-stained, marked by misery and tried to smile.

"Just the—just the—cook," Nancy said wildly.

"Old Lucy? What's she done to my little girl?"

He had taken out his handkerchief and given it to her, but she turned her face obstinately away. "I—want so much to meet your—to meet Florence," she stammered. "Perhaps she might not like it—this——"

"Florence? What's he got to do with it?" he asked.

"He? You don't mean to say—he?"

"Ned Florence? You've heard me speak of Ned often enough' or I thought you had——"

Nancy stood up suddenly and looked at him with her chin tilted back. "Tom Holbrook, if you are my fourth cousin twice removed, I will never—never forgive you as long as I live!"

But Tom Holbrook at the door caught her hand and said before she ran down the hall, "I don't want you to forgive me, Nancy, just love me, that's enough!"

ALL VIENNESE WEAR GREEN

Pronounced Change From Somber Color Which Has Been Worn in the Austrian Capital.

Revival of interest in commercial life in Austria has manifested itself in a contemplated "fair" and in a revival of fashions which include a new shade suggested perhaps by the general discontent, and called "malice" or "poison" green.

By means of the "fair" exposition, a new institution for Austria, business men hope to revive commerce by foreign merchants for which raw materials and semi-manufactures will be imported.

A certain revival of enterprise also is manifested in the prevailing fashion. In contrast to the rather monotonous shades of the last few years, modes revel in the extremest color—"giftgrun" ("malice green," "spiteful green," "arsenic green") is the color of the season. In the ballrooms dresses blaze forth in "malice green." In the streets this glaring green is subdued a little by black; but even in the most discreet robes the belt or tie must be lined with green, or from under the straw of coquettish little hats peep out coquettish little bows in "malice green."

Lost Suit Starts a Suit.

This is the tale of a generous tailor and a suit that brought about a suit. Vincent Ciccarelli of South Third street, Camden, N. J., is the tailor.

The tale, as told by Joseph Coantuno, of Fourth and Clinton streets, follows:

"I went to get my suit and the tailor had given it to another patron. Because of that I could not keep an engagement with my fiancee and we almost had a severe disagreement."

And so Coantuno brought suit for $200 to cover the loss of the suit and the "mental anguish suffered."

Both Expensive.

She—Your wife is such a dear sweet thing.

He—Yes, and so is our new flat, a dear suite thing.

California power plants were the first to use oil fuel under boi'

OBEDIENT, IF NOTHING ELSE

Man at Post Office Window Literal in Obeying Injunctions of Clerk in Charge.

The stamp clerk at the Grand Central post office says he has seen many funny things during his 15 years at the window.

A foreign-looking man stepped up to the stamp window the other day and handed the clerk a letter with a 2-cent stamp on it. It was overweight, so the clerk handed it back and said, "Two cents more."

"No understan'," said the man.

"Two cents," repeated the clerk. "One, two! Two cents!" And he held up two fingers. After repeating this several times, the customer seemed to understand and produced 2 cents, for which he was given another 2-cent stamp. Thereupon he handed the letter back to the clerk and turned to go away.

"Here!" called the clerk, "put the stamp on here. It needs 2 cents more."

"I geeva you two da cent!" exclaimed the man.

"Yes, but put the stamp on here." And the clerk pointed to the corner of the letter.

The man's face brightened with understanding. "Oh!" he said, and licking the stamp he very carefully stuck it on top of the other one.—New York Sun.

Animals' Need of Salt.

Persons who have the salt-taking habit insist that they require it. Some insist that they need more pepper, mustard, vinegar and sugar than other persons do. Perhaps this is true and perhaps these persons confuse the meaning of the words "need" and "desire." Many wild animals seem to have taken naturally to salt. The "salt-licks" of this country were the places where herds of buffalo, which roamed the land east of the Alleghenies as well as the region west of the Mississippi, traveled in order to lick the ground that was coated with the mineral. The aborigines of the land which came to be the United States knew the uses of salt and it was a common practice with some of the tribes to eat hickory ashes with their food, those ashes containing quite a high per cent of saline matter.

A True Ending.

"He's too great a stickler for the truth ever to make a successful novelist," said Hardley. "Did you hear how he ended his last book?"

"No," answered Smith.

"He wrote: 'And they were married and lived scrappily ever after!'" said Hardley.

Politeness Paid.

"My butcher congratulated me today on the rumor that clothes are going down."

"Well?"

"He was so nice about it that, of course, I couldn't kick when he charged me a little more for meat."—Detroit Free Press.

"Ouija! What's the good word?"

MY YOUNG sister.
HAS A Ouija board.
AND SHE believes it.
AND TALKS to Noah.
AND I think she talks.
TO HER best fellow.
WHO'S DEAD but doesn't know it,
AND I used to give her.
THE LOUD, rude laugh.
BUT I'M sorry now.
BECAUSE LAST night.
I WAS home alone.
SO I got the board.
AND PUT in a call.
FOR JOHN Barleycorn,
AND OTHER departed spirits.
BUT THE line was busy.
FOR NOTHING happened.
THEN I cheated a little.
AND IT spelled this.
"GRAMMASHOTTA SEVEN."
SO I shut off quick.
TO HEAD off any.
FURTHER FAMILY scandal.
THEN I stopped to smoke.
A CIGARETTE.
AND AFTER a while.
I CRANKED up weejee.
AND ALL of a sudden.
IT STARTED off.
AND QUICK as a flash.
IT SAID something.
"THEY SATISFY."

"SATISFY"—*that's* the good word. Just light up a Chesterfield and see what experts can do with fine Turkish and Domestic tobaccos when they blend them in that can't-be-copied Chesterfield way. You'll say "they satisfy."

Did you know about the Chesterfield package of 10?

FARMERS STATE BANK

OF GOODRIDGE

Hank Meets John

Hank Hello, John, where are you going?

John I am going to make a deposit in the bank,

Hank Do you find it more convenient depositing your money in the bank and checking it out?

John Very much so. I can issue a check to anyone I owe and it will not be necessary for me to have a receipt as the check will be returned to me with the proper endorsement, and I in turn can file my checks away and at the end of the year will have a complete statement of the amount of my expenditures.

Hank I agree with you, as it certainly is the best method of keeping account of moneys paid out and taken in.

The Farmers State Bank of Goodridge is a good place to do your banking.

Breaking It Gently.

"Oh, mamma," said little Charlie. "I've upset the salt-cellar over the clean tablecloth!"

"That was very careless," answered mother, "but go and brush the salt off, and see that you don't spoil the table cloth."

"But, mother, when any one spills salt they have a quarrel, don't they?" Charlie now asked.

"Yes, that is so," agreed the mother. "But why do you ask?"

"Well, mother," continued Charlie, "if they don't spill the salt they don't have a quarrel, do they?"

"No," answered mother. "That's quite right, but I can't see why you ask."

"Well, mother," replied Charlie, getting his back to the wall, "it wasn't the salt I spilled, it was the ink!"

MINNESOTA HISTORICAL SOCIETY

THE GOODRIDGE BANNER

MINNESOTA HISTORICAL SOCIETY

VOLUME XV, No. 28. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, JULY 15, 1921. $1.50 PER YEAR.

School Election

The annual school election for the Goodridge consolidated district will be held tomorrow evening. Two members of the board of education are to be elected. Candidates are required by law to file ten days before the date of the election, but there have been no filings.

We understand A. B. Mandt and Peter Lovly have been solicited and have promised to serve if elected. We have also peard mentioned for the position, Christ Urdahl, M. O. Seavey and Jay Payne, although these latter are not, as far as we know, candidates.

SHARE AND SHARE ALIKE

As a result of the recent visit of commissioners from the two counties it was decided that Beltrami couny take charge of the south six miles of the county road north and Marshall county the north six miles, work to be begun on grade, ect., as soon as posible. When this is done it wil make a complete connect from the J. H. through this section north to Roseau Co. and beyond.—Eagle

These are the most important offices in the community, and no effort should be spared to secure the services of our best men.

VERY TRUE

When "thieves fall out," and certainly when lumber manufacturers quarrel, that's it, we get part of the truth. Does anybody know why we stand for monopoly and protfieering in lumber, coal, meat packing and the assembling of our life necessities? Perhaps it is because the large manufacturers, large newspapers and large officeholders get along on such amible terms. At any rate, we know we are grafted unmercifully by the coal operator and the lumber baron. An awakened public sentiment is the answer and the only one. So long as we do not demaded of our public offial, senators ane congressmen a definite accountability on these questions; we will get nominal response and a show record, but no real relief. We, the public, are whelly to blame.—Thief River Falls Trlqune.

Live Stock Agency To Open in August

The new livestock marketing agency organized by Minnesota farmers to centralize co-operative selling in the northwest will open for business on the South St. Paul market nexh month.

It will begin active operations with the expectation of handling 10,000 cars of stock in its first business year. With 250 Minnesota co-operative shipping associations signed up as members of new selling agency, its officers believe that amount of business assured.

Minnesota farmers once more have taken the lead in co-operative marketing enterprises, according to an announcement from state farm bureau headquarters. The new livestock organization this week became an interstate marketing agency, when the work of organizing Wisconsin shippers to sell through the South St. Paul co-operative firm was begun. Shipping associations in South Dakota will be offered membership in the Minnesota agency next week.

Farm Leaders Of 12 States To Meet

Important farm bureau policies will decided next week, when the leaders of the farm bureau federations of 12 states meet at St. Paul to discuss agricultural problems of the middle west.

The relationship of the farm bureaus to the U. S. Grain Growers, Inc., and its plans for establishing grain sales agencies in the middle wsst is the most important matter to come before the intsrstate conference.

Two far reaching co-operative enterprises will be taken up by the Minnesota directors. The meeting Monday will decide whether the state federation will pool coal orders for farmers throughout the state and purchase the winter's fuel for a large part of rural Minnesota direct from the mines. Under plans drafted by the American Farm Bureau federation, farm bureaus in coal producing states will employ buyers to handle orders from other states, while deliveries to individual farmers would be made through present local dealers or through co-operative elevator or exchanges. The Minnesota directors also will consider financing the launching of the new statewide dairy marketing and service agency, and the Minnesota Co-operative Creameries association, Inc.

United Creameries Find Ready Market

Making the eastern market come to the Minnesota farm is the latest achievement in co-operative marketing enterprises in the northwsst, acsording to John Brandt of Litchfield, secretary of the new Minnesota Co-operative Creamerits association, Inc.

Twenty co-operative creameries in Meoker, Wright and Kandiyohi counties, which have united to form a shipping unit, have reversed the traditional system which compels the producer to hunt for his market, Mr. Brandt says.

The twenty creameries in the unit have shipped 20 carloads [illegible] the last three months. The [illegible] sulting from lower freight rates, obtained by shipping in carload lots, has amounted to as high as 56 cents a hundred pounds. The associctisn also is buying tubs and salt for its members, and seven creameries have begun grading with a view to shipping large quantities of one standard, to command a better market.

The most significant result of co operation is, however, the influence wielded by this little unit of 20 creameries on the large markets. Already three buyers, representing the New York, the Boston and the Philadelphia marketo, have come to us sesking the business of the association.

When a unit of 20 creameries can accomblish such results, officers of the Minnesota Farm Bureau federation sald today, the new statewid association, deslgned to iuclude 500 to 600 local creameries, should be able to save large sums for Minnesota dairymen.

Grygla Couple Wed

Miss Carrie Schneider of Wales, N. Dak., and Mr. John E. Maney of Grygla were married Wednesday, July 13, at 9 o'clock in the morning, at the Catholic church at Thief River Falls, by Rev. Father Noessen. The married couple left Thursday for a visit with friends at Wales, N. Dak., after which they will return and be at home at Grygla.

The bride was at one time a nurse in the Adkins hospital at Grygla. Her father is a well to do farmer at Wales. The groom is well known here. He was two years ago mail carrier on the Goodridge-Grygla route and operated in connection an auty livery from this place.

Thorstein Skarning

World Known Famous Master on The Accordion and His $700 Gold Inlaid Instrument

At the school auditorium, Friday, July 15, 8:30 p. m., a concert will be held, the like of which has not before taken place in onr city. The principal entertainment will be furnished by Thorstein Skarning, considered at present the world's leading virtuoso on the accordion, an instrument that is very popular in Scandinavian countries, as it is also in Italy. He has participated victoriously in various contests of skill on the accordion, his last victory being over an Italian player in Chicago seven years ago. He then won a gold medal and considerable money price.

Since then Mr. Skarning has traveled extensively in many European countries, giving concerts in large cities. At the opening of the war, four years ago, he was playing an engagement in Moscow. Before he could get out of Russia he was arrested on suspicion of being a German spy, but was soon released through the efforts of the Norwegian consul at Archangel.

His musical ability and splendid mastery of the technique of the accordion have received flattering comment in the press wherever he has appeared, both European and American papers according him highly complimentary mention. Lack of space at this time prevents us from giving extracts from some of these reviews.

In his concert here he will be assistod by his wife, who is a talented soprano and pianist, and among her solos will be "Solveig's Sang," Saeterjententens Sondag" and "Aa Mor." Mr. and Mrs. Skarning will render as duets "Death of Aase," "Anitras Dance," "Poet and Peasant" overture, Norwegian airs and other Norse compositions.

Alone on the accordion he will give "Nearer, My God, to Thee," sextetre from "Lucia," 'Vossérull,' and other selections.

The Skarnings have also made records for the world's greatest graphophone companies and also given entertainments at Camp Grant and to Red Cross benefits.

The Superior Telegram says: No such Scandinavian minsical artists as the Skarnings have been in the northwest since the tour of Ole Bull.

DIED

Mr. George Kassa, Sr., died Monday, July 11, at 5 o'clock, at the home of his son, George Kassa, Jr., at Thief River Falls, at the age of 80 years, of old age. He leaves his sons George, Jr., and John of Thief River Falls, Steve and Mike of Goodridge, and one daughter, Mrs. Susie Golda, who resides at Harvey, Ill. Mr. Kassa came to America from Czecho-Slovakia, Austria, in 1881, and settled at Streator, Ill. He removed to Pennington county in 1902 and has since resided here.

Funeral was held Thursday at 10 o'clock, [illegible] by Rev. [illegible] Catholic church [illegible] Falls, and iuterment was made in the Catholic cemetery at that place.

PICNIC

The Ladies' Aid and Young Peoples' societies will have a picnic at Bennie Johnson's place on Sunday, Aug. 24. A program has been prepared—good speakers, ball game, music by Goodridge band, etc. Dinner will be served at noon. Everybody invited.

Best to Forget Family Tree.

Possibly it should be a source of pride to us that a group of able scientists say we are not descended from monkeys, but that monkeys are degenerate descendants of our own race.

The recent discoveries of prehistoric human remains indicate that our family is much older than we supposed. This is very nice, but the accompanying details are the usual results one finds in running up family trees. These ancestors of ours who throve so many aeons ago were impossible people socially from all accounts, and we are wonderful improvements upon them in every way.

Gratitude that our race may feel in being relieved of the stigma of simian ancestry is therefore not unalloyed with the unpleasant. There are no indications in scientific research that a Society of the Sons of the Dawn Men will ever be popular.—Toledo Blade.

Woman Long Public Servant.

Postmistress or assistant nearly 60 years at Center Bridge, a little village in Pennsylvania, Mrs. Jacob W. Bowlby has resigned because of failing health. There being no applicants for the vacancy, the government has closed the office and made arrangements for its patrons to get postal service through the postoffice at Stockton, says the Philadelphia Ledger.

The Widow's Might.

Smith—Einstein, the rich pawnbroker, died and left the business to his wife.

Jones—Poor loan widow.

What He Goes By.

"Do you don your straw hat by the calendar?"

"No."

"Thermometer?"

"No."

"By what, then?"

"Pocketbook."—Boston Transcript.

The Pothooks and Hangers

By HAROLD SINCLAIRE

(© by McClure Newspaper Syndicate.)

Jimmy had come early. It was regular lesson night, but the Shark wouldn't appear for perhaps half an hour. Plenty of time for Jimmy in which to learn his fate and—well, he hadn't decided just what he would do after that; that is, in case she wouldn't marry him.

So he sat in the little parlor of Louise's home and waited. Presently she would come in briskly, her brown eyes demure, her lips smiling. She always made you think of a sturdy little wildflower in the woods in springtime. And Jimmy, young lawyer though he was, knew that his heart would skip a beat and his ruddy face take on a still deeper hue as he faced her. He tried to be patient, and as the minutes passed memories came—sweet and bitter—in their turn.

Around that library table in the center of the room he had sat three nights a week with Louise and—yes—Terry Gerard, the Shark—who was the particular fly in Jimmy's ointment. Why did he need a commercial education, anyway—his business didn't require it. Jimmy's did; at least, so he had represented to Louise when he had begged her to teach him the art of shorthand.

So around this table the three had sat—Louise and her two mismated pupils, for they hated each other as much as they loved their teacher. Both had invented their need of a knowledge of shorthand in order to be near the object of their affections. The only difference in their methods was that while Jimmy didn't try to learn, concealing his indifference to the best of his ability, Terry made the most of his lessons and consequently was able to read whole pages of curlicues without a break.

"Red headed shark," growled Jimmy, gritting his teeth. He smoothed his own glossy dark hair and scowled. That shark was to be reckoned with, he was bright and, yes, good looking, and Louise seemed to like him. Of late he had imagined that she preferred him. Only yesterday he had come upon them talking confidentially in low tones when no one was near. Well, the suspense would soon be over. He heard her coming down the stairs, and his heart skipped that beat according to prophecy, as Louise entered in anticipated fashion.

While he was holding her hand, which had been extended in welcome, he looked at it idiotically, as if he had never seen it before.

"Why, Jimmy," said Louise, looking at him in surprise:

Jimmy gulped.

"You promised to write my answer today."

"And so I have."

"Didn't get it," gasped Jimmy, "Mail service punk. Was it yes or no?"

"Silly," she answered, diving into her pocket. "I didn't say I'd mail it to you. Weren't you to come this evening to take your lesson? Well!"

She handed him a notebook, open, pointing to a neat array of pothooks and hangers that adorned the page.

"That is my answer," she told him sweetly.

He looked at it helplessly. "Jehoshaphat!" he exclaimed. For the first time he envied that shark. He could have read those marks. Poor Jimmy couldn't, and he didn't know whether to sink with despair or take his teacher in his arms!

It was at "recess" the night before that it happened. The Shark had left early, Louise had told him goodnight in what seemed to Jimmy a most unnecessarily interested fashion, and Jimmy had forthwith laid his heart and fortune at his teacher's feet. In a sweetly businesslike manner she had promised to write him her answer.

And there it was in his hand and he couldn't read it!

"That is your answer," repeated Louise.

"Yes," Jimmy floundered miserably. She was looking out of the window now. Jimmy set his teeth and began to study those awful marks with a vengeance.

A gasp escaped him. There was a familiar chicken track in that first line. It was the one phrase he had learned very early in the course, thinking some time to use it craftily, "I love you!" He recognized that when he saw it. It was there! He looked closer. Yes, it was there, but what was that silly little mark preceding the word love? It didn't belong! He tried with his finger to remove it—it might be an eyelash fallen there. But it stayed, and Jimmy's brow grew moist with the dawning of an awful thought. Suppose that little fool curved line should be the negative to that sweet phrase! Did she or didn't she? That was the question. It was time to use some of that craftiness. Pushing back his damp hair and calling to his aid a sickly smile, he pointed to the disturbing curlicue.

"Teacher," he said, in a wheedling tone which he sometimes used teasingly, "teacher, you made this character a little lame. I can't quite make it out." He held his breath.

"That," answered Louise, turning to him patiently and spelling the word phonetically, "is 'd-o-n-'t'—half length, you know, to add 't.'"

Jimmy stiffened and the notebook fell to the floor. When Louise left it there and turned away again he exploded. Black despair reigned, but rage gained mastery of his tongue.

"I hope you're satisfied," he said thickly. "You've made all kinds of a fool of me—deliberately, too."

Louise raised her finger warningly and listened. "I think Terry's coming," she said. "He's early."

Jimmy swallowed and looked for his hat. He was certain now—the Shark had won. Louise's smile showed that. It was radiant and her face was shining with a glory that only love can bring.

"Can't stay for lesson," he mumbled, cramming the letter into his pocket and making for the door.

"It was a false alarm," said Louise after a moment, re-looking toward the door.

"That shark——" began Jimmy angrily.

"Isn't he a wonder?" asked Louise, her sparkling eyes upon him. "He can read shorthand like print." Her face was glowing still and Jimmy could stand it no longer.

"Goodnight," he said thickly.

"But," said Louise, innocently. "Have you read all the letter, Jimmy? There are some good phrases there and you should study——"

"I know one of them," thundered Jimmy, "and that's enough. "'I don't love you'—in the first line—that's enough. I can read that."

The doorbell rang jarringly.

Jimmy gave a farewell backward look, saw her brandishing another paper before his eyes, felt her hand upon his arm. But he jerked away angrily from those fingers he had so loved to touch, accidentally, of course, at their tasks.

"I'll read no more fool marks," he said.

"But this is a typed transcript of the fool marks, Jimmy," she explained. "I knew you were a fraud and prepared this for you," and suddenly her arm went about his stubborn neck, tightened, and brought his eyes down within range of the typewritten words: "I don't love you half as much as I'm going to——"

"Jehoshaphat!" Jimmy waited to read no more, but blinking at the heavenly light that enveloped him, he kissed his teacher, and together they went to the door to let in the Shark.

The Cuckoo Clock From Mother

By DORA MOLLAN

(© by McClure Newspaper Syndicate.)

Young Mr. Pepper stood in his own [illegible] room, hands in pockets, pipe between his teeth, surveying the whole with an air of perfect contentment. His bachelor dreams were realized. He was married at last to Mabel—this was the first day in their own home and they had been arranging their wedding gifts, with delightful interruptions to explain how wonderful that they two had met and loved—and everything.

"There is only one fly in the ointment," remarked Harry Pepper. "And that is—"

Pretty Mabel hung on his words expectantly. "What is it, dearest?" she asked.

"The—the cuckoo clock, honey."

"The c-u-c-k-o-o c-l-o-c-k," she stammered, "why mother gave me that—I asked her to—I l-o-v-e it, Harry!" Tears brimmed her lovely eyes. Harry kissed her and assured her that he, too, had admired those impertinent reminders of the flight of time, but always at a distance. "I never expected to have one in my own home," he ended.

"But you knew—you knew, Harry, that I adore them—they are cunning."

"I knew it," he admitted, "but I thought after you married me you would not care for such an absurdity. You see, darling, I'm tired at night after a nerve-wracking day at the office, and then to have a silly little bird pop out of ambush and remind me it's time to go to bed—but never mind, I'll get used to it after a while."

"You're an old dear," cried Mabel, but while Harry Pepper smiled patiently his was no martyr spirit.

Came one morning when the neighborhood was rife with tales of burglaries and the Smith's home had escaped ransacking. Came another morning a week later when a frightened maid rushed upstairs and announced that the silver spoons had disappeared from the sideboard and that the cuckoo clock was missing from its accustomed place.

"I cannot feel sorry, darling," said innocent Mr. Pepper to his distracted wife; "but I will call up the police station right away," and he did. He went to the city that morning with a curious feeling of satisfaction. "Some discriminating burglar," he muttered. I'd like to give him a tip about the blue glass vases that Aunt Lucretia donated—well, perhaps Norah will break them some day when she's dusting! I love my home—but some of the wedding presents!"

In the meantime Mabel Pepper had called up her sympathetic mother and related the story of the burglary. "I really miss his cheerful little call," she added.

"Never mind, dear," comforted her mother—"there are just as good fish in the sea as ever were caught, and there are just as charming birdies as ever sang in a cuckoo clock!"

So her mother told Mabel's sad experience to great-aunt Lucretia and to Harry's Uncle Benjamin, who called on her that day. In the meantime the police searched diligently for the midnight marauder.

Mr. Harry Pepper lost his cheery bearing. A troubled look came into his eyes, and he made several grievous mistakes in his work. "[illegible] the cuckoo clock!" he muttered savagely one night after Mabel had confided to him that it was wretchedly lonesome all day there without him—and that the empty house [illegible] more cheerful when she could [illegible] the cunning little chirp of the clock.

"Hang the cuckoo clock!" [illegible] "I never heard such a fuss [illegible] anything in my life."

Of course Mabel was a [illegible] young woman, and thought of [illegible] other things, and had plenty of [illegible] ment to distract her mind, but for [illegible] moment her new home was paramount in her thoughts.

One Sunday morning, a couple of weeks after the burglary Mabel came down to breakfast and found the table gay with roses, while her chair was heaped with packages.

"Happy birthday, darling," said her husband, as he slipped a pearl ring on her finger. "I must kiss you how many times—sixteen?"

Mabel told him and then began to open her packages. "Such large ones, dear," she exclaimed; "you must help me."

"A cuckoo clock—from mother. Just like the other one. Isn't it, dear? Do hang it in the old place, Harry—there."

She squealed again when she found that Aunt Lucretia had remembered her birthday with—a cuckoo clock. And once more when Harry's Uncle Benjamin's gift was unwrapped and disclosed another cuckoo clock.

"Three!" laughed Mabel hysterically. "Harry, what shall we do with them?"

"The more the merrier," said Harry gloomily. Then, to the hovering maid servant, "What is it, Norah?"

"Please, Mr. Pepper, I found this on the back doorstep this morning." She gave him a large package wrapped in newspapers.

"What can it be, Harry?" asked his wife cautiously.

"I'm afraid, dearest—yes—another clock!" He held it up and untangled the weights. To one of them was fastened a crumpled envelope.

"It's the one that was stolen—why did he bring it back?" wondered Mabel. He must be an honest burglar!"

Harry opened the letter and read the penciled lines:

"Dere mr. Pepper—Hears yore clock. my wife wont have it in the house. she hates kookoo clocks. Its the wifes house and I let her have what she wants. respecfuly—nobody. you no."

The Peppers laughed until they cried, and the laughter and the tears seemed to wash away all the soreness and the bitter feeling caused by the clock. "We shall keep them all," declared Mr. Pepper generously, "to remind me of my selfishness."

"We shall keep only one and [illegible] permission to change the others for something else," declared Mrs. Pepper, "and this being the 'wife's house' you must let me have what I want."

"It is yours," grinned Mr. Pepper.

"Then—my way is that it is our home—and we must both have what we want—and the best way to do that is to make up our minds to each like what the other likes." And the rest was buried in the shoulders of her admiring husband.

AVOID OVERCROWDING CHICKS

Growing Fowls Need Plenty of Room in Sleeping Quarters—Ventilation Is Needed.

After the chickens are a few weeks old special attention should be given to see that their sleeping quarters are not overcrowded. Brooders that provided plenty of room when the chicks were first hatched will now be seriously overcrowded, and the chicks will be stunted and permanently injured if more room is not given. Until they can be transferred to larger houses provide all ventilation possible.

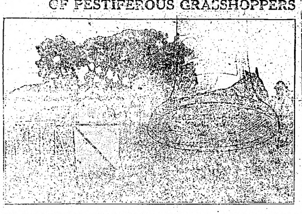
QUALITY ALL THAT COUNTS

Task Must Be Properly Done if It Is to Have Any Value That Is Lasting.

There is not haste but economy is, and rightness is. Whatever is rightly done stays with us, to support another right beyond, or higher up; whatever is wrongly done, vanishes; and by the blank, betrays what we would have built above. Wasting no word, no thought, no doing, we shall have speed enough; but then there is that farther question, what shall we do?—what we are fittest (worthiest, that is) to do, and what is best worth doing? Note that word "worthy," both of the man and the thing, for two dignities go together. Is it worth the pains? Are we worth the task? The dignity of a man depends wholly upon this harmony. If this task above him, he will be undignified in failure; if he is above it, he will be undignified in success. His own composure and nobleness must be according to the composure of his thought to his toil.—"The Cestus of Aglaia," Ruskin.

POISONED BRAN TAKES HOP OUT OF PESTIFEROUS GRASSHOPPERS



Side and Back View of Hopperdozer for Destruction of Hoppers—Horses Are Hitched to Projecting Ends of Two-by-Four.

(Prepared by the United States Department of Agriculture.)

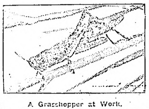
There is nothing so good as poisoned bran for taking the hop out of a grasshopper and there is no better way of buying and distributing the bran than through a community organization, specialists of the United States Department of Agriculture find. In the areas where the grasshoppers come down on the farm crops like all the plagues of Egypt there should be grasshopper-fighting organizations, just as there are fire-fighting units in every city. Fighting a grasshopper invasion without the help of the neighbors is like trying to put out a fire in a powder factory with one bucket of water.

In the Pacific states the vast, uncultivated areas of mountains, foothills, and grasslands afford ideal breeding grounds for at least eight common species of grasshopper. Undisturbed, the pests can mass their forces in the spring and be ready for a descent upon the alfalfa fields and cultivated crops of the farmer when weather conditions permit. There seems to be little hope of destroying the grasshoppers in these isolated breeding areas and for that reason specialists of the bureau of entomology, United States Department of Agriculture, maintain that it will be many years before the grasshopper menace disappears from the West. But, while the eight plagues cannot be exterminated at their source, they can be met with a systematic, well-directed barrage of poisoned bait, fire, and other weapons for control when they attempt to invade the cultivated fields.

Preparing for the Attack.

Every locality should have an organization fully equipped and prepared to meet the grasshopper onslaught. All preparations should be made early in the spring, before the insects have left their breeding grounds. The organization should be directed and controlled by efficient and energetic leaders, and it ought to have the co-operation and support of every farmer in the community as well as the landowners who hold title to the remote areas from which the plague spreads.

An equitable method of raising funds for the work can be arranged if every landholder is taxed on the acreage he holds or operates. The funds should be collected and placed at the disposal of a good business man who will know how and where to go about buying poisons and other supplies when they are needed, without the necessity of untangling red tape. Sometimes it is advantageous to fight the grasshopper army with fire, and it is often necessary to spread poisoned bait upon the property of nonresident landowners. Here are two points where legal advice is desirable, and the leaders should know their exact rights and limits in these matters before the time comes for them to act to save the crops of the community.



A Grasshopper at Work.

If the district is divided into defense areas and each area put under the supervision of a man who knows grasshopper habits and how to use the weapons which the organization has put in his hands, there will be no waste of materials or effort when the foothills disgorge their hungry hordes. Lastly, the wider the co-operation the better the results will be. It does no good to drive the hoppers from one district, if they are allowed to settle and feed upon another—passing the pest along to the other fellow does not afford permanent relief, and it puts an extra hardship upon one's neighbor. The assault should be simultaneous throughout the whole infested area; farm should co-operate with farm, village with village, and county with county, so that every leap that the hopper makes to escape the frying pan will land him in the fire, the specialists say.

Eight Species in West.

There are at least eight species of grasshopper commonly found in the Pacific states. Some of these are winged, some are not; some prefer one variety of food, but altogether, when seasonal conditions are favorable, they can destroy any crop that [illegible] grow. The habits and characteristics of each species are described in Farmers' Bulletin 1140, Grasshopper Control in the Pacific States, which may be had upon request of the United States Department of Agriculture, Washington, D. C.

In addition to a brief description of the pests, the bulletin gives the recipes for mixing the most efficient poisons, when to spread, and how to place the bait so as to avoid injury to live stock. Special control measures are required to meet different geographical conditions, and the publication presents the methods that have proved most effective after five years of experimentation.

CONTROL OF WHEAT DISEASE

Farmers' Bulletin 1213 Tells of Flag Smut Discovered in Illinois County in 1919.

Methods for controlling flag smut, a destructive disease of wheat, are given in Farmers' Bulletin 1213, Flag Smut of Wheat and Its Control, issued for free distribution by the United States Department of Agriculture. The disease was discovered in 1919 near Granite City, Madison county, Ill., and in 1920 was found in 111 fields confined to 47 square miles.

Black stripes running lengthwise in the leaves and leaf sheaths are typical of flag smut. Diseased plants are stunted and rarely head. The disease is spread by spores carried on the seed, and by spores left in the field on infected plant material or on the ground, where they may be scattered in various ways, and infect wheat seedlings in the fall.

Treat with formaldehyde the infested grain as it comes from the thrasher. Burn infested straw. Sow disease-free seed on noninfested land. Treat with copper sulphate and lime the seed wheat to be sown in the infested area. Grow resistant varieties.

The bulletin may be had upon application to the division of publications, United States Department of Agriculture.

GATHER FOR GREAT FESTIVAL

"Devil Dance" Is Important Occasion in Mongolia—Driving Out the Spirits of Evil.

The devil dance is one of the greatest festivals of the Lama church in Mongolia. It takes place each spring, and represents the chasing out of the spirits of evil. The dance is simply a series of posturings of men and boys in rich costumes, wearing fearsome animal masks, accompanied by an impressive chant.

The midsummer festival is also an interesting affair. It is a survival of the primitive nature cult, and attracts crowds of pilgrims. Caravans begin to arrive days in advance. The Living Buddha appears in his fringed orange felt helmet, the abbots in their fat lacquer hats, the lesser lamas in silk or brocade skull caps, and the lay officials in old Manchu hats, topped with colored buttons to denote their rank. The whole company rides out to the monastery gate before dawn to the obo or sacred mount. These are elevations crowned with piles of stones and decorated with prayer banners. They represent the ancient totems to the nature spirits.

The ceremony must be completed by sunrise, when all return to the monastery for a big feast. The ceremony at the obo is a riot of color. A weird service is held in which huge bronze trumpets, six feet long flutes made from sea shells and libation cups from human skulls are used.

A Better World.

Whenever we get the notion in our head that the world is no better and life no easier to live than it ever was all we have to do to cheer up again is to reflect back to the old days when house cleaning meant that we used to have to get down on our hands and knees and work the skin off both of them trying to stretch an old carpet back into the space it occupied before mother insisted on it being ripped up. Anyone who has ever laid a carpet in the old way will tell these smart young folks of today who complain about the chores they have to do that they know nothing whatever of the agonies of house cleaning. Incidentally the folks who beat the dust out of the rugs with a stick aren't so numerous as they used to be.—Detroit Free Press.

Not a Word.

There was nobody who could play the violin like Binks, at least, so he was delighted when asked to play at the local concert.

"The instrument I shall use at your concert," he explained to the host, "is over 200 years old."

"Oh, that's all right, old chap. Don't worry about that," replied the host. "I shan't tell and no one will ever know the difference."

To Be Pitied Indeed.

"I pity poor Alice with such a commonplace husband."

"It must be awful. She says even the things he says in his sleep are flat and uninteresting."—Boston Transcript.

Says Jud Tunkins.

"Many a man," said Jud Tunkins, "inquires about the baseball score not because he's particularly interested, but because he wants to get his mind off the League of Nations."

Grave of John Howard Payne.

In Georgetown, the oldest part of Washington, is buried the author of "Home, Sweet Home," the song which has been translated into almost every language in the world. John Howard Payne was the American consul in Tunis, where he died about seventy years ago. Many years later W. W. Corcoran, a noted philanthropist, thinking it a shame that a man who loved home so much should be buried thousands of miles away from it, paid the expenses for the bringing of Payne's body home. He was then buried at Oak Hill cemetery, Georgetown, in the plot in front of the chapel. The spot is marked by a pedestal on which is a bust of the poet.

Historic Mountain.

Pisgah, a mountain of the Abarim range, east of the Dead sea, from the top of which Moses viewed the promised land, has been identified also with the modern Naba, a ridge which projects westward from the plateau of Moab, near the northeastern end of the Dead sea. It commands an extensive view of the whole of western Palestine. There are two summits, the higher, Ras Naba; the lower and outermost, Ras Siyagah. The latter commands the whole of the Jordan valley, and is probably identical, says the Jewish Encyclopedia, with the "top of Pisgah which looketh down upon Jeshimon."

Speaking of Softness.

"How beautifully soft it is!" he murmured as he sat on a low stool at her feet, laying his hand on her glorious white arm.

"How less beautiful, but oh, how much softer!" she tenderly replied, laying her jeweled hand on the top of his head.

In Lonelyville.

"Why hang around the station like this? No train for four hours."

"I want to see if I can't intercept a cook starting back for town."—Louisville Courier-Journal.

FARMERS STATE BANK
OF GOODRIDGE

Hank Meets John

Hank: Hello, John, where are you going?

John: I am going to make a deposit in the bank,

Hank: Do you find it more convenient depositing your money in the bank and checking it out?

John: Very much so. I can issue a check to anyone I owe and it will not be necessary for me to have a receipt as the check will be returned to me with the proper endorsement, and I in turn can file my checks away and at the end of the year will have a complete statement of the amount of my expenditures.

Hank: I agree with you, as it certainly is the best method of keeping account of moneys paid out and taken in.

The Farmers State Bank of Goodridge is a good place to do your banking.

Annual Meeting

The stockholders of the Farmers Elevator and Milling Co. held their annual meeting last Monday. There was a good attendance and the best of feeling prevailed.

The following officers were elected: Emil Grams, president: Morgan Vaughan vice pesident. Henry Dlen, Theo. Gilbertson and A. B. Mandt were elected directors.

The reports of the manager and treasurer were read and approved. The business has paid a profit of about $1200 during the past year, notwithstanding all kinds of adverse conditions. This is a good showing. Most of the farmers elevators of the country have met with more or less loss during that time.

NOTICE FOR BIDS

The school board of District 65, Pennington county, will receive bids for laying founbation and placing wall board on the inside of the school house. Also to take down the old chimney and build a new one. Bids to be opened and considered on July 30, 1921.

The contractor is to furnish all material, and the work must be finished Dec. 20, 1921.

Specification may be seen at the office of the clerk.

The board reserves the right to reject any or all bids.

The Election In District 8

The school election last Saturday evening passed off very quietly, although there were 79 votes cast. There were no filings of candidates and no regular tickets, consequently the vote was somewhat mixed. Following is the result:

For three years.
Peter Lovly, 55.
A. B. Mandt, 39.
Carl Christianson, 26.
M. O. Seavey, 18.
G. C. Gulrud, 9.
C. Thompson, 5.
For one year.
Carl Christianson, 33.
Chris Urdahl, 22.
G. C. Gulrud, 21.
C. Thompson, 15.
Peter Lovly, 14.
A. B. Mandt, 5.

The following were elected: For three years—Peter Lovly, A. B. Mandt. For one year—Carl Christianson, Chris Urdahl.

Speed at County Fair

"With the best dirt track drivers in the country racing at Thief River Falls on August 6, the closing day of the 20th annual Pennington County Fair, people of the Northwest will have the opportunity to witness the greatest display of speed ever put on in the state before," Secretary Herbert Fuller has announced. Extra blanks have been forwarded to the leading speed demons in the racing game and indications point to the greatest assemblage of race pilots ever gathered in the Northwest.

Special inducements are being offered to such stars as Sig Haughdahl, Fred Horey, Louis Disbrow and O. T. Barr to enter against a field of challengers as Les Allen, Rowe Brainerd, Ted Rick and others. Negotiations have been opened with some of these drivers already, and by the end of the week Secretary Fuller expects to have the majority of them signed up for the meet. O. T. Barr, Les Allen and Rowe Brainerd are contenders for this year's championship and are forcing Sig Haughdahl to the limit to keep his title. So if these bitter rivals for the trophy are signed, one of the closest and speediest battles ever contested can be assured.

As a feature attraction for the four days of the fair, Secretary Fuller has signed up the crack all-American auto polo team to play the Pacific coast aggregation in a four game series. A hot battle can be expected since these veterans know all the tricks of the game. "No game in all sportdom offers the thrills, action and excitement that auto polo does," Secretary Fuller stated, and it is so sensational that the spectator is kept on his toes every minute of play."

A Correction

In the district clerk's annual report, as published last week, the item

"Cash apportioned the District, but not yet drawn from County Treasury, $3,714.11"

was placed under the wrong item. It should have read:

"Outstanding Orders paid, $3,714.11."

NEW HARDWARE MAN

John A. Sundquist of Butte, Montana, has purchased the hardware store, building and residence of N. H. Dahl. Mr. Dahl acquires some property in Butte, Montana, in the deal.

Mr. Strandquist will assume management of the store as soon as the invoice now being taken is completed. He appears a pleasant gentleman and a business man, and will no doubt build up a flourishing business here. Mr. Dahl and family will reside in Thief River Falls until he finds a new location.

A Million Dollar Theft

Cy Thompson, comptroller of the Hormel Packing Co., Austin, Minn., one of the city's best respected citizens, is in jail charged with the most spectacular embezzlement in the history of the Northwest.

Specifically accused of misappropriating $10,000 of the company's funds, Thompson's defalcations, extending over a period of ten years, will total $1,189,000, according to auditors who have been going over his accounts.

His total holdings are estimated to be worth close to $1,000,000, including a new $80,000 home in the city of Austin.

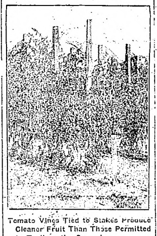
STAKE TOMATOES FOR BEST QUALITY FRUIT

Plants Are Thus Held Off Ground and Kept Clean.

In Pruning Remove All Side Shoots and Suckers, Leaving Only Main Stem—Small Saplings Are Good and Inexpensive.

(Prepared by the United States Department of Agriculture.)

It generally pays to stake and prune the tomatoes grown in the small home garden because, by this method the fruit is held off the ground and is clean, a larger number of tomato plants can be grown on a given space and the fruit generally ripens earlier than if the plants are allowed to grow in the natural way. In pruning the plants all side shoots and suckers are removed, leaving only the main stem with its leaves and clusters of fruit. It is easy to determine which are the side shoots and which are the young blossom clusters because the shoots appear directly in the little pocket where the leaf joins the stem, while the fruit clusters appear on the naked side of the stem where there is no leaf. Pinch out the side shoots, but be careful not to injure the blossom or fruit clusters.



Tomato Vines Tied to Stakes Produce Cleaner Fruit Than Those Permitted to Trail on the Ground.

Tomato stakes should be from 4 to 6 feet long and 1 to 1½ inches through at the thickest part. They may be small saplings cut in the woods and sharpened at one end, or they may be split from a log that is free from knots. Sometimes strips of waste material from a sawmill or planing mill, known as edgings, are used. It makes little difference so long as the stakes are strong enough to support the plants and are inexpensive. The stakes should be driven firmly into the ground, one on the north side of each tomato plant, and the plants tied to them once a week during the active growing period with soft cord or narrow strips of muslin. Sometimes the tomato plants will reach the tops of the stakes and then hang over until the tip will touch the ground, clusters of fruits being formed all along the stems.

Twenty-five to 50 tomato plants trained to stakes will supply the average family with all the tomatoes needed for use while fresh, also for canning. It pays to go to some little trouble to have them early, also to stake and prune them so that the quality will be the best.

PLAN SEEDBED FOR ALFALFA

Plenty of Good Barnyard Manure Should Be Applied if Soil Lacks Humus and Fertility.

If you are planning a five or ten-acre field of alfalfa, and you ought to plan it if you do not already have alfalfa, see that the ground is made ready in good shape. Alfalfa needs a hospitable soil, but it isn't so hard to make a soil pretty fairly hospitable. Apply lime if the soil is acid, and plenty of good barnyard manure if it lacks fertility and humus. Then remember this: You cannot get the seedbed too fine for alfalfa; this crop needs a firm, fine seedbed and to get the very best results, you should see that it gets what it needs.

DISCARD ALL BOARDER HENS

In Small Flock Owner Can Determine by Observation Which Fowls Are Layers.

In any flock some hens will be found to be much better producers than others. Often there are a few hens that are such poor layers that it doesn't pay to keep them. Where the flock is small the owner can determine by observation which hens are merely boarders; and these are the ones to eat.

Ladies' Aid and Y. P. S. meeting

AT BENNIE JOHNSON'S SUNDAY, JULY 24

FEDERAL GRADES HELP MARKETING

Organizers of Co-operative Associations Fail to Recognize Value of Standard

(Prepared by the United States Department of Agriculture.)

Growers of fruits and vegetables are appreciating more and more the benefits possible through organization in marketing their products. It is estimated that there are 14,000 farmers' coöperative buying and selling associations in the United States of which about 2,000 represent fruit and vegetable interests.

Will Find Bureau Grades Helpful.

Where the association is organized for the purpose of selling, the organizers often lose sight of the fact that some standard must be adopted for marketing their products. Individuals or organizations will find the recommended or proposed grades formulated by the bureau of markets, United States Department of Agriculture, very helpful as a basis for their packs or brands.

One Florida truck growers' association adopted this past season, the tentative United States grades for cucumbers as a basis for their "Fancy" and "Choice" packs, marketing them under their leading brand. An investigator of the bureau of markets inspected the association pack and the individual shipper's pack and advised with them when any doubtful points concerning grades were raised. This inspection service gave the bureau of markets an opportunity to determine in the field whether the grades as formulated would be practical, at least under Florida conditions.

The association packed all cucumbers through a central packing shed, each grower's product thus being graded by a disinterested person. This made for uniformity of the product. Every car loaded by the association was approximately 4 to 5 per cent within the grade requirements. Nearly every car inspected outside the central packing house was below grade, ranging 3 to 20 per cent in excess of the 10 per cent tolerance allowed for defective or cull stock.

Cucumbers Uniform in Size, Shape and Coloring Are Much More Attractive Than Defective Specimens.

It is interesting to study the prices received by association members for stock packed under Federal grades through their central packing house, and prices received by farmers outside the association. Prices given in the accompanying table are f. o. b. car lots in bushel hampers.

No straight cars of No. 3 were loaded on the street because it is customary to include a certain portion of such cucumbers in both the No. 1 and No. 2 grade.

Grades Fixed on Some Products.

The Bureau of Markets has officially recommended grades for potatoes, sweet potatoes, strawberries, northern-grown onions, Bermuda onions, and formulated tentative grades for barreled apples, cabbage, peaches, tomatoes, cucumbers, lettuce, celery, and asparagus. These grades are the result of investigations conducted in the leading fruit and vegetable sections, as well as in primary markets. The adoption of such definite grades by fruit and vegetable shippers, whether individuals or associations, would assist very materially in increasing returns and no doubt tend toward better understanding between shippers and receivers.

CUT CLOVER EARLY

Do not delay overmuch in getting off the first crop of clover; often the early cut field will yield a really worthwhile crop in September, and price or no price, clover in the mow is a comforting asset when the winter snows drift over the fields and yards.

The "Wife" Back Home

By DOROTHY DOUGLAS

(© by McClure Newspaper Syndicate.)

Rose Hall came out of the West, accompanied by her mother, Mrs. C. Slater Hall, and her father, Charles S. Hall. Rose came joyously; her mother acquiescently; her father reluctantly, with many protestations. Papa Hall stayed just long enough to get his family ensconced in an exclusive hotel and then hustled back, to see to it that nobody made hay of his business in the sunshine of his absence; for it was his boast that he owed his success to strict personal attention to details.

Mr. Hall left an imposing bank balance subject to his daughter's signature, and for two weeks Rose was supremely happy. She was a bewitching little blonde. With softly waving hair, to which a fashionable hairdresser did wondrous things, and a petite figure that delighted the exclusive modistes, innumerable oblongs of pink paper bearing the imprint of a big metropolitan bank passed into willing hands and in exchange Rose received masses of chiffons and laces, satins and velvets, brocades and furs, which the fairy wand of commerce summons for my lady's adornment from the ends of the earth.

For a year previous to the realization of her dream of spending a winter in New York, Rose had studied religiously the Sunday editions of the great city's newspapers. The result was two sheets of letter paper covered with notes of places and things she intended to see. Theaters, famous and obscure; restaurants, fashionable and merely queer; museums, art exhibits, foreign quarters, odd back waters that casual visitors usually missed; everything—even down to the menageries in the parks—Rose had vowed to see it all. And now she was ready to begin. But how was she to go unaccompanied?

In Mrs. C. Slater Hall, Rose could find no solution of her problem. Mrs. Hall possessed two enormous interests, and two only. Her aches and pains and the movies. In her home town it kept her "humping," as Rose expressed it, to keep up with the changes in the programmes of three movie theaters. In New York even unlimited leisure and endless taxis could not bring success to her desperate efforts to see all the "releases." Rose tried the companionship of Marie, her maid.

Marie was blase, unappreciative—no fun at all. Besides, she uttered veiled threats of leaving. Rose turned in her extremity to a certain friendly middle-aged clerk of the hotel, who knew all things.

"If you don't mind the cost," suggested he, "you might engage some decent, presentable young man who knows his New York as a sort of permanent escort. Oh, it's quite often done." The clerk even knew of such a person, until recently a guest of the hotel himself, but a bit out of luck and having some difficulty finding a job. The clerk would make a point of getting in touch with him if Rose wished.

The idea was utterly novel to Rose—but so was New York. She told the clerk to bring on his courier or escort or whatever he might be. And the very next day he did. The young man, who gave his name as Jerald Holmes, seemed all he was represented to be, so Rose engaged him. Then it was a case of breaking the news to her mother. Mrs. Hall bestirred herself to be a little shocked at this caprice of her daughter's, but in the end Rose had her own way, as always.

Jerald Holmes proved to be a delightfully sympathetic companion. As the days went by Rose's enjoyment of the things she had looked forward to was complete; for wasn't she seeing them properly dressed and properly escorted?

Also she was glad—very glad. Rose succeeded in convincing herself—that Mr. Holmes was married. In their first interview he had mentioned a wife "back home," for whom he intended to send when he was settled permanently. Meanwhile, he assured Rose, acting as her escort was an exceedingly pleasant way of bridging over what would have been for him a very awkward period.

If their conversation ever verged on the personal, it was the man who always steered it away; so it was with never a hint to build on that Rose concocted a picture of Mrs. Jerald Holmes. Because her escort had the look of an outdoors man, she placed his wife as the tailor-made type. She probably combed her hair smoothly back and affected those mighty good looking sport suits and sailor hats that one saw in the shops. Unconsciously Rose imagined Mrs. Holmes a direct contrast to herself.

Yes, Rose assured herself, it was far better that her escort should be a married man—provided his wife did not object; [illegible] had Mr. Holmes' word [illegible] that; otherwise he might attempt to make love to her in the many opportunities thrown in his way, and then, of course, she would be obliged to snub him. Or he might be a fortune hunter! This train of thought always landed Rose at the same terminal—that she was glad Jerald Holmes was married—of course!

It was afternoon on one of those mild, sunny days which occasionally lose their way in the calendar and stumble into the wrong month. Rose and her escort were strolling in the park and amusing themselves by feeding those little furry grafters, the squirrels. Rose had never seen Jerald Holmes in such a happy mood. It was contagious, but at the same time she couldn't help wondering what had caused it. So she questioned, very casually. "Had some good news?"

"Yes," answered her companion, "how did you guess it? Word came this morning that a position I was waiting for is open and I leave New York at the end of the week."

So his position was out of town! Well, what difference did it make to her where it was? If he did not see fit to tell her more about it, she would not ask. So, while she was murmuring congratulations, Rose shivered slightly in the wind [illegible] seemed to have blown up of [illegible]. She wished the mild day [illegible] beguiled her into leaving off her [illegible] wrap.

As the taxi bore them slowly through the intricate traffic that evening on their way to the opera, Jerald Holmes took from his pocket two bits of pasteboard and deliberately tore them up. "Those are the tickets I bought with your money, Miss Hall. These I got myself." He produced two more. "I want you to be my guest at the opera this evening—and to the other places we have planned to go this week. Will you? I want it more than anything else in the world."

Rose turned her head and looked out of the window, but not before Jerald had seen the color flaming into her cheeks as with trembling hands she manipulated the ermine collar of her evening wrap into a shield. After all, she reasoned with herself, why shouldn't she? That woman would have him for always! What would be the harm if she pretended for a few days that there wasn't any such person?

"You are from the West and you can't wear the New York girl's poker face, Miss Hall." So Jerald's voice broke the silence. "You want to accept, but you are worrying about something that does not exist—my wife! You needn't," he continued shamelessly; "I invented her to protect me from possibly designing females."

"Why, you conceited man!" exclaimed Rose. "I won't go anywhere with you now anyway. Not ever again! I detest you!"

"Look straight at me and say that last again," insisted her escort. Rose tried hard, but her eyes fell before his.

"You can't do it; you haven't got the poker face!" reiterated Jerald Holmes triumphantly as he pulled her hands away from the enveloping collar and held them tightly.

Then Rose couldn't think of a single reason why the world would have been brighter if Jerald had really been married!

MATERIAL FOUND IN WHEAT

Specialists Define Terms Used in Federal Standards—Dockage Is Easily Removed.

There are two terms in the federal wheat standards which apply to foreign material, explain specialists of the bureau of markets, United States Department of Agriculture—"dockage" and "foreign material other than dockage." The term dockage is applied to the foreign material which can be removed readily from the wheat by the use of appropriate sieves, cleaning devices, or other practical means suited to separate the foreign material present. Foreign material other than dockage is the foreign material that is not separated in the screening and remains in the dockage-free sample and is a factor in the grading, definite percentages being permitted within each numerical grade. Dockage does not affect the grade.

WAR ON INSECTS

Preventive measures are best against insect enemies. Rotate the crops, avoid introducing insects and diseases, practice frequent cultivation, and employ fertilizers to stimulate plant growth. A vigorously growing garden may produce a crop in spite of injurious insects, but in fighting insects be thorough.

GIVE GUINEA CHICKS WELL-BALANCED FEED

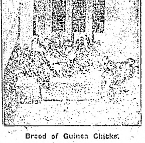
Nothing Is Required for First Thirty-Six Hours.

Fowls Are Natural Rangers and Will Pick Up Seeds, Grasses, Insects and Green Vegetation to Supply Much of Living.

(Prepared by the United States Department of Agriculture.)

Guineas are fed in much the same way as chickens, but they require less feed, as they are natural rangers and can be trusted to find enough seeds of weeds and grasses, buds, insects and green vegetation in the fields to supply much of their living. For the first 36 hours after hatching no feed is required, as the sustenance from the egg is sufficient to nourish them for this period. The first meal may consist of a little hard-boiled egg mixed with bread crumbs, or bread may be soaked in milk, squeezed nearly dry, and fed in small bits. [illegible] milk also is very good, [illegible] specialists in the United States Department of Agriculture say.

Three times a day is as often as they need to be fed, one feed consisting of clabbered milk or the bread and egg or bread and milk mixture, and the other two of chick feed. If the coop is placed in a field or pasture where green feed is available, the guinea chicks can secure this for themselves; otherwise, sprouted oats, dandelion leaves, lettuce, or onion tops cut fine should be furnished. Water, grit, and fine oyster shell should be before them always.



Brood of Guinea Chicks.

By the end of the first week the young guineas will be finding enough worms and insects to take the place of the egg or milk feed, so this may be eliminated and chick feed given morning and night. If clabbered milk is available, however, it can be continued with excellent success, since guineas are very fond of variety in their ration and it is conducive to quick growth. As the birds grow older whole wheat, oats, and cracked corn can be substituted gradually for the chick feed.

WAY TO PREVENT MILDEWING

Keep Leather in Well-Ventilated, Dry, Well-Lighted Place, Exposed to Sunlight.

Any leather article is almost certain to mildew if kept in a warm, damp, and dark place, such as a closet, cellar, or stable. This mildewing probably will not reduce seriously the serviceability of the article, unless it is allowed to remain on the leather too long. It may, however, change the color appreciably, thus injuring the appearance. The simplest way to prevent mildewing, say specialists of the United States Department of Agriculture, is to keep the leather in a well-ventilated, dry, well-lighted place, preferably one exposed to the sunlight. Mildew can not make much headway in the sunshine. When mildew develops, it should be washed off with soap and warm water, or simply wiped off with a moist cloth, drying the leather well afterwards. These simple measures are preferable to the application in the home of preparations designed to prevent the growth of mildew.

POISON BAIT FOR CUTWORMS

White Arsenic, Arsenate of Lead or Paris Green Mixed With Bran Is Effective.

Cutworms appear in early spring and cut off the stems of young plants at the surface of the ground. They are quickly destructive. The best remedy is poisoned bait. For a small garden mix two level tablespoons of white arsenic, arsenate of lead, or Paris green into five pounds of dry bran. Add from four to six quarts of water, in which half a pint of sorghum or cheap molasses has been mixed. After the mash has stood several hours scatter it thinly over the garden or a small quantity at the base of the plants. Put the poison on late in the day, so it will be moist during the night when the cutworms feed.

ERROR COST ARTIST'S LIFE

How A. M. Villard, French Draughtsman, Unintentionally Violated Drastic Law of China.

Of the design of a postal stamp that cost the life of the artist, the Trait l'Union says:

"A. M. Villard, a draughtsman of exceptional ability, was in 1849 employed in the Chinese customs office. He was requested to design new postal stamps to be issued on the sixtieth birthday of the emperor's mother.

"Proud of the distinction thus conferred upon him, Villard did his best to satisfy the Pekin government, but made two fatal mistakes. He used the abbreviation 'Imp. China. Post' instead of spelling out 'Imperial Chinese Post.' As a Chinese public official he was expected to know that the criminal code forbids any abbreviation in a public document under severe penalties.

"Still worse was Villard's other offense. One of his designs was in purple, the use of which color was the exclusive prerogative of the imperial house, and a capital offense for any other person.

"His artistic achievement and good intentions notwithstanding Villard was disgraced, and told that he deserved capital punishment for his unheard-of, even if unintentional, offense against the imperial house.

"In deference to France (Villard was a Frenchman) he was not put to death, but sent on official business to Tibet, a mission that was considered another form of execution. And indeed Villard was never heard of afterward."

Roy's "Ups and Downs"

By BARBARA KERR

(©, 1921, by McClure Newspaper Syndicate.)

"It must be wonderful," observed Jane Wright, "to be in a position to do the good this Roy Harris is doing—and to do it the way he is doing it."

"Just who is he and what is he doing?" inquired her mother, dropping the magazine she had been reading to her lap and peering over the top of her glasses at the daughter.

Jane held up the newspaper she had been perusing.

"He's writing a series of articles for this paper, telling just how the working men in various lines of industry are treated or mistreated, whatever the case may be. He ought to know, because he comes in actual contact with them as one of them. For instance, in this issue he tells of the life of a restaurant waiter. In order to obtain the information he got a job as a waiter without letting anyone know about it, of course, and worked at it for a week. He goes into every little detail, telling about the wages, tips, insults from both the boss and the patrons, what he was given to eat—and everything. He reveals all the good and all the bad, admitting that all the places may not be the same as the one where he was employed."

"One of the articles appears every Saturday, and last week he dealt with work in a laundry. The week before that he was a grocery clerk. The articles are intensely interesting and keep one wondering what the writer will deal with next. I am surprised to learn that very intelligent men are found in menial positions, being perhaps the victims of circumstances. For instance, here is a college graduate washing dishes in a restaurant. Surely you must have seen the articles, mother."

"I have no time for such things," the mother replied. "Seldom do I look at a newspaper. As for waiters, laundry workers, etc., I am not interested in them. No doubt they are treated as they ought to be, and it's none of my affair. I am surprised, Jane, that you should be concerned about such matters."

"But all these people are human," Jane persisted, "and some of them are thinkers. Mother, I'd like to put myself in the same position as this Mr. Harris. I think I'll get a job somewhere and learn something about the work."

"Rubbish!" her mother exclaimed scornfully, and prepared to resume her reading. "You should pay a little more attention to your own future. Here's half a dozen young fellows of your set falling over themselves to marry you—rich young men with social prestige. Better pick up one of them, get married and stop worrying about the workers."

With which she dismissed the subject and became absorbed in an article concerning "The Gay Mr. West and His Six Divorces."

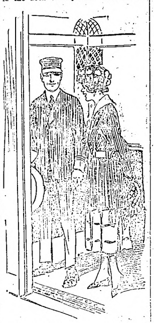
"Just the same," Jane murmured, picking up the newspaper again, "I think I'm going to try this thing out."

And Jane did try it out in spite of strenuous opposition on the part of her parents. It was no time to stop having her own way, she argued after she had been doing it so long.

One Thursday morning Jane stepped out of her twelve-cylinder automobile at a downtown parking place and walked two blocks to Gordon Bros.' wholesale millinery establishment. In her pocketbook was a newspaper clipping reading:

"Wanted—Several girls to learn millinery trade. Good wages and future offered."

She experienced a queer sensation as she stepped from the sidewalk to the entrance of the building. She felt much like a fish must feel when he flops out of water and lands on a dry plank. Jane was out of her element, the same as the fish is under the circumstances described. Her element was a drawing room or a golf course or the deck of a yacht. This sordid world of working people was her dry plank.



He Could Discuss Any Subject.

She found herself in a big vestibule. Directly opposite her a man in a blue uniform was shutting the door of an elevator while he called "Going up."

He waited while she found a place in the elevator along with a crowd of several women, some old, some young, some with pale faces, some with countenances well reddened, some dressed neatly, others dressed shabbily, and a scattering of men, some with their hats off, others with them on.

The elevator man shut the door and pulled back a lever and up they went. Here was as good a time as any to start her investigations. The elevator man looked young and bright and had a cheerful smile.

"How do you like this job?" she questioned affably. Ordinarily she would not have seen him at all, but now she was privileged, because she was a member of the working class.

"It's all right," he returned. "Third floor—trimming department. We elevator men have our ups and downs, of course."

He brought his vehicle to a stop and smiled at Jane while most of the girls left the lift. At the next floor she got off and found her way to the general manager's office. She had little trouble in getting a position because the rush season was on, and she was taken to the trimming department and set to work at once.

It was a hard week for Jane because she was not used to such confining activities, and, furthermore, was not exceptionally dexterous with a needle. She made a few acquaintances among the girls, and went to lunch with one of them, and in a social way enjoyed herself. She realized, however, that it was the novelty of the venture that held her to the task, and she knew she would not be there under other circumstances. Certainly the wages were no inducement.

The main feature of interest to Jane was her association with the elevator man. He was the most intelligent man she had ever met, Jane decided, except her father. He could discuss any subject from politics to pyramids, and had a cheerful philosophy of his own, of which she now and then caught a glimpse during their snatches of conversation while going up or coming down.

"He's the most fascinating man I ever knew," Jane told herself more than once. "If he wasn't just an elevator man I'd fall in love with him. He knows more than all the men in our set put together. He must be a college professor who has abandoned his position for a more lucrative job."

At the end of four days Jane would have brought her researches to an end if it had not been for this elevator man. He seemed to exercise a powerful influence over her, fight it as she would. Jane always had believed in love at first sight, and she was almost obliged to confess that she had lost her heart. Impossible as it was, she was in love with this young man in the blue suit who said he had his ups and downs.

On Thursday night Jane resigned, principally because she wished to get away from the influence of the elevator man.

"I'm through today," she told him as they dropped toward the first floor.

"So am I," he smiled.

The elevator stopped and he opened the door. She stepped out, but he stopped her.

"Some day," he said, "I'd like to call and see you. I want you to think it over first, though, and if you finally think it would be all right, call me on the phone at 782—Richard."

She stepped outside to write the number on a calling card, although she felt certain she never could make use of it.

Jane was reading the articles by Roy Harris with new interest, now that she had made a voyage into the working world, and on Saturday night she eagerly opened the paper. On the usual page was the article, and this time the heading was:

"The Ups and Downs of an Elevator Man."

She read only a few words, then went to her pocketbook and fished out a card. Making her way to the telephone, she asked for:

"782—Richard, please."

POISON TO KILL INSECT ENEMIES

Gardener Must Keep Up the Fight From Time of Sowing Until Harvest Time.

LIVE OVER WINTER IN SOIL

Principal Means Effective Against the Destructive Pests Are Applied as a Spray or as Bait in Form of Bran Mixtures.

(Prepared by the United States Department of Agriculture.)

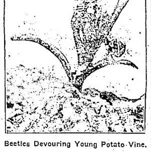
Destructive insect pests give the gardener or farmer a fight from the time he puts his seed into the ground until the crops are ready for market. Left alone, they would devour every useful plant in the garden. The successful gardener is the one who studies the habits of these pests, learns the means of combating them, and keeps constantly at it.

The gardener who starts with clean soil has done much to keep out insects and diseases. Many diseases and insects live over winter in the soil, and one of the best ways to avoid trouble is to plant each vegetable in a different part of the garden every year. Some of the worst garden troubles are brought in on roots of plants; consequently, in buying plants of any kind one should be sure they are healthy and free from insects.

Use Some Kind of Poison.

In spite of the best precautions, insects will attack healthy plants. The principal measures effective against them are various kinds of poison, generally applied as a spray or as a poison bait, in the form of bran mixtures. The kind of poison to be used depends upon the insects' method of feeding. Some bite and chew the leaves and other parts of the plants, and these are best destroyed by arsenical stomach poisons, such as Paris green, arsenate of lead, and arsenate of lime. Of these, arsenate of lead is the best and safest for general use, and also adheres better to the foliage. Paris green is likely to burn some plants, such as beans, seriously if not carefully applied, but on account of its long use can be obtained at every drug store and seed house.

Sucking insects, or those which puncture the skin of the leaf and feed upon its sap, are combated with contact poisons, sprayed or otherwise applied on the bugs, such as nicotine sulphate and kerosene emulsion. Where these are applied as a spray it is often desirable to mix them with bordeaux mixture to prevent various fungous troubles.



Beetles Devouring Young Potato Vine.

The most destructive garden plant enemy, and one which made its appearance within the last half of the Nineteenth century, is the common Colorado potato beetle, known to farmers as the potato bug. This potato beetle passes the winter in the ground and emerges early in the spring, so that he is on hand when the first potato leaves begin to push through the ground.

Easily Destroyed by Poison.

An arsenical may be applied dry, mixed with 10 to 20 parts cheap dry flour or hydrated lime and dusted on, preferably when the dew is on, by means of guns or bellows, so as to cover the plants and leave as little as possible. The application must be repeated as often as new larvae hatch. A spray is generally preferred. It is prepared by mixing the arsenical with water or bordeaux mixture at the rate of one pound of poison to 50 gallons of the liquid. A small quantity of quicklime in the mixture will prevent scorching the leaves.

Arsenate of lead is sold in either dry or paste form and should be mixed at the rate of one pound of paste or one-half pound dry powder to 15 or 25 gallons of water or bordeaux mixture. Two or three sprayings will ordinarily suffice for the spring brood, and the same number should be applied for the second and third generations. Both insecticides are deadly poisons and should be kept away from children. The spray will also prevent injury by the potato flea-beetles.

BANANA STALKS ARE USEFUL

Hung in Poultry House They Will Keep Lice and Vermin Away—Change Occasionally.

Banana stalks hung in the poultry houses will keep lice and vermin away. Almost any grocer will give you some of these stalks for the asking. Destroy old stalks and hang up new ones occasionally.

NEAT TRICKS IN GARDENING

One of Best Is Laying Board Over Row of Seeds to Start Them and Hold Moisture.

There are a great many little tricks that should be learned and practiced by the gardener. It is not necessary to be a wizard to practice these tricks but just a good, common sense gardener. One of the best of these is the use of a board laid over the row of seeds for a few days after planting to hold the moisture and make the seeds start during dry weather. Another is to flood the furrow with water and allow it to soak into the soil before dropping the seeds, then cover with dry earth. Slightly packing or firming the dry soil over the seeds will help to bring the moisture to the surface and make the seeds grow. Garden tricks are easy to perform—try a few and see the results in the form of fresh vegetables for the table—it means better living.

To Wearers of Artificial Eyes.

Wearers of artificial eyes usually remove their glass eyes upon retiring in order to rest the orbital tissues during the hours of repose. This practice, absolutely necessary with eyes of the simple shell type (until comparatively recently the only kind used), if a disagreeable suppuration is to be avoided, need not be followed by wearers of artificial eyes of the double shell type, the type most commonly used today—this on the authority of Doctor Coulomb whose paper on this subject was read by Professor de Lapersonne at a recent meeting of the academy of medicine. This feature of double shell eyes is attributable to the fact that, because of their special construction, they permit the tears to flow normally through their natural channels so that the secretions are carried away instead of accumulating in the hollow of the eye socket to cause maceration of the tissues.—From Le Petit Parisien.

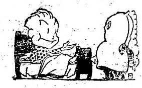
This ghost was a 1921 model



LAST MONTH, on a bet.
WITH THE boys up home.
I SPENT a night.
ALONE IN the old.
HAUNTED HOUSE.
AND WHEN I heard.
MOANS AND groans.
I SAID "The wind."
AND TRIED to sleep.
I HEARD rappings.
AND SAID "Rats."
AND ROLLED over.
THEN I heard steps.
AND IN the light.
OF A dying moon.
A WHITE spook rose.
I WASN'T scared—much.
BUT DIDN'T feel like.
STARTING ANYTHING.
BUT THEN I caught.
JUST A faint whiff.
OF A familiar.
AND DELICIOUS smell.
WHICH TIPPED me off.
SO I gave the ghost.
THE HORSE laugh.
AND SAID "Ed.
YOU FAT guys.
MAKE BUM ghosts.
BUT BEFORE you fade.
LEAVE WITH me one.
OF YOUR cigarettes.
THEY SATISFY."

THAT spicy, delicious aroma of fine tobaccos, both Turkish and Domestic, makes you almost hungry for the "satisfy-smoke." And there isn't a ghost of a chance you'll ever find its equal anywhere—for the Chesterfield blend is an *exclusive* blend. It can't be copied.

FARMERS STATE BANK

OF GOODRIDGE

Hank Meets John

Hank Hello, John, where are you going?

John I am going to make a deposit in the bank,

Hank , Do you find it more convenient depositing your money in the bank and checking it out?

John Very much so. I can issue a check to anyone I owe and it will not be necessary for me to have a receipt as the check will be returned to me with the proper endorsement, and I in turn can file my checks away and at the end of the year will have a complete statement of the amount of my expenditures.

Hank I agree with you, as it certainly is the best method of keeping account of moneys paid out and taken in.

The Farmers State Bank of Goodridge is a good place to do your banking.

J. M. BISHOP, Pres. NICK BUNDHUND, V. Pres.

HENRY ROCKNE, Cashier

GOODRIDGE CO-OPERATIVE CREAMERY COMPANY

Your home creamery wants more sweet cream. Why not bring in sweet cream and get the 5 cents premium? We will gladly explain to you how to keep it sweet, if we can, and it will be to your own interest, as well as a big boost to your creamery.

Bring Exhibits

At a meeting of the Community club held last spring it was decided to put up an agricultural exhibit at the county fair in Thief River Falls. To make this a success a large variety of exhibits is required.

We need: 2 qt. samples of grains; grain in sheaf; 10 ear samples of corn; samples of tame grasses, annual forage crops; potatoes—each sample to contain 20 potatoes; stock vegetables; garden vegetables; canned vegetables: best collection—must be shown in clear glass, glass top cans, pint cans as much as possible, 1 can each: fresh fruits; fruits in glass that cannot be shown fresh: special sweet collection, and a miscellaneous collection consisting of anything not included in above classification and grown or manufactured on farm.

The exhibitors can assist in this matter by bringing exhibits in to Goodridge and leaving same at any business establishment or informing members of the committee of what you have to display, and we shall make every effort to collect it. Do what you can and do it quickly.

Committee.

B. O. NORBY, Chairman.

THE NEW AUTO TAX

Automobile owners who are complaining that the newly established state license fees are excessive and unjust fail to always take into consideration that hereafter they will not hvae to pay personal property taxes on their cars. In many communities this tax equaled and in some instances exceeded the present exactions for state road purposes, but because this item was included in the total personal tax bill and not figured alone its amount never was fully realized.

Under the new system each owner knows exactly the amount of this tax and the stark naked figures look quite imposing when compared only with the previous ridiculously low license of $5 for three years. As a result complaints have come from many, but these may be expected to cease when the true situation becomes generally known.—Red Lake Falls Gazette.

WHY NOT SELL THE NAVY, TOO?

The navy is giving up its oil lands. It is preparing to buy its oil instead of taking it from the ground.

Until the last day of his term as secretary of the navy, Josephus Daniels resisted all efforts to take the naval oil reserve lands in California away from the navy department. The navy was rapidly increasing its use of oil as fuel and the editor-secretary was long headed enough to foresee the time when a supply of cheap oil would be absolutely vital—when it might mean the difference between an effective navy and a failure. And all the pressure from all the oil interests could not jar Josephus loose from this position.

June 8, by order of President Harding, Secretary of the Navy Denby turned the naval oil lands over to Secretary of the Interior Fall.

One month later Secretary Fall accepted the bid of the Pan-American Oil Co., a Doheny concern, for a large slice of these lands. The navy's retirement began.

This, no doubt, accords with the theory that there is too much government in business, and that there should be more business in government. More business in government is apt to mean most anything. In this case it is bound eventually to mean that the navy will be put at the mercy of the oil interests as completely as the owner of the humblest flivver. The price to the navy will go up and down, as it does to other customers, and it will always go up when the dhmand is heaviest, the navy's heaviest demand being in time of national danger.

If we are going to be logical in this business, let's pursue it through to its conclusion. Let's get out of the navy business. Let's turn the navy over to private business men and buy our protection from them.

GUMMER TRIAL POSTPONED

The trial of William Gummer, who is charged with the murder of Marie Wick of Grygla, Minn., at the Prescott hotel in Fargo on June 6, which was to have been called up the latter part of this month, has been postponed to the regular November term of Cass county district court.

Continuance of the Gummer murder trial until November was deemed advisable because of the difficulty of obtaining a jnry during the busy farming season.—Moorhead News.

Two Sets of Twins In Eighteen Months

Four healthy youngsters added to a family in a year and a half is considerable of an addition, it must be admitted. Yet this is the number of children born to Mr. and Mrs. Berner Levos, farmers residing near Mavie, in just eighteen months. Two sets of twins in this short interval is somewhat of a record, even for Pennington county, and at this rate the Leveses will soon have a real Rooseveltian brood of youngsters. Each set of twins consists of a boy and a girl, and they are all well developed and healthy children. The latest arrivals came Saturday, July 16.

Picnic a Success

A very successful picnic was held at the home of Bennie Johnson northeast of town last Sunday. The affair was given under the auspices of the Lutheran Ladies' Aid and Young Peoples' societies of Goodridge and the income is intended as a fund to be used for the construction of a basement in the Goodridge Lutheran church.

The weather was beautiful and a large number of people were present. Rev. I. T. Aastad, president of the Northern Minnesota district, was present and delivered the main address. John Nystul also delivered an address.

Took the Prizes

Stuart McLeod returned the first of the week from making a circuit of fairs with his Guernsey cattle. He exhibited at Ada, Crookston, Fargo and Grand Forks. Everywhere he won prizes, which aggregated about $1100. We hope to give a more detailed statement next week.

BUSINESS BASIS IN SELECTION OF FARM

Many Serious Errors Made by Young Men in Moving.

Know Only One Set of Conditions and Are Not Able to Weigh Accurately All New Factors That Must Be Considered.

(Prepared by the United States Department of Agriculture.)

Many farmers, especially the younger men, in moving from one region to another, make serious errors in selecting farms, not because their judgment is naturally poor, but largely because they know only one set of conditions and are not able to weigh accurately all the new factors that must be taken into account, say specialists of the United States Department of Agriculture. Here the science of farm management is helpful, in that from the farm-management viewpoint the farm is put on a business basis.

In doing this, however, the home side of the question must always be kept in mind. The farm home and the farm business are inseparable. A desirable farm, from a business standpoint, is nevertheless undesirable if it has no social or community advantages. On the other hand, desirable living conditions are of little or no advantage unless accompanied by a successful farm business.

A farm may have fine buildings, good water supply, excellent roads, and other such assets, yet if the soil is rocky, shallow, or naturally infertile, so that its productive possibilities are distinctly limited, there will be no adequate income for enjoying the other advantages. Moreover, these physical limitations are enduring, while the needed improvements, such as buildings and roads, can be added as means are provided.

BUGS CARRY WILT BACTERIA

Green Beetles Transmit Disease From One Plant to Another by Means of Jaws.

Striped green beetles which infest cucumbers have been found to carry wilt bacteria in their jaws not only from one plant to another, but they often keep these bacteria alive over a winter in their intestinal tract and infect the plants in the spring, according to plant pathologists of the United States Department of Agriculture.

Writes Novel in Three Weeks.

William Le Queux, the English author, is reported as having recently completed a whole novel in the space of three weeks.

Livestock Agency To Serve 6 States

Livestock shippers can begin marketing their stock through their own co-operative commission company on the South St. Paul market August 8.

According to information received by county farm bureau officers, the Minnesota Central Co-operative Commission company will open for business on that date, with contracts to sell livestock produced by 35,000 farmers in Minnesota alone. Besides Minnesota the new selling agency will serve co-operative shipping associations in Wisconsin, North and South Dakota, Montana and Idaho.

The farmers' sales agency has built up a selling organization which is believed to be as strong as any selling agency possibly can be. It will market the farmers' stock efficiently and more cheaply.

The Minnesota organization would be the second in the northwest. The Iowa Farm Bureau federation has organized a committee of 15 farmers and 15 bankers who are now establishing an agricultural finance company for that state.

Taxation, farm legislation, co-operative marketing and high freight rates were discussed by officers of 12 state farm bureau federations who met at headquarters of the Minnesota federation July 19 and 20. Unified action by farm and commercial interests, through a national conference to be called by the farm bureaus, was proposed.

The directors of the Minnesota federation decided on several important policies.

They voted to help finance the launching of the centralized marketing enterprises for livestock and dairy products, by loaning up to $4,000 to the Minnesota Central Co-operative Commission company and up to $3,000 to the Minnesota Co-operative Creameries association, Inc.

They voted to defend the interests of Minnesota farmers before the interstate commerce commission when it opens hearings in August on reduction of freight rates on farm products. Mr. Thos. E. Cashman of Owatonna was named to represent Minnesota.

They ordered further investigation of money saving that might be made by buying coal co operatively direct from the mine. This information will be laid before the farmers in each county, and each community will decide for itself whether to pool coal orders.

They also conferred with leaders of university extension work and all county agent leaders to work out plans for unified efforts to improve agricultural conditions.

TYPICAL OF LONG STRUGGLE

Word "Giant" and Its Derivatives Really Denote Contest Between Good and Evil Forces.

Like a fly in a piece of amber, a great epoch of human struggle with the unknown forces is inclosed in the word "giant," of which "gigantic" is a derivative. We first come across the word "giant" in the Greek form, "gigas" (genitive "gigantos"). The name was applied to monstrous creatures of an enormous size and brute force who for ages contested the supremacy of the gods and the lives and happiness of men.

They were eventually hurled into Tartarus, or the lowest regions, by the power of Uranus, the god of light. The same legend is to be found in the mythology of other nations. It undoubtedly expresses in concrete form the universal conception of the struggle between good and evil, between light and darkness.

It took "giant" forces to eliminate some of the evils that beset the life of the human race, and to modify others. The day when mankind has conquered the last of the enemies of his well-being and happiness will indeed be a day of "gigantic" triumph.—Chicago Journal.

About It and About.

Our will is an illusion caused by our ignorance of the causes which compel us to exert our will. That which wills within us is not ourselves, but myriads of cells of prodigious activity, of which we know nothing, which are unaware of us, which are ignorant of one another, but which nevertheless constitute us. By means of their restlessness they produce innumerable currents which we call our passions, our thoughts, our joys, our sufferings, our desires, our fears, and our will. We believe that we are our own masters, while a mere drop of alcohol stimulates, and then benumbs, the very elements by which we feel and will. —Anatole France, in "A Mummer's Tale."

How Scroop's Sign Aided Cupid

By FREDERICK HART

© 1921, by McClure Newspaper Syndicate.

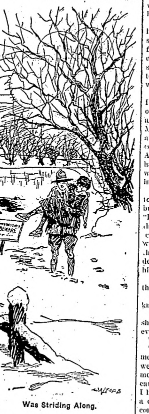
The sign, "Private Property—Trespassers Beware," did not have the usual effect on pretty Mildred Hamilton when she saw it conspicuously displayed in a pole stuck upright on the edge of the little pond in the woods. To begin with, Mildred was the undisputed mistress of many acres in that very neighborhood, and was used to roaming the country at her own free will. Then, too, she had heard that the next property had been purchased recently by a Mr. Scroop, and she had taken an immediate dislike to the name.

"He's probably an old curmudgeon who will put up high fences and buy a bulldog to keep people off," she had said when her father told her of the purchase. "I hate him already!" With which remark she had flung out of the house, pausing only long enough to get her skates.

Mildred set a high opinion of her skill on the steel runners, and when she was in a pet she would often steal away to the little pond on her neighbor's property for an hour in the winter, to return with peace at her heart from the hard exercise, and glowing with health from the chilly air.

So when she read the impudent notice board she was merely confirmed in her opinion of the unknown Mr. Scroop. She stuck out her tongue at the sign, and sitting down on a bowlder she slipped off her shoes and in a moment had fastened the gleaming skates in place. Then out upon the ice she glided.

Outer edge—inner edge—back pink turn—grapevine—she essayed them all, and all successfully. Her irritation at her new neighbor was rapidly dissipating when there was a sudden cracking, a sickening, sinking sensation, and then she was standing up to her shoulders in the icy water, with the churned-up flood and chunks of broken ice all around her.



Was Striding Along.

The suddenness of it all caused her to utter one frightened scream. She knew that she was in no danger of drowning, for the pond was nowhere over four feet deep—this she had ascertained long ago in the summer months—but she was three miles from her home, and while the distance was nothing to her youthful strength when dry, in soaked clothes it might prove a fatal venture. All these thoughts flashed through her mind as she set herself to clamber out on the ice. At last she managed to find a stretch of ice that would bear her weight, and for a moment lay exhausted. Then she struggled to her feet, to become conscious for the first time of a man standing on the edge of the pond watching her. As she stood upright he called to her:

"Skate over here—quick! The ice will hold."

She was too wet and cold to wonder at his appearance. Obediently she did as he said, though her wet clothes hampered her. When she got to the shore he stretched out his hand—she grasped it and in a moment was standing beside him. He was struggling with the laces of her skating shoes. They were obdurate. In a moment he had given up the job, and before Mildred had time to utter more than an astonished protest he had swung her up in his arms and was striding along the lake shore toward a clump of trees.

He entered the thicket, and Mildred saw a cabin, newly built, with a big stone chimney from which the smoke was curling. Her unknown bearer set her down, opened the door, and beckoned. She staggered in—how clumsy skates are on the land!—and found herself in a comfortable living-room with great wicker chairs and before her a fireplace in which great logs were glowing. Her host threw an armful of kindling on the blaze, and then turned to her.

"You must get out of your clothes and get warm immediately," he said in the voice of one accustomed to be obeyed. "There are a lot of sweaters and breeches and golf stockings and things in that locker over there, and I guess you can find enough dry things. When you are ready, call, and I'll see if there's a cup of coffee to be had."

And he was gone, the door slamming behind him.

Cold conquered amazement. Mildred meekly obeyed him, and in a moment her soaked clothing was steaming before the fire, while she herself, clad in knickers and golf jacket, a bit too large, but very comfortable, was seated before the blaze, feeling that life was really worth living. She called, and in a moment the door opened. Her unknown host entered.

"Ah! I see you managed to make out," he said with a smile—quite an attractive smile. "Now let me get you some coffee."

She was about to protest, but he had a small percolator bubbling over an alcohol flame in a few seconds, and set out cups, sugar and cream. Then and only then, while waiting for the coffee to finish "perking," did Mildred find her chance.

"You are a remarkable young man," she said calmly. "You pick me up without a by-your-leave and kidnap me here—though I'm very glad you did."

"You are a remarkable young lady," he replied equally calmly. "You did not scream and struggle, but realized, as few would have done, that I did the only thing possible under the circumstances. And I am very glad I did, too. And now perhaps you'll tell me who you are and why you are here."

"My name is Mildred Hamilton and I live next door, and I've always skated on that pond; and father told me that a horrid old—old flibbertigibbet named Mr. Scroop had bought the property and put up notice boards, and so I couldn't stand that, and came over. And I hate Mr. Scroop, because if he hadn't bought the property I probably wouldn't have come over and fallen in."

"I must confess that I am grateful to Mr. Scroop," said the young man, busying himself with the percolator. "But you mistake his motives. He put that board there because he knew the ice wasn't safe, and he thought it would do more to keep people off than the ordinary 'Danger' sign. And I don't think he is as black as you paint him."

"How could he help being mean, with that name?"

"He isn't to blame for his name. I know, because—I am Mr. Scroop!"

"Oh-h" Mildred grew red. Then she said in a small voice, "C-can you ever forgive me for being so horrid?"

The young man laughed.

"I've been waiting for the chance to meet you ever since I found that we were neighbors," he said. "And I'm more than grateful to my name because it brought it about sooner than I had hoped. And—I think there'll be a cold snap tonight. Will you let me come and call and be properly introduced, and then—come and skate with me tomorrow?"

Mildred dropped her eyes to hide her blushes.

"I—I should love it," she whispered.

BEST DIVISION OF PASTURES

A 20-Acre Tract Will Yield More Grass Where Herd Is Shifted to Small Fields.

Dividing pastures into smaller fields is time and money well spent. A 20-acre pasture divided will yield much more grass where the herd is shifted from one field to the other than if allowed to tramp on the entire field at will.

BEST CONDITIONS IN WOODS

Trampling of Soil by Different Animals Among Growing Trees It Not Favored.

You can't do two things at once. If the best growing conditions are wanted in a woods, grazing animals must be kept out. Hard trampling of soil does about the same amount of good in a woodlot as it does in a field of growing corn.

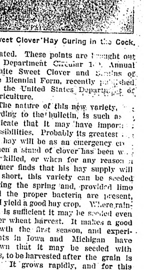
ANNUAL WHITE SWEET CLOVER YIELDS WELL

New Variety May Possess Important Possibilities.

When Farmer Finds His Hay Supply Will Be Short This Crop Can Be Planted—Grows Well During First Season.

(Prepared by the United States Department of Agriculture.)

It has been determined that sweet clover, which grows luxuriantly along roadsides and out-of-the-way places, and which is grown in some sections as a forage crop, has one strain which is annual. The annual sweet clover occasionally appears in patches of the more common biennial form, either as single specimens or in small groups. Seed of the annual has been separated, and in recent years it has been propagated. These points are brought out in Department Circular 1[illegible], Annual White Sweet Clover and Strains of the Biennial Form, recently published by the United States Department of Agriculture.



Sweet Clover Hay Curing in the Cock.

The nature of this new variety, according to the bulletin, is such as indicate that it may have important possibilities. Probably its greatest [illegible] for hay will be as an emergency crop. When a stand of clover has been winter-killed, or when for any reason a farmer finds that his hay supply will be short, this variety can be seeded during the spring and, provided lime and the proper bacteria are present, will yield a good hay crop. Where rainfall is sufficient it may be seeded even after wheat harvest. It makes a good growth the first season, and experiments in Iowa and Michigan have shown that it may be seeded with oats, to be harvested after the grain is cut. It grows rapidly, and for this reason will keep ahead of weeds.

The annual has a smaller and more woody root than the biennial form, and crown or resting buds are not formed. The stems, branches, leaves, flowers, pods and seeds are indistinguishable from those of the biennial form, but during the season of seeding the plant grows more rapidly, blossoms, fruits and dies. It blooms early and ripens seed in August when seeded early. Seed of the annual form is still very scarce and high priced and, since it cannot be distinguished from seed of the ordinary biennial, should be purchasd with caution.

CAMPAIGN FOR BETTER SIRES

Since Movement Was Started There Have Been Many Animals and Fowls Enrolled.

Recent figures on the enrollment of animals and poultry in the "better sires—better stock" campaign, which is being supervised by the United States department of agriculture, show that since the movement was started in October, 1919, there have been 174,104 animals and 264,045 chickens or other poultry enrolled. During this time 3,570 certificates of membership in the campaign have been issued by the department. In order to secure a certificate, a stock breeder or poultryman must fill out a blank, which is supplied by the bureau of animal industry, stating that he will use only purebred sires. A report recently issued by the department shows that [illegible] states and two possessions—Guam and Porto Rico—have stock breeders or poultrymen enrolled in the campaign. Virginia leads in the movement with 1,130 certificates issued, but Nebraska has the largest number of live stock enrolled.

MANURE PRODUCED ON FARM

Dairy Cows Lead All Other Animals Yielding 8.5 Tons Yearly—Goats Give Least.

Under farm conditions it is estimated that the following amounts of manure may be saved each year from mature animals: Horse, five tons; dairy cows, 8.5 tons; other cattle, four tons; sheep and goats, 0.4 ton, and hogs, 0.6 ton.

CONTROL GRAPEVINE LOOPER

Green Worm Is Sometimes Destructive to Garden and Arbor Grapes —Kill By Spraying.

The grapevine looper, a green worm about an inch and a half long, sometimes destructive to garden and arbor grapes and to Virginia creeper, has been found by United States Department of Agriculture observers doing some damage to vineyards in the Chautauqua belt along Lake Erie. The worm ordinarily feeds from early in June until the middle of July.

It may be killed by spraying. A solution of 1½ pounds of powdered arsenate of lead to 50 gallons of liquid has been found effective. The poison may be used in water or may be combined with bordeaux mixture used to control fungous disease. A spray application directed primarily against the grapevine rootworm and the grape-berry moth, immediately after the blossoms fall, incidentally controls the grapevine looper.

SMALL FRUITS IN ORCHARDS

Blackberries, Dewberries, Strawberries and Grapes Generally Give Good Returns.

Small fruits should have a place in every orchard. For the home fruit supply, blackberries, dewberries, strawberries, grapes and other small fruits generally give a good account of themselves, when planted on good soil and given the proper attention. A small area of land, set to small fruits, will often bring in more revenue than the rest of the farm, provided, of course, there is a market for the surplus fruits.

COMMUNITY CLUB IS ORGANIZED IN IOWA

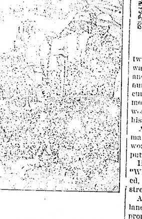
Boys and Girls Carry Out Interesting Program of Work.

Club Has Advantage of Encouraging Young People in Local Problems and Probably Will Be Means of Holding Them on Farms.

(Prepared by the United States Department of Agriculture.)

A team of club boys from Cass county, Iowa, won the pig club demonstration at the state fair last fall. Later the United States Department of Agriculture asked this team to [illegible] in its exhibit at the National Swine Show at Des Moines. Immediately thereafter the members of this demonstration team, with other [illegible] boys and girls of their home community, organized the "Progressive Club of Washington Township," with their own officers and program of work.

Regular monthly meetings of the club are held. Part of the time is given over to songs and yells and a social hour. The business program includes discussions of subjects related to the farm or home. Reports from members who are engaged in various club activities, telling their experiences and results, also form a part of the program.



Members of Pib Club Exhibiting Their Prize Animals.

The boys decided to enroll in a pig club this year and the girls to take up sewing club work. A committee has been appointed for each group to secure new members. It is planned to put on a demonstration by each section of the club at the state fair next autumn.

The local leader of the club is a rural teacher and the work is done under the direction of the county agent, who has already received requests from other communities nearby asking how they could form similar clubs. Such a club has the advantage of interesting the boys and girls of a community in local problems and will probably be the means of encouraging them to remain in farm work.

The Treasure Under the Oak

By KATE EDMONDS

(©, 1921, by McClure Newspaper Syndicate.)

Billy North wondered if all children had, at one time in their play days, buried a tin box containing the heart's most treasured possessions.

Billy had been about the world a good deal since those days in his own life and now he had returned to the old homestead. The brownstone dwelling where, as a little boy, he had spent his childhood was the place where his travels ended.

He hoped now to stay forever in that place called home. Billy had roamed so long and so excitedly that nothing in the world seemed any better than an anchor in the way of the old house with its many fond memories. He loved the large, old rooms, with great yawning fireplaces in each. He loved the bit of flagged garden in the rear and he intended turning it into a veritable fairy garden. The ideas he had picked up in various parts of the globe were etched in his brain and ready to reproduce themselves in that square of garden with its high stone walls and its single spreading oak tree.

It was while he was spading up around the roots of that same oak preparatory to carrying out a circular seat he had seen in a garden in London that Billy found his buried treasure.

That old tin box flung Billy straight back through the years until he was a lanky boy of twelve summers. The box was rusty and earthy and the contents musty, but Billy was as excited as if the old broken knife were a famous diamond and the mildewed note a queen's love missive. Also there were a broken doll and five marbles. The note however, brought a swift laugh to Billy's lips. Scratched on a bit of slate, as if with heart's blood, were the words "I love Daisy. I will always love Daisy."

Billy sat long and amusedly gazing at the treasure.

"Daisy! Daisy! Oh, Daisy Rogers a freckled-faced little imp who lived next door," laughed Billy.

He remembered now having noticed that the great house occupied twenty years ago by his first love was now an interior decorator's studio and was called the Dragon. From the number of cars parked against the curb Billy imagined the Dragon to be most successful, but he couldn't help wondering to what part of the globe his little dove had flown.

"Hello, Billy!" She Called.

And because Billy was a bit romantic and partly just to see if there would be an answer, he decided to put an advertisement in the papers.

He inserted it in all the dailies: "Whereabouts of Daisy Rogers, wanted, once living at 9 West Forty-ninth street."

After that Billy went on with his landscape gardening both in his own property and that of others. Billy was rather well known in that chosen profession.

Sundays he saved for his own garden, and on that day Billy, in old trousers and flannel shirt, enjoyed working out his schemes in that small back patch of property. The tin box was lying on his library table—he kept it there to amuse special friends with. Many a yarn of boyhood days had been unearthed from other heads by that buried treasure.

Billy was working a great lion's head in plaster against his stone wall when he felt a bang on the side of his head. He glanced about for the attacking party, suspecting a small boy, such as himself had been, but was unsuccessful.

Good-naturedly he again bent over the plaster. This time an apple hit him squarely on the top of the head.

His movement was too swift for the miscreant, for she was caught red-handed, or perhaps red-headed, for undoubtedly the head in the upper window next door was red—a fiery, tousled red.

Billy gazed upward and the pert little face in the window smiled down at him.

"Hello, Billy!" she called.

"Daisy! By all that's holy! Do you still live there? Come down, this minute! I have something to show you." He still gazed unbelievingly at that head with its mop of red hair. For Billy had called it a mop twenty years ago and shamelessly he still called it a mop, albeit a burnished, coppery wonderful mop.

"You used to be a red-headed, little freckle-faced imp!" shouted Billy.

"And you still are a long-legged, tow-haired—youth!" flung Daisy. "And don't disgrace the neighborhood—remember, I am a dignified interior decorator—so stop shouting your flattering remarks. I am coming down to see what you are doing."

"Spitfire—same as ever!" grunted Billy, and dashed through to the front door, hardly realizing that twenty years had gone since he and Daisy had played together in those old gardens.

Daisy rushed through the front gates and into Billy's studio in much the same state of mind as Billy. Her batik smock was of coppery silk that matched her wonderful hair.

When they drew near one another there was a breathless moment in which each hesitated before the hand clasp, a moment in which each devoured the other with hungry eyes that took in each detail of the other's growth.

"You still have a few freckles across the bridge of your nose." Billy found himself able to say, though his voice shook a trifle. Her eyes were wide and gray and intelligent.

"And you still have a growl in your voice," laughed Daisy, but that her childhood pal had developed into a splendid fair-haired, clear-eyed giant, was printing itself into the recess of her heart.

"Come here," Billy said swiftly and dragged her, in much the same way as twenty years ago he had dragged her, into the library to see his latest treasure. "I found this in the garden under the oak tree," he said and watched her closely.

"My doll—that you stole from me," she cried and touched the broken toys with fingers that shook. Next she saw the knife and then the slate. This she carried to the light that streamed in from the French windows leading into the back garden and Billy came and stood close beside her.

"I love Daisy," she read. "I will always love Daisy," she half turned to Billy then quickly away. "I—I— what silly things children think to do," she said and her voice trembled.

Billy was silent a long, long moment while he contemplated the fluff of that glorious coppery mop and the white curve of neck, for Daisy's back was toward him.

"You know, Daisy," he said slowly, "I am not so sure it's—silly. I have never been in love—perhaps——"

Daisy flashed about, her eyes glowing. "Billy North—don't you dare tell me you love me—the very first time we meet!" The light in her eyes was not anger. "I am not given to falling in love, either," she added.

"I have known you exactly twenty-two years, Miss Red-Head," laughed Billy, "since you were a freckle-faced imp of five summers. I have that slate as witness—pretty good test of faithfulness, isn't it?" He deliberately turned Daisy so that she had to look at him. "I will dare tell you I love you whenever I want to. In fact I will probably shout it over the back fence."

There was a trailing sweetness about Daisy's laughter.

"I think I will rush right home and —listen," she said.

FOUNTAIN PEN NOT MODERN

Abundant Proof That Contrivance Was Known as Far Back as the Year 1600.

In a review of Professor Weekley's Etymological Dictionary of Modern English surprise is expressed that the professor should be able to quote a reference to fountain pens in an advertisement published so far back as 1788. As a matter of fact, this form of writing implement must have been known nearly two centuries before this date, for E. S. Bate, in his "Touring in 1600," shows that travelers wrote with them at that time. By the middle of the Eighteenth century they had come to be called by their present name. A Dictionary of Arts and Sciences published in 1754 defines "fountain pen" as "a pen made of silver, brass, etc., contrived to contain a considerable quantity of ink and let it flow out by gentle degrees. . . . To use the pen, the cover must be taken off, and the pen a little shaken, to make the ink run more freely."

British patents were obtained for fountain pens in 1809. Apparently it was not until the seventies of last century that fountain pens came into anything approaching general use.

VALUE OF SILAGE

One ton of silage is equal to about 226 pounds of corn and 613 pounds of clover hay for dairy cows.

One ton of silage is equal to 144 pounds of corn and 930 pounds of clover hay for fattening lambs.

These figures are calculated from Wisconsin experiments.

HAD FIGHT FOR EXISTENCE

Lizard Embryo Successfully Resisted Efforts of Moss Plant to Prevent Its Natural Development.

During his sojourn in the south of Europe, a French naturalist had the rare opportunity of observing an intensely interesting struggle for existence between an egg and a moss plant.

The egg was that of a lizard which had been deposited on a cushion of moss. It was inclosed by a white protective covering of leatherlike toughness. The moss on which the tip of the egg rested, secreted at the point of contact a substance that gradually dissolved the leathery shell of the egg. When there was no longer any resistance, the stem of the moss plant penetrated the shell and sent its branches through the substance of the egg, emerging at the opposite end.

But the egg was equal to the emergency. It enveloped the stem of the moss inside the egg with a membranous coating that formed an insulating tube around the intruder. Then the moss sent out side branches through the egg, traversing it, but these also were made innocuous by an albuminous coating. In spite of this struggle against the intruding moss, the lizard embryo developed to all appearances normally and finally emerged from its prison unharmed.—Popular Science Magazine.

HENS IN GOOSEBERRY PATCH

Fowls Will Do Much Toward Clearing Out Fruit-Worm From Under Trash in Garden.

One gooseberry insect we have with us that isn't easy to control is the fruit worm. It doesn't often become a serious pest but occasionally it has been known to take a whole crop. The worm eats into the partly grown berry and feeds on the pulp. Handpicking is still the method used to hold this worm in check. Poultry ought to be turned into the gooseberry patch after the fruit is picked, as the hens will do a lot toward clearing the worms from under the trash. Poultry and fruit are a good combination when run right.

LIVE STOCK FLY REPELLENT

Care Should Be Exercised to Prevent Getting Mixture Too Strong, Causing Hair Shedding.

When mixing a repellent to put on the live stock to keep the flies away, care should be taken to prevent getting too strong a mixture. It may cause shedding of the hair. The following mixture has been found by the United States Department of Agriculture to give good results for a short time where applied lightly but thoroughly: One gallon of fish oil, two ounces of oil of pine tar, two ounces of oil of pennyroyal and one-half pint of kerosene. The horses and milk cows will appreciate some preparation.

"Ouija! What's the good word?"

MY YOUNG sister.
HAS A Ouija board.
AND SHE believes it.
AND TALKS to Noah.
AND I think she talks.
TO HER best fellow.
WHO'S DEAD but doesn't know it,
AND I used to give her.
THE LOUD, rude laugh,
BUT I'M sorry now.
BECAUSE LAST night.
I WAS home alone.
SO I got the board.
AND PUT in a call.
FOR JOHN Barleycorn,
AND OTHER departed spirits.
BUT THE line was busy.
FOR NOTHING happened.
THEN I cheated a little.
AND IT spelled this.
"GRAMMASHOTTA SEVEN."

SO I shut off quick.
TO HEAD off any.
FURTHER FAMILY scandal.
THEN I stopped to smoke.
A CIGARETTE.
AND AFTER a while.
I CRANKED up weejee.
AND ALL of a sudden.
IT STARTED off.
AND QUICK as a flash,
IT SAID something.
"THEY SATISFY."

"SATISFY"—that's the good word. Just light up a Chesterfield and see what experts can do with fine Turkish and Domestic tobaccos when they blend them in that can't-be-copied Chesterfield way. You'll say "they satisfy."

FARMERS STATE BANK

OF GOODRIDGE

Hank Meets John

Hank Hello, John, where are you going?

John I am going to make a deposit in the bank,

Hank Do you find it more convenient depositing your money in the bank and checking it out?

John Very much so, I can issue a check to anyone I owe and it will not be necessary for me to have a receipt as the check will be returned to me with the proper endorsement, and I in turn can file my checks away and at the end of the year will have a complete statement of the amount of my expenditures.

Hank I agree with you, as it certainly is the best method of keeping account of moneys paid out and taken in.

The Farmers State Bank of Goodridge is a good place to do your banking.

MINNESOTA HISTORICAL SOCIETY

THE GOODRIDGE BANNER

VOLUME XV, No. 31. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, AUGUST 5, 1921. $1.50 PER YEAR

SCHOOL BOARD ORGANIZE

The new board of education held their first meeting Tuesday evening and organized by electing the following officers:

C. N. Urdahl, chairman.
A. B. Mandt, clerk.
P. O. Tvedt, treasurer.

The balance of the trustees are: N. Bundlund, Carl Christianson and Peter Lovly.

In this connection it may be stated that Prof. Norby and Misses Sarah Vaughan, Teresa Giefer and Mildred Argall, and Miss Jorand Hegland of Fosston have signed contracts to teach during the coming school year.

Barberry Found in Lambert

Common barberry bushes were discovered on a Lambert township farm last week by Wm. P. Graham, state barberry scout, who is making a search of Red Lake county in quest of the rust producing bush. This was the second farm in the county on which the bushes were found. In both cases it is very evident that the plants had been set out a number of years ago for hedge purposes. They were immediately removed and destroyed.—Red Lake Falls Gazette.

Makes More History

The local light plant, which has been a source of constant trouble and expense to the village during the last year, added another chapter to its history as a nuisance Tuesday night. An egplosion took place in the big exhaust chamber recently constructed for the deadening of noises, blew it to pieces, wrecked the 12 inch thick concrete foundation under one corner of the building, broke the lead pipe off from the fuel tank and spilt several hundred gallons of kerosene. Several persons persons were in the building at the time, but escaped unhurt.—Oklee Herald.

Spend Three Per Cent

All over the country merchants are adopting the three per cent method of advertising, and it is proving so profitable and satisfactory to them that we believe our business men would do well to give it attention. Actual tests in hundreds of cases have proved that an advertising appropriation of three per cent of the previous year's gross sales has increased the business 33 1-3 per cent. This increase doesn't happen the first week after the advertising starts, but in the cumulative effect of a campaign carried on regularly each week for a whole year. If the three per cent were all spent in one grand blowout it would be wasted. But distributed over an entire year it is the surest business builder in the world. Big city stores spend 5 and 7 per cent, but in towns like this three per cent will do as much, and even more on the capital invested. There is one sure wap to prove this and you can't lose either. And that is to try it out.—Ely Miner.

SUFFICIENT FUNDS TO SUPPORT FARM BUREAU

Funds sufficient for the maintenance and operation of the Pennington county farm bureau for the coming year have been pledged by the farmers and business men of the county as a result of the board of county commissioners' refusing an appropriation of $2,000 to carry on the work in this county. The action of the county board in refusing the appropriation was taken following a referendum vote early last spring when the consensus of opinion seemed opposed to the farm bureau by the majority of voters. Since that time it has been necessary for bureau members to show their loyalty to the local bureau and they have come through in a generner.

The action of the farmers and business men in subscribing sufficient funds to carry on the work makes it necessary for the bureau to limit activities to members only. At the present time there are something over 500 members, and these members will be given the benefit of the bureau.—Tribune.

How Did He Do It?

If you had a man working for you at a salary of $5,000 a year at a job where he had charge of all the cash coming into your establishment, and if this employee was seen to be spending money at the rate of $100,000 a year, wouldn't you become suspicious and wonder if he was not helping himself out of your funds? When Cy Thompson was buying high-priced cattle and poultry, was purchasing large farms and erecting expensive buildings all on a salary of $5,000 a year, apparently no one in Austin, not even his employers, were the least bit curious. Imagine this going on for ten years!—R. L. F. Gazette.

The yellow chiffon dress lay billowing over the bed and the little black satin slippers stood invitingly handy, yet Avis in camisole and silk petticoat stood hesitating with puckered white forehead and drooping lips.

"I won't go," she was saying to herself bitterly, "I'd rather stay home than play gooseberry for Penelope and Rodney—for that is what it amounts to, these everlasting triangle outings! I'm tired of hearing Rodney tell Penelope how pretty she looks tonight and of her telling him how well he drives and what not!"

Oh, it had been a queer affair from the beginning—Rodney Wells coming to see them and nobody quite sure if he meant Avis or Penelope. And Avis, before she was positive that Penelope was the lucky one, had fallen desperately in love with this fascinating young man. At first she really took it for granted that he was attracted to her. For Avis' mirror told her that her dark beauty was more alluring than that of her little blond sister, but after a bit his attentions seemed equally divided and since a few weeks Avis felt that she was becoming the loser in the race.

With a toss of her head and a deep ugly hurt in her heart she marched down the hall to Penelope's room, and as she was about to enter the girl herself stepped out. Penelope with her blond hair uncurled, unbrushed wore a serge dress, all rumpled, and a very pale face.

"Oh, Avis, I was just coming to ask you a favor," trying to speak naturally, "I can't go tonight—no, really I'm too tired.

"But will you do me a favor?" slowly bringing to view a square white envelope "give this to Rodney," blushing and dropping her eyelids, "but not when anyone sees you! I can depend upon it, can't I, Avis?"

Sat Down on the Bed and Stared.

"Why, surely," assured Avis, easily, taking the letter. "Hope you will be rested in the morning. I'm going to spend the night at Meta's" and retraced her steps leaving a dejected looking Penelope leaning against the door.

"Of all things!" cried Avis to herself as she slipped into her dancing frock, "to make me act as a go-between and carry their love-letters! It's cruel and Penelope does it on purpose!"

Finished dressing she slipped her party bag over one slim arm and lifted her cape—there lay the white envelope pleading—and quickly she slipped it into the corsage of her dress and hurried downstairs.

At the bottom of the steps she stopped breathless and warm, for through the living room portiers she caught a glimpse of Rodney waiting. His lean, well-built body looked exceptionally good in evening clothes, and the light shining on his clear cut profile sent warm rushes of blood through Avis' young body. "It's my night," she argued to herself for one brief moment, "my opportunity and Rodney won't mind not getting Penelope's letter."

"Penelope isn't [illegible]," she informed him, "will I do?"

"That's too bad," he regretted, but a glint in his eyes told Avis that she would do very nicely.

The taxi ride with Rodney alone would have been a dream realized for Avis if it had not been for the sharp corner of Penelope's letter pressing into the tender flesh under her dress and reminding her [illegible] against her will that she had not fulfilled her promise.

Rodney's hand lay dangerously near her own and once he made a movement as though he might take the little willing fingers in his own but the taxi driver taking a corner on two wheels, spilled Avis away into the corner and Rodney did not renew the attempt.

Avis felt her spirits sagging, and try as she would she could not whip up any vivaciousness. A gloom seemed to have settled down on her that could not be shaken off. At the party she danced the first dance with Rodney and she felt that her feet were heavy, and twice she got out of step.

"Oh, that letter, it's spoiling my evening!" she caught herself thinking a hundred times.

Rodney was entertaining, even jolly, but Avis' repartee was lame, and realizing it she became quiet, almost sullenly taciturn. She did not catch the surprised glance that flitted over the young man's face now and then. Finally she slipped out in the hall and had a little battle with herself. Would she give him the letter after all? No, it was too late now. And gathering all her courage she shook off all conscience pricks and determined to be the gay, laughing companion she knew Rodney admired, but the young man was nowhere to be seen. After a bit she caught sight of him towering above a bevy of pretty girls, and that was as near as Avis got to him the rest of the evening.

It was noon the next day when Avis opened the front door of her home. In the living room her mother smiled a welcome.

"Late hours do not agree with you, dear," warned the mother. "You're quite pale."

"Where's Penelope?" demanded Avis, hurriedly.

"Out," smiled her mother comfortably. "Rodney called for her nearly an hour ago. They spoke quite excitedly in the living room and Penelope came in to me with his violets pinned on her dress and she sent a message to you, dear."

"To me!" repeated Avis blankly.

"Yes, [illegible] told me to tell you that you were the dearest thing and to thank you a hundred times. She said you evidently had surmised how things were and had used your judgment—whatever that means!"

Up in her room Avis, baffled, took out the rumpled envelope and throwing everything to the winds tore open the letter and read it.

"Dear Rodney," the letter ran, "If I have ever appeared to give you any encouragement, please forget it and feel yourself quite free. I have told my sister that I am too ill to go to the party tonight, but the truth is that I am tired of playing gooseberry for you and Avis. Penelope."

Avis sat down on the bed and stared. After a while she said slowly. "Well, I guess the better girl won."

MADE JOKE OF REGULATION

Shrewd Youth's Neat Scheme for Getting Message to His Girl Despite Rigid Office Rule.

New trials of the young man in love are constantly popping up.

"It certainly is the limit," said Joe Jose as he emerged from a telephone booth. "I can't see why these employers should be so finicky about letting a fellow talk to his girl a few minutes during office hours. I've just tried to get her four times and the operator at her office inquires as to whether it is personal or business. The last time I said business, and I managed to hear her say, 'Hello.' The operator must have been listening, for as soon as I spoke, click! and I had gotten no further than I had the first three times I tried."

"Huh, you're an amateur!" said his friend Felix. "I'll tell you the way I fixed that. My girl works for a downtown surety company. Upon getting the number I asked for her boss, telling him I had received a letter from some one in his department by the name of Miss Soandso, and would like to speak to her about it. He immediately connected us and our conversation was as follows:

"'Miss Soandso?'

"'Yes.'

"'In your letter you asked me to have that policy at your office at 5:30, but I find I must work a little longer, but I will surely have it there at six.'

"'Oh, all right. I'll expect it then.'

"So you see how it's done. I was the policy. Of course, you can be anything else you like."

"Well, I never thought of that. Hello Central."—New York Sun.

Through the Skylight in the Studio

By RUBY DOUGLAS

(© by McClure Newspaper Syndicate.)

Tom Foster opened the door of the little apartment he shared with his sister. He had left some important papers in the pocket of another suit and had been forced to return home from the office to get them.

He stepped back in amazement at what greeted his eyes. Then he closed the door behind him and looked about the little room that served jointly as his sister's bedroom and their living room. Almost every drawer had been pulled inside out and the contents were lying all about the room.

"Burglars," he said to himself "And I can't tell what is what in Hazel's belongings. I wouldn't know if anything were stolen. I'll take a look at my own things." Yes—his own chiffonier drawers had been rummaged also, but not to such an extent.

"Looks like the work of women thieves," he said.

He looked about for other signs of the burglars' work, but everything else seemed to be in good shape. There were bits of bric-a-brac, a good small rug or two and some silver in the sideboard, but evidently the thieves had not cared for that sort of loot.

There was a skylight in the room; it was a studio apartment in a building adjoining other edifices of the same character.

Tom got out the little stepladder that he and Hazel used as a chair when they had extra guests. He climbed up and out onto the roof to see if he could get trace of the thieves. He decided that they must have been in the rooms within a couple of hours, since Hazel always remained to have breakfast before going out to teach.

On the roof he came upon a startling picture. A very lovely young woman was drying a mass of gold-bronze hair in the sunlight. She held a book on her lap under the curtain of hair and she evidently had not heard him come up through the skylight.

"I'm sorry," Tom began.

"Oh," the girl cried, startled. "I did not hear you come up."

"And I did not dream there was any one here. I am looking for thieves," announced Tom.

"Thieves?" The girl threw back the clouds of hair and looked inquiringly at the intruder.

"Yes; I happened to return home and have found the drawers in our apartment all ransacked. Have you perhaps, seen any strangers on the roof?"

The girl shook her head. "No. I have been here for an hour drying my hair, but I have seen no one." She told him how sorry she was and he found himself telling her all about his sister and incidentally about himself. He had forgotten all about the burglars and was observing the wonderful lights in the girl's hair, and the same tones in her large, soft brown eyes.

"Could I, perhaps, give you a little assistance in divining a reason—finding a clue?" she asked, when they had returned to the subject of the sneak thieves.

"Would you—come down the ladder and see?" he asked.

"Of course," she said, proudly. "I am visiting my aunt in the apartment below and I am almost dying of ennui. Out West where I live there is something doing all the time, so that I jump at the chance to have even so little excitement as this." She laughed as she followed Tom down through the skylight.

"It does look like sneak-thieves looking for something in particular," the girl said when she had viewed the contents of the emptied drawers.

Just then they heard footsteps on the stairs outside.

"Sh—" said Tom, his fingers on his lips.

They stood motionless while the footsteps drew nearer.

Presently a key was inserted in the lock and Hazel stood before them, her arms full of packages, a bag in one hand.

"Tom," she cried.

"Hazel," her brother replied. "There have been burglars here!"

Hazel looked at the girl with her hair all about her. "Oh," she said.

"No—no," Tom began, seeing her mistake. "This is a young lady I found drying her hair on the roof when I went up to look for the thieves."

"Helen Rogers," the girl explained. "I stepped down with your brother to offer my assistance."

Then, to the amazement of both Tom and his companion, Hazel Foster threw herself on the couch and emitted peal after peal of merry laughter.

"Hazel, what's the matter?" asked Tom.

"Yes—what amuses you?" Helen added.

"Oh, it is too funny for words. I suddenly got an invitation from Mrs. George Sanders to go with them for a week to the shore to brush up little Grace's music and I dashed home to put some clothes together. I never realized that the room would look like a cyclone or that Tom would be at home before I could explain. I even searched in his drawers for some odds and ends of things I keep in there."

Hazel began to laugh again, and this time she was joined by the other two.

"And there are no burglars after all?" said Helen, disconsolately.

Hazel looked at her, astonished at her tone. "You regret it?" she asked.

Helen shook her head. "No—of course, not. But I was just telling your brother how deadly dull it is here visiting my aunt and this had given me hope of a little diversion at least."

"Why don't you—but oh, I'm going away on the afternoon train. I was going to ask you to come in to see us," Hazel told her.

"It is good of you. I'd love to come."

Tom quickly came to the subject. "Hazel won't be gone long, Miss Rogers, and perhaps, if you don't mind, you could happen up on the roof after dinner in the evening and I—well, I could be looking for further burglars," he laughed.

Hazel looked at her brother. It was unusual for him to have so resourceful a mind. He was not given much to doing anything but attending to his business. "And by the time I get home you will be better acquainted," she said.

"Would you?" Tom asked. "Would you be able to do [illegible]?"

Helen nodded. "Yes. Aunt goes about a lot to meetings, and I can easily get to the roof. And——"

"Oh, yes; and after I return I'll make the acquaintance of your aunt if you like and you may come properly to see us," Hazel told the girl. "And now I must hurry and pack. Sit down—do."

Tom had to get back to his office with the papers he had been forced to return for, and Helen said she would stay and help Hazel pack if she needed her. "I'd love to put back the things and tidy up while you're getting ready!" she exclaimed, girlishly. "It's almost like being back home with my chum Mary, I miss her so."

This little admission quite touched Hazel, and the two girls worked together for an hour.

When Hazel Foster returned from her vacation at the shore she found that something warmer than friendship had developed in the relations between her brother and Helen.

"And I'm so glad," she whispered to Helen after many things had been said. "I—I've been wanting to tell a certain man that I'd marry him, but I didn't know what on earth to do with Tom if I did."

"I'll take care of him if he asks me," Helen confided.

"He'll ask you, all right. He may be waiting to know what to do with me."

Modern Crusoes.

Crusoes of today are not so few as many people suppose. Notwithstanding that in these times almost every part of the seven seas is traversed by ships, lonely castaways are being rescued every year. Now an instance comes from the Pacific, and now from the South Atlantic. Yet there are castaways who are discovered too late. Recently a United States "wind jammer" rounding Cape Horn had occasion to send a boat ashore to look for water on one of the desolate islands off the Patagonian coast. They found more than water. In a roughly-made little wigwam built in a sheltered spot near the shore they discovered the remains of a seaman of unknown nationality. By the wreckage strewn about, it was conjectured he was the sole survivor of some vessel that had gone down in that neighborhood.

Monk First to Wear Spectacles.

A Florentine scholar invented eyeglasses. It was in 1285 that the idea first struck him for aiding his failing eyesight, with two lenses attached in front of his eyes by two wires hooking on behind his ears. His name was Alexander de Spina. He was a learned monk who lived in Florence. While at work on a beautifully illuminated missal, in 1285, his eyesight grew dim, and intent upon finishing his task, he constructed the first pair of spectacles. The rest was easy.

NECESSITY GOOD FOUNDATION

Farmers Interested in Co-operative Organization When Facilities Are Lacking.

Necessity is a good foundation for a co-operative organization. If the farmers in your community feel a need for an organization they will be interested in it, unite with it, support it. This need may show itself in a lack of marketing facilities or unsatisfactory marketing conditions.

AIM TO ANALYZE MARKET REPORTS

"Bulk of Sales" Quotations Are Likely to Prove Confusing to Many Farmers.

FIGURES WILL VARY WIDELY

On Day When Low-Grade Hogs Are Neglected Higher Grade Animals Are Finding Ready Sale at Attractive Prices.

(Prepared by the United States Department of Agriculture.)

"Bulk of sales" quotations appearing in live stock market reports are likely to prove confusing to the farmer who attempts to keep himself informed on selling conditions, yet a present-day market report would not be complete without such quotations. If the farmer confines his attention only to "bulk" and "top" sales, and ignores the factors of quality and weight in the market receipts, he is almost sure to form a wrong opinion of the actual market conditions, say market specialists of the United States Department of Agriculture.

May Vary From Day to Day.

Bulk of sales figures should always be studied in conjunction with the quotations on grades which are based on weight and quality. The bulk of sales figures may vary widely from day to day without indicating that the market is unstable. This situation frequently arises from a limited trade in low-grade hogs on the same day that high-grade animals are finding ready sale. The bulk of sales quotation for such a day will reach a relatively high figure. On the following day a larger number of low-grade animals may be included in the sales and the higher grades neglected, with the result that the bulk of sales quotations will be far below that of the preceding report. On sessions when the average quality of the animals offered is low the bulk of sales report will reflect this condition, and the farmer who has animals ready for shipment may be misled as to the actual state of affairs, unless he takes into account the other factors which have an important bearing. Because the bulk of sales report from one market is much lower than that from another city he may decide to ship his product to the market which appears to offer the highest prices. As a matter of fact, for the grade that he has to offer, the market quoting the lower bulk figures may offer the higher price to him. It is undoubtedly true that country buyers often take advantage of low bulk of sales reports to depress purchasing prices in their localities.

The Wise Farmer Learns to Analyze His Daily Market Report.

This can be done if the farmer is in the dark as to the quality of the stock comprising the bulk transactions.

Shows Quality and Grades.

To be of practical use to the farmer, the bulk of sales quotations must be considered with the knowledge of what is being offered for hogs of various grades and qualities. Studied in this way the bulk of sales reports are of material value, for they show the quality and grades that make up the principal supply at any market for any period. Bulk quotations also give a more lucid idea of general trade conditions on those sessions of the market when the values from the opening to the closing vary widely.

The clarification and standardization of market reports and classifications throughout the whole country is one of the big tasks on which the bureau of markets, United States Department of Agriculture, is working. When this has been accomplished and the live-stock trade begins to grade its receipts with reasonable uniformity the need for bulk of sales quotations will not be nearly so great as at present.

Lizzie and the Lip Stick

By A. MARIA CRAWFORD

(©, 1921, by McClure Newspaper Syndicate.)

Ross had always made love to girls. It was as natural to him as breathing. No matter where he was, in street cars, in restaurants, on dancing floors or in church. Ross made love to any pretty girl who happened to be close enough to hear the sound of his winning voice. But he was a clever fellow and he never put anything into writing, and never asked any of them to marry him.

Late in the winter he invited all of his old flames and many of his little flickers, along with an equal number of good fellows, to make up a gay house party at his lodge in the mountains.

"Every face here a pretty face!" he sighed thankfully the first evening at dinner, when, just at that moment, the hangings at the door parted and May Tillman came in, holding another girl, a stranger, by the hand.

"Hello, everybody!" cried May gayly. "I'm late as usual. Missed the express and had to come on the local; then waited at the station half an hour to get a car to bring me up the mountain. Ross, this is my little cousin, Lizzie Wilson. She came to visit us very unexpectedly, so I brought her along. Knew you could put her up, and I simply would die if I had to miss one of your great and glorious parties."

Everybody watched Ross to see the effect of his uninvited guest. She wore a blue satin dress that bulged at the neck. Her brown hair was soft and clung damply to her high forehead. Her mouth was big and wide, a sure sign of brains but a wholly unnecessary attribute in a female of the species, and in fact a real obstacle in the way of a girl's social success with men like Ross Reeder. Ross was tremendously polite to her and all the girls were painfully nice to her. Lizzie was harmless. They had nothing to fear from her.

Each man did his duty by his host and wished her off on another with the precision of an alarm clock set for a fatal hour. Before any man started out with her, walking, riding or motoring, he took care to acquaint himself with the time, place and manner of her bestowal on the next unfortunate.

It was the morning of the third day that the blow fell. "Great Scott!" yelled Ross, coming into the big living room and waving a sheet of yellow paper. "Every servant on the place has beat it for town. Belong to a union or something and got their orders to walk out." He looked around at the woeful faces, then he laughed. "Well, we should worry, with twelve girls here to shake the rolling pin and skillet."

"I've got a perfectly awful headache," gasped Mary Potter.

Ross looked at her suspiciously. "I can get servants from town by tomorrow night. In the meantime we'll take it in shifts, four at a time, with all of us boys willing to peel potatoes and things. Volunteers, please step forward!"

"Come on, girls, it would be embarrassing to have to conscript you. Who is going to help Miss Wilson?"

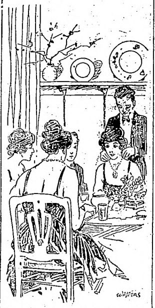
Two other girls reluctantly moved forward.

"We'll have luncheon in one hour," declared Ross. "After that five-mile tramp I could eat a raw beefsteak. Gee, I'm hungry!"

He went back into the kitchen in a few minutes and there he found Lizzie. She wore an all-enveloping blue apron, her sleeves were rolled up to her elbows and she seemed to know what she was doing. The other two girls were setting the table, slowly, carefully, touching things gingerly.

"Isn't it awful for this to happen, Ross; right in the midst of our fun?" sniffed one of them.

Lizzie Wilson said nothing. She moved back and forth, capably, from table to stove. Under her skillful fingers cold cuts were attractively arranged on platters which were quickly and prettily garnished. A salad was marvelously evolved out of the contents of several tin cans and fruit was scrubbed and piled in a big silver bowl. Ross looked at her wonderingly as he helped her carry the cheese and other things she had found in the icebox and storeroom.



Common Interest Stretching Their Eyes.

"You had better find out whether or not the other girls can cook," she told Ross when luncheon had been duly praised and devoured.

A light snow was falling and the crowd, standing in groups at the windows, was planning to get out into it. Ross crossed the room to speak to them, then came back, shaking his head negatively at Lizzie.

"Oh, well, I'll manage," she told him quietly. "There is a mountain woman here who can wash the dishes. I'll cook and in some measure repay you for my intrusion. May made me come. Perhaps it is just as well now that I did." When Ross insisted on remaining indoors to help, Lizzie, smilingly, waved him away. "No, indeed," she said, "you couldn't do a thing. You would just be in my way."

Now Ross had never been dismissed in such peremptory style, and again he looked at Lizzie wonderingly. Most girls would have seized the opportunity to have a long talk with him. Twice during the afternoon he left the crowd coasting on a slick track and sneaked back into the kitchen to see what he could do, and each time Lizzie pleasantly but firmly urged him to go.

A heavy snow set in by nightfall, and it was impossible to get servants there as soon as Ross had expected, and for three whole days Lizzie baked and basted, brewed and boiled. The gallants who had so ungallantly wished her off on their suffering friends a few days before begged for the privilege of holding her wraps, fastening her skates or even peeling the much-despised potatoes for a nice French fry, but Lizzie smiled a Mona Lisa smile and went serenely on her way.

For the last night they had planned a big dance, a full-dress affair. Just before dinner one of the girls who really appreciated Lizzie's hard work decided to show her gratitude. "Let me do your hair tonight and loan you that little white georgette dress of mine!" she urged. "You'd look so well in it."

"That's right nice of you," said Lizzie, "I'll be delighted."

It is surprising what properly coiffed hair, a bit of artistically applied rouge and a lip stick can do, not to mention the simple elegance of a gown with perfect lines. By no means did Lizzie emerge from grateful hands a real beauty, but Lizzie was wonderfully improved. There was something different in her manner, too. No longer was she the shy, little town girl whom May had dragged into the dining room a week before. She walked with head up and an air of conscious power.

When dinner was over, Ross rose and lifted a little glass of elderberry wine. "I wish to propose a toast," he said. "To the most capable girl I ever knew, Miss Lizzie Wilson! May she live long and never be far away from me!" Then he left his place and going around behind the girl slipped something around her throat.

[illegible] leaned forward impulsively, with common interest stretching their eyes. One of the Reeder heirlooms, a cameo set round with diamonds, was glistening on Lizzie Wilson's breast.

An hour later Ross broke in on Don Rodgers, who was rushing Lizzie outrageously, and whirled her out into the hall. He picked up a fur coat from the console table and wrapped it closely around the girl. Then he pulled on his own coat, and opening a door cautiously whisked her through it out into the cold, crisp air of a February night.

Lizzie's hand went to her breast. "You're awfully kind to offer this, this wonderful pendant to me. It was your mother's, I know, and—and there's only one person in the world who really ought to have it."

"That person has it, the girl I love, the girl I want for my wife," said Ross very tenderly. His voice shook. Even his big square hands were trembling on her arms. "I love you," he whispered gravely. "Oh, Lizzie, I love you so. I don't know how to tell you." This from the eloquent Ross Reeder, who had made love fluently, beautifully and poetically to girls ever since he wore Fauntleroy suits and soft bow-ties. "Can you learn to love me, just a little?"

Lizzie Wilson's head was swaying giddily toward his shoulder. He caught her in a close embrace. "You're the only girl I ever asked to marry me," he declared honestly, scorning to lie about his many loves at that great moment of his life.

He announced their engagement that night, announced it proudly with a ring in his voice and a happiness in his eyes that none of his old flames had ever been able to light there. "Of course I don't deserve a girl like Lizzie. No man does," he said humbly. "But she's mine," he exulted. He was positively shameless about his joy, for he kissed her before all of them.

Might Have Been Harder.

"I wuz in de movies once," said the tattered visitor.

"Not an actor?"

"You could hardly call me dat, mum. But in de big scene I wuz thrown out of a barroom by de star."

"You should have been well paid for that."

"Well, I got my $5 a day, an' de drinks I took wuz real ones."

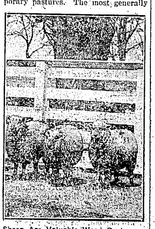
TEMPORARY PASTURES ARE BEST FOR SHEEP

From 10 to 14 Days Is Long Enough on Same Ground.

Basis of 1 Acre to 25 Animals Is More Satisfactory Than Seeding Larger Areas—Smaller Lots Are Convenient.

(Prepared by the United States Department of Agriculture.)

For health and for economical use of the pasturage it is undesirable to keep sheep on the same ground more than from ten to fourteen days, say specialists of the United States Department of Agriculture, in discussing the question of raising sheep on temporary pastures. The most generally useful size of lot is one acre to 25 sheep. This area, on an average, furnished in experiments 14 days' feed.



Sheep Are Valuable Weed Destroyers and Will Keep Fence Rows, Roadways and Waste Places Clean.

Arranging the size of lots on the basis of one acre to 25 sheep is more satisfactory than seeding larger areas and using hurdles to permit advance to fresh feed each day. Less labor is necessary, and by going to entirely new ground after ten or twelve days the danger of picking up parasite larvae on ground grazed over earlier is prevented. With a one-acre lot for 25 ewes, or correspondingly larger ones for larger flocks, it is an added advantage if their length is two or three times the breadth.

With a heavy crop of forage that would last longer than was considered safe to hold the flock on the same ground, a short piece of cross fence can readily be put down to divide the pasture into two parts. The smaller lots are also convenient with purebred flocks to provide for the separate pasturing of smaller lots of ram and ewe lambs.

Movable fencing is not likely to be satisfactory for the outside-lot fences unless the whole area to be used lies in a long strip with side fences, when only two end pieces need to be in place at one time for the ground being grazed.

STANDARDS FOR CONTAINERS

Hamper, Round-Stave Basket and Market or Splint Basket Lack in Uniformity.

Three important shipping containers in need of standardization at the present time are the hamper, the round-stave basket, and the market or splint basket, say specialists of the bureau of markets, United States Department of Agriculture. Investigations in all parts of the United States where these packages are used have shown a serious lack of uniformity in capacity, shape and strength which could be corrected by the adoption of standards which have been prepared by the bureau of markets.

These standards have been written into a bill, H. R. 4900 now before congress. Its adoption should go a long way toward eliminating the 15 styles and sizes of round-stave baskets, 25 styles and sizes of splint baskets as well as the 50 styles and sizes of hampers. The bill provides for five sizes of splint baskets, 4, 8, 12, 16 and 24 quarts; five sizes of round-stave baskets ½-bushel, ⅝-bushel, 1-bushel, 1½-bushel and 2-bushel, and six sizes of hampers, 8, 16, 20, 32 and two styles for 48 quarts.

KILL GREEN CABBAGE WORMS

Arsenate of Lead Spray Will Prove Satisfactory to Destroy Various Insects.

The green cabbage worm can be killed with an arsenate of lead spray in which laundry soap has been mixed, to make it adhere to the leaves. This treatment will also kill the cabbage looper and other cabbage worms. Nicotine sulphate or kerosene emulsion and soap should be used against the harlequin cabbage bug and plant lice or "aphis."

PICK AND PREPARE BERRIES

Care Must Be Exercised by Grower in Shipping Blackberries by Parcel Post.

If a grower wishes to ship blackberries by parcel post, he should exercise care in picking and packing the berries. Carelessness in picking and handling blackberries sometimes causes more injury to the fruit than does the treatment given while in transit, say specialists of the United States Department of Agriculture. Success in shipping blackberries is dependent largely on favorable weather conditions and the way in which the fruit is handled in transit.

The shipping weight of a 16-quart crate of blackberries is from 27 to 30 pounds, and the charge for postage to points within the first and second postal zones is from 31 to 34 cents. The cost for crate and postage on a 16-quart crate of blackberries will vary, therefore, from 58 to 64 cents. It may be possible at times to ship more than one kind of berries in a crate, such as a combination shipment.

Don't stick with the prunes

MY DAD'S favorite yarn.
WAS THE one about.
THE OLD storekeeper.
WHO WAS playing checkers.
IN THE back of the store.
AMONG THE coal oil.
AND THE prunes.
WHEN THE sheriff
WHO HAD just jumped his king.
SAID "SI there's a customer.
WAITIN' OUT front."
AND SI said "Sh-h-h!
IF YOU'LL keep quiet.
MEBBE HE'LL go away."
NOW HERE'S the big idea.
WHEN A good thing.
HAPPENS ALONG.
DON'T LEAVE it to George.
TO GRAB the gravy.
F'RINSTANCE IF.
YOU HEAR of a smoke.
OR READ about a smoke.
THAT REALLY does more.
THAN PLEASE the taste.
THERE ARE no hooks on you
THERE'S NO law against.
YOUR STEPPING up.
WITH THE other live ones.
AND SAYING right out.
IN A loud, clear voice.
"GIMME A pack of.
THOSE CIGARETTES.
THAT SATISFY."

YOU'LL say you never tasted such flavor, such mild but full-bodied tobacco goodness. You're right, too, because they don't make other cigarettes like Chesterfields. The Chesterfield blend *can't be copied.*

FARMERS STATE BANK

OF GOODRIDGE

Hank Meets John

Hank : Hello, John, where are you going?

John : I am going to make a deposit in the bank.

Hank : Do you find it more convenient depositing your money in the bank and checking it out?

John Very much so. I can issue a check to anyone I owe and it will not be necessary for me to have a receipt, as the check will be returned to me with the proper endorsement, and I in turn can file my checks away, and at the end of the year will have a complete statement of the amount of my expenditures.

Hank I agree with you, as it certainly is the best method of keeping account of moneys paid out and taken in.

The Farmers State Bank of Goodridge is a good place to do your banking.

SOCIETY

THE GOODRIDGE BANNER

VOLUME XV, No. 32. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, AUGUST 12, 1921. $1.50 PER YEAR.

Road Work Rushed In First 90 Days

Charles M. Babcock, state highway commissioner, this week made public a mid-season review of activities in the Minnesota highway department covering the 90-day period since Good Roads Ament No. 1 went into effect. The summary, indicating that operations are well advanced on a large scale toward spreading early benefits over the entire trunk route system, is as follows:

Abont 6,200 of the 7,000 miles of trunk routes temporarily designated and taken over by the state for maintenance,

Army of 1,126 patrolmen covering the system smooth temporary routes until permanent improvements can be extended.

Another big maintenance force, equipped with 150 trucks and 50 tractors—surplus war equipment rebuilt for road work—shaping up highways for patrolmen where necessary.

Office and field forces increased from small number to nearly 3,000 employees, exclusive of hundreds on contract work, but administration expense held to less than 7 per cent.

Approximately $8,000,000 of new construction, for 1921 completion in about 75 scattered sections, placed under contract at prices from 15 to 50 per cent below 1920 levels charged counties.

Fight continued for new federal aid apportionment to enable Minnesota to carry out its full 1921 program for 677 miles of grading, 438 miles of gravel surfacing and 80 miles of new paving.

Undertakings advanced as outlined, Commissioner Babcock left for Washington to continue the fight for farm-to-market road legislation in order to add $2,225,000 of grading and gravel surfacing and $500,000 of paving to 1921 construction list under the state development program.

Poultry Culling Schools

Poultry Culling schools will be held in Pennington county on August 18. As many persons as are interested will take part in this work. The aim is to have three persons or more from each township to qualify as a township culling team. These should be persons interested in poultry and who will have the disposition and time to show those who want to know how it is done.

Different places in the county will be visited on the 18th. A morning session will be held at 9:30 to 12 a. m. and an afternoon session from 2 to 4 p. m. Any one interested in this should notify the Farm bureau and be on hand at 9 o'clock Thursday, August 18.

PIANO RECITAL

The Woman's club of Thief River Falls takes great pleasure in presenting to the public Miss Doris Halvorson in a piano recital at the Lyceum theatre on Tuesday evening, Aug. 16, 1921. Miss Halvorson will be assisted by Mrs. Irma Mallory Fisher and Mrs. O. F. Mellby.

This will be the first opportunity to hear Miss Halvorson after having finished a four year course at the Oberlin conservatory, where Miss Halvorson received the degree of Bachelor of Music. We are proud of the fact that a girl from our midst has become an artist of high rank and we bespeak a large attendance. Doris, as we all know her, is a master in technique, execution and style, and renders the most difficult compositions with an ease and grace that is astonishing.

Miss Halvorson will be assisted by Mrs. Irving Mallory Fisher, who will sing two group of songs. Mrs. Fisher has a rich contralto voice of exceptional ability, and has received many flattering comments from musicians of reputation. Mrs. O. F. Mellby will play the second piano part in the Grieg Concerto. Mrs. Mellby is well known as a musician of talent and the entire program promises to be as fine as any ever given in Thief River Falls.

Visiting Day

On Saturday, August 13, there will be a "Visiting Day" at the Golden Valley Peat Experimental Fields, 16 miles east of Holt. The crops are excellent this year— much like those in 1918. In addition we have had fine winter rye.

The program will be held at 2 o'clock. The plots may be inspected either before or after the program The day is for farmers or others interested in farming peat lands.

MAN'S LOVE FOR HIS HORSE

As Some Writer Well Expressed It, It Is One of Humanity's Few Redeeming Qualities.

There is a bond between man and horse which is apparent to all those who go through the world with open eyes.

For all such there is a sympathetic interest in the case of John Ranavaro, the Morrisania truckman, who declared that he would go to the workhouse rather than take the life of his faithful horse Jerry, which after fourteen years of drudgery had become blind and unfit for work.

The devotion between the mounted policeman and his horse is apparent to all who walk our streets. The same feeling is manifested toward most of the horses which play their part in the trucking activities of the metropolis and those between the shafts of that relic of other days, the hansom cab. But there is even a stronger tie in the case of the man who is farther away from civilization and more dependent upon his horse for that companionship which is demanded by about everything that lives and breathes, and the need of which makes the convict in solitary confinement glad to cultivate the friendship of a rat.

It would require courage to say anything disparaging about the mount of a trooper of the Royal Canadian mounted police. Between the men of this organization and their horses there is almost a human bond growing out of days and nights of intimate association in the tasks of a service which is famous for its dogged persistency and fearless quality. These men may ride one, two, three, four or five hundred miles after a desperate criminal, and at the end of the journey, with the culprit in safe-keeping, it is the horse that is fed and made comfortable before the man thinks of his own needs.—New York Herald.

A Branch of Coutts.

For more than 200 years the famous banking business of Coutts & Co. has flourished in the Strand, London. First it stood at the top of Craven street, then known as Spur alley; and then it moved to the old red-brick premises which formed the northern boundary of the Adelphi. Seventeen years ago it went to the present palatial premises on the north side of the Strand. In either of the three premises Coutts was self-contained. Coutts was Coutts, and if you wanted to do business with Coutts you went to Coutts, just as Mohammed went to the mountain. But even Coutts has found that it must go with the times; and at long last it has decided to do as other banks have done, and open a branch. It will stand in Piccadilly, close on the edge of Mayfair which the shrewd Scotsman's daughters, "The Three Graces," delighted to adorn.

Creatures With Long "Snouts."

The sprout-fly, which makes parts of Nubia uninhabitable for three months of the year, has a particularly long snout. The "feelers" of the Scottish timber beetle stretch out four times the length of its body, for no purpose whatever that has been discovered. The most plausible explanation yet offered for these monstrous noses, long "feelers," and other anatomical peculiarities, is that they constitute the apparatus by which these insects communicate with one another, much as human beings do by wireless telegraphy. The long "feelers" of the timberman beetle may well be the wireless mast through which it picks up atmospheric vibrations set in motion by similar "feelers" on other beetles.

Influence of Home Brew.

"Crimson Gulch seems to have become strangely sedate," remarked the visitor.

"Yep," replied Cactus Joe; "all the boys have taken a notion for getting married and settling down. Instead of squandering their money they're savin' it up to buy yeast cakes and raisins and such."

The Needed Thing.

A scientist claims to be able to grow square trees. More important if he could do the same with men.

Chocolate Emperor's Food.

Montezuma, emperor of the ancient Mexicans, lived in a state of luxurious magnificence and took no other beverage than chocolat, a potation of chocolate, flavored with vanilla and other spices, and so prepared as to be reduced to a froth of the consistency of honey, which gradually dissolved in the mouth and was taken cold.

This beverage, if so it could be called, was served in golden goblets, with spoons of the same metal or tortoise shell finely wrought. The emperor was exceedingly fond of it, to judge from the quantity—no less than fifty jars or pitchers being prepared for his own daily consumption. Two thousand more were allowed for that of his household.

The Mission Festival

The German Lutheran Mission festival was a grand success. More than 150 people were in attendance, coming from all parts of the parish, from Thief River Falls, Warren and Holt. Rev. Martin Hauser of Warren preached two inspiring sermons, arousing new interest and enthusiasm for mission work. Rev. E. H. Kreidt of Thief River Falls spoke in the afternoon on the topic "The Institutions of Learning Supported by Our Synod". Showing their development in the last 75 years and thier present needs. The choir of the St. Johns Lutheran church of Thief River Falls sung both forenoon and afternoon, and their music was highly appreciated. Collections for missions were taken and amountod to over $71.

Dinner was served by the ladies in the basement. On account of the fact the Norwegian Lutherans were using their church for the surprise for Rev. G. A. Hanson the mission festival services were held in the school house.

Farmers Livestock Agency Cuts Rate

Livestock commission rates 20 to 35 percent lower than the prevailing charges have been adopted by the new co-operative marketing agency organized on the South St. Paul market by Minnesota farmers.

The company was to open for business August 8.

The board of directors, made up of farmers elected at a state-wide conference in St. Paul, decided last week to charge the commission rates set by the state railroad and warehouse commission. Other dealers previously had prevented enforcement of the new rates by appealing to the courts.

"The farmers' selling agency voluntarily accepts the rates fixed by the commission", W. A. McKerrow, manager of the co-operative association, said. "We believe these rates are reasonable, and that the farmer should not be forced to pay more than is absolutely necessary to cover the cost of marketing his livestock efficiently. If the local co-operative shipping associations of the northwest support their central agency, the cost of doing busniess can be reduced 50 percent within two years."

LIGHTNING

We have never reported in these columns that Charles Thompson's house was struck by lightning on the morning of Friday, July 22, during the heavy storm. The bolt struck the roof on each side of the chimney. Several rafters and a number of shingles were torn out. Four persons were sleeping up stairs, including Mr. Thompson's mother, who was slightly deafened by the shock, but is recovering. Aside from that, no one was injured.

Union Young Lady Secures Fine Position

Miss Helga Koppang, after finishing a combined course at the Union Commercial College, was placed in an extra fine place with the Great Northern Life Insurance Co. of this city. Miss Butler was also placed with the same company. Both these young women have found that a business training enables one to earn big money. Victor Heen goes to a nice position with Gr. Forks Mercantile Co. and Henry Haugen with the Nothern Electric Co. Plenty of chances for young men and women with this training. Send for free catalog and find out how little it costs.

Commercial College
Grand Forks, North Dakota

The Fair

The fair received a big attendance from this part of the country. In fact nearly everybody in town went and a large part of the farming population. The many exhibits from this section were fine and many prizes were received. The list of winners has not yet been announced so we cannot give them this week.

At 46 it is useless for me to expect girls to look at me with any great interest. I feel young, but the girls do not know it.—Louisville Courier-

Chickens Spoil the Garden.

"Why isn't your son making a garden this year?"

"On account of the chickens next door."

"Heh?"

"He doesn't like for those girls to see him in overalls."—Louisville Courier-Journal.

IMPORTANT NEED FOR MORE TREES

Three-Fifths of Primeval Forests Have Been Cut Away, Says Forester Greeley.

SUPPLY OF WOOD NECESSARY

Despite Fact That Many Substitutes Have Been Devised Demand for Timber Continues to Grow—Much Land Is Idle.

(Prepared by the United States Department of Agriculture.)

Timber depletion has now reached a point in this country where three-fifths of the primeval forests are gone and where 61 per cent of the timber that is left is west of the Great Plains, Col. W. B. Greeley, chief forester, forest service of the Department of Agriculture of the United States, recently told the members of the Chicago Association of Commerce.

Liberal use of American forests was a necessary part of the commercial growth of this nation, Colonel Greeley believes, but reforestation should have been practiced, if not from the start, at least in late years. There is an abundant area of forest land in this country to support all industries, and a liberal supply of wood is most necessary to the people of this country. It was thought that, like the European countries, we would use, when our civilization was older, but one-third or one-half as much wood per capita as we did in the early days. But this rule does not affect the American people. The older the states and communities in this country grow the more timber they seem to require in one form or another.

Demand Continues to Grow.

Many substitutes have been devised for wood, and yet the great demand of the country for timber continues to grow. More wood is used in construction today than before the discovery of concrete, and more wood is used in building railway cars than before the steel or part-steel car was developed. This is apparently true in nearly every industry.

Abundant and widely distributed forests have meant to the United States homes for the masses of the people beyond the standards of any other nation. They have placed newspapers and magazines on the average family table. They have contributed largely to social and industrial conditions which promote democracy and constructive energy rather than discontent and destructive social forces bred by hard and comfortless conditions of life.

The idleness of 81,000,000 acres of forest land, an area increased by 8,000,000 to 10,000,000 acres annually, destructive logging, and still more destructive forest fires are the factors at work to increase the timber shortage.

Land Enough if Kept Growing Trees.

The exhaustion of American timber has not come about because the forests have been used so freely but because of the failure to use forest growing land. In a nutshell, the problem is that the United States is cutting wood out of its forests three or four times as fast as it is being grown. Much of the land on which timber stands or has been cut off will always be forest land. It is ample to grow all the wood needed for the use of the people of this country and for export trade in lumber and products manufactured from lumber, if the land can be kept at work growing trees. Timber for the future is simply a matter of putting idle land to work.

Hill Land Orchard Near Lynchburg, Va.

Every reasonable encouragement should be given to the landowner to grow timber on his own account in the ways best suited to his own purposes, but by some means or other the public must see to it that forest lands not needed for agriculture do not lie idle. The regulations imposed must be reasonable and equitable. Obviously the owner of the land cannot do it all. The public must aid him in overcoming the hazard of forest fires and must recognize that the present methods of taxing forests in many regions are equivalent to taxing a farm crop twice a week during the growing season.

COWPEAS CHOICE FEED FOR STOCK

Crop Is of Great Importance for Soiling, Hay, Silage and Pasturage.

USEFUL TO INCREASE HUMUS

Farmers' Bulletin Points Out Different Methods of Growing and Harvesting It for Each of Its Various Uses.

(Prepared by the United States Department of Agriculture.)

Few crops can be utilized in as great a variety of ways as cowpeas. For centuries they have been grown for human food in Asia, Africa and in the Mediterranean region of Europe. In this country, particularly in the southern states, the crop is commonly used for this purpose, but its most important use by far is in the feeding of live stock, being utilized for soiling, hay, silage and pasture. It is also of great value as a green-manure crop to increase the humus and nitrogen content of the soil upon which it is grown. These are points brought out in Farmers' Bulletin 1153, "Cowpeas: Utilization," recently published by the United States Department of Agriculture, which discusses not only the utilization of the crop, but the methods of growing and harvesting it for each of its various uses.

Have High Food Value.

Cowpeas are not grown for seed more generally because of the uncertainty of the crop, the expense of harvesting and the comparatively low yield obtained. In localities well suited to production it will be found highly profitable to grow cowpea seed on a large scale, especially if the best machinery for handling the crop is used. The seed has a high feeding value, but is rarely cheap enough to be used as feed. It can be stored for a considerable length of time without much danger of loss of vitality. As it is subject to attacks from insects, especially the cowpea weevil, the seed produced in southern states should be placed in cold storage, the bulletin recommends.

Cowpea hay is an excellent forage for all kinds of stock. Even the straw obtained from threshing the peas for seed is a valuable stock feed. As a rule cowpeas should not be cut for hay before the pods begin to turn yellow. The best quality is produced and the hay cures most readily if the vines are cut when most of the pods are full grown and a considerable part of them matured. If cut before this stage the vines are watery and difficult to cure, while if left too late before cutting there will be an unnecessary loss of leaves in handling and the stems will be tough and woody. The hay is somewhat difficult to cure, but with attention to the stage of growth and to weather conditions little more trouble will be experienced in obtaining well-cured cowpea hay than clover or alfalfa hay.

Cowpeas Grown With Sorghum Makes Good Stock Feed.

The bulletin recommends that cowpea hay be substituted in the southern states for much of the hay now being purchased from the North and West.

Cowpeas alone have not given good results as a silage crop. In addition to the high protein content, the green vines contain a large proportion of water, producing a watery silage that keeps poorly and is not well relished by stock. The best silage is obtained when this crop is grown with corn or sorghum.

Serve Best for Hogs.

Although pasturing cowpeas is not thought the best farm practice, under certain conditions it is advisable and quite profitable. Any kind of live stock may be pastured on cowpeas, but hogs are generally used. The best time for turning the stock on cowpeas is when the crop has reached the stage of maturity thought best for hay.

As a soiling crop, the cowpea can be used advantageously to supplement crops with less protein, such as corn, sorghum and millet. It is used more as a soil-builder than any other legume, because it is so easily grown, has such a marked effect upon succeeding crops, and thrives under a great diversity of conditions.

KEROSENE WILL HOLD INSECTS IN CONTROL

Mites and Lice Seriously Affect Health of Fowls.

Specialists of Department of Agriculture Recommend Thorough Applications of Some Preparation to Interior of House.

(Prepared by the United States Department of Agriculture.)

Mites, as well as lice, are troublesome and harmful to poultry. They do not live upon the birds like lice, but during the day hide in the cracks and crevices of the roosts and walls of the house and at night they come out and get upon the fowls. Mites suck the blood, and if allowed to become plentiful, as they certainly will if not destroyed, will affect seriously the health of fowls, and consequently their ability to lay eggs. Specialists in the United States Department of Agriculture recommend thorough applications of carbolineum, kerosene, or some of the coal-tar preparations sold for this purpose, or crude petroleum, to the interior of the poultry house.

"Delousing" His Brood Coop With Kerosene.

Commercial coal-tar products are more expensive, but retain their killing power longer, and the cost of treatment may be lessened by reducing with an equal part of kerosene. Crude petroleum will spray better if thinned with one part of kerosene to four parts of crude oil. Both the crude petroleum and the coal-tar products often contain foreign particles, so should be strained before attempting to spray. One must be sure that the spray reaches all the cracks and crevices, giving special attention to the roosts, dropping boards, and nests, and the treatment should be repeated two or three times at intervals of a week or ten days.

PLANT LEGUMES IN ORCHARD

Good Practice That Crops Be Kept Growing Between Trees in Summer and Early Fall.

Good orcharding practice requires, in many instances, that crops be kept growing between the trees during late summer or early fall. For one thing the soil will need humus and protection from the burning rays of the sun. It is a good practice to plant cowpeas, soy beans, or other crops that thrive in late summer and early autumn to protect the soil and to add fertility to it for the next season.

Most of the legumes are well adapted for summer crops in orchards. Cowpeas are in many instances better than other summer legumes for this purpose.

Usually, planting peas or soy beans in rows between the trees and giving them a cultivation or two is better than broad-cast sowing. However, some prefer to sow broadcast.

KEEP GARDEN FREE OF TRASH

Cornstalks, Tomato Vines, Potato Tops, Etc., Should Be Gathered Up and Burned.

Neatness, cleanliness, and order in the garden help in the fight against insects and diseases, specialists in the United States Department of Agriculture emphasize. As a general rule, the residue of the garden such as cornstalks, tomato vines, potato tops, etc., should be burned. Do this promptly, so that insects and disease spores may not be harbored by the rubbish. Just as soon as any crop is gathered, remove the trash, spade up the ground, and plant something else. Keep the garden free from weeds at all times, and this can best be done by frequent cultivation which destroys the weed seeds as soon as they sprout

WINDBREAKS ARE BIG ASSET

Soil Is Prevented From Drying Out Quickly and Protection Given Grain and Trees.

Windbreaks are in many ways a farm asset. They tend to prevent the soil from drying out quickly and they protect grain and orchards from injury by the wind. A belt of trees near the farm buildings protects them from extreme cold and from summer's heat. Trees make the farm a pleasanter place in which to live. The windbreak may be also a source of wood supply for fuel or for sale.

EVERY DAY MONDAY IN KOREA

Laundry Work Is Ceaseless in Eastern Land, Since Invariable White Must Be Spotless.

Every day is Monday in Korea. From early morning the thump-thump-thump of the washing paddle sounds on the bank of stream and canal. Until late at night the rat-a-tat-tat of the ironing sticks tells of the washerwomen, whose work is never done.

The crowded hut may be dirty and malodorous, but the gentleman of the household must appear immaculate in loose white trousers and jacket and sheer long overcoat of white, and his wife must have her spotless jacket, full pantaloons and voluminous transparent skirt. For white is the "descent black" of Korea. Originally the color of mourning, it became, like black in the East, the badge of respectability and sobriety. Though it is losing its vogue in the ports and larger towns, it is still, in the interior, the ordinary garb, winter and summer, of a large part of the population.

All save the poorest, however, keep bright-hued feast day silks laid away in the family chest, and the children and young girls are always as brilliant as butterflies.

There is the interminable washing and ironing. Then there is the sewing—and the household sewing in Korea is no small task; for all the garments worn by the family are taken apart before each washing and sewed together again after they are beaten smooth with the ironing sticks. —Asia Magazine.

Early History of the Hat.

The use of beaver in making hats commenced about 1200, for Chaucer mentions it. Flanders turned out the first. Hatters' guilds began to appear in England, and apprentices were taught the art of making felt hats and decorating them. Nine cents a day was then a hatter's wages. In the Sixteenth century the first hat stores began to do business, and hats, therefore as widely decorated as poetic fancy, began to be standardized. In other words—style began to rule. By 1600 styles were very much in evidence, but were very changeable. Shakespeare's plays speak of various types of hats then worn.

Irony of Fate.

After a Philadelphia connoisseur returned from England, where he paid $6,000 for a manuscript of Shelley, the love[illegible] of that poet hunted up some hist[illegible], and they assert [illegible]

GROW MORE FOOD FOR FAMILY USE

Necessary to Save Shipping Costs on Water in Face of Lessened Returns.

BEST TO GROW NECESSITIES

Specialized Farming Has Created Peculiar Conditions — Poultry Is Quickest Meat Supply to Produce on Farm.

(Prepared by the United States Department of Agriculture.)

"The American farmer is not going to be able this year to pay freight on water," said a department official. "Water makes up a large part of fresh fruits and vegetables. The answer is that he must grow his own table food. He must also study the possibilities of substitution. This applies to vegetables, fruits, poultry, eggs and dairy products which must be transferred from commercial channels to home consumption if they are to come within the reach of the average farmer's family.

Peculiar Condition Created.

"Specialized farming has created conditions of which comparatively few persons are aware. The grain farmer in many instances buys even his potatoes and green vegetables; the fruit farmer buys his dairy products; and even the man who raises milk for creamery, condensary or cheese factory is likely to send his cream or milk away, feed the skim milk or whey to the calves, and not make his own butter. This year, just as far as possible for him to alter his system in a single season, the department officials advise that he get back to the old plan which was aptly described as 'living at home.' This means not so much remaining on the farm as it does deriving every practicable product for consumption from the farm.

"The average American farmer knows how to raise other crops than those on which he specializes, but it has seemed good business, or at least expedient, to devote his energies to very few or even a single cash crop and buy his necessities, just as is done in other specialized industries. The grain farmer is perfectly capable of raising his own potatoes, his green garden stuff, and melons, tomatoes and other garden fruits, to take the place of orchard fruits which in many parts of the country have been killed by the late freezes. If the farmer has a piece of really good garden ground he can add materially to the variety and wholesomeness of the farm food supply with scarcely any expenditure except for seeds, and seeds, fortunately, are lower this spring than for several years.

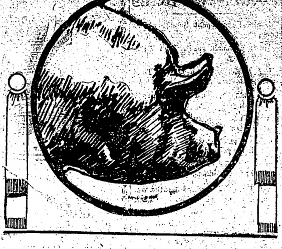
Poultry Most Important Meat Supply.

"The same may be said of poultry. With the increased freight rates this year, the general farmer's principal meat supply will come out of his poultry yard, either in eggs or in table chickens and other fowls. Poultry is the quickest meat supply to produce, and the farmer will do well to build up a small flock as rapidly as possible. The increased freight rates on butter and eggs, together with the farm money shortage due to the disappointing returns from last year's crops, will make it advisable for many farmers' wives to return to the butter-making arts which they learned as girls from their mothers and which have been largely discontinued as farmers became specialists.

The Garden Is a Good Source of Home-Grown Food.

"Fruit is likely to be scarce in large and important farming regions, but its place can largely be taken by vegetable products. Two things are clear. In the first place, the average farmer, as it stands now, cannot afford to pay freight on the water which makes up the larger part of both fresh and canned vegetables and fruits. In the second place, under existing conditions he can raise those things cheaper himself than he can buy them, and he can make many substitutes out of the garden and poultry yard if he sets out to do it. He has the material for the crops, while he is short of money. It is not good business to run in debt except for essentials of production."

The Department of Agriculture will be glad to give information and advice to those who wish to diversify their home-grown food supply.



The biggest livestock show ever held in these parts will be put on at the big

MINNESOTA STATE FAIR

September 3 to 10

PALATABILITY OF VARIOUS PLANTS

Some Interesting Information Revealed in Series of Feeding Tests at Beltsville.

SILO FERMENTATION STUDIED

Wild and Tame Sunflowers Devoured Readily When Removed From Silo—Cabbages Were Untouched by Cattle When Siloed.

(Prepared by the United States Department of Agriculture.)

A series of experimental feeding tests conducted by the United States Department of Agriculture at its Beltsville (Md.) live stock farm, revealed some interesting information as to the effect of siloing upon the palatability of various plants found on a farm or range.

During the last summer and fall about 150 different plants and combinations of plants were packed in barrels in a silo. The purpose was to study the effect of the silo fermentation upon the fiber, and other features of the plants. It was thought possible that silage would overcome objectionable qualities of certain plants, in addition to breaking down the fiber of some which were too woody for stock feed.

Test Palatability.

The various lots of silages were taken to Beltsville to test their palatability as cattle feed. The tests were not protracted enough to give final conclusions, but a number of interesting results were obtained. Both wild and tame sunflowers were eaten readily when they came out of the silo, although the peculiar flavor and woody stalk of the former make it distasteful in its natural state. Russian thistle was eaten in the course of about 12 hours, and the same was true of ragweed, which cattle seldom touch in the field. Canada thistles, and castor bean plants without seed were eaten quite readily. Jack bean vines and pods were eaten rather reluctantly. The cows ate siloed Australian salt bush, but not the native plant. Siloed onion tops were fed to four cows; two ate them and two refused them. Buckwheat also provided a choice morsel. Cabbages, which in their natural state are eaten avidly by cattle, were absolutely untouched when siloed, the product being in many respects similar to sauer kraut but without the salt. Giant rye grass went untouched.

Cattle Fed Regular Rations.

The cattle were not compelled to eat any of the siloed products to satisfy hunger, as hay was fed them between siloed rations and they had the regular portions of grain. The tests were not entirely conclusive, especially as the quantity [illegible] small that the animals did not have an opportunity to get accustomed to unfamiliar flavors.

A Silo Filling Crew at Labor Gathering Corn—Sled Type of Cutter Is in Use and Corn Is Carried Directly to Wagon.

The department may make more extensive tests another season on some of the materials, as there was no opportunity with barrel lots to gain any knowledge as to the beef and milk producing value of the feeds.

BEETLES ARE MOST HARMFUL

Covering of Cheesecloth Will Afford Necessary Protection for Vines and Plants.

The striped cucumber beetle and the 12-spotted cucumber beetle attack cucumber, squash, and melon vines through the East. The best protection is to cover young plants with cheesecloth-covered frames, which may be made on barrel-hoop arches. When the insects actually get access to the leaves, a solution of arsenate of lead and bordeaux mixture is effective.

SELECT SEED CORN IN FALL

Autumn Is Favored by Many of Best Seed Men of Country—Supply of Seed Assured.

Many of the best seed men of the country have come to the conclusion that fall selection of seed corn is best from every standpoint. One thing is certain, if it is selected in the fall, the farmer is certain of having seed corn.

G. A. HANSON, Pastor.

Card of Thanks

We hereby wish to express our thanks to all those who contributed in any way toward the "surprise" on us Aug. 7.

REV. G. A. HANSON
AND FAMILY.

Prof. Norby is in Fosston this week.

H. A. Halvorson was on the sick list yesterday.

Reuben Gunderson is recovering from his illness.

N. Bundhund went to Germantown this morning to attend to his threshing.

Nick Bundhund and Joe Christianson hauled the fair exhibits home Saturday.

Mike Tunick returned Thursday from the cities, where he went with a car of stock.

Mrs. Christina Vake and daughter returned Thursday from Traill, where she has besn visiting relatives.

H. A. Halvorson has resigned the office of marshal. Consequently the curfew bell does not ring now-a-bays.

Mrs. George Johnsen entertained Sunday her parents, Mr. and Mrs. Wendt, and a brother and sister, all of Holt.

Misses Vera Larson and Ruth McDonald "hiked" ont to the Caspar Iverson home yesterday for a visit to the young people there.

Mr. and Mrs. M. G. Thoreson and family went to Thief River Falls last evening to visit Mr. and Mrs. Bennes and the young daughter.

Bert Cirkconnell of Spooner was a visitor at the McLeod home Friday and Saturday, and went to Nevis, where he has a farm, accompanied by Stuart McLeod.

Mr. and and Mrs. Olson of Seattle, Wash. visited Mrs. Martin Olson the trist of the week, Mr. Olson is a brother of Mrs. Martin Olson and they have not met for thirty years.

While young Morris Reason was raking hay yesterday his team ran away and over a buggy with serious results to the rake, buggy and harness. Fortunately the boy was not hurt.

The Farmers State bank has just heard from K, Prncha, who went to Canada last fall. He says the crops are all burned out at Laporte, Can. where he moved, and he wants badly to get a location here again.

Surprised Rev. Hanson

A very pleasant farewell reception in the nature of a suprise was tendered Rev. G. A. Hanson last Sunday by members of his four congregations, Goodridge, Erie, Torgerson and Bethania. Each conregation being well represented.

Rev. E. A. Mostue of Thief River Falls was present and gave a fitting address. A nice sum of money was presented to Mr. Hanson and family in token of the esteem of his congregation.

Dinner was served in the church.

What The Letters Mean

Many people are not familiar with the meaning of the letters "A", "B", "D", "T", "X" and "Z" over the figures "21" on the new license tags and for the benefit of those who do not know we publish the following, which explains the meaning of the various letters in detail: Cars having a license tag with the "A" come under the minimum tax of $12 per year. The great majority of them are Fords. The letter "B" on a license tag indicates that the owner has paid a tax of more than $12. "D" designates a dealers' license; "T" designates a truck on which less than the minimum tax is paid; "X" is is nsed to specify trucks paying more than the minimum tax, and "Z" is found on every license tag for a trailer or semi-trailer.—Ex.

Fine Detective Work

As a result of a little fine detective work on the part of Village Marshal Hope last Sunday, five quarts of "moonshine" was taken from the dispenser. about a mile north of town. Marshal Hope learned that $2 had been paid for a quart to be deliverered at a certain place in the brush. Hope hid near by and when the salesman and purchaser met to deliver the goods, Hope stepped in and captured the goods. The salesman took to the brush, but not until he was plainly identified. The purchaser plead for his quart but Hope kept it all. The salesman is well known and will be watched, as well as a few others.—Eagle.

Many To Attend Agricultural school

Plans for the new school year at the Northwest School of Agriculture, Crookston, are rapidly being completed according to Registrar A. H. Larson of that institution. Announcements are being sent to the former students regarding members of the teaching staff who will take up their duties there when the school opens October 10. Mr. Henry P. Constans, garaduate of Carleton College, is the name of the new athletic director and debate coach. He will also coach the basket ball teams. Mr. A. K. Pierce, a graduate of the Wisconsin University is the business training instructor and Miss Mildred Schenck will be preceptress and have charge of the domestic science work in place of Miss Ward, who is to be married this month.

Red Lake county proposes to be the banner county of the Valley in the number of students if the plans of L. M. Bond, county agent, are carried out. A reunion of alumni and former students is planned to be held September 15. Red Lake county already has over 50 who have attended the school. The aim set is to have 50 more the coming year. In other counties a similar meeting is being planned.

A Bad Place

The junction between the state highway from Thief River Falls and the road south from Goodridge should be fixed up As it stands it is a trap. There is a crossing, with roads leading in four directions, and practically no cut-offs. It will be a wonder if somebody does not meet death there.

Last Sunday a party from Thief River Falls on their way to visit Mrs. J. P. Ferdinandsen failed to make the turn quickly enough and jumped into the ditch on the east side of the grade. Not much damage was done except to one front wheel, which was smashed. Two men, two women and children were in the car but no one was injured except receiving a good shaking up and some minor scratches. That there were not serious casualties was but a matter of good luck.

Some improvement should be made there at once.

Sudden Death

Harold Koepp, only son of Mr. and Mrs. William Koepp, living three miles east and three miles south of Middle River, was killed Saturday afternoon when struck on the head by a crowbar he was using in an attempt to move a granary.

The accident happened on the Koepp farm and was caused by the running machinery of a threshing rig. Koepp took a five foot crowbar and was stooping down to get under one corner of the granary so that it could be moved around and the grain from the thresher run directly into the building. In stooping over to put the bar under the corner of the building, he accidentally got it too close to a belt on the thresher, which caught the bar and brought it up against the side of his head with such force that he was knocked unconscious and died in a few hours.

State Creameries Lose

Attorney General Daugherty has reversed the ruling of his predecessor, A. Mitchell Palmer, in the sour cream case and dumped Minnesota creamery exports overboard, giving victory to the centralizers.

Palmer ruled that butter made from sour cream in which lime water or other neutralizer was used was adulterated butter within the old law. Daugherty reverses this but says that of course unscrupulous manufacturers will not be permitted to produce butter from filthy, decomposed or putrid substances or add poisonous or deleterious substances.

Shut Off Railroad Hold-Up

The railroads filed claims against the government based upon their contention that during government operation of the roads labor was permitted to slack on the job and was much less efficient than during private operation.

The "cost of labor" phrase in the contract between the government and the roads was the peg upon which the roads hung their claims.

The proposition was absurd on its face, because even though there were anything in the "slacking" charge, there could be no way of computing the money loss.

The interstate commerce commission has just handed down a decision disallowing all of these absurd claims and preventing another railroad raid on the treasury.—Daily News.

Goodridge at The Fair

Goodridge Community Club won second prize on farm club exhibit, $10.

Rocksbury Club, farm club exhibit, first prize, $70.

Silverton Farmers Club, farm club exhibit, third prize, $25.

Grygla Farm Club, farm club exhibit, fourth prize, $15.

Thief River Falls school booth, first prize, $50.

Goodridge school booth, second prize, $35.

Rural School, school booth; third prize, $50.

The Goodridge school won many prizes on Booklets, Drawing, Garden, Canning, Sewing, too numerous to mention.

Must Display Weed Law

"All threshermen are required by the new weed law, Chapter 320, S. F., 422, Laws of 1921, to display a notice of the weed law as it applies to threshing machines, upon the separator. This notice should be tacked on all machines and failure to do so will subject them to the penalty provided by law.

POOLING FEATURE IS MOST FEASIBLE IDEA

Each Grower Receives Same Price for His Products.

Individual Members Amply Protected From Loss Because of Unfavorable Market Conditions of a Temporary Nature.

(Prepared by the United States Department of Agriculture.)

The pooling of products sold through co-operative organizations is an important feature of co-operative marketing, specialists of the United States Department of Agriculture have found. By pooling is meant averaging the returns received for products sold during a certain period, or for certain shipments, so that each grower having products of the same grade receives the same price. The success of a pooling system depends upon the observance of uniform grading and packing of the products.

This method of operation, it is said, protects the individual member from loss because of unfavorable market conditions of a temporary nature. Some farmers' marketing organizations, especially grain-elevator companies, purchase the members' products outright. Conditions and practices in grain marketing make such a plan feasible, but organizations handling other products usually find it to their advantage to pool shipments and await returns before making payments to the growers.

In this way the association is relieved of speculative risks, the avoidance of which is highly desirable. Co-operative creameries, which prorate to the members, monthly, in accordance with the amount of butter fat each has delivered the preceding month, the returns received for products sold less operating expenses, are good examples of pooling.

The length of the pooling period varies with the products handled and the local conditions. Thus there are car lot, daily, weekly, semimonthly, monthly, and seasonal pools.

Change In Game Law

A special act of the legislature passed last fall provides for an open season of 14 days on prairie chickens in Minnesota this year. This season will open Sept. 16 and will close on Sept. 30. The open season on ducks and geese also starts Sept. 16, but does not close until Dec. 31.

The limit per day of prairie chickens is nine birds and for the season 18. The law provides that dogs may be used in hunting the chickens.

THE STATE FAIR

The most stupendous entertainment and educational program ever put on by any state fair in America is staged for the Minnesota State Fair September 3 to 10.

The amusement bill is a thriller. It opens on Saturday, September 3, with all the regular featnres of the week, plus a big railroad locomotive collision directly in front of the grandstand. A straight track is being laid inside of the mile track. The engines, with throttles thrown wide open, will be turned loose, one at each end of the track, and will rush head-on to destruction in the center of the track at a terriffic speed.

Each afternoon, directly in front of the grandstand, Lieut. Louis James will pass from a speeding racing automobile to a low-flying aeroplane—the most daring stunt ever attempted. A rope ladder hanging from the bottom of the plane will be grasped by Lieut. Jones as the airship goes over. Lieut. Jones will then climb up to the aeroplane. Ruth Law will loop the loop daily standing on top of an aeroplane.

Each evening the big fireworks spectacle, "Montezuma, or the Fall of the Aztecs," will be presented. With it will be a big open air program of circus acts, signed up from all parts of the world. Auto polo, a dozen big bands and orchestras, and a score of other features will supplement the afternoon and evening programs. Auto racing will be put on Wednesday and Saturday, Sept. 7 and 10. Horse racing will be scheduled the other days. The fair gates will be closed to the public Sunday.

The biggest livestock show in the history of the fair is assured. Every foot of space on Machinery Hill has been sold for two weeks. The eighty acres of space will be covered completely with every known kind of machinery. Several European government art exhibits will be displayed at the $500.000 art exhibition. Horseshoe pitching champions from all the states will compete for the national championship in the big tournament.

All children will be admitted free on Labor day.

Third Class Postmaster Examination

At the request of the Postmaster General, the United States Civil Service commission anjonnces an open competitive examination to be held on September 10, 1921, to fill the position of postmaster ot Goodridge and many other places at which a vacancy exists. It is expected that appointments will be made as result of this examination unless it is found in the interest of the service to fill any vacancy by reinstatement. transfer, or promotion. This is not an examination under the civil service act and rules, but is held under an executive order of May 10, 1921, providing for such procedure.

Examinations will be held on the above date throughout the United States of postoffices at which there are vacancies. There are twenty-nine listed for such examination in Minnesota. The examination for Goodridge postoffice may be taken at Thief River Falls on the date above named, but a competitor for this office may be examined at any one of the places named in the notice.

Applicants must submit to the examiner on the day of examination their photograPhs, taken within two years, securely pasted in the space provided on the admission cards sent them after their applications are filed.

Application forms, containing full information as to the requirements to be met and the character of the examination to be given, may be obtained from any one of the vacancy offices listed, or from the United States Civil Service Commission, Washington, D. C. Applications must be properly executed, showing the examination point at which the applicant desires to be examined, and must be filed with the Commission at Washington in time to arrange for the examination at the examination point chosen.

LACK OF PACKAGE UNIFORMITY MEANS MONEY LOSS FOR BUYER

They Look the Same Size, but They Are Not.

(Prepared by the United States Department of Agriculture.)

Standard containers for marketing fruits and vegetables are of more interest to the average citizen than he generally realizes. Not only is he defrauded frequently by the substitution of short-measure packages at the full-measure price, which is inevitable if the difference in the size of the packages is not easily detected, but also the cost of marketing is increased by the greater expense of manufacturing a large number of unnecessary styles and sizes and by breakage in transit, sometimes directly attributable to the difficulty of loading odd-sized containers. These losses constitute an unnecessary tax on the fruit and vegetable industry that the bureau of markets, United States Department of Agriculture, is endeavoring to cut down by fostering the use of standard containers.

Old-Time Units Cause Confusion.

Local package units that came into use long ago are most largely responsible for present difficulties. Such packages may have been satisfactory when their use was confined to a limited territory, but of late years rapid transportation and the use of special refrigerator and ventilator cars have brought the products of every section of this country into our great marketing centers, where the diversity of styles and sizes of containers have resulted in unnecessary confusion.

There are in common use today about 40 sizes of cabbage crates, 20 styles of celery crates, 30 lettuce crates or boxes, 50 styles and sizes of hampers, 15 styles and sizes of round stave baskets, and market baskets, varying in size from 1 to 24 quarts, whereas relatively few standard sizes would satisfy all the demands of the trade.

The unfair competition of short-measure containers has been another unsatisfactory factor. Certain shrewd packers have found that by slight modifications in the shape of packages the cubical contents can be reduced substantially without noticeably affecting the appearance.

Short-Measure Package.

Commodities sold in these containers can be offered at a lower price per package than those sold in standard packages, but the price by unit of weight is, of course, higher. Often this has caused the general adoption of the short-measure package, and there is no end to this procedure, for once the short measure is recognized as the standard a still shorter one is put out by an unscrupulous minority.

The six-quart market basket, the 14-quart peach basket, the seven-eighths-bushel bean hamper, and the five-peck lettuce hamper are easily confused with peck, half-bushel, bushel and 1½-bushel baskets.

Another factor which has caused the addition of many unnecessary packages is the lack of a unit which is accepted as the basis for all package standards. If a manufacturer wishes to introduce a crate into a producing section normally using the barrel instead of using the bushel unit, the tendency is to offer a barrel crate or half-barrel crate. At the present time the crates and boxes are being manufactured in sizes based on the United States standard barrel (105 quarts) with its subdivisions, the United States cranberry barrel (86 45-64 quarts) with its subdivisions, the weight bushel, the heaped bushel, and the volume bushel. These different standards are used because of competing packages.

Series of Crates.

The result may be seen by a glance at the following table:

Three Series of Crates Which Cannot Be Readily Distinguished From Each Other.

Crates based on U. S. apple barrel:		
1-barrel crate	quarts	105
½-barrel crate	do	52½
1-3 barrel crate	do	35
Crates based on U. S. cranberry barrel:		
1-barrel crate	quarts	86 45-64
½-barrel crate	do	43 11-32
1-3 barrel crate	do	28 29-32
Crates based on standard bushel:		
3 bushel crate	quarts	96
1½-bushel crate	do	48
1-bushel crate	do	32

A standard unit of measure should be permanent, definite, and of fixed and uniform value. The heaped bushel, which is in common use, is far from being fixed, and in many instances the heap has practically disappeared, say specialists of the bureau of markets. A proper heap has never been defined by congress, and in those states where an attempt has been made to describe the manner in which the measure should be heaped the phraseology generally is vague and indefinite. The heap has been referred to as a cone, the base being the top of the measure, and the height depending upon the nature of the article when piled "as high as may be without special effort or design." Such vegetables as sweet potatoes under this definition might be piled so high that the heap would be as large as the measure itself.

In view of the difficulties which are necessarily encountered in attempting to secure a uniform method of filling or packing standard containers, it is generally recognized that weight is the only really definite basis of sale, and for that reason the pound or hundredweight should be used where this is practicable. An exception may be noted in regard to products which are carefully graded as to size, in which case the sales may be made satisfactorily by numerical count.

WAY TO PREVENT MILDEWING

Keep Leather in Well-Ventilated, Dry, Well-Lighted Place, Exposed to Sunlight.

Any leather article is almost certain to mildew if kept in a warm, damp, and dark place, such as a closet, cellar, or stable. This mildewing probably will not reduce seriously the serviceability of the article, unless it is allowed to remain on the leather too long. It may, however, change the color appreciably, thus injuring the appearance. The simplest way to prevent mildewing, say specialists of the United States Department of Agriculture, is to keep the leather in a well-ventilated, dry, well-lighted place, preferably one exposed to the sunlight. Mildew can not make much headway in the sunshine. When mildew develops, it should be washed off with soap and warm water, or simply wiped off with a moist cloth, drying the leather well afterwards. These simple measures are preferable to the application in the home of preparations designed to prevent the growth of mildew.

POISON BAIT FOR CUTWORMS

White Arsenic, Arsenate of Lead or Paris Green Mixed With Bran Is Effective.

Cutworms appear in early spring and cut off the stems of young plants at the surface of the ground. They are quickly destructive. The best remedy is poisoned bait. For a small garden mix two level tablespoons of white arsenic, arsenate of lead or Paris green into five pounds of dry bran. Add from four to six quarts of water, in which half a pint of sorghum or cheap molasses has been mixed. After the mash has stood several hours scatter it thinly over the garden or a small quantity at the base of the plants. Put the poison on late in the day, so it will be moist during the night when the cutworms feed.

POTATOES ASSUMING THEIR FORMER RANK

Have Receded From Temporary State as Delicacy.

Crop of 1920 Was Largest in History of Country, Amounting to 430,458,000 Bushels—Steady Drop Is Noted in Prices.

(Prepared by the United States Department of Agriculture.)

With the continuing drop in price, potatoes have receded from their temporary status of delicacy, and are assuming their old rank as a great American staple food. This is to be assumed from figures lately compiled by the bureau of crop estimates, United States Department of Agriculture, which shows that between harvest time and January 1, this year, 285,172,000 bushels of tubers were moved off from the farms on their way to the table. This is 56,799,000 bushels more than left the farms in the corresponding period a year ago, or a half bushel additional for every man, woman and child in the United States.

Good Potatoes of Uniform Size.

The potato crop of 1920 was the largest in the history of the country, amounting to 430,458,000 bushels, and of these only 145,286,000 bushels were estimated as remaining in the hands of growers and dealers January 1. In 1919 the crop was 255,773,000 bushels, and the amount in the hands of growers and dealers January 1, 1920, was estimated at 127,400,000 bushels.

When the potato crop has been large, under normal conditions, the stocks of January 1 usually have been large, and in years of usual production, before 1918, the stocks of January 1 commonly were about one-half of the crop in the total of the principal northern potato-producing states. In the case of the 1920 crop, on the contrary, the stocks on the farm January 1 amounted to only one-third of the crop, and were smaller than the average of the three preceding years, when the production was much less.

Statisticians of the department believe the greater consumption of potatoes has been encouraged by the drop in prices. For the entire country the average price received by growers was $3.09 a bushel August 1; $1.85, September 1; $1.35, October 1; $1.18, November 1; $1.15 December 1, and $1.06 January 1.

If a moisture tray or sponge has been added to a non-moisture machine, it should generally be taken out before the chicks pip.

The question of moisture depends largely on the place where the incubator is located. If run in a room in a dwelling house, it is frequently necessary to add moisture even to non-moisture machines, while such machines run in an ordinary cellar in the same building might not need extra moisture. When a large number of machines is operated in one room, extra moisture is more necessary than if only a few are kept together. More moisture must be supplied in a very dry than in a humid climate.

Correct Conditions.

Water on the glass door of the incubator during hatching time is the best indication of correct moisture conditions during incubation. A good way to learn the proper amount of evaporation during incubation is to set one or two hens when starting the incubator, and compare the size of the air cell in the eggs under these two conditions when testing on the seventh and fourteenth days. As the weather becomes warmer more moisture is generally used than earlier in the season. Many operators add moisture only during the latter part of the hatch, generally on the sixteenth, seventeenth and eighteenth days.
